That the Shoudu Iron and Steel Company scored such an outstanding success in less than 4 years, was primarily attributed to its consistent implementation of the policies adopted since the 3d Plenary Session of the 11th CPC Central Committee to reinvigorate the economy. The workers and staff correctly used the power given them by the state to make their own decisions. By creatively implementing the economic responsibility system, actively improving management and adopting advanced techniques for raising economic results, they are achieving better results, year after year. Energy consumption for producing one dun of steel has, on the average, dropped from 1,247 kilograms of standard coal in 1978 to 974 kilograms in the first three quarters of this year. It is expected that more than a million dun of coal will be saved this year. Shoudu Iron and Steel Company's profit percentage in relation to output value and capital funds ranked first during the first 10 months of this year compared with other enterprises in the same category, registering an increase of 65.6 percent and 95.6 percent respectively compared with the same period in 1978.

NATIONAL RURAL ENERGY MEETING IN CHENGDU ENDS

HK231512 Chengdu Sichuan Provincial Service in Mandarin 2300 GMT 22 Nov 82

[Text] The second national academic seminar on rural energy concluded in Chengdu on 22 November after 7 days in session. This meeting was held after the state leading departments and scientific research units concerned had organized large numbers of experts, professors, research and engineering and technical personnel to carry out a relatively long period of investigation and study. As China's rural population is large and there is a notable shortage of firewood, and in particular, as the population has increased, people's living standards have improved and production technology has progressed, rural energy needs have increased all the more, and there are extremely prominent contradictions between supply and demand for rural energy. All sectors attached very great importance to convening this meeting.

Lu Dingyi, member of the Standing Committee of the Central Advisory Commission and vice chairman of the CPPCC, specially wrote a letter of congratulation to the meeting. As commissioned by Comrade Tan Qilong, Sichuan Provincial CPC Committee Secretary Yang Chao greeted the meeting on behalf of the committee. In his opening speech at the meeting Yang Jike, vice governor of Anhui, deputy director of the China Energy Research Association and professor of the China Science and Technology University, reviewed the importance of solving China's rural energy problem. Bian Jiang, adviser to the Ministry of Agriculture, Animal Husbandry and Fisheries, and Lin Hanxiong, director of the China Energy Research Association and a responsible person of the State Economic Commission's Science and Technology Office, made speeches during the meeting.

The meeting held: Rural energy is a major affair related to the production and daily life of 800 million peasants, to the growth or decline of the rural economy and to the degree of agricultural modernization. Since rural energy construction is a comprehensive topic, being directly related to agricultural ecological balance, agricultural management, rural planning, peasants' daily life, closing the hillsides to facilitate afforestation, and environmental protection, it is essential that all sectors cooperate and coordinate their actions to solve the problem properly.

Over 150 experts, professors, researchers, engineers and technicians, and rural energy workers from all parts of the country exchanged academic information at the meeting. The fruits of their researches reflected the splendid progress in rural energy research work in recent years. During the meeting the participants visited the construction and utilization of small methane installations, hydroelectric stations and coalmines in Sichuan's Guangxian County. They also visited Chengdu research units concerned with methane, farm machinery, biology and so on.

A number of experts and professors also put forward very good suggestions on the exploitation and use of new energy sources in rural Sichuan. They held: Sichuan has a large population. Solving the rural energy problem is thus all the harder. However, there are many superior features for solving this problem. That is, the province is crisscrossed by large and small rivers and there are abundant water conservation resources. There are fine prospects for further developing small hydroelectric stations. Sichuan has popularized relatively early methane and biological energy and accumulated a certain degree of experience. So long as this experience is consolidated and enhanced and developments are carried out in light of local conditions, the results will be all the more outstanding. In addition, it is also possible to carry out planned research, exploitation and utilization of peat and solar energy on the northwestern Sichuan grasslands, solar energy, wind-power and water conservation resources in Liangshan, Ganzi and Aba Prefectures, and the abundant geothermal resources.

In conclusion, the meeting set up the rural energy special committee of the China Energy Research Association, and elected 36 committee members. Yang Jike was elected director.

NUCLEAR APPLICATIONS EXHIBIT OPENS IN CHENGDU

OW181242 Beijing XINHUA in English 1127 GMT 18 Nov 82

[Text] Chengdu, November 18 (XINHUA) -- China's first nuclear technology exhibition opened yesterday for 20 days at the Sichaun Province exhibition hall in Chengdu, provincial capital.

The exhibition, sponsored by both the Chinese and the Sichuan Nuclear Societies, bring together 87 nuclear research institutes and nuclear technology consumers throughout the nation. Lectures, films and technical data will all be presented.

The exhibition is designed to introduce visitors to basic knowledge of nuclear physics, radiation protection, nuclear energy and nuclear power plants.

Zhu Guangya, vice-president of the Chinese Nuclear Society, said the purpose of the exhibition is to provide education and promote cooperation among research institutes, production units and users.

The show chronicles the nation's 27-year progress in the atomic age, reflecting achievements in nuclear research, industry and higher education Displays describe application of isotope and radiation technology to agriculture, industry, medicine and food preservation, while also showing the study and designs of nuclear power plants, including fast-breeder neutron reactors, fusion technology and other equipment.

One of the exhibition's most prominent displays is a model of China's first high-flux atomic reactor and another model of the first 300,000-kilowatt power station. Sketches and maps of stations under design are also displayed.

Zhu Guangya said that after 27 years, China has developed complete facilities for both nuclear research and industry. The focus of the industry now is on the national economy and living standards, thus opening vast vistas for the peaceful application of nuclear technology.

PRC EXPECTS TO SET COAL OUTPUT RECORD FOR 1982

OW231406 Beijing XINHUA in English 1138 GMT 21 Nov 82

[Text] Beijing, November 21 (XINHUA) -- China's coal output this year is expected to be around 643 million tons, 18 million tons more than the planned figure or 7.5 million tons over that of the record year 1979, a top official in charge of the country's coal production said here today.

Speaking at a national conference on coal industry now in session here, Yu Hongen, Chinese vice-minister of coal industry, said that the expected figure would be 3.5 percent greater than the actual 1981 output.

In the January-October period this year, the vice-minister recalled, China cut more than 534 million tons of coal, which was about 85 percent of the annual plan. Among the January-October output, more than 291 million tons came from the country's major mines, which are directly under the Ministry of Coal Industry. These mines topped their their plans for the period by more than five million tons. Local mines which are run by governments of the provincial level cut more than 243 million tons, 14 million tons or more above the annual quota.

The country's leading coal producer -- Shanxi Province in north China, whose output accounts for one-sixth of the national total, Yu Hongen said, topped its plan for the January-October period by 2.43 million tons, more than 45 percent of the national increased total.

The Chinese vice-minister then listed the achievements in other aspects of coal production. The January-October output of dressed coal came to more than 42.67 million tons, outstripping the planned target by 3.04 million tons.

The January-October tunnelling footage reached 652,700 meters, over 70,000 meters above the planned target.

Mechanization in China's major mines has gone up to the present 40.7 percent from 39.8 percent last year. As a result, machine-cut output has gone up by 10 million tons.

Coal mining machinery producers completed their annual production plans by the end of October, two months ahead of time.

Yu Hongen said China has added 20,000 million tons to the nation's known coal reserves (640,000 million tons).

The Ministry of Coal Industry said early this week that 102 coal mining projects with a combined annual production capacity of 104.13 million tons are being opened across the country. Of these, 34 are mines each with an annual production capacity of 900,000 tons or more.

COAL PRODUCTION TECHNOLOGY, EQUIPMENT IMPORTED

OW231408 Beijing XINHUA in English 1244 GMT 21 Nov 82

[Text] Beijing, November 21 (XINHUA) -- China has imported technology and equipment worth one billion U.S. dollars for coal production, according to the national conference on coal industry now in session here.

China has also used 700 million U.S. dollars of foreign funds to boost coal production, conference materials said.

Mines being developed with foreign funds will have a combined production capacity of 21 million tons, and projects still under negotiation will have a total production capacity of 40 million tons.

In March, an agreement was signed for jointly conducting a feasibility study on the development of the Antaibao open-cut mine in the Pingshuo mining area, Shanxi Province, North China, between the China National Coal Development Corporation and the Island Creek Coal Company of the Occidental Petroleum Corporation of the United States.

An open-cut mine with an annual production capacity of 15 million tons only needs to employ 1,200 people and the average output of a miner will be 40 tons per day. Such a mine would take two years to dig and would reach capacity output in the third year of operation, the conference said.

The Chinese Ministry of Coal Industry also collected 700 million yuan RMB (about 350 million U.S. dollars) from some provinces, cities and counties to speed up coal production.

CONSTRUCTION CONTRACTS SIGNED WITH 43 COUNTRIES

OW231022 Beijing XINHUA in English 1138 GMT 19 Nov 82

[Text] Beijing, November 19 (XINHUA) -- China has signed 808 contracts with 43 countries and regions for contract construction and labor cooperation projects since entering this market in 1979, according to Wei Yuming, vice minister of foreign economic relations and trade.

He was speaking at the opening session this morning of a national meeting on the work of contracting construction and labor cooperation with foreign countries.

Vice-minister Wei said there are at present 23 corporations in China under central and local governments which undertake projects in foreign countries. These include the construction of highways, bridges, power stations, housing projects, parks, wharves, geological prospecting, channel dredging and drilling of wells.

At present, China has a big potential for construction projects abroad and also can send engineers and technicians to install complete sets of equipment and give technical training to workers, the vice-minister said. Another kind of contract labor is seamen and cooks.

The vice-minister also said, in undertaking construction and labor projects, contracts are honored and quality of work is guaranteed.

PLA OFFICIAL ON RELYING ON SCIENCE IN LOGISTICS

OW230243 Beijing Domestic Service in Mandarin 1000 GMT 21 Nov 82

[Text] Zhang Ruguang, deputy director of the PLA General Logistics Department, pointed out at a recent PLA logistics conference: It is necessary to rely on science and technology to create a good situation in logistics work. It is also necessary to open the way for applying scientific and technological results in logistics building and to serve logistics in combat readiness.

Zhang Ruguang said: Marked progress has been made in scientific and technological work in the PLA in support of logistics since the 3d Plenary Session of the 11th CPC Central Committee with more than 2,600 scientific and technological results winning fifth-class or above prizes. However, many more scientific and technolocal results have still not been publicized, put into use or popularized. In doing logistics and other work in the future, only by relying on science and technology and by putting into use scientific and technological results can we broaden the sources of income and reduce expenditures, raise the effectiveness in using limited military expenses and materials, improve the economic results and successfully fulfill the defense role in time of peace as well as in time of war.

Zhang Ruguang also put forth specific suggestions on how to apply scientific and technological results to improve logistics work.

PEASANTS INCREASE FARM MACHINERY PURCHASES

OW230840 Beijing XINHUA in English 0701 GMT 23 Nov 82

[Text] Beijing, November 23 (XINHUA) -- China's domestic sales of farm machinery came to 4,190 million yuan in the first nine months of 1982, a 5.8 percent increase over the same 1981 period, according to the China Agricultural Mechanization Service Corporation.

Sales have risen this year in most parts of the country, a spokesman for the corporation said. A more than 20 percent increase was recorded in the Inner Mongolia Autonomous Region, and Yunnan, Guangdong, Gansu, Guizhou and Anhui Provinces. The spokesman admitted however that the peasants' purchasing power had been underestimated and the supply of hand-tractors, pumps and sideline product processing machinery cannot meet the demand.

From January to October this year, Chinese peasants bought 208,500 hand-tractors, 63,970 more than during the same 1981 period. Many peasant families now buy machinery jointly or independently, as a result of the establishment of the responsibility system, which has increased rural income.

Nearly 10,000 peasant families in Yutai County, Shandong Province, have bought 1,021 small tractors, 3,718 pumps, 1,500 threshers and other processing machinery. The county has 20,000 hectares planted to wheat, which averaged 3.75 tons per hectare this year, up 0.75 tons over that of last year, despite serious drought.

The Wangguanji People's Commune in Suqian County, Jiangsu Province, has collectively purchased 35 large tractors and 115 hand-tractors. The commune has mechanized sideline product processing and farm work on its 2,130 hectares of farmland.

COMMERCIAL, SERVICE ENTERPRISES REPORTED TRIPLED

OW231036 Beijing XINHUA in English 1117 GMT 21 Nov 82

[Text] Beijing, November 21 (XINHUA) -- The number of commercial enterprises in China has tripled since 1979, mainly through the increase in the number of collective and individual enterprises, the Ministry of Commerce said.

In 1981, the nation had 3.04 million commercial, catering and service trade enterprises. Of these, 600,000 were state owned, up 28 percent; 940,000 were collectively owned, 49 percent more; and 1.5 million were owned by individuals, an increase of 33 times, the ministry said.

The expansion of the commercial network has eased the difficulties in buying things, getting repairs and services. These difficulties, the ministry said, resulted from the drop in the number of commercial enterprises by more than 80 percent during the merging of shops and nationalization drives in 1958 and the 1966-1979 "Cultural Revolution" and the growth of population.

This year, the ministry said, the number of commercial booths and shops has continued to grow.

Grain stores, groceries, vegetable stalls and radio and T.V. set repair shops have been built under new high-rise apartment buildings in the cities as required by municipal governments. Stalls, shops and make-shift stands have been built along the streets. Small restaurants have been opened by individuals, and cobblers on the street and stands selling vegetables, cigarettes, wines offer customers immediate service.

In China's third most populous city of Tianjin, the municipal government has set up a provisionary office headed by Acting Mayor Li Ruihuan for erecting shops and booths for commercial use. The office meets with department leaders to decide where these shops should be located, thereby shortening the approval time.

In July, August and September, 594 shops were built in Tianjin with a total floor space of more than 30,000 square meters. The shops are engaged in catering, repairing, tailoring and other services, and selling native produce, general merchandise and furniture.

Under the new method, within three to five days permission is granted and work is started on the construction, and within another 20 days or more a new shop is open. In the past it used to take six months to gain approval before construction could be started, the ministry said.

In Changzhou, a medium-sized city with a population of 480,000 in Jiangsu Province, 1,236 shops and service units were set up by collectives and individuals in the last three years, more than double the original. Many of these shops and service units are managed by collectives or individuals who entered into contracts with state commercial enterprises. They are owned by the state, but managed independently with full responsibility for profits or losses and for handing in a fixed amount of profits to the state each year.

In remote Tibet where the population is largely scattered, there is a shop now for every 600 persons in the region. In the Himalaya Mountains local peasants and herdsmen can now buy what they need from nearby shops or from traveling businessmen with goods on horseback.

During the 1979-1981 period, the increase in the number of commercial and service trade businesses created jobs for more than 4 million jobless young people. Changzhou and 27 other medium-sized and small cities have reported full employment, the ministry said.

CYL SECRETARY URGES YOUTH TO LEARN FROM ZHANG HUA

OW231224 Beijing XINHUA in English 1137 GMT 23 Nov 82

[Text] Beijing, November 23 (XINHUA) -- Calling on young people throughout the country to learn from Zhang Hua, a 24-year-old college student who gave his life to save an old peasant, Wang Zhaoguo, new secretary of the Communist Youth League, said Zhang Hua had high ideals as well as socialist morality, culture and discipline.

In a press interview published in today's Beijing papers, Secretary Wang said life becomes meaningless without ideals. What was most inspiring about Zhang Hua, he continued, was that he did not just talk about ideals but worked for them each day of his life.

Commenting on recent reader's letters on whether a promising young college student should have sacrificed his life for a 69-year-old peasant, Wang Zhaoguo said, he felt that Zhang Hua's dedication to duty showed a great wealth of spirit which demonstrates that in China it is possible to build a new-type of relationship of mutual respect and solicitude, including the sacrifice of one's life if necessary. This is a tremendous spiritual force which can rally the entire society to work for the country's modernization.

The discussion is continuing in the papers. Fang Yaomei, of Tongji University of Shanghai said it is the people of China who give students the opportunity to study, to acquire knowledge to serve the people. Their knowledge, should not be taken as capital with which one can bargain. A person with such mentality would be worthless even if very learned.

Another reader's letter took issue with the argument that described college students as "gold" while an old peasant as "stone". The reader said the country spent quite a substantial sum in training a college graduate and part of that money came from the peasants. A college student should understand this point and adopt a correct attitude towards the people and himself.

A young man wrote that the value of one's life cannot be measured like commodities. Anyone who felt it was not worthwhile to sacrifice a college student for a peasant was actually looking at himself as a commodity.

ANHUI PLANS FIFTH CONGRESS SESSION IN DECEMBER

OW111101 Hefei Anhui Provincial Service in Mandarin 1100 GMT 10 Nov 82

[Text] The 16th Session of the 5th Anhui Provincial People's Congress Standing Committee, which was held in Hefei from 8 to 9 November, decided to hold the 5th Session of the 5th Anhui Provincial People's Congress in Hefei this December. The main agenda of this congress will be to relay, study and implement the guidelines of the fifth session of the Fifth NPC and to hear work reports from departments concerned.

The standing committee meeting also heard a report from the provincial people's government on the handling of motions raised by deputies at the fourth session of the provincial people's congress, discussed the standing committee's work report to the fifth session of the provincial people's congress and approved relevant appointments and removals.

Zhang Zuoyin, Xia Deyi, Li Guangtao and Chen Yuanliang, vice chairmen of the Anhui Provincial People's Congress Standing Committee, presided over the plenary session of the standing committee meeting.

Hu Kaiming, Huang Yan, Yang Chengzong, Zhao Minxue and (Zhao Kai), vice chairmen of the Anhui Provincial People's Congress Standing Committee, also attended the meeting.

Wei Xinyi, vice governor; (Shi Jian), vice president of the Anhui Provincial Higher People's Court; (Wang Wenzhi), deputy chief procurator of the Anhui Provincial People's Procuratorate; and responsible persons of other provincial departments concerned attended the meeting as observers.

ANHUI TO HOLD PLA, MILITIA CONGRESS IN JANUARY

OW171041 Hefei Anhui Provincial Service in Mandarin 1100 GMT 16 Nov 82

[Text] With the approval of the Anhui Provincial Party Committee, the provincial people's government and the provincial military district recently issued a joint circular on holding a congress in January of 1983 for advanced elements to promote spiritual civilization in PLA and militia units in Anhui Province and put militia building on a solid basis organizationally, politically and militarily. The purpose of the congress is thoroughly to implement the 12th Party Congress guidelines, promote the modernization and regularization of PLA units in Anhui and step up militia building in the province.

The circular urged party committees and government organizations at all levels to conscientiously conduct investigations and study in PLA units and in grassroots militia contingents and to sum up their experiences. It called on the broad masses of PLA commanders and fighters and militia members in the province to greet the congress with concrete actions and outstanding achievements so that they can contribute to common efforts to create a new situation for socialist spiritual civilization in PLA units and militia contigents throughout the province.

ANHUI HOLDS CONFERENCE ON CIVIL OFFENSE TRIALS

OW230625 Hefei Anhui Provincial Service in Mandarin 1100 GMT 21 Nov 82

[Text] The Third Anhui Provincial Work Conference on Trials of Civil Offenses and Disputes ended in Hefei today. It was pointed out at the conference that the task of political and legal affairs work for this winter and next spring is to improve social order and public security.

Such a task should be regarded as an important measure for implementing 12th party congress guidelines and striving for a fundamental turn for the better in standards of social conduct.

Cadres responsible for trying civil offenses and disputes were urged by the conference to make contributions to comprehensive improvement of social order and public security.

The guidelines of the third national work conference on trials of civil offenses and disputes were conveyed to, and studied by, the participants. New situations and problems regarding trials of civil offense and dispute cases were studied in the light of actual conditions in the province. The provincial work conference defined various tasks under the new historical conditions and formulated specific measures for carrying out those tasks.

The conference was addressed by Chen Zhenya, president of the provincial higher people's court, and Vice President of the Court (Su Ying) delivered a report entitled: "Enhance Our Understanding, Work Hard To Do a Good Job in Trials of Civil Offenses and Disputes."

On behalf of the provincial party committee, (Liu Lianmin), standing committee member of the provincial party committee, delivered a speech. He said: Improving social order and public security should be the central task of our political and legal affairs work. While we should strike at active criminal activities, we should also strengthen our crime-prevention work, implement measures to improve social order in a comprehensive way and combine temporary solutions of problems with measures for getting at the root of problems. Trials of civil offenses and disputes are a glorious, yet arduous task.

Comrade (Liu Lianmin) stressed: We should enhance our understanding of the importance of trying civil offense and dispute cases and increase our awareness of the need to do a good job in conducting trials. Cadres handling trials of civil offenses and disputes should raise their understanding of our legal system, act strictly in accordance with the law in handling legal cases and ensure fairness in trials. Party committees at various levels should strengthen their leadership over trials of civil offenses and disputes, help solve practical problems and make big efforts to create a new situation in such trials.

ANHUI RADIO COMMENTS ON SOLVING CIVIL DISPUTES

OW231106 Hefei Anhui Provincial Service in Mandarin 1100 GMT 21 Nov 82

[Station commentary: "Strengthen the Administration of Justice in Handling Civil Cases, Promote the Fundamental Improvement of Social Customs"]

[Text] The law of civil procedure of the People's Republic of China was put into effect on a trial basis beginning 1 October of this year. This was a major event in building the legal system in our country. Civil cases are now handled strictly in accordance with the law of civil procedure. This will have an important bearing on protecting the people's legitimate rights, strengthening our country's democracy and legal system and promoting the fundamental improvement of social customs.

In accordance with our country's actual situation, the 3d Plenary Session of the 11th CPC Central Committee decided to shift the focus of the party's work to economic construction and pointed out that class struggle was no longer the principal contradiction in our society. At present, when we compare the number of contradictions between ourselves and the enemy and the number of contradictions among the people themselves, we can see that the latter is more conspicuous and numerous.

Civil disputes are due to differences between advanced and backward conditions and between correct and erroneous views and attitudes or due to actual problems in the people's production and daily life. If we look at the surface of those civil disputes, they appear to be nothing but disputes among older and younger people, among neighbors or between husband and wife, and many of those disputes were caused by trifling things. However, we must see clearly that all those civil disputes are related directly to the people's production, daily life, happiness and bitterness, personal interest and harmony in the family. They also have an impact on social stability and the building of the four modernizations. Therefore, the administration of justice in handling civil cases is an important work which requires correct ideology and policy.

By correctly handling civil disputes and adjusting financial relations and personal relations in accordance with the law, we shall be able to solve problems for the litigants, remove obstacles in industrial and agricultural production, turn negative factors into positive factors and promote stability and unity.

In order to implement the law of civil procedure and handle civil cases properly, all judicial workers should concentrate firmly on serving the people wholeheartedly, improve their style of work, rely on the masses, conduct investigations and study, make greater efforts to mediate civil cases, conduct hearings on points of dispute and settle civil cases properly, in accordance with law. Cadres in charge of handling civil cases should visit the litigants and explain law and reason to them personally. They should convince the people with law and treat the people with courtesy and sincerity. They should integrate their efforts to solve disputes with their efforts to solve people's ideological problems. They should strive to mediate civil cases and find solutions amenable to both parties. In addition, they should pay attention conscientiously to preventing, lessening and solving contradictions in order to reduce trouble. They should make new contributions to promote the fundamental improvement of social customs in the whole province.

XIANG NAN ATTENDS FUJIAN JUDICIAL MEETING

OW100530 Fuzhou Fujian Provincial Service in Mandarin 1120 GMT 9 Nov 82

[Text] The 8-day Fujian provincial meeting on the work of public security, the procuratorate and the judiciary closed in Fuzhou this afternoon. Following the guidelines of the 12th CPC National Congress, the provincial meeting further conveyed and implemented guidelines of the national meeting on the work of public security, the procuratorate and the judiciary, analyzed the present situation of Fujian's public order and arranged the primary tasks for 1983 of Fujian's public security, procuratorial and judicial departments. Xiang Nan, first secretary of the provincial party committee, attended and addressed the meeting. On behalf of the public security, procuratorial and judicial committee of the provincial party committee, Yuan Gai -- a standing committee member of the provincial party committee -- made a work report entitled: "Implement the Guidelines of the 12th CPC National Congress, Create a New Situation of the Work of Public Security, the Procuratorate and the Judiciary and Struggle To Achieve a Fundamental Turn for the Better in Public Order." (Ding Qi), deputy secretary of the public security, procuratorial and judicial committee of the provincial party committee, delivered a report of conveying the guidelines of the national meeting on the work of public security, the procuratorate and the judiciary. Comrade Jin Zhaodian delivered a summing-up speech.

The meeting held: With the improvement of the national political and economic situation and with the constant advancement of efforts to enforce law and order, public order in Fujian's urban and rural areas has clearly improved.

Public security, procuratorial and judicial workers in the province have done a great deal of work and made great achievements in the struggle against grave criminal offenses in the economic sphere.

The meeting emphasized: Public security, procuratorial and judicial organs are important instruments for exercising the people's democratic dictatorship. They shoulder the arduous twofold task of protecting the people's democracy, security and legitimate rights and resolutely striking blows at antisocialist hostile elements and various serious criminals. They are important functional departments for improving public order. Public security, procuratorial and judicial departments at all levels must understand and handle correctly class struggle which still exists within certain limits. They should work under the leadership of the provincial party committee and party committees at all other levels, use the guidelines of the 12th CPC National Congress as their motivational force, make the protection and promotion of socialist modernization their central task, uphold the four cardinal principles and adhere to the party's line, principles and policies and the law. They should adhere to the principle of combining people's efforts with the efforts of government organs to strike resolute blows at criminals who seriously sabotage socialist economy, counterrevolutionaries, enemy agents and spies, those who commit serious crimes of endangering public order and red-handed saboteurs among remnants of Lin Biao's clique and the gang of four. They should strive thus to achieve a fundamental turn for the better in public order in the next 3 or 5 years and insure good production order, living order and social order in the interest of socialist modernization.

The meeting called on public security, procuratorial and judicial departments in the province and their personnel seriously to study and implement the guidelines of the 12th CPC National Congress, unify their thinking and enhance their vigor to make new contributions toward creating a new situation for public security, procuratorial and judicial work and promoting the building of socialist material and spiritual civilizations.

Some 500 persons attended the meeting. They include responsible persons of various prefectural, municipal, county and district party committees in charge of public security, procuratorial and judicial work; responsible persons of public security, procuratorial, judicial and civil affairs departments and courts; responsible persons of public security, procuratorial and judicial offices of various prefectural and municipal party committees; and responsible persons of legal committees of the provincial people's congress and the Fuzhou and Xiamen Municipal People's Congress.

XU JIATUN LEADS JIANGSU NPC DELEGATION TO BEIJING

OW230331 Nanjing Jiangsu Provincial Service in Mandarin 1100 GMT 22 Nov 82

[Excerpts] The Jiangsu delegation to the Fifth NPC Session left Nanjing for the national capital, Beijing, this afternoon. More than 120 deputies from various areas and all walks of life throughout the province -- under the slogan of striving to create a new situation in all fields of socialist modernization put forth at the 12th CPC National Congress -- will take part in discussing important matters such as the fundamental law of the state and economic construction.

Members of this delegation included: Hui Yuyu, member of the Central Advisory Commission of the CPC Central Committee; Xu Jiatun, first secretary of the provincial CPC committee and chairman of the standing committee of the provincial people's congress; Han Peixin, secretary of the provincial CPC committee and acting Jiangsu governor; Xin Shaobo, He Binghao, Dai Weiren, and Liu Shuxun, vice chairmen of the standing committee of the provincial people's congress; Jin Xun, Wu Yifang and Chen Ketian, Jiangsu vice governors; and Gong Weizhen, adviser to the provincial people's government.

Jiangsu Provincial CPPCC members to the fifth session of the Fifth CPPCC National Committee also left for Beijing today.

JIANGSU'S XU JIATUN ATTENDS MILITIA WORK MEETING

OW201419 Nanjing Jiangsu Provincial Service in Mandarin 2300 GMT 19 Nov 82

[Text] The people's armed forces committee under the Jiangsu Provincial CPC Committee on the morning of 19 November held its first committee meeting since the readjustment of its membership. The meeting discussed how to implement the guidelines of the 12th CPC National Congress in order to create a new situation in Jiangsu's militia work.

The meeting was presided over by Han Peixin, secretary of the Jiangsu Provincial CPC Committee, acting governor of Jiangsu and chairman of the people's armed forces committee and political commissar of the Jiangsu Provincial Military District, and (Che Jilin), director of the office of the people's armed forces committee under the provincial CPC committee and chief of staff of the provincial military district command, spoke on Jiangsu's strategic position and tasks, its achievements in militia work since the 3d Plenary Session of the 11th CPC Central Committee and its plan for next year's militia work.

Xu Jiatun, first secretary of the provincial CPC committee and first political commissar of the provincial military district, came to the meeting to visit comrades of the people's armed forces committee.

Comrade Han Peixin made a speech at the meeting. He affirmed Jiangsu's achievements in militia work after the 3d Plenary Session of the 11th CPC Central Committee and pointed out that the most important task at present was to implement the 12th CPC National Congress guidelines and create a new situation in militia work. He said: First of all, it is necessary to do a very good job in organizing militiamen and militia cadres conscientiously to study the 12th congress documents so as to unify their thoughts on implementing the 12th congress guidelines. Great attention should be paid to solidifying and improving the militia after readjustment has been made in militia organization. Militia building should be strengthened throughout according to the requirement that militia building must be done well and carried through organizationally, politically and militarily. It is imperative to continue building contingents of full-time people's armed forces cadres and militia cadres in accordance with related documents of the party Central Committee and the provincial CPC committee. We must educate militiamen to implement exemplarily the party's various principles and policies, take the lead in doing production work well, maintaining social order and striving for the three fundamental turns for the better and for realization of the grand goals set forth by the 12th CPC National Congress.

(Li Yousheng), vice chairman of the people's armed forces committee and commander of the provincial military district; Li Zhizhong, vice chairman of the people's armed forces committee and vice governor; and (Tian Natian), vice chairman of the people's armed forces committee, were present at the meeting.

NANJING PLA UNITS STRESS ROLE OF EDUCATION

OW190441 Beijing XINHUA Domestic Service in Chinese 0739 GMT 18 Nov 82

[Text] Nanjing, 18 Nov (XINHUA) -- The Nanjing PLA units party committee has stressed that education on science and general knowledge must be intensified so as to create a new situation in the armed forces, that the misconception that one still can win a battle without knowledge must be rectified and that a new atmosphere of earnestly studying science and general knowledge must be encouraged in the armed forces.

While studying documents on the 12th CPC National Congress, members of the Ninjing PLA unit's party committee have also reviewed the present situation in the armed forces and discussed the need to create a new situation in the armed forces by intensifying education on science and knowledge. Commander [of the Nanjing PLA units] Xiang Shouzhi pointed out: Promoting education on science and knowledge in the armed forces not only makes those who have little schooling more knowledgeable and satisfies needs in the armed forces' modernization but it also encourages armymen to improve themselves through studying hard. He said: This is significant for training more knowledgeable and more professionally competent cadres. At present we must continue to liquidate the influence of "left" ideology and adopt effective measures to deepen and effectively promote education on science and knowledge.

Dung Ping, former political commissar [of the Nanjing PLA units] said: After they have become more knowledgeable it will be easier for cadres and fighters to accept new things because they will have become more broadminded. Otherwise they will be shortsighted and they will hardly be able to do their jobs well. For this reason we must work energetically to intensify the armed forces' cultural construction. If intellectually and physically capable, those veteran cadres who have retreated to the second and third lines should play a positive role in this task. Some may become teachers, and some may take charge of certain tasks on behalf of the party committee.

After discussion, the Nanjing PLA Units Party Committee presented the following specific measures for intensifying education on science and general knowledge in the armed forces:

1. Broadly propagate the significance of stressing education on science and knowledge and continue to liquidate the influence of "left" ideology toward despising science and knowledge and discriminating against intellectuals.

2. Continue to intensify extension education among the cadres. Units at and above the corps levels must sponsor extension education classes for the cadres to study the courses of senior middle schools and technical middle schools. Those cadres whose educational level is below that of the senior middle school must be retrained by stages and by groups on a rotational basis.

3. Training of teachers must be intensified. To strengthen the teaching staff and guarantee the quality of teaching the armed forces must, in addition to selecting teachers from the armed forces, contact the local educational departments so that each corps unit can borrow three or four college graduates to teach their specialty in the armed forces.

4. The cadres' general and special knowledge must be strictly tested before they can be promoted. The educational level of the young cadres to be transferred to work in armed forces organizations must at least be up to the technical school level. Cadres selected from among fighters must be strictly tested; only those who pass the test will receive further training in colleges or schools.

5. Study on one's own shall be encouraged. Assistance will be given to cadres and fighters who enroll in night schools and in televised and correspondence courses.

SHANGHAI PRESS COMMENTATORS ON ECONOMIC CRIMES

17 Nov WEN HUI BAO

OW231132 Shanghai WEN HUI BAO in Chinese 17 Nov 82 p 1

[Commentator's article: "No Relaxation of Efforts During the Crucial Moment"]

[Excerpts] Our struggle against grave criminal offenses in the economic sphere in the whole city of Shanghai has been intensified since the beginning of July 1982. Leading cadres at various levels have taken up this matter personally, thereby accelerating the progress of investigation and the handling of important cases.

What merits our attention at this moment is that we must overcome the idea of relaxing our efforts and fearing hardships and difficulties. Some comrades have said that the struggle against economic crimes is a long-term task and that we can slow up the tempo since there are many other tasks facing us. After completing the investigation and handling of a number of economic criminal cases, some organizations thought that their problems had been solved and that it was time to end the struggle.

The report to the 12th CPC National Congress points out that criminal elements in the economic sphere "cause tremendous damage to economic construction, upset social stability, debase the standards of social conduct and corrupt people's minds and life. They are termites undermining the edifice of socialism." The struggle of the broad masses of people against grave economic offenses is an important manifestation of class struggle in the economic sphere under new historical conditions where we are pursuing a policy of opening to the outside and taking flexible measures to invigorate our domestic economy.

Our success in this struggle has an important bearing on our striving to bring about a fundamental turn for the better during the next 5 years in our country's financial and economic situation. In accord with standards of social conduct and party style, it is one of the four important guarantees for persisting in the socialist road and concentrating our strength on our modernization drive. The party Central Committee has, therefore, issued a call: the whole party must enhance its understanding of this struggle, take a firm stand in it and unswervingly carry it through to the end.

The struggle against grave criminal offenses in the economic sphere has now entered a crucial moment. On the basis of our investigations and study, we should concentrate our main energies on taking up the big and important cases so that we can exploit our achievements in this struggle. We are enthusiastic for China's modernization, enthusiastic for bringing about a fundamental turn for the better in the style of the party and in the standards of social conduct. We must brace up, have full confidence, remove all difficulties and obstructive forces, and unswervingly carry this struggle through to the end.

17 Nov JIEFANG RIBAO

OW231420 Shanghai JIEFANG RIBAO in Chinese 17 Nov 82 p 1

[Commentator's article: "Intensify the Struggle by Putting the Stress on Cracking Down on Major, Important Cases -- Further on Never Slackening Efforts To Strike at Grave Criminal Offenses in Economic and Other Spheres"]

[Excerpts] On 16 November the Shanghai Municipal CPC Committee held a meeting of party members and cadres to exchange experiences in the struggle against grave criminal offenses in the economic sphere. The meeting also made important arrangements for the next stage of work. This will surely help carry on the struggle in an intensified and sustained way.

Judging from the situation of Shanghai as a whole, the struggle is being intensified and the general situation is good. However, the development is uneven as the leading cadres of some units think that they may take their time. They are not paying attention to the struggle and are comparatively slow in starting it.

At present, criminal offenses in the economic sphere are still quite conspicuous. In this situation, we particularly need to pay more attention to the struggle and we should never slacken our efforts.

How can we pay more attention to the struggle? First we should grasp the key issue of investigating major and important cases. We should conduct a thorough investigation and study truly to find out what has happened. In this way, we will be able to know the facts and deal sure, accurate and relentless blows at those who commit grave criminal offenses. At present, organizations at and above the ward, county and bureau level and major enterprises and institutions should pay attention to doing a good job in investigation and study. We should see soberly the clear characteristics of the economic crimes in recent years -- that is, collusion between a small number of personnel of state organs, enterprises and institutions and some lawless persons in society, each using the other for his own ends, in committing crimes together under the cover of bad customs and habits. Some of them are even supported by certain leading cadres. Therefore, in order to strike at grave criminal offenses in the economic sphere, we particularly should pay attention to ferreting out the small number of criminals hidden in party and government organizations, enterprises and institutions.

Next, we should expedite the handling of exposed cases, especially major and important cases. Leading cadres at all levels personally should take a hand in handling major and important cases in close coordination with public security, procuratorial and judicial organs.

Third, we should pay attention to plugging loopholes and carrying out ideological education well. In the struggle against economic crimes, we should be aware of our management problems and our cadres' being seriously corrupted by capitalist thinking. We accordingly should improve management, institute and improve various rules and regulations and strengthen anticorruption ideological education.

SHANGHAI HOLDS MEETING ON ECONOMIC CRIME

OW171034 Shanghai City Service in Mandarin 2300 GMT 16 Nov 82

[Text] The Shanghai Municipal CPC Committee held a meeting at the auditorium of the municipal people's government on the afternoon of 16 November to exchange experiences in striking at grave economic crimes.

After reviewing and summing up the struggle against economic crime that has been carried out since the beginning of this year, the meeting made arrangements for performing work in this regard. The meeting emphatically pointed out: The struggle against grave economic crimes is now at a critical stage. Guided by guidelines of the 12th CPC Congress, party organizations at all levels throughout the municipality should have a clearer understanding of priorities in the struggle and carry them out persistently and extensively.

Information provided by the meeting shows that a large number of economic criminal cases have been discovered in the municipality so far and that 37.7 percent of such cases have been investigated and handled.

The struggle has been developing in a normal and healthy manner, and achievements made in the struggle are remarkable. Ths struggle is now focusing on the investigation and handling of major and important cases and on the investigation and study of loopholes and problems in leading bodies at or above the ward, county or bureau level.

Yang Di, member of the municipal party committee's leading group for public security and judicial work and director of the municipal public security bureau, presided over yesterday's meeting.

Hu Lijiao, second secretary of the Shanghai Municipal CPC Committee, and (Wang Yaoshan), head of the preparatory group for setting up the municipal party committee's discipline inspection commission, spoke at the meeting.

At the meeting, representatives from the party committees of the municipal light industry bureau, Nanshi ward and other units made reports on their experiences in carrying out the struggle against grave economic criminal offenses.

SHANGHAI TO BUILD INDUSTRIAL, CONSTRUCTION ZONES

OW230553 Shanghai City Service in Mandarin 2300 GMT 21 Nov 82

[Text] Development plans for the new Minhang industrial and Hongqiao construction zones in Shanghai Municipality have been completed, according to contributing reporter (Mo Xin) of the SHINJIE JINGJI DAOBAO. Efforts to form the two development corporations are being stepped up; preparatory work in various areas is already underway.

The new Minhang industrial and Hongqiao construction zones are expected to offer better conditions for Shanghai to develop its economic relations with foreign countries and a better investment environment for overseas investors. Foreign businessmen are welcome to enter joint ventures in both of the two new development zones. To establish plants and erect highrise buildings there, the Shanghai Municipal People's Government will take measures to offer preferential treatment to overseas investors in joint ventures.

It is also reported that, during anniversary celebrations of the Shanghai municipal trust and investment corporation from 24 to 26 November, foreign and Hong Kong businessmen by the hundreds will come to Shanghai for business meetings on economic and technical cooperation. The corporation will brief these guest businessmen on the development of Shanghai's various trades and professions and the envisioned future of the new Minhang industrial and Hongqiao construction zones. The corporation will also give its recommendations on the first 60 joint venture projects open for negotiation and join the guest businessmen in exploring ways and means for the latter to make direct investment in Shanghai and develop economic and technical cooperation with the city.

(Xu Pengfei), general manager of the Shanghai municipal trust and investment corporation, noted, in answer to a question by the SHINJIE JINGJI DAOBAO reporter, that the 60 projects represent only a start. He said there is a much greater area and scope for possible cooperation and a far greater number of projects which may be open for joint venture negotiations. He added that the guest businessmen are also welcome to express their own intentions and propose projects which interest them. This will broaden the scope of and add new content to, the forthcoming businees meetings.

HEILONGJIANG'S YANG YICHEN ON AIDING THE POOR

SK231112 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 22 Nov 82

[Text] According to HEILONGJIANG RIBAO, the provincial CPC committee and the provincial people's government recently sponsored a forum in Bin County to discuss the issues of providing for and helping oneself by engaging in production and of supporting and assisting the poor.

The forum concentrated on exchanging experiences gained by various localities in this regard and held extensive and in-depth discussions. Comrade Yang Yichen addressed the forum and Comrade Chen Junsheng delivered a summing-up speech.

The forum contended that, following the implementation of 12th CPC Congress guidelines, the rural situation in the province had thrived. Popular feelings among the broad masses of rural people have been stable in spite of natural disasters this year. Though there is a reduction in grain output, rural people have greatly developed a diversified economy. Following natural disasters, various localities in the province have provided early disaster relief and scored marked achievements in the work to provide for and help themselves by engaging in production and to support and assist the poor.

The forum pointed out: Only by earnestly implementing 12th CPC Congress guidelines and doing a good job in providing disaster relief and helping the poor will localities in the province certainly be able to reach the target -- within a year -- of making up losses caused by 2 years of natural disasters and to fulfill the task of creating a new situation in preparation for quadrupling agricultural output value by the end of this century.

The forum pointed out: To do a good job in providing for and helping oneself by engaging in production and supporting and assisting the poor, it is imperative to uphold the principle of laying stress, first, on self-reliance and, second, on assistance and support from the state and collectives, open more avenues in production and vigorously develop a diversified economy. This is a way both to provide disaster relief and to become wealthy. Efforts shoud be made to arouse the masses to analyze their local conditions so as to develop whatever strong points they have and to open whatever production avenues they can find. Attention should be paid first to making arrangements for this winter and next spring. Households that have difficulties in tiding over the winter should get proper relief. Particular importance should be attached to consuming grain in planned and frugal ways.

The forum noted: Steadily to enact and improve the responsibility system of sygning contracts in accordance with one's output and to implement party policy on the rural economy -- such as releasing private plots, fodder-growing plots and new afforestation land -- are of vital importance in changing the backward situation of poor production brigades and teams. In developing a diversified economy, it is necessary to parallel individual tasks with collective ones. This means that production suitable to individuals should be undertaken by commune members and that those suitable to collectives should be undertaken by units. Those who have expertise, if conditions of their collective's permit, may be allowed to earn their living outside. The departments concerned should support counties which are disaster victims and poor production teams to develop a diversified economy and formulate policies suitable to local conditions so as to benefit the people.

To release private plots, fodder-growing plots and new afforestation land is a major way for peasants to become wealthy. Efforts should be made to implement policies in this regard down to every household within the winter-spring period.

While encouraging commune members to become wealthy, it is necessary to support and help poor households. Effort should be made to publicize the experience gained by households that were first to become wealthy and to urge them to help poor households become wealthy also.

The forum pointed out: The work to provide successfully for and help oneself by engaging in production and to support and assist the poor is aimed not only at overcoming current difficulties but also at laying a foundation for quadrupling agricultural output value by the end of this century. Party organizations at all levels and all industries and trades should regard this work as a practical step in implementing 12th CPC Congress guidelines and creating a new situation in rural areas, put this work into their daily schedule, grasp the work successfully, meticulously and thoroughly and bring about marked effectiveness in the work. Departments concerned at all levels should organize outstanding investigation groups to go deep into disaster areas to grasp the suffering of every production team and household and to conduct guidance by classifying their extent of suffering. Departments at all levels should engage in and exercise leadership over the enactment of production responsibility systems and adopt measures for implementing immediately various responsibility systems down to every poor production team and household under their jurisdiction in line with the situation prevailing in these teams and households. It is necessary to integrate the work to provide for and help oneself by engaging in production with the task of consolidating party organizations and leading bodies. The broad masses of party members, by carrying forward the spirit of workstyle rectification, should plunge into the work to provide for and help themselves by engaging in production and into the work of supporting and assisting the poor, and they should adopt the practice of assuming heavy duties while facing serious disasters and taking the lead in facing difficulties. Efforts should be made to encourage party member households to set up coordination systems. It is also necessary to strengthen ideological and political work among the masses and conduct timely education among them, aimed at specific problems on the state of affairs, collectivism, self-reliance, practicing economy and on policies and the legal system. Efforts should be made to encourage the masses to raise their spirit to overcome difficulties. Those who loot food grain and oil-bearing seeds and indulge in gambling, robberies, unlawful felling of trees and the practice of feudal and superstitious activities should be strictly punished.

Attending the forum were responsible comrades from six agricultural prefectures, 18 agricultural communes and from the provincial level departments concerned. After hearing the briefings given by the party committee of Bin County, one of the counties plagued by serious disasters this year, and by party branches of two communes, the forum organized its participants into visiting groups to go deep into the eight production teams of the four communes to grasp their situation and suffering. Comrades, including Yang Yichen, Chen Junsheng, (Wang Yusheng) and Wei Zhimin, went deep into every production team and household to learn in detail about their living and production situation and held discussions with commune members on how to become wealthy.

RENMIN RIBAO REVIEWS U.S. MX DEPLOYMENT PLAN

HK251440 Beijing RENMIN RIBAO in Chinese 25 Nov 82 p 6

["Newsletter from America" by Yuan Xianlu [5913 0341 4389]: "A Look at the U.S.-Soviet Disarmament Talks From the MX Missile Deployment Plan"]

[Text] Nuclear disarmament talks between the United States and the Soviet Union are now underway in Geneva. The United States has revealed that it will propose to the Soviet Union a new scheme on arms control. President Reagan delivered a television speech on 22 November, putting forth the new U.S. plan of defense deployment of MX missiles on land. This development shows that although a subtle situation in U.S.-Soviet relations has emerged at present, neither superpower will slow down its pace in strengthening its own forces and weakening each other's superiority.

As reported, the MX missile is a new type of extraordinarily powerful intercontinental missile with a high percentage of accuracy. According to its design specifications, this missile can carry 10 nuclear warheads. In recent years, the Soviet Union has surpassed the United States in intercontinental missile armaments both in terms of quantity and payload and is catching up with its rival in terms of the quality of its missiles. The United States holds that its existing 1,000 or more Minuteman and Hercules missiles are already obsolete and can easily be destroyed by the Soviet Union in its first nuclear strike. Therefore, the United States has planned for a long time to deploy MX missiles to offset Soviet superiority. However, disputes in the last few years over how to deploy these missiles have yet to be settled. The last tentative plan of the Carter administration was to deploy 200 MX missiles together with a number of fake missiles, both of which were constantly to be moved between 4,600 underground blindages in the valleys of Nevada and Utah so that the Soviet Union could not aim at all the targets. This plan, which had many problems, could provide only uncertain reliability at tremendous expense. Therefore, it was opposed by many people. In his election campaign, Reagan criticized this plan as "absurd and ridiculous." After he assumed the presidency, his military experts put forth many different proposals. As a result of the disputes lasting more than a year, the Pentagon adopted a so-called "dense pack" deployment scheme, in which 100 MX missiles will be concentrated in a series of "extra-strong" underground launch silos built in the mountainous area of west Wyoming, with the launching silos 500-600 meters apart from one another and the total area of the deployment zone about 52 square kilometers. As reported, with such a deployment plan, only a small number of MX missiles will be destroyed even if Soviet missiles hit the deployment zone. The radiation produced by the explosion of the first invading nuclear bomb would detonate other Soviet missiles which follow, thus preventing the rest of the MX missiles from being destroyed. Consequently the United States would be able to preserve its nuclear retaliatory force. Having adopted this scheme, Reagan declared that if Congress approved this scheme, the first 10 MX missiles would be deployed in 1986, and the deployment of a total of 100 MX missiles would be completed by 1989.

Just like the scheme selected by the preceding administration, the "dense pack" scheme adopted by the Reagan adminstration has also been criticized by some people as "absurd and ridiculous." Some people point out that since the explosion of the first invading Soviet nuclear bomb would make other following Soviet nuclear bombs "destroy themselves," it can also prevent MX missiles from being deployed.

Some people hold that if one of the Soviet nuclear bombs explodes in the deployment zone, the collapse of those fragments of concrete which weigh tons may detonate a certain MX missile warhead underground and thus destroy all 100 MX missiles. Some others predict that the Soviet Union, by improving its nuclear weapons in such a way that the warheads will explode underground, will be able to destroy all densely deployed MX missiles with just one warhead. Even officials concerned at the Pentagon cannot deny such a possibility but argue that with the "dense pack" deployment scheme they can ensure the safety of U.S. land-based intercontinental missiles within at least 10 years. In refuting this argument, the opposition points out that -- according to official sources -- the expense for deploying these missiles is estimated at $26.4 billion, the installation of the antiballistic missile system in the neighborhood of the deployment zone would cost about $10 billion and the construction of a number of false launch silos would cost another $2-3 billion. Since under present conditions the United States is facing tremendous deficits, it seems more economical to install an antiballistic missile system in the existing Minuteman missile base as a means to prevent the enemy's assault than to spend $40 billion in deploying the MX missile system whose reliability is uncertain. By the way, the United States surely has a second nuclear strike force since it already owns nuclear submarines.

To be sure, both those for and against the MX system can only argue on the basis of theoretical hypotheses and can hardly reach a definite conclusion because it seems that no experiment has been devised so far to test the result of an attack against a deployment of MX missiles. However, this proposal by Reagan still shows a certain intention of the United States toward the current disarmament talks or even the whole sphere of U.S.-Soviet relations.

For the Reagan administration, strengthening the U.S. position in the U.S.-Soviet balance of nuclear power is one of its most important goals.

Reagan holds that the Salt II treaty concluded between the Carter administration and the Soviet Union is unfavorable to the United States. He discourages Congress from approving this treaty because it has "fatal flaws". After resuming nuclear disarmament talks with the Russians, he purposely proposed restrictions on nuclear warheads and payloads to deprive the Soviet Union of its superiority and speeded up the rearmament program at home. The deployment of MX missiles is an exact and important step in the U.S. efforts to strengthen its military forces.

In his television speech, Reagan cited on the one hand a series of graphs and charts to demonstrate the inferior position of the United States in the U.S.-Soviet balance of nuclear power and to emphasize the importance of the deployment of MX missiles in preventing war and pushing ahead disarmament talks. On the other hand, in affirming the Soviet Union's serious attitude toward the talks, he voiced the expectation that the talks would result in an agreement. American newspapers pointed out that Reagan's purpose was to send a signal to the new Soviet leaders as well as some people at home and in West Europe, assuring them that he was willing to improve U.S.-Soviet relations. In the meantime, he tried to avoid such an overwhelming reconciliatory atmosphere that the U.S. efforts to strengthen its military force would be spoiled. He also hoped that the United States decision to deploy intercontinental missiles would help to remove the obstacles it was facing in deploying medium-range missiles in Europe so that the United States would be in a favorable position in the disarmament talks.

TASS TERMS MX DEPLOYMENT DECISION 'DANGEROUS'

OW251228 Beijing XINHUA in English 1102 GMT 25 Nov 82

[Text] Moscow, November 24 (XINHUA) -- The official Soviet news agency TASS has issued commentaries in the past two days, describing U.S. President Ronald Reagan's decision to deploy 100 MX intercontinental ballistic missiles as a "dangerous decision".

TASS said that the decision represented a "new dangerous step" along the path of stepping up the strategic weapons race and preparing for a nuclear war. It was aimed at "upsetting the rough strategic parity between the USSR and the USA and ensuring military superiority over the Soviet Union."

The Soviet agency asserted that the U.S. has advantages in the total number of nuclear charges of strategic forces provided with delivery vehicles, in the number of strategic bombers and the number of nuclear charges rried by them. These advantages alone, not to mention other ones, "more than make for the Soviet Union's certain superiority in the number of intercontinental ballistic missile launch silos," it added.

Upholding the new deployment plan, U.S. President Reagan had stressed that it was not only crucial to U.S. security but would also prove helpful to negotiating an arms control agreement with the Soviets. "In virtually every measure of military power the Soviet Union enjoys a decided advantage," and it is engaged in a relentless military build-up, Reagan said.

The charges and counter-charges between Moscow and Washington have cast new dark shadows on the S.T.A.R.T. talks which reopened in early October but have made little progress because each of the two wants to maintain its own nuclear superiority.

U.S. ARMY: PERSHING TEST RESULT UNSATISFACTORY

OW241146 Beijing XINHUA in English 1139 GMT 24 Nov 82

[Text] Washington, November 23 (XINHUA) -- The U.S. Army announced today that the Pershing-2 missile "did not achieve the desired accuracy" in its latest test carried out on November 19. It was the third test the U.S. Army made in a month.

The Pershing-2 has a range of 1,100 miles, more than twice that of the Pershing-1, and is 10 times more accurate. It could carry a smaller nuclear warhead.

Under a NATO agreement in December 1979, 108 Pershing-2s are to be deployed in West Germany beginning December 1983 to counter some 300 Soviet SS20 missiles based in Soviet European territories.

To meet the NATO deployment deadline, the Pershing-2 is on a hurry-up schedule of 18 flight tests. But so far few satisfactory results have been yielded. Its first test in July ended in failure when it was exploded 17 seconds after launching. On November 4, the second test was halted by onboard batteries' failure. A test scheduled on November 12 was postponed due to discovery of bad electrical components in the guidance system.

The United States Government has given high priority to the Pershing-2 project. The U.S. Army was reported to have committed more than 600 million dollars in advanced production funds for the missile.

BEIJING VIEWS U.S. DECISION ON PIPELINE SANCTIONS

OW240859 Beijing in Russian to the USSR 1800 GMT 17 Nov 82

["Review" program: "Why the United States Made Concessions to Western Europe on the Issue of Implementing Embargoes on Exporting Oil and Gas Equipment to the USSR"]

[Text] On 13 November U.S. President Reagan announced in a radio address that the United States and its Western European allies had reached an important agreement on the

issue of their economic relations with the Soviet Union, and, consequently, he had decided to lift U.S. sanctions against Western European companies supplying oil and gas equipment to the Soviet Union.

As reported, the agreement reached with Western countries -- about which Reagan spoke -- chiefly means many measures limiting the granting of favorable credits to the Soviet Union and the transfer of the newest technology, as well as the question of studying measures to avoid dependence on Soviet energy resources.

If one compares this agreement with the position the seven leading Western industrial countries expressed in July 1982 in the Versailles declaration, then it is not difficult to see that the United States has wasted the attempt to lift sanctions in exchange for large concessions from Western Europe on trade with the Soviet Union and that the promise made by Western Europe was not contained in the Versailles declaration. Therefore, the agreement between the United States and Western European countries essentially signifies a U.S. concession to Western Europe.

People still remember that Reagan forbade U.S. companies to export oil and gas equipment to the Soviet Union after the establishment of martial law in Poland in December 1981. On 18 June 1982, he also announced that he was prepared to extend this order to affiliates of U.S. companies in Western Europe and West European companies using U.S. patents for the production of oil and gas equipment. The Reagan government's position regarding European states selling oil and gas equipment to the Soviet Union was quite a rigid one. It imposed sanctions on a number of French, UK and West German companies and announced more than once that it would not abandon its position.

However, events have shown that the U.S. sanctions did not frustrate the agreement between Western Europe and the Soviet Union on constructing a pipeline. On the contrary, it inflicted economic losses on the United States and Europe and aroused the greatest indigniation of Western European allies. However, how does one explain U.S. President Reagan's announcement on the lifting of sanctions? There can only be one explanation: This practice is unrealizable. First and foremost, it was unpopular within the United States. The economic sanctions implemented by the Reagan government against the Soviet Union inflicted an enormous disaster on the United States itself. Companies in industrial states with an enormous number of unemployed, particularly a company in Illinois, lost the opportunity to conclude a contract for $90 million. Western public opinion believes that these sanctions inflicted an even larger disaster on U.S. industrial circles than on Europeans.

Moreover, it was also very important that a deep rift appeared in the Western alliance as a result of the sanctions of the Reagan government. West European countries, particularly France, received the U.S. decision with indignation. Completely ignoring this Reagan government decision, they continued to supply oil and gas equipment to the Soviet Union. This forced the United States to realize that Western European countries are no longer obedient partners, but allies, that their striving for self-dependence and independence are becoming stronger and that the taking of unilateral actions without consulting them and even interfering in their internal affairs can only lead to injuring the Western alliance.

Under such difficult circumstances, the Reagan government had to find a compromise in order to set U.S.-European relations into motion and to mollify opposition in the country. This is one of the main reasons the U.S. Government, not having achieved its projected aims, revoked the decision on implementing the embargo on importing oil and gas equipment into the Soviet Union.

AFP: SPOKESMAN URGES IMPROVED SOVIET TIES

OW251124 Hong Kong AFP in English 1104 GMT 25 Nov 82

[Text] Beijing, Nov. 25 (AFP) -- China today urged the new Soviet leadership to "make new efforts" to clear obstacles standing in the way of an improvement in Sino-Soviet relations.

Commenting on new Soviet Communist Party General Secretary Yuriy Andropov's call for improved bilateral ties, a Chinese official spokesman said "We hope to see the new Soviet leadership make new efforts in eliminating the obstacles hindering the normalization of relations between the two countries.

There are three obstacles from Beijing's point of view. They are the deployment of Soviet troops along the two countries' common border, the Soviet intervention in Afghanistan and Moscow's support for the Vietnamese occupation of Cambodia.

Last month China and the Soviet Union had a first round of exploratory talks on their relations. These talks are to be continued alternately in Beijing and Moscow.

In his recent speech to the Soviet Communist Party Central Committee, Mr. Andropov said his predecessor Leonid Brezhnev had made an appeal for improved Sino-Soviet relations and he added "We attach great importance to a positive response by the Chinese party."

In recent weeks, China has made a number of gestures to the Soviet Union notably by sending then foreign minister Huang Hua to Moscow for Mr. Brezhnev's funeral.

Mr. Huang took what observers saw as the most conciliatory stand taken by China towards Moscow since the rift between the two communist giants in the early 1960's. It is not the first time China has called on the new Soviet leadership for "new gestures" to remove the obstacles to a normalization of relations. Chinese strongman Deng Xiaoping made a similar call even before Mr. Andropov's speech.

The Chinese spokesman today also confirmed that Soviet Defense Minister Dimitriy Ustinov had sent a message of congratulations to his newly appointed Chinese counterpart, Zhang Aiping. He did not, however, give any indication of the contents of the message.

Observers said the mere fact it had been sent at all constituted another sign of Moscow's desire to continue its overtures toward Beijing.

YOMIURI CITES USSR, PRC COMMENTS ON BORDER TALKS

OW251351 Tokyo YOMIURI SHIMBUN in Japanese 25 Nov 82 Morning Edition

[By Moscow bureau]

[Text] 24 Nov -- Korniyenko, first deputy minister of foreign affairs, speaking at the 24 November session of the USSR Supreme Soviet, intimated that an agreement had been reached on resuming contacts between the Soviet Union and China over their border issue. This is presumed to signify resumption of the Sino-Soviet border negotiations which have been suspended since 1978. Since the border issue has been the crux of the Sino-Soviet confrontation, it is believed that it would be difficult to reach an agreement all of a sudden on specific details even if the border negotiations should be resumed.

However, it is possible that as a result of this the ongoing moves to normalize bilateral relations might make further progress.

Commenting on this, a Chinese source here said: "No precise agreement has been reached on resuming the so-called border negotiations. However, if it is true that the Soviet side has said that, I think it is referring to the various contacts made in many border areas. It is possible that border negotiations might be resumed sooner or later."

ANDROPOV ELECTED TO PRESIDIUM OF SUPREME SOVIET

OW250117 Beijing XINHUA Domestic Service in Chinese 1235 GMT 24 Nov 82

[Text] Moscow 23 Nov (XINHUA) -- The USSR Supreme Soviet held a regular meeting on 23 November at which Andropov, general secretary of the CPSU Central Committee, was elected member of the Presidium of the Supreme Soviet. The president of the Presidium will be elected shortly. The meeting discussed the economic plan and state budget for next year.

In his report to the meeting, Baybakov, chairman of the State Planning Committee, said: The national income of the Soviet Union this year is expected to reach 460 billion rubles, an increase of 2 percent over that of last year. This shows that the original plan, which calls for an increase of 3 percent, has not been fulfilled.

Garbuzov, USSR minister of finance, said in his report: In the state budget for next year, revenues will be 354 billion rubles while expenditures will be 353.8 billion rubles. He announced that Soviet military expenditures for the next year will be 17.05 billion rubles, equivalent to 4.8 percent of the total expenditures in the national budget.

USSR SUPREME SOVIET SESSION CLOSES 24 NOV

OW250824 Beijing XINHUA in English 0810 GMT 25 Nov 82

[Text] Moscow, November 24 (XINHUA) -- The two-day meeting of the Supreme Soviet of the USSR closed in the Kremlin today.

At the meeting, Yuriy Andropov, general secretary of the Soviet Communist Party, Stepan A. Shalayev, chairman of the All-Union Central Council of Trade Unions, and Nikolay G. Basov, chairman of the "Znanie" (Knowledge) Society of the USSR, were elected members of the Presidium of the Supreme Soviet. Newly elected Politburo member Geydar A. Aliyev was appointed first vice-chairman of the Council of Ministers. Tangiz Menteshashvili was elected secretary of the Presidium of the Supreme Soviet to replace the late Mikhail Georgadze.

Nikolay K. Baybakov, chairman of the State Planning Committee, delivered a report at the meeting on the economic plan for 1983.

The meeting discussed and approved the economic plan and the state budget. A law on the state frontier of the USSR was also approved.

FURTHER MATERIALS ON PREMIER SON SANN'S VISIT

Son Sann Press Conference

HK250108 Beijing CHINA DAILY in English 25 Nov 82 p 1

[By staff reporter]

[Text] Son Sann, prime minister of Democratic Kampuchea, said at a press conference held in Beijing yesterday that the coalition government would ceaselessly fight Vietnamese invasion forces until the country's independence and territorial integrity had been restored. He said the 200,000 invaders, backed by the Soviet Union, had been trying desperately to kill off the Khmer identity and Khmer soul. They wished to transform Kampuchea into a southwestern province of Indochina under Hanoi's rule, but they had met stiff resistance.

He warned that the Vietnamese forces were preparing a new offensive and they had restored to the use of chemical weapons. It was necessary to increase guerrilla activities everywhere in Kampuchea, he said.

"I was warmly received in China, the conversation between General Secretary Hu Yaobang and us today was very inspiring," Son Sann said.

He said "Vietnam's attempt to disrupt the unity of the three patriotic forces in Kampuchea is futile. The only way to solve the Kampuchean issue is for the Vietnamese to withdraw and let the Kampuchean people solve their own problems. Vietnam must follow the United Nations resolution on the Kampuchean issue." He appealed to all countries and peace-loving people to provide aid for the national liberation of Kampuchea.

Zhao Ziyang 21 Nov Speech

BK241528 Beijing in Cambodian to Kampuchea 1030 GMT 22 Nov 82

[Text] Zhao Ziyang, premier of the Chinese State Council, gave a banquet in Beijing on 21 November to welcome Son Sann, prime minister of the Coalition Government of Democratic Kampuchea [CGDK], and his party. Zhao Ziyang and Son Sann gave speeches. Zhao Ziyang said: [begin Zhao Ziyang recording in Mandarin fading into translation]

Your Esteemed Excellency Prime Minister Son Sann, esteemed distinguished Kampuchean guests, dear friends and comrades: His Excellency Son Sann is an old friend of the Chinese people. Today I am very happy to offer a warm welcome, on behalf of the Chinese Government and people, to His Excellency Son Sann, prime minister of the CGDK, who is on a friendship visit to China. As a patriot, His Excellency Son Sann has for years joined in the struggle to resist the Vietnamese aggressors and defend the national independence and the cause of the fatherland's liberation. In July this year his excellency signed with Samdech Norodom Sihanouk and His Excellency Khieu Samphan a statement on the formation of the CGDK, thus making new contributions to uniting all the patriotic forces in Kampuchea to resist the Vietnamese aggressors. The formation of the CGDK reflects the desire of the Kampuchean people and conforms to their interests. It also accords with the common aspiration of all justice-upholding countries in the world. It marks a new stage of the Kampuchean people's efforts to strengthen their unity, resist the Vietnamese aggressors and safeguard national independence and state sovereignty.

Since the formation of the CGDK, its three principal leaders have carried out active diplomatic activities, extended the influence of the coalition government and won wider sympathy and support. The 37th UN General Assembly supported Democratic Kampuchea's legitimate seat at the United Nations by an overwhelming majority.

It also adopted a resolution demanding the withdrawal of all foreign troops from Kampuchea, thus once again frustrating the Soviet-Vietnamese schemes. All these are of great significance to the Kampuchean people's struggle against the Vietnamese aggressors and the defense of peace in Southeast Asia and the Asian-Pacific region. The Chinese Government and people sincerely express their great joy over and warm welcome to all the delightful victories scored since the formation of the CGDK.

For more than 3 years the Vietnamese authorities, backed by the Soviet Union, have tried to annex Kampuchea by armed strength. Out of their evil aim to forever occupy Kampuchea, the Vietnamese authorities have sent 200,000 troops to invade Kampuchea, destroy the Kampuchean territory and sovereignty at will and barbarously and cruelly suppress and massacre the Kampuchean forces and patriotic people. But Vietnam's dream of wiping out Kampuchea was smashed by the resistance of the valiant Kampuchean armed forces and people. The Vietnamese aggressors are now bogged down in a quagmire. The Vietnamese authorities have yet to change their policy of aggression and expansion. They continue to refuse to carry out the UN resolution and pull their troops out of Kampuchea. They are preparing for a new operation on the Kampuchea battlefield. Furthermore, the Vietnamese authorities have employed various intrigues to sow dissension among the various Kampuchea patriotic forces in an attempt to obstruct and undermine their coalition. It is correct for Prime Minister Son Sann to say that closing our ranks is our answer.

We believe that if the patriotic forces, under the CGDK leadership, strengthen their unity and persist in the struggle, they will realize the sacred aspiration of the Kampuchean nation in liberating their fatherland from the iron yoke of the Vietnamese aggressors.

Justice in on the side of the Kampuchean people. All the peace-loving and justice-upholding countries and peoples in the world are siding with the Kampuchean people. Final victory certainly belongs to the heroic Kampuchean people.

Now, I would like to propose a toast to the new, continuous victories of the Kampuchean people in their struggle against the Vietnamese aggressors, [applause] to the national unity and coalition of the Kampuchean patriotic forces, [applause] to the traditional friendship between the Chinese and Kampuchean peoples, to the health of His Excellency Prime Minister Son Sann, to the health of all the distinguished Kampuchean guests, to the health of all friends and comrades present here. [end recording]

Son Sann Speech

In his speech Son Sann said: [begin Sonn Sann recording in French fading into translation]

Esteemed Excellency Mr Premier, excellencies, ladies and gentlemen: The great, friendly people of China and their outstanding leaders have always given active support to the Kampuchean people's just struggle against the Vietnamese aggressors. Today I have the great honor and pleasure to come to the PRC in order to express my respect and salutations to them.

At present the Khmer people are following the example set by the great, friendly people of China by waging a heroic struggle to beat back the Vietnamese aggressors. Before 1975 Vietnam had friendly relations with Democratic Kampuchea. However, almost 4 years ago, that is, at the end of 1978, Vietnam sent its army to launch a large-scale, gross intervention against Kampuchea, invading and occupying it. At the beginning of 1979, Vietnam installed a puppet regime in Phnom Penh and forcibly formulated a so-called 25-year treaty of peace, friendship and cooperation in order to impose its colonialist yoke on Kampuchea for 25 years.

In order to realize this goal, Vietnam has increased the number of its occupation troops from 100,000 to 200,000 and sent thousands of North Vietnamese cadres to control with force of arms at all levels, from top to grass-roots levels, of Kampuchea's administrative organs under its control. After that the Hanoi leaders sponsored rigged elections in Kampuchea in an attempt to legalize their occupation and keep the weak Heng Samrin regime alive. As you know, the Vietnamese occupation troops have carried out their barbarous suppression, expansion and annexation activities in Kampuchea. It is known to all that Vietnam's ambition has been to create an Indochina federation under its control since time immemorial. At each stage of the Kampuchean history, Vietnam has tried to cause trouble and to intervene. All peace-loving and justice-holding countries and peoples in the world, particularly the great, friendly people of China, have clearly seen all these Vietnamese activities. At present, Vietnam has tried to eliminate the Kampuchean entity and soul. It has turned our country into one of its provinces in the southwestern part of Indochina. In history it was said that Vietnam had helped to liberate the neighboring countries. In reality, the independent Champa Islamic state that existed before the 13th century lost its name completely. More recently the Khmer territory in Kampuchea Kraom, or Cochin China, was probably annexed at the end of last century. The so-called Vietnamese liberation of Kampuchea was planned dozens of years ago. The Vietnamese occupation troops in Kampuchea have committed all kinds of dishonest activities. This is why our compatriots were compelled to desert their homes, farms and property and fled to the Kampuchean - Thai border to escape massacre. The two goals of the Vietnamese occupation troops are to send the Vietnamese nationals to settle with the Kampuchean people in Kampuchea and to make neighboring Thailand unstable. They have intentionally obstructed the aid destribution and humanitarian relief in order to prevent humanitarian aid from timely reaching the hands of the Kampuchean people, who are suffering from hunger, in order to send this humanitarian aid to Vietnam for their own benefit. Aside from using all kinds of pretexts to bleed our people white, they have arrested and detained tens of thousands of our compatriots, accusing them of launching counterrevolutionary activities. This is in an attempt to wipe out the struggle and efforts to oppose the occupation troops in our country.

Since Vietnam is a member of the United Nations, its invasion and occupation of Kampuchea constitute a flagrant violation of the UN Charter, and this causes untold misery for the innocent, patriotic Kampuchean people. During the past 4 years Vietnam's occupation of Kampuchea has created an increasingly intense and unstable situation in this region, causing well-known adverse consequences. As for the Soviet Union, it has done its utmost to strengthen its strategic position in Southeast Asia by having access to the naval bases in Cam Ranh, Danang and Ream and providing more and more military, financial and other aid to Vietnam. The Soviet Union stands by the side of Vietnam in the Kampuchean conflict. It has constantly launched direct activities. If this is allowed to go on without obstruction, all the Soviet activities will be realized in the long run.

For the past 4 years, that is, in 1979, 1980, 1981 nad on 28 October 1982, the UN General Assembly adopted four resolutions demanding in particular the withdrawal of all foreign troops from Kampuchea and respect for Kampuchea's independence, sovereignty and territorial integrity and the Kampuchean people's right to self-determination.

Likewise, in July 1981 the International Conference on Kampuchea, which was attended by delegates from over 90 countries and the parties concerned, unanimously adopted a communique and a resolution recalling the spirit of the resolutions of the UN General Assembly. This conference called for negotiations to be held in order to ensure a cease-fire and the withdrawal of all foreign troops from Kampuchea, the implementation of measures to safeguard order and peace in Kampuchea and the holding of a free election under the UN supervision to enable the Kampuchean people fully to exercise their right to self-determination, free from any interference.

Vietnam is a UN member and has been deeply involved in the Kampuchean conflicts. If Vietnam really wants peace and stability to be restored in this region, it will certainly be able to find some beneficial factors to enable it to honorably attend the International Conference on Kampuchea to be held in accordance with the announcement and current resolution of the UN General Assembly.

The countries that concern themselves with safeguarding regional and world peace and stability, the ASEAN nations in particular, have made unremitting efforts to work out a peaceful and fair political solution to the Kampuchean issue. Thus, if Vietnam is willing to respect and comply with the UN resolutions by consenting to withdraw its troops from Kampuchea and, through this, shows its willingness to find peaceful solution to the Kampuchean people's tragedy caused by the unjust occupation of their country by the Vietnamese troops, the following point cannot be ruled out, that is, negotiations with Vietnam might be considered and possibly carried out.

Being aware of their noble mission for Kampuchea's liberation, the three resistance forces of Kampuchea unanimously approved the statement establishing the present CGDK on 22 June 1982. The official establishment of the coalition government was announced on Kampuchean territory on 9 July 1982.

As prime minister of the CGDK, I declare that the three parties that form the coalition government pledge to resolutely mobilize all their forces to wage struggles in political, diplomatic and other fields so as to fully restore Kampuchea's independence, sovereignty and territorial integrity. To lead an effective struggle for the liberation of the Khmer people, we are determined to take all necessary actions to maintain and develop the mutual knowledge, trust and understanding among the various parties of the coalition government and to realize the national harmony on the basis of respecting each other's obligations and acknowledged and agreed principles. In the face of the subversive activities of the insidious enemies of the Kampuchean state and people, we shall make every possible effort to safeguard the prestige of our coalition government at home and abroad.

We call on all peace-loving and justice-upholding countries and peoples, first of all the great, friendly people of China, to give all forms of urgent aid to the Kampuchean combatants who are fighting for national liberation. The Kampuchean combatants who are struggling for national liberation are determined to fight more vigorously and fearlessly against the Vietnamese aggressors until final victory and the fatherland is totally liberated. We are convinced that the great, friendly people of China will respond to our appeal because we still remember the wise remark made by the late Excellency Zhou Enlai during his first official visit to Kampuchea following the end of the Bandung Conference in 1958 that China would not implement the policy of big-nation chauvinism. This outstanding remark greatly impressed us. As time has passed, I have become increasingly impressed by the significance and profound influence of this remark.

The attitude and activities of the PRC's high-ranking leaders are always forever. I would like to express my salutations to them for all these noble deeds. In all negotiations with the Soviet Union, the PRC has not forgotten to mention the Kampuchean and Afghan issues. The peoples of these two countries are all suffering from the oppression and domination yoke of hegemonism, that is, present-day colonialism. The Kampuchean people know that the PRC's support for them in all fields is resolute and unswerving support. The Kampuchean people and I would like to express our salutations to the PRC's high-ranking leaders for their noble attitude, that is, they always keep their promise. His Excellency Deng Xiaoping has stated that China will give similar aid to the Kampuchean combatants who are fighting against Vietnam's aggression and for national liberation. I can testify and confirm that concrete actions have been made since this statement. China has really given political and diplomatic support and military and other aid to the Kampuchean combatants fighting against the Vietnamese occupation troops. The resistance combatants of Kampuchea are now rallying in the CGDK.

The great, friendly people of China have given continued and active support to the historic, decisive struggle waged by the Kampuchean people for national liberation. The Kampuchean people will forever remember this support. When we drive all the Vietnamese aggressors out of Kampuchea and win final liberation, we shall build Kampuchea into a truly independent, neutral and nonaligned country with no foreign military bases on our territory. There will truly be democracy and the Kampuchean people will enjoy peace, freedom, fundamental human rights, fundamental rights as citizens and a just and honorable life in our society. In the future, Kampuchea will become a country which cordially and warmly welcomes its guests, loves peace and enjoys happiness. To defend peace and freedom and to safeguard stability and progress, Kampuchea will pursue a policy of harmonious and peaceful coexistence and cooperate sincerely with all countries near or far.

Your Excellency Mr Premier, excellencies, ladies and gentlemen, allow me to express, on behalf of the Kampuchean people, the solemn sentiments of gratitude to the great, friendly people of China for their active and constant support for the Kampuchean people's struggle for national liberation. On behalf of the Kampuchean people and in my own name, I would like to extend sincere wishes to the PRC for its prosperity, glory and powerful strength.

Long live the PRC, long live the friendship between the great, friendly Chinese people and the Kampuchean people, long live the Coalition Government of Democratic Kampuchea. The Kampuchean people will win. [end recording]

Zhao Ziyang Sees Son Sann Off

OW242158 Beijing XINHUA in English 1523 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Son Sann, prime minister of the Coalition Government of Democratic Kampuchea, left here this morning for Kunming, with Han Nianlong, adviser to the Chinese Foreign Ministry.

Prior to Son Sann's departure, Premier Zhao Ziyang went to the guesthouse to bid him farewell.

Son Sann thanked the Chinese Government for the reception accorded him during his stay in Beijing.

Zhao Ziyang said Son Sann repeatedly told him he would continue the unity of the coalition government and the resistance to the Vietnamese aggressors. "We highly appreciate this position," he said.

The Chinese premier said "To persist in unity and resistance to the Vietnamese aggressors is of prime importance and serves the fundamental interests of the Kampuchean people. It is also of key importance to the development of the situation in Kampuchea."

Son Sann was seen off at the guesthouse and airport by Pech Cheang, ambassador to China of Democratic Kampuchea.

Son Sann was met at the Kunming airport by Meng Qi, vice-governor of Yunnan Province, Zhu Kui, mayor of Kunming, and other local leaders.

In the evening, the guests attended a banquet hosted by the provincial government.

The guests visited the Yunnan Institute for Nationalities this afternoon.

Son Sann Leaves Kunming

OW261320 Beijing XINHUA in English 1255 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Son Sann, prime minister of the Coalition Government of Democratic Kampuchea, concluded his visit to China and left Kunming this morning for home via Guangzhou.

Son Sann and his party were seen off at Kunming airport by Meng Qi, vice-governor of Yunnan Province.

Han Nianlong, adviser to the Ministry of Foreign Affairs, accompanied the guests to Guangzhou and saw them off at Guangzhou airport with Liang Weilin, vice-governor of Guangdong Province.

During their short stay in Guangzhou, the guests were given a luncheon by the Guangdong Provincial Government.

PENG CHONG, NPC DELEGATION VISIT SOUTHEAST ASIA

Report on Thailand Visit

HK260339 Beijing RENMIN RIBAO in Chinese 23 Nov 82 p 6

["Newsletter From Thailand" by Wang Rongjiu [3769 2837 0036] and Yang Qun [2799 5028]: "Kinsmen Are Getting Closer and Closer -- on NPC Delegation Visit to Bangkok"]

[Text] In November in Beijing the earth is covered with frost, but in Bangkok there is a blazing sun overhead and green vegetation everywhere. The NPC delegation led by Peng Chong, vice chairman of the 5th NPC Standing Committee, arrived in Bangkok in the afternoon of 12 November. Boonteng Thongsawasdi, speaker of the House of Representatives, and many other Thai friends went to the airport to greet the delegation. That night Harin Hongsakul, president of the Senate, held a banquet in the Senate Club to welcome the delegation. President Harin and Vice Chairman Peng Chong made warm addresses at the banquet. They unanimously held that developing friendly Sino-Thai relations is in keeping with the common interests of the people of the two countries and, in addition, helps to uphold peace in the region and the world. They stressed that the Kampuchea issue is the root of the turbulent situation in this region. Only when the Kampuchea issue is settled can there be genuine peace in Southeast Asia. On the eve of his visit to China, Prem Tinsulanon, the Thai prime minister, met and entertained Vice Chairman Peng Chong and the entire delegation at a banquet in his residence. Priem Minister Prem said: "The friendship between China and Thailand will continue to be strengthened. The vice chairman's visit improves relations."

Wherever the delegation went it was warmly welcomed and entertained. In Lampang in northern Thailand, the members were entertained at a "kangdu" [1660 4648] banquet. The "kangdu" is a traditional supper with a strong local flavor. People in northern Thailand use it to entertain guests from afar. With floral leis around their necks, members of the delegation sat on the floor and tasted typical local dishes. At the banquet, the mayor of Lampang invited Vice Chairman Peng Chong to dance the Thai dance "Nanwang" [0589 2489] with him. The gaiety of the banquet reached its climax when members of delegation danced with their Thai friends to the joyous and relaxed melody.

The visit to the Floating Market enabled the NPC delegation to gain a more profound understanding of the life of the Thai people. That morning, Peng Chong and other members of the delegation were driven in a car to Dannushadao [0030 0505 3097 6670] County in Rat Buri which is 80 kilometers away from Bangkok. The place is situated in the Lue Klong River valley. There is a criss-cross network of 270 streams of different sizes and water communciation lines extend in all directions; natural conditions are favorable for the Floating Market. Every morning -- with straw hats on their heads -- peasants from different places row their boats which are full of bananas, coconuts, mandarin oranges, fresh kidney beans, white gourds, persimmons and so on to the Floating Market. The Floating Market bustles with noise and excitement. The arrival of the delegation enhanced the excitement there. A handicraft merchant presented a sword with both hands to Vice Chairman Peng Chong and said: "According to Thai custom, sharp weapons are normally not given to people as gifts. Thus, one who receives a sharp weapon should give 1 baht in return to show that he has 'bought' the weapon." Vice Chairman Peng Chong immediately gave him 2 baht, smiled and said: "According to Chinese custom, fortunes never come singly, so I 'buy' your sword with 2 baht." All their Thai friends laughed. A lady shopkeeper waited, with handicrafts in her hands, on the jetty which the delegation would pass. She told the reporter that: "I give these things to the Chinese people as gifts of my own accord. They are not worth much, but they are a token of our regard. Two days ago, I heard that the NPC delegation would come to Thailand. I was extremely happy. Our prime minister is visiting China now. It is nice to have frequent contacts." Talking about this visit Comrade Lin Liyun, one of the delegates, said: "We felt that we were in our own homes." This is what all the delegates wanted to say.

The beautiful scenery, the hard-working people, the hospitable hosts and the friendly relationship have provided the delegation with sweet momories. In the afternoon of 19 November, the vice chairman and the delegation left Bangkok to visit Malaysia and the Philippines. When the delegation members spoke parting words to their host who had come to see them off, they promised that there would be frequent contacts between the people of the two countries. At that moment, one could not help being reminded of what President Harin said at the return banquet: "Our senate has been entertaining many delegations. However, we do not treat your excellency, Mr Peng Chong, as our guest; we treat you as our kinsman."

Meet Malaysia's Musa Hitam

OW250107 Beijing XINHUA in English 1851 GMT 24 Nov 82

[Text] Kuala Lumpur, November 24 (XINHUA) -- The Malaysian Government appreciated the close cooperation between Malaysia and China on the Kampuchean issue.

Deputy Prime Minister and Minister of Home Affairs Musa Hitam made the statement when Peng Chong, head of the delegation of the Chinese National People's Congress, called on him this afternoon.

"Malaysia is happy to see that China is always sympathetic with and supporting the stands and positions of Malaysia and ASEAN in their opposition to the aggression of Kampuchea by Vietnam in many international forums," he said.

He also said: "China joins the ASEAN countries in denouncing Vietnam for the destruction of Kampuchean cultural heritage. China always supports the principle of sovereignty, independence and self-determination of Kampuchea."

The deputy prime minister said that he believed China's support will continue.

Peng Chong reiterated China's firm and consistent stand on the Kampuchean issue. He said: "The Chinese government and people will, as always, firmly support the Kampuchean people in their just struggle against Vietnamese aggression until the final victory."

Peng believed that the Kampuchean people, with the support of peace-loving peoples including peoples of ASEAN, will surely defeat the Vietnamese aggressors.

Host Banquet in Kuala Lumpur

OW250441 Beijing XINHUA in English 1856 GMT 24 Nov 82

[Text] Kuala Lumpur, November 24 (XINHUA) -- Datuk Mohamed Zahir Ismail, speaker of the Malaysian House of Representatives, stressed today that the visit of the Chinese National People's Congress (NPC) delegation here had promoted the good relations between the two countries.

Speaking at a farewell banquet given by Peng Chong, head of the visiting Chinese NPC delegation, Ismail said: "We have exchanged views on questions of mutual concern and this is beneficial to both of us." He also expressed the hope that bilateral trade would be further expanded.

Peng Chong in his farewell speech stressed that the steady increase of exchanges and contacts between the two countries and consistent [word indistinct] on of mutual understading and trust [word indistinct] very important to the development of national economy of both countries as well as to the maintenance of peace in Southeast Asia and the Asian and Pacific region.

Peng Chong called on the president of the Senate, Tan Sri Datuk Ismail Khan, this morning. Ismail Khan expressed the belief that the relations between Malaysia and China are very important to the maintenance of peace and tranquility in the Pacific region." [Words indistinct] the Malaysian government thinks it important to develop relations with China," he added. The Malaysian Senate president accepted China's NPC Standing Committee's invitation to visit China.

Arrive in Manila From Malaysia

OW260544 Beijing XINHUA Domestic Service in Chinese 0230 GMT 26 Nov 82

[Text] Manila, 25 Nov (XINHUA) -- President Ferdinand E. Marcos received and had a cordial conversation with Peng Chong, vice chairman of the Chinese NPC standing committee, and his party here this evening. Speaker of Batasang, Pambansa Querube C. Makalintal and Chinese Ambassador to the Philippines Mo Yanzhong were present on the occasion. Peng Chong is leading an NPC delegation on a visit here at the invitation of the Philippine Batasang Pambansa (Parliament). The Chinese delegation arrived here this afternoon from Kuala Lumpur after a two-day friendship visit to Malaysia. In [words indistinct] made upon arrival at the Manila International Airport, Peng Chong said that he hopes that the visit will be conducive to the promotion of contacts between the Chinese NPC and the Philippine Batasang Pambansa, as well as to the further strengthening of relations and cooperation between the two countries.

FIFTH SESSION OF FIFTH NPC OPENS 26 NOV

Presidium Elected 25 Nov

OW250300 Beijing XINHUA in English 0243 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- Peng Zhen, vice-chairman of the Standing Committee of the National People's Congress, declared today that all preparations for the Fifth Session of the Fifth National People's Congress have been completed. The session, which opens tomorrow, will last for 15 days.

Peng Zhen made this statement at a preliminary meeting of the N.P.C. session in the Great Hall of the People here this morning. The preliminary meeting was attended by 2,957 deputies.

Officiating at the meeting, Peng said the main items on the agenda of the coming session include examination of the draft of the revised constitution of the People's Republic of China and examination of the Sixth Five-Year Plan for the development of the national economy.

The constitution is the fundamental law of the state as well as the cardinal guideline for running the country, Peng said. The Sixth Five-Year Plan is a program of action for achieving the splendid goals of modernization in China, he said.

Both are major events of great interest to the people of China, he said. "These two events are of paramount importance for achieving China's socialist modernization, making China a socialist country with a high level of civilization and democracy, and mobilizing people of all our nationalities to work with one mind and fulfill this monumental task," Peng stated.

The preliminary meeting elected a 253-member Presidium with Yang Shangkun as secretary general and adopted the agnda for the N.P.C. session. It also decided the composition of the Motions Examination Committee with Luo Qingchang as chairman and elected Wu Xiangbi (Miao nationality) as a new vice-chairman of the Nationalities Committee of the Fifth National People's Congress.

Agenda Approved

OW250356 Beijing XINHUA in English 0344 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- The agenda for the Fifth Session of the Fifth National People's Congress was approved at a preliminary meeting here this morning. It reads as follows:

1. Report on the draft of the revised constitution of the People's Republic of China delivered by Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution.

Adoption of the constitution of the People's Republic of China.

2. Endorsement of a resolution regarding the anthem of the People's Republic of China.

3. Report on the Sixth Five-Year Plan delivered by Zhao Ziyang, premier of the State Council.

Endorsement of a resolution regarding the report on the Sixth Five-Year Plan.

4. Report on the implementation of the 1982 national budget and a draft plan for the 1983 national budget delivered by Wang Bingqian, minister of finance.

Endorsement of a resolution regarding the report.

5. Explanation of four draft laws made by Xi Zhongxun, vice-president of the N.P.C. Standing Committee and chairman of its Commission of Legislative Affairs.

Adoption of the organic law of the National People's Congress of the People's Republic of China and the organic law of the State Council of the People's Republic of China, and endorsement of resolutions on revising some provisions in the organic law of the local people's congresses and local people's governments at various levels, and on revising some provisions in the electoral law of the National People's Congress of the People's Republic of China and the local people's congresses at various levels.

6. A written report on the work of the N.P.C. Standing Committee delivered by Yang Shangkun, vice-chairman and secretary general of the N.P.C. Standing Committee.

Endorsement of a resolution regarding the report.

7. A written report on the work of the Supreme People's Court delivered by Jiang Hua, president of the court.

A written report on the work of the Supreme People's Procuratorate delivered by Chief Procurator Huang Huoqing.

Endorsement of a resolution regarding these two reports.

8. Explanation concerning the number and election of deputies to the Sixth National People's Congress delivered by Yang Shangkun.

Endorsement of a resolution on the number and election of deputies to the Sixth N.P.C.

9. Miscellaneous.

Presidium Holds Meeting

OW250422 Beijing XINHUA in English 0406 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- The Presidium of the Fifth Session of the Fifth National People's Congress held its first meeting here this morning.

Yang Shangkun, vice-chairman and secretary general of the N.P.C. Standing Committee, presided over the meeting.

The meeting elected 20 executive members of the Presidium. They are Ye Jianying, Peng Zhen, Deng Yingchao, Ulanhu, Wei Guoqing, Tan Zhenlin, Li Jingquan, Peng Chong, Seypidin, Liao Chengzhi, Ngapoi Ngawang-Jigme, Xu Deheng, Hu Juewen, Xiao Jingguang, Shi Liang, Xi Zhongxun, Su Yu, Yang Shangkun, Bainqen Erdini Qoigyi Gyaincain and Zhu Xuefan.

The meeting decided that Xi Zhongxun, Peng Chong, Wu Xinyu, Wang Hanbin and Zeng Tao will serve as deputy secretaries general at the present session.

The meeting approved the formation of a group in charge of the work concerning the constitution, with Hu Sheng as head of the group. The task of the group, which is under the leadership of the Presidium, is to make necessary revisions to the draft of the national constitution in accordance with opinions advanced by deputies in panel discussions and to submit a report on its work to the Presidium.

The Committee for the Revision of the National Constitution has completed its task by presenting the draft of the revised constitution to the congress.

Today's meeting heard and approved a report delivered by Song Renqiong, chairman of the Credentials Committee, on the general situation of the deputies and the examination of the credentials of the newly elected deputies.

The Credentials Committee held its meeting earlier this morning.

The report said that 32 deputies died and eight others were recalled by their constituencies since the Fourth Session of the Fifth N.P.C. Eight new deputies were elected.

The Credentials Committee examined the qualifications of the eight new deputies and affirmed the validity of their representation. The number of deputies to the Fifth N.P.C. Now totals 3,421.

The meeting also decided to submit a draft resolution regarding the anthem of the People's Republic of China to the congress for examination.

The schedule for the Fifth Session of the Fifth N.P.C. was also adopted at the meeting.

Presidium Namelist

OW251136 Beijing XINHUA Domestic Service in Chinese 0234 GMT 25 Nov 82

[Text] Beijing, 25 Nov (XINHUA) -- The following is the namelist of the members and secretary general of the Presidium of the Fifth NPC Session:

Presidium (number of members: 253; names listed in the order of the number of strokes in their surnames):

Ding Guangxun, Yu Guangyuan, Cedain Zhoma (female), Wan Da, Xi Zhongxun, Ma Wenrui, Ma Qingnian, Ma Hengchang, Ma Haoqian, Wang Ping, Wang Shitai, Wan Bicheng, Wang Yeqiu, Wang Kunlun, Wang Shoudao, Wang Enmao, Wang Duo, Wang Ganchang, Wang Qian, Wang Ruichang, Wang Zhen, Tian Bao, Wei Guoqing, Zhaxi Wangque, Ou Tangliang (female), You Taizhong, Bei Shizhang, Mao Wenshu (female), Mao Zhiyong, Ulanhu, Ba Yikai, Ba Jin, Basang (female), Deng Xiaoping, Deng Diantao, Deng Yingchao (female), Yu Rong [3768 2837] (female), Gan Weihan, Shi Zhongqin (female), Puncog Wangjie, Lu Shenghe, Ye Fei, Ye Shengtao, Ye Jianying, Ye Honghai, Tian Fuda, Shi Laihe, Shi Liang (female), Bai Rubing, Bai Shouyi, Feng Jixin, Pu Chunzi [2613 2504 1311] (female), Bi Ken (female), Lu Shuxiang, Lu Ji, Zhu Guangya, Zhu Xuefan, Qiao Xiaoguang, Wu Chan, Ren Zhongyi, Hua Luogeng, Xiang Layu (female), Zhuang Xiquan, Liu Tianfu, Liu Zhijian, Liu Yunsheng [0491 5366 3932] (female), Liu Jie, Liu Minghui, Liu Nianzhi, Liu Fei, Guan Shanyue, Jiang Yizhen, Jiang Weiqing, An Pingsheng, Xu Jie, Xu Dixin, Xu Jiatun, Xu Dengheng, Namra, Ting Mao [1694 2021], Ruan Bosheng, Yin Fatang, Yan Youmin, Yan Zheng, Yan Jici, Yan Jiaan, Lu Guojun [5684 0948 0193], Keyum Matniyaz, Su Buqing, Du Xinyuan, Li Renlin, Li Jingquan, Li Shizhang, Li Yamin (female), Li Zhen (female), Li Jianzhen (female), Li Chang, Li Huang, Li Tinggui, Li Qiang, Li Ruishan, Li Fuzhong, Li Jukui, Li Desheng, Yang Yongqing [2799 3057 7230] (female), Yang Chengwu, Yang Xiufeng, Yang Shangkun, Yang Shangkui, Yang Yichen, Yang Yong, Yang Dezhi, Xiao Hua, Xiao Jingguang, Wu Xianfeng, Wu Kehua, Wu Ruoan (female), Wu Chengqing, Wu Huanxing, Wang Yuxia (female), Wang Feng, Song Renqiong, Zhang Tianfang, Zhang Wenyu, Zhang Pinghua, Zhang Tingfa, Zhang Qilong, Zhang Binggui, Zhang Jinbang, Zhang Guizhen (female), Zhang Fucai, Ngapoi Ngawang-Jigme, A-yi-tu-la (female), Chen Yuniang (female), Chen Zaidao, Chen Weida, Chen Xiaoshun, Chen Yisong, Chen Jingrun, Chen Dengke, Chen Fuhan, Wu Xinyu, Fang Zhongzhi, Mao Yisheng, Lin Yishan [2651 0001 1472], Lin Qiaozhi (female), Lin Lanying (female), Lin Liyun (female) Lin Yiping, Lin Tie, Lin Huiqing (female), Guojimugu, Luo Qingching, Luo Shuzhang (female), Luo Dengyi, Pagbalha Geleg Namgyai, Ji Fang, Zhou Zhanao, Zhou Shutao, Zhou Jianren, Zhou Haiying, Xiang Nan, Zhao Puchu, Zhao Lin, Zhao Zhongyao, Zhao Zukang, Zhao Dezun, Zhao Yanxia (female), Hao Shucai [6787 2885 2088], Rong Yiren, Hu Ziang, Hu Lijiao, Hu Jiwei, Hu Sheng, Hu Juewen, Hu Yuzhi, Hu Yaobang, Kui Bi

[1145 3880], Duan Suquan, Duan Junyi, Hou Zhanyou [0186 0594 0645] Hou Baolin, Rao Shoukun, Hong Sisi, Hong Xuezhi, Zhu Xingfa [4376 2502 4099], Fei Yiming, Bainqen Erdini, Qoigyi Gyaincain, Qin Jiwei, Yuan Renyuan, Nie Rongzhen, Mo Wenhua, Li Youwen, Jia Tingsan, Xabchung Garbo, Gu Zhuoxin, Yan Dakai, Qian Sanqiang, Qian Xuesen, Tomur Dawamat, Tie Ying, Ni Zhifu, Xu Xiangqian, Ai-xin-jue-luo Pu-jie [1947 2450 6030 5012 3302 2638], Gao Houliang, Guo Lanying (female), Guo Linxiang, Tang Kebi (female), Pu Jiexiu (female), Hai Yuchen, Tao Zhiyue, Cuo Mu [2238 1192] (female), Huang Kecheng, Huang Bingwei, Huang Oudong, Huang Rong, Huang Juxiang (female), Chang Xiangyu (female), Sheng Wan (female), Kang Keqing (female), Liang Biye, Liang Jiquan, Peng Chong, Peng Dixian, Peng Zhen, Dong Tianzhen, Dong Qiwu, Han Ningfu, Han Quanhua [7281 2938 5478] (female), Su Yu, Zeng Sheng, Zeng Siyu, Xie Bingxin (female), Xie Ming, Xie Tieli, Rui Ban, Chu Tunan, Yi Shijuan (female), Pei Changhui, Liao Hansheng, Liao Zhigao, Liao Chengzhi, Seypidin, Tan Youlin, Tan Qilong, Tan Shanhe, Tan Zhenlin, Miao Yuntai, Pan Duo (female), Pan Chengxiao, Huo Shilian, Ji Chunguang, Dai Nianci.

Secretary general: Yang Shangkun.

Motions Committee Namelist

OW251206 Beijing XINHUA Domestic Service in Chinese 0701 GMT 25 Nov 82

[Text] Beijing, 25 Nov (XINHUA) -- Namelist of chairman, vice chairmen and members of the Motions Committee of the Fifth Session of the Fifth NPC: (59 persons):

Chairman: Luo Qingchang

Vice chairmen: Hong Xuezhi, Yan Jici, Li Shizhang, Huang Rong, Qin Lisheng, Kang Yonghe.

Members (names listed in order of the number of strokes in their surnames):

Ding Guangxun, Ma Zhijie [7456 1807 2638], Ma Hengchang, Zha-xi-la-mu (female), Ou Tangliang (female), Fang Zhichun, Batu Bagen, Ba Jin, Deng Liqun, Shen Jilan [3947 4764 5695] (female), Shi Huaibi [0670 2037 3880], Cheng Fangwu, Cheng Shengsan, Ren Xinmin, Hua Fengxiang [5478 7685 5046], Hua Yuqing, Zhuang Mingli, Liu Yi, Li Furong, Wu Guozhen [0702 0948 4394], Wu Xuezhou, He Xian [0149 6343], Zhang Pinghua, Lu Rongshu, A-yi-nu-la A-pi-zi (female), Lin Lanying (female), Lin Jiamei (female), Jin Minghan, Zhou Li, Zhou Gucheng, Zheng Ying [6774 5391], Zhao Fasheng, Zhao Puchu, Zhao Tingguang [6392 1694 0342], Zhao Zukang, Zhao Ximing [6392 0823 2494], Hao Deqing, Shi Jiaming [2457 0857 2494], Mo Naiqun, Jia Tingsan, Qian Sanqiang, Xu Boxin, Xu Meisheng, Ling Yun, Guo Dihuo, Pu Jiexiu (female), Tao Zhiyue, Peng Dixian, Hui Yuyu, Tong Shaosheng, Zeng Zhi (female), Xie Bingxin (female).

Fifth NPC Opens 26 Nov

OW260932 Beijing XINHUA in English 0915 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- The Fifth Session of the Fifth National People's Congress (N.P.C.) opened at the Great Hall of the People here this afternoon.

Ye Jianying, executive chairman of the session and chairman of the N.P.C. Standing Committee, declared the congress open at three p.m. A military band played the national anthem.

A total of 3,155 deputies attended today's meeting which proceeded in a warm atmosphere of unity.

Peng Zhen, vice-chairman of the Committee for Revision of the Constitution, delivered a report on the drafting of the revised constitution on behalf of the committee and its chairman, Ye Jianying.

Peng Zhen said the present draft maintains and develops the fundamental principles of the 1954 constitution, while incorporating a careful summary of the rich experience of China's socialist development and drawing on international experience. It also takes into account both the current situation and the prospects for development.

He said this session of the National People's Congress assuredly can promulgate a constitution that is distinctively Chinese, suits the needs of China's socialist modernization in the new historical period and will remain valid for a considerable period of time.

Peng Zhen explained the basic content of the draft of the revised constitution in the light of the opinions gathered during nation-wide discussions. His explanation consists of six parts: 1. China's state system, the people's democratic dictatorship; 2. China's socialist economic system; 3. socialist spiritual civilization; 4. the structure of the state; 5. unity of the country and unity of all the nationalities; 6. China's independent foreign policy.

At today's meeting, the Presidium put forward a draft resolution on the national anthem of the People's Republic of China for deliberation by the congress. The Credentials Committee made a writeen report on the general situation of the deputies and the examination of the credentials of the newly elected deputies.

The other executive chairmen at today's meeting were Peng Zhen, Deng Yingchao, Ulanhu, Wei Guoqing, Tan Zhenlin, Li Jingquan, Seypidin, Liao Chengzhi, Ngapoi Ngawang-Jigme, Xu Deheng, Hu Juewen, Xiao Jingguang, Shi Liang, Xi Zhongxun, Yang Shangkun and Bainqen Erdini Qoigyi Gyaincain.

Members of the Fifth National Committee of the Chinese People's Political Consultative Conference attended today's meeting as observers.

Attending today's meeting as observers were also members of the State Council; leading members of the departments under the N.P.C. Standing Committee; leading members of the Supreme People's Court, the Supreme People's Procuratorate, and the organizations directly under the Central Committee of the Chinese Communist Party and the State Council; leading members of the general departments, various arms and services and military academies of the Chinese Poeple's Liberation Army; and Chinese diplomatic envoys to foreign countries who are now in Beijing.

Foreign diplomatic envoys to China and foreign correspondents attended the meeting as guests.

Peng Zhen on Constitution

OW260854 Beijing XINHUA in English 0832 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- The draft of the revised constitution now submitted to the current National People's Congress session for deliberation is a product of two years' revision and discussion which effectively pooled the wisdom of the people. This was stated by Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, at the Fifth Session of the Fifth N.P.C. which opened here today.

In his report on the drafting of the revised constitution, Peng Zhen said the concensus of the nationwide discussion from late April through August is that the draft scientifically sums up the historical experience of China's socialist development, that it reflects the common will and fundamental interests of all nationalities in the country, conforms to the situation in China and meets the needs of socialist modernization.

Peng Zhen pointed out that the constitution currently in force was adopted by the Fifth N.P.C. at its First Session in March 1978. Since then, the country has passed through a period of important historical change. Enormous changes have taken place in the country's political, economic and cultural life. The constitution as it stands no longer conforms to present realities in many ways, nor does it suit the needs of the life of the state. Thus, an all-round revision is necessary.

In accordance with a resolution adopted by the Fifth N.P.C. at its Third Session on September 10, 1980, a Committee for the Revision of the Constitution was set up. The committee and its secretariat solicited opinions widely from all localities, departments and quarters, closely studied them and, in February 1982, submitted a draft for discussion.

After further discussions and revisions, the draft was made public by the N.P.C. Standing Committee in April and submitted to the people of all nationalities in the country for discussion. In the light of the opinions and suggestions raised in the nationwide discussion, the secretariat of the committee made further revisions of the draft in September. After approval by the committee on November 23, the draft is now submitted to this N.P.C. session for deliberation.

Peng Zhen said: "The drafting was done under the overall guidance of the four cardinal principles, namely, adherence to the socialist road, to the people's democratic dictatorship, to leadership by the Communist Party of China, and to Marxism-Leninism and Mao Zedong Thought. These cardinal principles form the common political basis for the united advance of the people of all our nationalities and are the fundamental guarantee for the smooth progress of our socialist modernization."

The four cardinal principles, Peng Zhen noted, are both a reflection of the law of historical development that is independent of human will and the decisive choice of the hundreds of millions of Chinese people in the course of long years of struggle.

Peng Zhen said that the first constitution of the People's Republic of China adopted in 1954 was a very good one. But at that time China had just begun socialist transformation and construction.

Since enormous changes have taken place in China, Peng Zhen said, it is natural that the 1954 constitution no longer fully meets the current situation. The present draft maintains and develops the fundamental principles of the 1954 constitution, while incorporating a careful summary of the rich experience of China's socialist development and drawing on international experience. It also takes into account both the current situation and the prospects for development.

Therefore, Peng Zhen said, this session of the National People's Congress assuredly can promulgate a constitution that is distinctively Chinese, suits the needs of China's socialist modernization in the new historical period and will remain valid for a considerable period of time.

Peng on Rights of Citizens

OW260906 Beijing XINHUA in English 0843 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- China's state system of the people's democratic dictatorship and her socialist social system provide de facto and de jure guarantees that the Chinese citizens enjoy extensive and genuine freedoms and rights.

Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, made this remark at the Fifth Session of the Fifth National People's Congress here today.

In his report on the drafting of the revised constitution, Peng Zhen said the draft explicitly stipulates that "all power in the People's Republic of China belongs to the people." This is the kernel of China's state system and a fundamental principle governing it, he said.

The draft has reinstated the provision in the 1954 constitution that all citizens are equal before the law, Peng Zhen said. China's laws are drawn up by the whole nation under the leadership of the working class and are the concentrated expression of the will and interests of the people.

"No citizen is allowed to enjoy privileges that transcend the constitution and the law," Peng Zhen stated. "It is imperative to reinstate this provision, for it represents a basic principle that ensures the application of socialist democracy and legality."

He quoted the first article of the draft revised constitution which says: "The People's Republic of China is a socialist state under the people's democratic dictatorship led by the working class and based on the alliance of workers and peasants." This determines the nature of the state and constitutes China's state system, he said.

In essence, the people's democratic dictatorship in China is a dictatorship of the proletariat, Peng Zheng explained. The people's democratic dictatorship, a form created by the Chinese people under the leadership of the Chinese Communist Party, suits the conditions and revolutionary traditions of China.

Since an extremely broad united front has been formed under the leadership of the Chinese Communist Party in the long years of revolution and construction, Peng Zhen said, China is in a position to practise democracy among the greatest number of people while narrowing the target of dictatorship to just a handful of persons. The formulation -- the people's democratic dictatorship -- clearly shows the democratic nature of China's state power.

Peng Zhen said the right to elect and to stand for election are important indicators that the people exercise state power. According to statistics from the 1981 general election, 99.97 per cent of the citizens at and above the age of 18 enjoyed these rights. This fully demonstrates the broad scope of socialist democracy in China, Peng Zhen said.

In the light of historial experience and the lessons of the "Cultural Revolution," he said, the draft has not only restored what was relevant in the provisions on the fundamental rights of citizens in the 1954 constitution, but made these provisions more specific and explicit and added new content.

He mentioned the additional provision on the inviolability of the personal dignity of citizens, the more specific provisions on citizens' freedom of person and religious belief, the inviolability of their homes, the protection of their freedom and privacy of correspondence by law, their right to criticize and make proposals to any organ of state or its functionaries, and to make appeals, complaints or charges against violation of the law or dereliction of duty by any organ of state or its functionaries.

The draft stipulates: "The exercise by citizens of the People's Republic of China of their freedoms and rights may not infringe upon the interests of the state, of society and of the collective, or upon the lawful freedoms and rights of other citizens."

Peng Zhen explained that freedoms and rights with absolutely no restrictions have never existed in the world. As China is a socialist country, the interests of the state and society are in basic accord with the citizens' personal interests. "Only when the democratic rights and fundamental interests of the people as a whole are ensured and extended will it be possible for the freedoms and rights of individual citizens to be effectively ensured and fully realized," Peng Zhen said.

The draft also specifies the citizens' duties to the state and society. "Only when all observe and perform their fundamental duties as citizens can they be sure of enjoying their civic rights as prescribed by the constitution," he said.

Peng Zhen noted that democracy among the people is one aspect of the people's democratic dictatorship, the other being dictatorship exercised by the entire people over their enemies. With the elimination of the system of exploitation and the exploiting classes, the targets of this dictatorship are no longer complete reactionary classes, and the number of people involved is much smaller. However, class struggle will continue to exist within certain limits for a long time, and may even sharpen under certain conditions.

Therefore, he said, it is essential to uphold the function of the state as an instrument of dictatorship and, in accordance with the constitution and the law, suppress treasonable and other counter-revolutionary activities and strike at dangerous criminals who attempt to undermine and overthrow the socialist system in the economic and other fields.

It is imperative to uphold these functions in order to ensure successful implementation of the socialist modernization programme and safeguard and promote socialist democracy, Peng Zhen said.

Peng on Reunification

OW260916 Beijing XINHUA in English 0858 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Establishment of special administrative regions to suit the special situation arising from the future reunification of Taiwan with the mainland of China is one of the new provisions in the draft revised constitution.

Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, said this at the Fifth Session of the Fifth National People's Congress here today.

An article in the draft says: "The state may establish special administrative regions when necessary. The rules and regulations in force in special administrative regions shall be instituted by the National People's Congress in legal form in accordance with their specific conditions."

In his report on the draft revised constitution, Peng Zhen said an early end to the separation of Taiwan from the mainland will be highly conducive to the prosperity of the Taiwan region and the motherland as a whole, and to the maintenance of peace in the Far East and in the whole world.

It is an inevitable trend in accord with the desires of the people, and no political party, force or individual can resist it, Peng Zhen said. It is an internal affair of China, and no foreign country has the right to interfere in it.

Peng Zhen quoted the statement made last year by Ye Jianying, chairman of the Standing Committee of the National People's Congress, who said that, after peaceful reunification, Taiwan can enjoy a high degree of self-government as a special administrative region. This power of self-government means, among other things, that the present social and economic systems in Taiwan, its way of life and its economic and cultural relations with foreign countries will remain unchanged.

Peng Zhen said: "We are absolutely unequivocal on the principle of safeguarding China's sovereignty, unity and territorial integrity. At the same time, we are highly flexible as regards specific policies and measures and will give full consideration to the concrete situation in the Taiwan region and the wishes of the people in Taiwan and those of all personages concerned. This is our basic position in handling problems of this kind."

Peng on Foreign Policy

OW260922 Beijing XINHUA in English 0904 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Independence, as the basic principle of China's foreign policy, has been written explicitly into the draft of the revised constitution, stated Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, at the Fifth Session of the Fifth National People's Congress here today.

"No matter what happens outside China, we will adhere to the policy of independence," he said. "As Comrade Deng Xiaoping said at the Twelfth National Congress of the Chinese Communist Party: 'No foreign country can expect China to be its vassal, nor can it expect China to swallow any bitter fruit harmful to China's interests.'"

Peng Zhen said China's independent foreign policy involves developing diplomatic relations and economic and cultural exchanges with various countries on the basis of the five principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-intereference in each other's internal affairs, equality and mutual benefit, and peaceful coexistence; opposing imperialism, hegemonism and colonialism; strengthening unity with the people of other countries; supporting the oppressed nations and developing countries in their just struggle to win and preserve national independence and develop their national economies, and striving to safeguard world peace and promote the cause of human progress.

He said: "Our adherence to these principles of foreign policy is dictated by the nature of our state and our social system." The establishment of the socialist system has rooted out the social causes both of China's submission to any foreign oppression and of any possibility of China committing aggression abroad in any form, he noted.

"The world today is in the throes of intense turbulence, and this turbulent situation will not end so long as imperialism and hegemonism exist in the world. No matter what happens outside China, we will adhere to the policy of independence," he declared.

"We will also persist in the treating all countries, big or small, as equals and consistently stand on the side of all oppressed nations and developing countries as well as all other countries and people working for world peace. China will never seek hegemony and will never allow any hegemonists to subdue it," he added.

Peng Zhen said that China follows the policy of opening to the outside world on the premise of independence and will continue to do so in the future. China will continue to expand its economic, technical and cultural exchanges with other countries on the principles of equality and mutual benefit. The draft stipulates that foreign economic organizations and individual foreigners can invest in China and enter into economic cooperation with Chinese economic organizations. All foreign economic organizations in China must abide by the laws of the people's Republic of China, and their lawful rights and interests will be protected by the laws of the People's Republic of China.

In accordance with international practice, he said, China protects the legitimate rights and interests of Chinese nationals residing abroad, and at the same time, calls on them to abide by the laws of the country in which they take up residence and to live in harmony with the people of that country. China protects the legitimate rights and interests of foreigners residing in China and, at the same time, requires that they abide by the laws of the People's Republic of China.

Peng Zhen said China's foreign policy represents the fundamental interests of the Chinese people and is in conformity with those of the people of the world. The draft stipulates that the state shall educate the people in both patriotism and internationalism. The tradition of patriotism and internationalism of the Chinese people must be handed down from generation to generation. "This is the basic guarantee for adhering to our independent foreign policy," he added.

Peng on Economy

OW260934 Beijing XINHUA in English 0925 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Resolutely shifting the focus of the nation's work to socialist modernization of the economy is a major strategic principle in China and all other work should serve this new focal point.

Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, made this statement at the Fifth Session of the Fifth National People's Congress here today.

Peng Zhen said the consolidation and strengthening of the country, the stability and prosperity of Chinese society and the improvement of the people's material and cultural life will, in the final analysis, be determined by the development of production and the success of the modernization program.

This strategic principle must be implemented unswervingly unless there should be a large-scale invasion by enemy forces, he said. Even in that event, economic construction required by the war and permitted by the actual situation must still be carried out. Recording this principle in the constitution is entirely necessary.

The draft of the revised constitution clearly stipulates in its preamble: "The basic task of the nation in the years to come is to concentrate its effort on socialist modernization" and "...to modernize industry, agriculture, national defence and science and technology step by step and turn China into a socialist country with a high level of culture and democracy."

The people of all nationalities in China must work in concert to fulfill this great task, Peng Zhen said.

Peng on Drafting Constitution

OW260954 Beijing XINHUA in English 0929 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- The draft of the revised constitution scientifically sums up the historical experience of China's socialist development, reflects the common will and fundamental interests of all nationalities in the country, conforms to the situation in China and meets the needs of socialist modernization.

This was stated by Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, in his report on the drafting of the revised constitution at the Fifth Session of the Fifth National People's Congress here this afternoon.

Peng Zhen said that two years had been spent on discussing and revising the constitution conscientiously, carefully and meticulously. By exercising democracy, the nationwide discussion effectively pooled the wisdom of the people.

Dwelling on the guidelines for the revision of the constitution, Peng Zhen pointed out that the monumental changes brought about by the Chinese revolution over the past century and more have led the Chinese people to the fundamental conclusion: But for the Chinese Communist Party there would be no New China, and only socialism can save China.

This is why, he said, the four cardinal principles -- adherence to the socialist road, to the people's democratic dictatorship, to leadership by the Communist Party of China, and to Marxiam-Leninism and Mao Zedong Thought -- constituted the overall guidelines for drafting the revised constitution.

Peng Zhen gave a six-point explanation on the basic contents of the draft revised constitution.

1. Concerning the people's democratic dictatorship, Peng Zhen said this is a system created by the Chinese people under the guidance of the Chinese Communist Party that conforms to China's realities and revolutionary traditions.

The nature of the state as a people's democratic dictatorship, he said, determines that in China the people are the masters of the state.

The fact that one billion people wield state power is a reliable guarantee for the fundamental interests of the people, Peng Zhen stressed. It also ensures that China will be able to weather any storm. China's state system and social system provide de facto and de jure guarantees that Chinese citizens enjoy extensive and genuine freedoms and rights.

2. On China's socialist economic system, Peng Zhen said that the draft reaffirms socialist public ownership of the means of production as the foundation of this system.

While upholding the leading position of the state sectors of the economy, he noted, diverse economic forms must be developed so the whole national economy will flourish.

3. Discussing socialist spiritual civilization, Peng Zhen pointed out that efforts must be made to expand education and improve its standards, raise the educational level of the workers, peasants and cadres, broaden the ranks of intellectuals and train all types of professionals.

Modernization of science and technology, Peng Zhen added, is a key link in the country's modernization program. The development of natural and social sciences, and the popularization of scientific and technological knowledge are of paramount importance for socialist construction.

Peng Zhen stressed Marxism-Leninism and Mao Zedong Thought as the fundamental principle guiding ideological work.

Citing the articles concerning education in ideals and morality, general education and education in discipline and the law and the advocacy of the civic virtues of love for the motherland, the people, labor, science and socialism, he said these provisions are intended to imbue more and more citizens with high ideals, moral integrity, general education, and a sense of discipline so that a new standard of social morality is fostered and the Chinese nation acquires a vigorous, revolutionary mental outlook.

4. On the structure of the state, Peng Zhen said that a number of new and important provisions about the state structure have been incorporated into the draft. They mainly deal with the following aspects:

— Strengthening the system of people's congresses;

-- Restoring the posts of chairman and vice-chairman of the state;

-- Establishing a State Central Military Commission to lead the armed forces of the whole country;

-- Putting overall responsibility for the State Council on the premier;

-- Strengthening the local organs of state power under the unified leadership of the central authorities;

-- Changing the system of the rural people's commune which now combines government administration and economic management, and establishing organs of political power at the township level. The people's commune will be solely an organizational form of the rural collective economy; and

-- Stipulating that state leaders, including the chairman and vice-chairman of the state, the chairman and vice-chairmen of the N.P.C. Standing Committee and the premier and vice-premiers of the State Council, shall not serve more than two consecutive terms.

5. On the unity of the country and the unity of all the nationalities, Peng Zhen said that to accomplish the great cause of reunifying the motherland is the sacred duty of the entire Chinese people including the compatriots in Taiwan. It is an inevitable trend in accord with the desires of the people and no political party, force or individual can resist it, Peng Zhen added. It is an internal affair of China and no foreign country has the right to interfere in it, he said. After peaceful reunification, Taiwan can enjoy a high degree of self-government as a special administrative region, he stated.

He said it is a basic principle followed by the Communist Party of China and the government to work for the equality, unity and common prosperity of all nationalities. The system of autonomy in regions inhabited by minority nationalities is a correct system which has proved in practice to be suited to China's conditions.

6. The draft stipulates that the basic principle for China's foreign policy is independence, Peng Zhen said. This means development of diplomatic relations and economic and cultural exchanges with other countries on the basis of the five principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit, and peaceful coexistence, opposing imperialism, hegemonism and colonialism, strengthening unity with the peoples of other countries, supporting the oppressed nations and developing countries in their just struggle to win and preserve a national independence and develop their national economies, and striving to safeguard world peace and promote the cause of human progress.

In conclusion, Peng Zhen said that after the draft of the revised constitution is formally adopted by the National People's Congress, it will go into ffect as the fundamental law of the state with supreme authority and legal force. It will be the general statute for running the country and ensuring its stability in the new historical period, he stated.

Peng Zhen's 17,000-character speech drew warm applause.

Ye Jianying Interviewed

HK250756 Beijing RENMIN RIBAO in Chinese 25 Nov 82 p 1

[Report: "Comrade Ye Jianying Makes Important Statements When Interviewed by Our Reporters on the Eve of the NPC Session"]

[Text] On the morning of 24 November, NPC Standing Committee Chairman Ye Jianying received RENMIN RIBAO reporters Ji Xichen [4764 1585 2525], Jiang Feng [5592 6912] and Luo Zisu [5012 5261 5685] for an interview, during which he made important statements.

Chairman Ye, in excellent spirits, spoke happily of the imminent Fifth Session of the Fifth NPC. He said this session will adopt a new constitution. This new constitution has been formulated after the party led the people of the whole country to discuss and revise it. This is a coustitution drawn up by the people themselves, and the people have the duty to supervise its implementation and to supervise the government in acting in accordance with it. After the new constitution is adopted, the whole body of party members must publicize it and act as models in practicing it.

When reporters asked him about his hopes for the younger generation, Chairman Ye said: I am old now, more than 80 years of age. China's future belongs to the young people. Young people are full of vigor and vitality, and after all, the future of China is theirs. For the sake of the future, the young people must cooperate with the old people and guarantee the implementation of the constitution.

Chairman Ye expressed earnest hopes in the old cadres. He said the old cadres have gone through the twists and turns of history, following a winding track, and they have been engaged in revolution for a relatively long time. They posses abundant experience and have relatively profound experience of struggle. Our high-ranking cadres followed Chairman Mao in making revolution for several decades, and were educated and cultivated by Chairman Mao for a long time. But for Chairman Mao's leadership, we might still be living today in the Shanghai concessions.

The old cadres should regard their memoirs as material for educating the young, and pass on to them the lessons of defeat and the experiences of success. This new constitution has been gained after long struggle and after countless successes and failures. We must greatly cherish it, and carry forward the party's fine traditions.

On the modernization of the armed forces, Chairman Ye said the army is the pillar of state political power. The morale of our armed forces is very high and there is great solidarity between all levels. This is a place where we have made progress. The cadres and workers in the factories have turned out advanced weapons, and the people who use those weapons must master them. The armed forces must implement and defend the constitution.

Deputies Interviewed

OW251004 Beijing XINHUA in English 1554 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Encouraging news from all parts of the country has been brought in by deputies to the Fifth Session of the Fifth National People's Congress, which opens November 26.

Veteran labor hero Wang Chonglun, a new member of the Communist Party Central Committee, is enthusiastic about the Sixth Five-Year Plan to be adopted at the forthcoming session. Known as "the man running ahead of time" for his technical innovations in China's earlier five-year plans, Wang stressed that success "depends mainly on the effort and the initiative of the Chinese people, including the workers, as masters of the country."

A deputy to the National People's Congress since 1954, Wang is now vice-president of the All-China Federation of Trade Unions. He called on workers throughout the country to work conscientiously for the fulfilment of the Sixth Five-Year Plan. "I am planning a veteran labor heroes' meeting for this purpose," he said.

Deputies from Daqing brought to Beijing the oil workers' pledge to fulfil the 1982 state plan.

Started in the early 1960's, Daqing oil field has won national fame for its self-reliant, hard-working spirit. Now accounting for half of the country's total crude oil output, it already fulfilled the state production quota for the first ten months of this year ahead of time.

Zhou Zhanao, a Daqing pioneer and today one of the trade union leaders there, said the annual oil output of Daqing will stay above the 50-million-ton mark during the Sixth Five-Year Plan period, though many of its oil wells are aging.

A seasoned rural cadre and party secretary of Wenjiang Prefecture, Gao Weilong from Sichuan expressed the joy and wishes of the peasants.

Sichuan ranks first in China in terms of population and grain output. Guanghan County in Gao's prefecture is one of China's first rural areas to introduce a system of responsibility in agricultural production, which has helped it increase its income per capita by 15 percent this year over 1981. A further increase of about 18 percent is planned for 1985.

The peasants welcome the responsibility system and wish to see it guaranteed by law, Gao Weilong said. The 12th party congress held last September encouraged peasants to get better off through labor. The peasants are really jubilant, he said.

"We peasants attach great importance to the Sixth Five-Year Plan," he said. "Actually, many have their own five-year plans to produce more and earn more." To develop and stabilize the responsibility system is a "must" if the country is to quadruple its total industrial and agricultural output value by the end of the centry. The peasants wish to achieve the goal, so do the rural cadres working at the grass-roots level, he said.

Ma Xingyuan, governor of coastal Fujian Province in southeast China where special economic policies are being implemented, expects the new constitution and the Sixth Five-Year Plan to be adopted at the coming N.P.C. session to "propel the development of our special economic zones". The Xiamen Special Economic Zone has been developing satisfactorily. More and more businessmen are coming from abroad for business talks, he said.

Fujian has about 9.4 million hectares of mountain areas and a coastline of 3,300 kilometers. The governor believed the new five-year plan will enable Fujian to bring out its strong points in forestry, animal husbandry, fishery, light industry, foreign trade, cash crops and science and education.

Zhao Ximing, who is in charge of the communist youth league's cultural, recreational and sports activities, said young people across the country are interested in the questions to be discussed at the N.P.C. session, particularly in China's modernization program.

China has 200 million young people between the age of 14 and 25, Zhao Ximing said. They are studying and working hard. "Their enthusiasm is a key factor in fulfilling the Sixth Five-Year Plan," he noted.

Long Mei and Yu Rong of Mongolian nationality, known as "heroic little sisters on the grassland" for protecting a herd of sheep in a snowstorm 18 years ago, came to the session with a joint proposal for cultivating among the young people love for the country and the collective. Both are young mothers now and work as youth league activists.

Deputies from Taiwan Province expressed the belief that the new constitution will promote the reunification of the country. The prospects held out by the country's Sixth Five-Year Plan will be helpful to that cause, they said.

RENMIN RIBAO HAILS OPENING OF NPC, CPPCC

HK261024 Beijing RENMIN RIBAO in Chinese 26 Nov 82 pp 1, 2

[Editorial: "Create a New Situation With Concerted Efforts -- Greeting the Opening of the Fifth Sessions of the Fifth NPC and Fifth CPPCC National Committee"]

[Text] The Fifth Session of the Fifth NPC opens today in Beijing. This session will discuss and adopt the new constitution and several laws, examine and approve the report by Premier Zhao Ziynag on the Sixth 5-Year Plan, and adopt a corresponding resolution. The Fifth Session of the Fifth National Committee of the CPPCC, which opened 2 days ago, will discuss and adopt the new CPPCC constitution, and all members of the CPPCC National Committee will also attend several meetings of the NPC as observers and join in discussions on national affairs. These two sessions are two extremely important meetings in our efforts to create a new situation in all fields of socialist modernization after the 12th CPC National Congress. We extend our cordial congratulations on the opening of these two sessions and hope that they will achieve success.

In his report to the 12th CPC Congress, Comrade Hu Yaobang expounded the problem of building a high degree of socialist democracy. He pointed out: "The steady development of socialist democracy provides the guarantee and support for the building of socialist material and spiritual civilization." "We must closely link the building of socialist democracy with that of the socialist legal system so that socialist democracy is institutionalized and codified into laws." He reiterated that our party would continue to adhere to the policy of "long-term coexistence and mutual supervision" and the principle of "treating each other with all sincerity and sharing weal or woe," that our party will continue to strengthen its cooperation with all democratic parties, nonparty democratic personages, personnages of minority nationalities, and patriots in the religious circles, and expand the patriotic united front. The NPC is our country's highest organ of state power; the CPPCC is the important organization of the Chinese people's patriotic united front, as well as an important foum to give full play to socialist democracy in our country's political life. As provided by the new constitution which is to be adopted soon, strengthening the roles of the NPC and the CPPCC is of extremely great significance to the building of socialist democracy, to the improvement of the socialist legal system, and to uniting the people of all nationalities and all circles throughout the country in our efforts to create a new situation with concerted efforts.

The people are the masters in a socialist country. The people's congress system is a basic political system that enables the Chinese people to exercise their powers and administer the country as its masters. From the first session to the current session of the Fifth NPC, our country has undergone a profound course of setting to right things which had been thrown into disorder, and has effected a historic change. The NPC and its Standing Committee have completed a great deal of work in this course and played important roles in developing socialist democracy and improving the socialist legal system. As far as legislation is concerned, the second session of the NPC adopted seven laws, including the criminal law, the law on criminal procedure, and so on; the third session adopted four laws, including the revised marriage law and nationality law; the fourth session adopted the law governing economic contracts and the law governing income taxes for foreign enterprises, and approved in principle the draft law of civil procedures. At the same time, the NPC Standing Committee also adopted other laws and regulations of legal nature such as the law governing environmental protection (for trial implementation), the law governing cultural relics protection, the law governing food hygiene, and so on. All these show that our country has already made a big step forward in improving socialist democracy and the socialist legal system in China.

The absolutely lawless situation which emerged in the period when the Lin Biao and Jiang Qing counterrevolutionary cliques were running amok is gone forever. In order to further improve socialist democracy and guarantee the people's right to be the master, the system of the people's congress has also been constantly improved. According to the related laws adopted at the second session, deputies to county people's congresses are elected directly by electors, and the people's congresses at and above the county level have to set up their standing committees. In recent years, as the responsible people of the standing committees of the people's congresses of provinces, autonomous regions and municipalities directly under the central government have attended the NPC Standing Committee sessions as observers, we have managed to maintain a closer link between the superior and the subordinate. All these measures help the people's congress to more effectively reflect the will and needs of the people and exercise the power which the people entrusts to it. In the new constitution which is to be submitted to the current session for examination and approval, we have taken a new step toward the improvement of the people's democratic system of our country.

This constitution has provided more thorough, more complete and more realistic definitions of citizen's rights and obligations, expanded the competence of the NPC Standing Committee, and, through a series of stipulations governing state organs, effected an important reform of the state system. We can be sure that the adoption and implementation of this new constitution will enable a further development of socialist democracy and the legal system of our country, and thus ensure prolonged stability of the country. In this way, the new constitution will provde an essential condition for the building of socialist material and spiritual civilization and for creating a new situation in all fields of socialist modernization.

The CPPCC is an organization of the patriotic united front formed in the course of the Chinese people's revolution and construction over a long period. During the new democratic revolution, the united front was named by Comrade Mao Zedong as one of the three major "magic weapons" for winning victory in the revolution; in the period of socialist construction, although the exploiting system and exploiting classes have been eliminated, it is still possible and necessary to expand rather than abolish the united front. The 12th party congress pointed out: It is necessary to exert all our efforts to further consolidate and strengthen the widest patriotic united front consisting of all socialist laborers and patriots who support socialism and the unification of the motherland, including our compatriots in Taiwan, Hong Kong and Macao as well as overseas Chinese. The united front is still an indispensable "magic weapon" for fulfilling the general task of our party in the new historical period, for realizing the four modernizations step by step and for the sacred cause of reunifying the motherland. The Fifth Session of the Fifth CPPCC will revise the CPPCC constitution on the basis of these reasons and the new constitution will better express the position and role of the patriotic united front in the new period, so as to better adapt the work of the CPPCC to the demands of the new historical stage.

Inspired by the 12th CPC National Congress, the Chinese people are energetically creating a new situation in socialist modernization. We have decided our general tasks in the new historical period and the strategic objective in economic development within this century. In order to realize this grand strategic objective we have also decided to take two major steps in our strategy: In the first decade, we will mainly concentrate on laying a solid foundation, accumulating strength and creating conditions; in the second decade, we will usher in a new period of economic prosperity. It is precisely based on this strategic plan that we worked out the Sixth 5-Year Plan which will be examined and approved by the coming session of the National People's Congress. This plan will continue to implement the principle of readjustment, restructuring, reorganization and upgrading. It is designed to further solve various problems left over by history which hinder economic development, to settle all sorts of important issues arising in our new practice, to strive for a decisive victory in realizing the fundamental improvement of the state financial and economic situation, and to lay a more solid foundation and create better conditions for the national economic and social development during the Seventh 5-Year Plan. To turn China, once an economically and culturally backward country, into a highly civilized and highly democratic socialist country with modern industry, is indeed one of the greatest creative projects in human history. We must encourageously advance ahead with an unswerving revolutionary spirit and in a down-to-earth manner. We must advance our cause through efforts of one 5-year plan after another, through struggle in one yearly plan after another, by settling one problem after another and improving one area of our work after another.

Since the 12th CPC National Congreee, the whole nation has been full of confidence. We believe that the Fifth Sessions of the Fifth NPC and the Fifth CPPCC will certainly express the desire of the people of all nationalities and all walks of life and will make their due contributions to the creation of a new situation in all fields of socialist modernization!

FIFTH SESSION OF FIFTH CPPCC OPENS 24 NOV

Deng Opens Committee Session

OW241120 Beijing XINHUA in English 1101 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- The Fifth Session of the Fifth National Committee of the Chinese People's Political Consultative Conference (C.P.P.C.C.) opened in the Great Hall of the People here this afternoon.

Warm applause burst forth when Dent Xiaoping, chairman of the National Committee, declared the session open, and the band struck up the national anthem.

Deng Xiaoping said that over the past five years, great progress has been made in the work of the united front and that of the C.P.P.C.C., paving the way for greater development.

"Our united front has expanded on an unprecedented scale, comprising not only all socialist laborers but also patriots who support socialism and those who support the unification of the motherland. It is the broadest united front of patriots," he stated. "We must adhere to the policy of 'long-term coexistence and mutual supervision' and the principle of 'treating each other with all sincerity and sharing weal or woe', strengthen cooperation with the democratic parties, non-party personalities and all other patriots, and work together to create a new situation in the socialist modernization of the country and in the work of the C.P.P.C.C."

The C.P.P.C.C. is an important instrument for promoting socialist democracy in China's political life. Its National Committee is composed of representatives of the Communist Party, the democratic parties, non-party persons, people's organizations, minority nationalities, various walks of life, compatriots in Taiwan, Hong Kong and Macao and returned overseas Chinese, as well as specially invited people.

The current session, the last of the Fifth National Committee, will examine and adopt a revised constitution of the C.P.P.C.C. and discuss the work of the C.P.P.C.C. in the new historical period. The National Committee members will also attend the forthcoming Fifth Session of the Fifth National People's Congress as observers and participate in the deliberation of affairs of the state.

Liu Lantao, vice-chairman of the C.P.P.C.C. National Committee and of the Committee for the Revision of the C.P.P.C.C. Constitution, made an explanation of the draft of the revised document.

He said that the decision to revise the constitution was taken at the third plenary session of the Fifth National Committee in September 1980. This was because the work of the united front and the C.P.P.C.C. had entered a new historical period as a result of the tremendous progress in the country's political, economic and cultural field since the Third Plenary Session of the 11th Central Committee of the Chinese Communist Party was held in Decmeber 1978.

The draft submitted to the session for examination, he explained, incorporated a wide range of opinions and suggestions from members of the C.P.P.C.C. national and local committees, the democratic parties and people's organizations.

He said the draft sets out the tasks and role of the C.P.P.C.C. in more explicit terms. The united front will continue to be an important instrument of the Chinese people for uniting and striving to build the country and reunify the motherland.

In the new historical period, Liu Lantao said, the C.P.P.C.C. should try its best to help modernize the country, promote the reunification of the motherland and defend world peace.

He described the primary functions of the C.P.P.C.C. as conducting consultations on the major policies and important affairs of the state and issues relating to the life of the people, and supervising the work of the state organs by making suggestions and criticism.

Hu Ziang, vice-chairman of the C.P.P.C.C. National Committee, delivered a report on the work of its Standing Committee.

Outlining the work done in the past year, he said C.P.P.C.C. members took an active part in deliberating state affairs through consultations, exercising democratic supervision over state organs by presenting their views in a variety of ways, and making new contributions to the country's socialist modernization.

He called on people of all nationalities in the country, the democratic parties, non-party democrats, patriotic religious figures and other patriotic compatriots at home and abroad to strengthen unity and work to make China a powerful, modern socialist country.

The First Session of the Fifth C.P.P.C.C. National Committee was held in 1978. Each National Committee sits for a term of five years. The fifth National Committee had 2,054 members at the time of its fourth session last year, and 59 of them have died of illness. Professor Fan Shoukang, who returned from the United States last April to settle on the mainland, and Huang Zhicheng, a former major and flight instructor in the Kuomintang air force who flew a military plane to the mainland from Taiwan last year, have been added to the fifth National Committee.

Members of the diplomatic corps in Beijing attended today's meeting.

Hu Ziang Work Report

OW241300 Beijing XINHUA in English 1201 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- The Chinese People's Political Consultative Conference (C.P.P.C.C.) has made much progress in its work since the first session of its fifth National Committee was held in 1978.

This was stated by Hu Ziang, vice-chairman of the C.P.P.C.C. National Committee, at its fifth session which opened here today.

As the broadest patriotic united front organization in China, the C.P.P.C.C. has enjoyed a rising status and played an increasing role in the nation's political life, Hu Ziang said. It is now entering a new stage of historical development.

Hu Ziang made these statements in his report on the work of the Standing Committee of the C.P.P.C.C. National Committee over the last year.

In the nation-wide discussions on the draft of the revised national constitution, Hu Ziang said, the C.P.P.C.C. organized special forums on socialist modernization, the socialist legal system, the basic rights and obligations of the citizens, and nationality and religious affairs. Many valuable ideas and proposals were put forward at these forums. The National Committee also drafted a new constitution for the C.P.P.C.C.

Hu Ziang said the C.P.P.C.C. also organized professionals among its members to make investigations into certain special subjects in various areas. The proposals they tabled on the basis of their findings include ways of improving the living and working conditions of middle-aged intellectuals whose workload is heavy, measures for protecting cities of historical and cultural significance and scenic sites, strengthening physical education in middle and primary schools and controlling hepatitis. These proposals received much attention from the Central Committee of the Chinese Communist Party and government departments concerned.

The C.P.P.C.C. has also helped the growth of education by encouraging the running of non-governmental schools. It called a meeting of leaders of the democratic parties, the All-China Federation of Industry and Commerce and the China Vocational Education Society to discuss the issue. As a result, some 600 spare-time schools with a total enrollment of 100,000 have been set up by democratic parties and people's organizations.

This is in line with the government policy of encouraging people's organizations and other institutions to run spare-time schools and special courses in order to train qualified professions as rapidly as possible.

Hu Ziang said the C.P.P.C.C. has done a lot of work for the reunification of the country including Taiwan. The C.P.P.C.C. has also helped departments concerned and local governments improve the living and working conditions of compatriots from Taiwan, Hong Kong and Macao, dependents of overseas Chinese and people who are now in Taiwan, and former Kuomintang personnel who have crossed over.

The C.P.P.C.C. sent a top-level delegation to visit Japan last year, invited Samdech Norodom Sihanouk, president of Democratic Kampuchea, and Zenko Suzuki, the Japanese prime minister, to speak to the C.P.P.C.C., and received 50 other foreign statesmen, visitors and journalists.

A special committee under the C.P.P.C.C. has in the past year collected and solicited 1,400 articles and documents of historical and cultural interest, which run to a total of some 14 million words, and reprinted more than 30 books and journals of a similar nature, Hu Ziang said.

On the C.P.P.C.C.'s future tasks, Hu Ziang said it will work with other departments concerned to create conditions that will enable intellectuals to play a greater role in China's modernization program. It will keep closer contacts with people from various walks of life and hold consultations on matters relating to cardinal government policies, the nation's political, economic and social life and other questions of major importance. It will also exercise democratic supervision through proposals and criticisms and help state organs improve their work and raise their efficiency.

He said the C.P.P.C.C. will strengthen ties and solidarity with compatriots in Hong Kong and Macao, strive to establish ties with people of various walks of life in Taiwan, and make new contributions to the great cause of reunifying the motherland. It will carry out people-to-people diplomacy so as to promote and enhance unity and friendship between the Chinese people and people of other lands, Hu Ziang said.

Liu Lantao on Constitution

OW260239 Beijing Domestic Service in Mandarin 0200 GMT 25 Nov 82

[Text] The following is the text of the explanation of the draft of the revised CPPCC constitution made by Liu Lantao, vice chairman of the CPPCC National Committee and vice chairman of the CPPCC Constitutional Revision Committee, at the Fifth Session of the Fifth CPPCC National Committee:

Explanation of the draft of the revised CPPCC constitution by Liu Lantao on 24 November 1982.

Chairman, vice chairmen, members of the CPPCC National Committee:

Entrusted by Chairman Deng Xiaoping and on behalf of the CPPCC Constitutional Revision Committee, I am going to explain the draft of the revised CPPCC constitution.

The CPPCC had two constitutions before; one was adopted in 1954 and the other in 1978. The draft of the revised CPPCC constitution that has been presented to you for examination now is the third constitution of the CPPCC. The constitution adopted in 1978 was formulated by the First Plenary Session of the Fifth CPPCC National Committee after the crushing of the Jiang Qing conterrevolutionary clique. This constitution played a positive role in reinstating and developing the work of the CPPCC. However, under the influence of the left guiding ideology, some of its contents still followed the erroneous theory and wording of the Cultural Revolution. Following the tremendous changes in the political, economic, cultural and other fields in our country brought about after the crushing of the Jiang Qing counterrevolutionary clique, and particularly after the 3d Plenary Session of the 11th CPC Central Committee, the CPPCC's organizational work and operation also underwent great changes. The work of the united front and the CPPCC entered into a new historical period of development. For this reason, the CPPCC felt that its constitution must reflect the new situation and tasks so that its work would better suit the needs in the new stage. In view of this situation, the Third Session of the CPPCC National Committee decided in September 1980 to revise the CPPCC constitution and formed the CPPCC Constitutional Revision Committee with Comrade Deng Xiaoping as its chairman and Liu Lantao, Zhu Yunshan (deceased), Shi Liang and Hu Juewen as its vice chairmen. Shortly afterward, the CPPCC Constitution Revision Committee held its first meeting, during which Chairman Deng Xiaoping explicitly set forth the principles and tasks in revising the CPPCC constitution. That meeting also decided to set up a Secretariat to take charge of the day-to-day affairs of revising the constitution.

In June 1982 the CPPCC Constitutional Revision Committee held its second meeting, during which the draft of the revised CPPCC constitution was discussed and adopted. In July the same year the 19th Meeting of the 5th CPPCC National Committee adopted a resolution to hand over the draft of the revised CPPCC constitution to all the members of the CPPCC National Committee and various local CPPCC committees as well as various democratic parties and mass organizations for their review and to request their opinions on the revision. The work of soliciting opinions was extensively carried out throughout the nation from July through September. It was unprecedented in CPPCC history, considering the great number of people of various sectors participating in the review of the draft. While it was an extensive discussion of the CPPCC constitution, it was also a restudy of the party's unified front theory and policies. Seen from the situation of the discussion, everyone basically supported the draft. They maintained that the draft was reflected the party's principles and policies set by the 3d Plenary Session of the 11th CPC Central Committee, eliminated the erroneous left theory and wording in the 1978 constitution, summed up the CPPCC's basic experiences gained from its work of over 30 years, and reflected the requirements for the united front and the CPPCC during the new historical stage of development. At the same time, they also put forward many fine opinions about the revision.

In the light of these opinions and under the guidance of the guidelines of the 12th CPC National Congress, the CPPCC Constitutional Revision Committee's 3d and 4th sessions held in mid-November made the final revision and additions to the draft. The final draft has now been presented for your review.

I would now like to make a concise explanation of certain major issues in the draft.

First, the nature of the CPPCC. In the course of revising the CPPCC constitution, the nature of the CPPCC was everyone's concern. After the discussion, it was unanimously ascertained that the state's supreme power must be exercised in a unified manner by the NPC and that the CPPCC is a united front organization under CPC leadership.

Our country's patriotic united front was formed and developed in the protracted process of revolution and construction. In the course of the new historical period, the number of united front targets has kept on increasing, not decreasing, and the scope of united front work has become increasingly broader, not narrower. The united front is still an important and vital magic weapon with which the people of our country will fight in unity to construct and unify their motherland. In view of our long historical experience and the necessity of the united front in the new period, the CPPCC will continue to be a highly effective organization for consolidating and developing the patriotic united front.

In its general program, the draft of the revised CPPCC constitution has clearly defined the nature of the CPPCC as a united front organization. It must be emphatically pointed out here that the stipulations concerning the CPPCC's nature in the draft of the CPPCC constitution are entirely identical with the relevant elaborations in the preamble of the draft of the revised PRC constitution. This is the first time that the CPPCC's nature, status and functions have been stipulated in explicit terms in the state's cardinal law. This will have important guiding significance and far-reaching influence on our country's united front and CPPCC operations.

Second, the CPPCC's tasks. It was pointed out in the report of the CPC Central Committee adopted at the 12th CPC National Congress: The general task of the CPC in the new historical period is to unite the people of all our nationalities in working hard and self-reliantly in achieving step by step the modernization of our industry, agriculture, national defense and science and technology and in making China a culturally advanced and highly democratic socialist country. The report added: We shall pursue the great aim of reunifying the motherland, and we shall carry on the struggle against hegemonism in defense of world peace. It continued: In the next 5 years, we should strive to bring about a fundamental turn for the better in the country's financial and economic situation, in the standards of social conduct and in the style of the party.

Comrade Deng Xiaoping pointed out in his opening speech at the 12th CPC National Congress: In a long period to come, we must diligently do the following four things: restructure the state administration and the economic setup, build a socialist spiritual civilization, strike at criminal activities in the economic and other fields that undermine socialism, and rectify party style and consolidate the party organization.

The CPPCC will do its utmost and, guided by the four cardinal principles, continue to consolidate and expand the patriotic united front and work hard to accomplish the above-mentioned four tasks and create a new situation of socialist modernization. In this regard, explicit terms have been stipulated in the general program and general principles of work of the draft of the revised CPPCC constitution in accordance with the CPPCC's specific conditions and its previous experience.

The 12th CPC National Contress clearly pointed out: While working for a high level of material civilization, we must strive to build a high level of socialist spiritual civilization.

We must emphasize here that with regard to building a spiritual civilization, the CPPCC must fully understand and use its favorable conditions and do a good job in this regard with great enthusiasm and initiative. On cultural construction, the CPPCC should resort to all possible means to bring the CPPCC members' specializations and role into play since the overwhelming majority of CPPCC members are intellectuals. On ideological construction, a great number of CPPCC members should make use of their rich experiences to set an example for other people and educate other people. When these conditions have been fully utilized, the CPPCC can make still greater contributions to the building of a socialist spiritual civilization.

Third, political consultations and democratic supervision. According to historical experience, the principal functions of the CPPCC are conducting political consultations regarding the major policies of the state and important local affairs as well as matters concerning the people's livelihood and relations within the untied front and exercising democratic supervision by way of making suggestions and criticisms.

Political consultations within untied front organizations are an important means by which the Chinese people develop socialist democracy under CPC leadership — a fine tradition in China's political life. The plenary sessions of the CPPCC National Committee and all CPPCC local committees, the sessions of the Standing Committee of the CPPCC National Committee and all other meetings are important ways to conduct political consultations. Members of the CPPCC committees at all levels are also invited to attend the NPC sessions at the corresponding levels and the related sessions of the NPC Standing Committee as observers and participate in the discussion of important issues concerning state and local affairs. This has been carried out for years and has produced very good results. The trend of developments shows that the channels of political consultations will gradually increase while the content of consultations will also become increasingly richer.

The pooling of wisdom through earnest consultations can help the CPC and the govenrment uphold truth and rectify errors in their work, help readjust the relations between all aspects of the united front and help mobilize the initiative of all quarters to work with one heart and one mind and run the country well. It can help the masses grasp the policies and laws of the state and translate them into the material force of socialist modernization.

The CPPCC, all democratic parties, mass bodies and personages in all fields can exercise supervision by way of making suggestions and criticisms on state affairs. This is also a fine tradition in China's political life. This supervision is different from that of the people's congress. The kind of supervision exercised by the people's congress using state power has a legal binding force, whereas supervision by the CPPCC is a kind of democratic supervision which is not of the nature of state power and therefore does not have that binding force. With regard to the guarantee of exercising state power, the people's congress is fundamentally different from the CPPCC. However, in terms of building a high level of socialist democracy, this difference can make the two organizations supplement each other.

The basic form of the CPPCC's democratic supervision is making suggestions and criticisms. Its constructive purpose is to help state organs improve their work, raise their efficiency and get rid of bureaucracy. If the CPPCC organizations at all levels seriously conduct investigation and study and make constructive suggestions and pertinent criticisms accordingly, they will certainly play very well their active role of democratic supervision and will be welcomed and supported by state organs and organizations concerned.

Fourth, the principle of voluntarism in study. To mobilize and organize the people to study has always been the CPPCC's important work.

In order to carry out socialist modernization, a magnificent cause unprecedented in China's history, we must have a very rich, modern knowledge of culture and science. We especially need correct advanced ideology to guide us and to succeed. Therefore, we advocate studying Marxism-Leninism and Mao Zedong Thought. However, we must adopt the principle of voluntarism when organizing the people to study. We must not force people to study; if we do, we will not be able to achieve any practical results.

It is necessary to develop the fine study style of integrating theory with practice, emancipating the mind, seeking truth from facts, upholding the policy of "letting a hundred flowers blossom and a hundred schools of thought contend" and making sure not to seize on other's faults, not to slap labels on people and not to wield the big stick.

Fifth, the relations between CPPCC organizations at all levels. All constitutions in the past stipulated that the relationship between the higher organization and the lower one should be that of guidance. All CPPCC local committees must observe and fulfill CPPCC National Committee resolutions of countrywide nature, and lower CPPCC local committees must observe and fulfill higher CPPCC local committee resolutions of local nature. Aside from that, the relationship of leaders and followers between the CPPCC organizations does not exist. The draft of the revised CPPCC constitution also sums up our past experience and makes stipulations on how the higher and lower CPPCC organizations can strengthen their ties so as to bring the role of guidance of higher organizations to lower ones into full play. This not only shows the political unity of CPPCC organizations at all levels but also helps local CPPCC committees at all levels do their work in line with local conditions independently and dutifully.

Sixth, the Chairman's Council. Along with the development of the situation, the CPPCC's work has become increasingly heavy. The Standing Committee which is in charge of CPPCC affairs cannot hold meetings often to do the work because it has a relatively large membership. In order to strengthen the leadership over important day-to-day work, the draft of the revised CPPCC constitution stipulates that the chairmen of the CPPCC National Committee and the CPPCC local committees should be in charge of the Standing Committees' work and that the chairman, vice chairmen and secretary general should form the Chairman's Council to handle the Standing Committee's important day-to-day work. This practice has actually existed for some time. It is now systematized to implement democratic centralism and bring the role of collective leadership into full play.

Seventh, the establishment of local committees. Generally speaking, the CPPCC organizations are developing in China as a whole. However, we should determine whether a CPPCC organization is or is not set up in line with local conditions. The draft of the revised CPPCC constitution stipulates that all autonomous prefectures, municipalities under the jurisdiction of the provincial government, counties, autonomous counties and districts under the jurisdiction of the municipal government should set up CPPCC local committees if necessary. Compared with the stipulations in the 1978 CPPCC constitution, the draft has shown tremendous progress in guiding ideology. It meets the needs of the continuous development of the present patriotic united front and is therefore appropriate.

All members: Since the 3d Plenary Session of the 11th CPC Central Committee, the draft of the revised CPPCC constitution has, under the guidance of the line, principles and policies laid down at the 12th CPC Congress and on the basis of the CPPCC's historical experience, incorporated a wide range of opinions and suggestions from all sides. Therefore, it may be called a product of integrating the party's line, principles and policies, particulary the guidelines of the 12th CPC Congress, with the concrete practice of the CPPCC. It is also the crystalization of the collective wisdom within the united front.

Personally founded by Chairman Mao Zedong and Chairman Zhou Enlai, the CPPCC traversed its glorious course under their leadership. Chairman Mao Zedong and Zhou Enlai took great pains to develop the CPPCC. Their imperishable contributions will always be cherished and are worth learning from. After discussion and approval by this plenary session, the draft of the revised CPPCC constitution will be the third CPPCC constitution. It will certainly play an important role in creating the new situation in the work of the CPPCC in the new historical period and prepare the way for the successful opening of the First Session of the Sixth CPPCC National Committee.

I submit the above explanation to the session for discussion.

NIE RONGZHEN PRAISES FRONTIER SOLDIERS

OW240429 Beijing XINHUA Domestic Service in Chinese 1435 GMT 23 Nov 82

[Text] Beijing, 23 Nov (XINHUA) -- Nie Rongzhen, vice chairman of the Military Commission of the CPC Central Committee, expressed cordial regards and respect to the vast numbers of commanders and fighters guarding the motherland's islands and frontiers. He praised them as the most lovable people.

On 20 November, after watching the PLA General Logistics Department's videotapes of its investigation of the PLA units on the frontiers and islands. Comrade Nie Rongzhen wrote a letter to Hong Xuezhi, director of the PLA General Logistics Department, and Wang Ping, political commissar, praising the department's investigation. He wrote: You have done a tremendous thing in sending so many cadres to travel thousands of li on a difficult journey to visit the vast numbers of commanders and fighters guarding the frontiers and islands of the motherland.

Nie Rongzhen said: The life of cadres and fighters guarding the frontiers and islands is extremely difficult. Seeing that they fought and lived in such a difficult environment and dedicated their youth and strength for the security of the motherland, I was deeply moved. They are the most lovable persons.

He said: Our leadership at all levels should show concern for the difficulties of the cadres and fighters on the frontiers and islands and should do what they can to help them resolve their difficulties.

During the department's investigation tours, the commanders and fighters' moving deeds in overcoming difficulties and guarding the frontiers and islands, as well as the true picture of all aspects of their life -- clothing, food, housing, transportation, lighting, water, rescue and treatment of the wounded and the sick, cultural life, logistic training and farm and sideline production -- and the difficulties they faced were recorded and reported to the leading comrades of the Military Commission. In accordance with the instruction of the leading comrades of the Military Commission, the General Logistics Department has appropriated a special fund and is proceeding to resolve the over 5,000 big and small problems reported during the investigation.

GATT SESSION CONTINUES DESPITE DIFFERENCES

OW281910 Beijing XINHUA in English 1611 GMT 28 Nov 82

[Text] Geneva, November 27 (XINHUA) -- The ministerial conference of the General Agreement on Tariffs and Trade (GATT) was adjourned until tomorrow afternoon because of great differences over some main issues, conference chairman Allan MacEachen of Canada announced here today. The meeting had been planned to end today.

At today's meeting, which was mainly one of private consultations, the representatives expressed the hope that the differences would be solved through final efforts. Observers here think that as the gaps are so big the 88-nation trade conference can only reach some face-saving agreements.

The United States wants the European Economic Community to phase out agricultural export subsidies over a two-year period. American trade officials have threatened that if the EEC should refuse to yield on agricultural export subsidies, the United States would have also to subsidize the exports of its own farm products and dump billions of dollars' worth of surplus U.S. dairy products on the world market. But the EEC side still refused to do so today.

The United States and the EEC tentatively agreed to put off their dispute over agricultural subsidies to a ministerial meeting between the two sides in Brussels next month.

On the question of banking, insurance and other non-merchandise transactions, many developed countries remained in opposition to U.S. attempts to extend GATT's free trade rules to these areas. They considered the U.S. proposal as favorable to banks and insurance companies with rich resources in their effort to infiltrate Third World countries and to bring under their control banks and insurance trade in these countries.

On the rules for safeguards, or temporary import curbs, developing countries contended that it is unfair to single out any one exporting nation for applying safeguard controls. But the EEC countries want to continue selecting individual countries as targets for import controls.

On the question of fighting protectionism, the developing countries, together with Australia and the United States, were in favor of including into the final political declaration a sort of commitment to a standstill in future protectionist actions. However, the EEC refused to make any commitment on this question, saying that it is unrealistic to do so.

As matters stand now, the meeting is not likely to agree on a "package deal". An EEC spokesman has made it clear that the EEC will issue a separate declaration in view of its differences with other countries on a number of issues, the issue of agricultural trade in particular.

PRC Observer Speaks

OW252003 Beijing XINHUA in English 1935 GMT 25 Nov 82

[Text] Geneva, November 25 (XINHUA) -- China is ready to explore the possibilities of further developing relations with the General Agreement on Tariffs and Trade (GATT), a Chinese representative said at the GATT Ministerial Conference here today.

Pu Zhaomin, speaking in his capacity as an observer at the conference, said that China hopes that progress will be made "in improving the existing trading system."

He said that the world economic organization should "play its due role in improving the north-south relations" and "in respecting and giving special attention to the interests of the developing countries."

The Chinese representative said that great changes have taken place in international trade in the past three decades. He referred especially to the emergence of Third World countries. "To adjust to the changed circumstances, establishment of a new international economic order has become an unavoidable task," he said. He noted that the GATT should improve some of its provisions to accommodate to the changes.

The Chinese representative expressed support to the Third World demand that the developed countries refrain from setting new tariff or non-tariff trade barriers and reduce and abandon their protectionist measures.

He said, "The special needs of the developing countries, particularly those of the least developed countries, should be taken care of, and their terms of trade should be improved."

He urged the conference to make contributions to an early solution of these problems which, he said, would help revitalize the world economy to the benefit of both the developing and developed countries.

On China's trade policy, Pu Zhaomin said China will firmly carry out the policy of "opening to the outside world" and make efforts "to expand economic and technological exchanges with foreign countries in accordance with the principle of equality and mutual benefit."

The GATT ministerial meeting opened here yesterday with the participation of 88 signatory states and some countries as observers. The conferenece is scheduled to last through Nov. 27.

RENMIN RIBAO on Meeting

HK241042 Beijing RENMIN RIBAO in Chinese 24 Nov 82 p 7

["Short Commentary": "A Difficult Meeting"]

[Text] The GATT meeting being attended by trade ministers from 88 countries opened today in Geneva. The meeting is being convened at a time when the economic crisis in the Western world continues, trade friction is aggravated and a new trade war might inflict greater economic catastrophe on the whole world. Its success or failure will have a bearing on the prestige of GATT, which aims at removing trade barriers and realizing free international multilateral trade. It is also a severe test as to whether leading trade groups and countries of the Western world can cooperate with one another to overcome economic difficulties.

At present, rising protectionism and the aggravation of a trade war are actually a matter between the EEC, the United States and Japan, whose export volume accounts for more than 50 percent of the total export volume of the world. In order to evade the most serious economic crisis since the war, they have placed restrictions on the products of their opponents exported to their markets while doing their utmost to sell their products in their opponents' markets. While taking various "protectionist" measures, they are shouting the slogan of "resolutely oppose protectionism" to deal with their trade opponents. This is the main reason why people have not placed much hope on the ministerial meeting in Geneva.

Of course the main victims in this trade war are primarily Third World nations which are numerous. The export quantity of their primary products has decreased and prices have dropped drastically. The export of their finished products such as textiles, shoes shoes, agricultural products, tropical products and so forth to developed countries has also been restricted rigidly. People are not optimistic over a settlement of this problem.

Trade may promote economic development; however, protectionism in the West only obstructs economic growth. It is unfortunate that protectionism always gains ground when an economic crisis is aggravating. This was the case with the economic depression period during the 1930's; there is no exception today. Overcoming the present predicament is a difficult problem facing the meeting.

EDITORIAL SEES THIRD WORLD ECONOMY WORSENING

HK231251 Beijing RENMIN RIBAO in Chinese 20 Nov 82 p 6

[Article by Chen Xiaoping [7115 1420 1627]: "Why the Economies of Developing Countries are Worsening"]

[Text] Economic conditions of the developing countries obviously have been worsening over the past few years because the developed countries have done their utmost to shift their crises to the Third World. This situation is becoming more and more serious.

-- Production is stagnant, economic growth rates are falling drastically, urban unemployment rates are hitting alltime highs, and the speed of economic development is generally slowing down. The annual GNP growth rate of all developing countries -- including petroleum exporting countries -- reached an average of 6.1 percent during the 1966-1976 period but decreased for 4 years after 1978 and dropped to 0.6 percent in 1981, being the lowest level in 20 years and lagging far behind the 7 percent annual increase target specified by the United Nations for development during the 1980's. What deserves particular attention is that the Third World countries that export manufactured goods have shown a negative growth for the first time. These countries maintained a relatively high economic growth rate during the 1970's. Their growth rate went from 9.4 percent in 1973 to minus 0.2 percent in 1981. With production down, the urban unemployment rate of the developing countries has escalated to an alltime high of about 30 percent at present.

-- Exports have decreased, prices of raw materials dropped and earnings from exports declined drastically, resulting in huge deficits in international payments. In 1981 the volume of international trade decreased for the first time since 1958 and the exports of mineral products and petroleum from developing countries dropped by 12 percent and 15 percent respectively. At the same time, world prices of raw materials fell by 15 percent in 1981 compared with 1980 and dropped by a further 8 percent in the first half of this year as against the same period of last year, hitting a 35-year low. As a result, the developing countries' international payments deficits increased from $35.9 billion in 1975 to $109.7 billion in 1981. It can be caluclated in advance that deficits will continue to increase this year. The 13 member states of OPEC will have international payments deficits amounting to $9.5 billion for the first time in more than 20 years.

-- Being heavily in debt, many countries find it difficult to pay back the principal plus interest and even more difficult to attract an influx of funds. In 1972, the developing countries incurred debts amounting to only $98 billion. Today, 10 years later, their debts have increased to $629 billion -- more than 6 times greater than in 1972. The developing countries have gradually lost their ability to repay their huge debts; they can only request resetting a date for paying off their debts.

In 1981, 17 countries rescheduled their debts. In 1981, 26 developing countries have requested rescheduling of their debts. The loss of paying ability makes it more difficult for many developing countries to get new loans. These countries have to cut their expenses and postpone their development plans.

--Inflation is serious and the people's living standards have fallen. Since the 1970's, commodity prices in developing countries have been rising steadily. In many of these countries, prices have soared more desperately than in the developed countries. In developing countries which do not produce petroleum, the annual increase in consumer goods prices was 20 percent in 1978, rising to about 32 percent in 1980 and 1981. In 1981 and 1982, serious inflation caused a decrease in actual per capita income in the developing countries for the first time since 1950. At present, living standards in the developing countries are generally falling and about 800 million people are in absolute poverty.

The worsening of the developing countries' economies is caused chiefly by the old, unequal international economic order and by the developed countries' policies and measures of shifting their economic crises.

The protracted rule and exploitation of colonialism led to the abnormal economic development of many developing countries. The commodity production set up in these countries is still characterized by the export of raw materials. Take the developing countries as a whole. Their income from the export of primary products accounts for three quarters of their foreign exchange earnings. The bulk of manufactured goods and grain they need is imported chiefly from the Western developed countries. At present, the world's commodity market is controlled basically by monopoly organizations of the developed countries, thus putting the developing countries in an extremely unfavorable situation in international trade. The developed countries adopt various means on the one hand to force down the prices of primary products, while on the other hand they continue to raise the prices of their manufactured goods and thus shift their inflation to the developing countries. This results in the daily widening difference between the regular income and expenditure of the developing countries. It is noteworthy that supply exceeding demand in the international oil market is due to the continued economic recession in developed countries in the past few years, the initial results produced by the energy conservation measures and the availability of energy substitutes. The Western countries took the opportunity to dump their stocks of oil to force oil prices down, thereby causing huge economic losses to OPEC member states.

During an economic crisis, the developed countries usually try to solve their economic difficulties at the expense of the developing countries. To defend their industries and stop the increase in unemployment, they adopt protectionist measures of various descriptions such as increased tariffs, import quotas and "voluntary restrictions on exports." These measures hinder the products and manufactured goods -- particularly of the developing countries -- from entering the developed countries' market and add more obstacles to the developing countries' exports. At present more than 100 varieties of the developing countries' fabric and garment products are subject to restrictions other than the tariff barrier. Finding no market, the textile, garment and shoe industries of many developing countries cannot easily be maintained. News about the bankruptcy of companies dealing with these industries is reported from time to time.

To restore an economic balance at home and abroad and to stem inflation, the Western developed countries have also tried to stabilize their economies by reducing the circulation of their currencies, thus causing a rise in the interest rate on the international capital market.

The interest rate on U.S. dollar loans in the European currency market has long remained in double digits (as high as 18 percent in 1981), so that the amount of money paid each year by the developing countries on the principal plus interest accounts for more than 80 percent of the amount of money they borrowed years ago. In 1981 the money paid by the developing countries amounted to $48 billion, being almost 60 percent more than that paid in 1980. This is an important reason why the developing countries have been getting deeper and deeper into debt.

With the developed countries forcing down the prices of raw materials and pushing protectionism, the developing countries earn much less foreign exchange with which to pay off their debts. When their abilities to pay debts dwindle, they have no alternative but to obtain new loans to pay their debts. However, they cannot get loans from reluctant Western commercial bankers because of their deteriorating ability to pay off their debts. As a result, they are incapable of paying off their debts. The developing countries are now caught in this vicious circle.

To cut their budgets and stem inflation, the United States and other leading industrial countries have reduced their spending on aid to foreign countries. They have also extended the period of payment regarding the multilateral governmental development aid which they promised to give. This is actually a way of cutting their aid to foreign countries. At the same time, they have laid down harsh terms for giving new loans. This has a bad influence on many developing countries, forcing them to reduce their imports further and slow down their economic development. Conditions are still more serious in the most underdeveloped countries which rely mainly on foreign governmental aid to develop their economies and solve their difficulties.

There are internal reasons for the worsening of the economies of the developing countries. For example, in drawing up policies for economic development, they have been overanxious in seeking industrial modernization at the expense of the production of grain crops. As a result, their industry and agriculture are seriously disproportionate. They do not have enough grain for self-sufficiency, and they have to use a huge amount of foreign exchange to import grain every year. Their national economic resources cannot cope with their overambitious and hasty industrial development plans. Their heavy fiscal burdens lead to serious inflation, great deficits in international payments and heavy foreign debts. Apart from this, their annual population growth rate is about 2.5 percent. The great increases in population have swallowed a greater part of the economic fruits of developing countries and caused more difficulties in solving employment problems.

In short, the causes of the worsened economies of the developing countries are numerous and complicated. The most fundamental cause is the old international economic order. At present, the international economic order is still controlled by the developed countries. The developed countries monopolize the international division of industry, the international trade and the internatinal money market. The economic arteries of many developing countries are controlled by the developed countries. Under these circumstances, the developing countries find it difficult to exercise sovereignty effectively over their own resources, trade and finance and to protect their economies by adopting effective countermeasures against the shifting of economic crisis by the developed countries. For this reason, to solve the serious economic difficulties confronting them, the developing countries must exert efforts gradually to change the existing international economic order and establish an equal, just and new order.

JAPAN'S NAKASONE ELECTED PRIME MINISTER

OW260822 Beijing XINHUA in English 0740 GMT 26 Nov 82

[Text] Tokyo, November 26 (XINHUA) -- Yasuhiro Nakasone, 64-year-old president of the Japanese ruling Liberal Democratic Party (LDP), was elected prime minister by the lower house of the Diet this afternoon.

He received 287 of the 497 votes cast, showing his party's majority of 287 seats in the 509-member lower house.

The upper house is to vote later today. Nakasone is guaranteed acceptance by the two houses because of the LDP's big majority in both houses.

Prime Minister Zenko Suzuki and his 20-member cabinet resigned en masse this morning, paving the way for his successor. Suzuki announced his resignation on October 12, after two years in office.

Nakasone is to name his cabinet later today after the upper house vote. Nakasone and his new cabinet will be formally inaugurated by Emperor Hirohito Friday night.

Discusses National Policy

OW272210 Beijing XINHUA in English 1652 GMT 27 Nov 82

[Text] Tokyo, November 27 (XINHUA) -- Yasuhiro Nakasone, newly elected prime minister, today made his first policy speech at a news conference held in his official residence. Nakasone touched on major questions of both internal and external affairs.

On foreign affairs, he advocated alliance with Western countries which, he said, forms the foundation of Japan's foreign policy. Nakasone said that the Japan-U.S. security system is the axis of the two countries' relations, and that only on the basis of this system can relations with communist countries be developed.

Nakasone said his government will, under the guidance of this policy, promote economic cooperation and friendly relations with China.

However, he said, Japan is waiting to see what Japan policy the Soviet Government under Yuri Andropov will produce. "I deem it dangerous not to cultivate dialogue with the most terrible adversary," he said.

When asked how the new cabinet will deal with the U.S. demand for a strengthened Japanese defense system, Nakasone said efforts will be made as far as public opinion and national budget will allow to meet the U.S. requirement. "Japan and the United States are partners in terms of security and safety," he said.

Talking on domestic affairs, Nakasone said the most urgent task in front of the incumbent cabinet is to carry out administrative reform and financial reconstruction. While promising adherence to "financial reconstruction without tax increase" as set forth by Zenko Suzuki's ex-cabinet, he conceded it is "rather difficult" to attain the aim.

On amendment of the constitution, a question which has aroused fears among its neighbors about Japan's revival of militarism, Nakasone said as a veteran of the "Great East Asian War" he knew very well how wars inflict misery. However, he said "No laws and systems are perfect. Review should be made of the constitution."

When questioned about the government's decision to allocate 1 percent of the country's annual gross national product to defense, Nakasone said he will do his best to respect this decision although defense spending may be affected by annual changes in budget appropriations, the financial situation and the gross national product.

Strengths, Weaknesses Assessed

HK270856 Beijing RENMIN RIBAO in Chinese 27 Nov 82 p 6

["Newsletter from Japan" by correspondents Chen Bowei [7115 3124 1792] and Sun Dongmin [1327 2639 3046]: "The Japanese Political Situation Reflected by the Nakasone Cabinet"]

[Text] The Suzuki cabinet, which had held office for 2 years and 4 months, came to an end on 26 November, and Liberal Democratic Party [LDP] President Yasuhiro Nakasone was elected Japan's 29th postwar prime minister -- that is, the 45th prime minister in Japan's history -- at the 97th Diet session. Nakasone completed the organization of his cabinet the same evening, and the formation of the new cabinet was announced.

After being elected LDP president, Nakasone repeatedly stated that he would establish an "all-party cooperative system." Judging by the composition of the new cabinet, he has indeed drawn in figures from all factions of the party. The 21 cabinet members include 6 members of the Tanaka faction, 4 of the Suzuki faction, 3 of the Nakasone faction, 6 members of the non-mainstream Fukuda, Komoto and Nakagawa factions, and 2 who are unaffiliated or neutral. It is not strange that the Tanaka and Suzuki factions should hold such obviously strong positions in the new cabinet. The Nakasone faction is a rather small one in the LDP and Nakasone came to power by relying on the full support of the two big Tanaka and Suzuki factions rather than on his own faction. The Tanaka and Suzuki factions have become the two main props of the Nakasone cabinet. This situation reflects the strength of the Nakasone cabinet and also illustrates its limitations and weaknesses. If, during his office, obstacles arise in the alliance of the Nakasone faction with those of Tanaka and Suzuki, the foundation of Nakasone's political power will be shaken.

The establishment of the Nakasone cabinet shows that the leadership stratum of the ruling LDP has reached the stage of "the new replacing the old." Beginning with the final period of the Sato cabinet 10 years ago, the leaders of 5 factions in the party -- Miki, Tanaka, Ohira, Fukuda and Nakasone -- have all held the office of prime minister, and the last named of these old hands has now formed his cabinet. At the same time, the so-called "new leadership stratum" composed of people such as Abe and Nakagawa has also started to show its hand in the just-completed election for the presidency of the LDP. Eleven of the 21 cabinet members are joining the cabinet for the first time. After his election as president, Nakasone repeatedly stressed the principle of "cooperation between three generations -- those born in the Meiji, Taisho and Showa eras -- probably because he realized that in the replacement of the old by the new, he would need the support of politicians of the older generation yet not neglect the strong desire of the new generation of politicians to share political power.

It is still too early to depict the color of the Nakasone cabinet.

At present there are certain unknown factors regarding the policies it will pursue in domestic and foreign affairs. On the afternoon of 25 November, speaking on his policies and aspirations at his first press conference after being elected party president, he said that he would endeavor for "easy-to-understand government, politics addressed to the people, and the pioneering of a fresh type of politics." He mentioned in particular that 25 November was the 92d anniversary of the convening of the "first Imperial Diet session" in the 23d year of the Meiji era." He declared that he would "inherit the tradition of the 'Imperial Diet'" and carry out "further great development." When asked about the revision of the constitution, Nakasone had high praise for the "historic role and significance" of the present constitution. He said that the present constitution has "the fine principles of freedom, peace, respect for fundamental human rights and international cooperation," which must be "resolutely maintained." On the other hand, however, due to "changes in the times and the people's thinking," "the correct attitude is to take a good look at and review the constitution in the light of our postwar experience and strive to make it a better constitution." On domestic policies, Nakasone said he would pursue the principle laid down by the Suzuki cabinet of "achieving fiscal reconstruction without tax increases," but added that he had "decided to review" the goal of endeavor set by the Suzuki cabinet of ending the deficit-covering bond issues by 1984, on account of difficulties in the present situation. Answering questions on foreign policy, he said that what he "attaches the greatest importance to is the relationship with the United States." On the basis of this relationship, he would proceed to "develop East-West relations, improve North-South relations, attach importance to cooperative relations with ASEAN and with neighboring countries" and "pursue policies of disarmament and of preserving peace."

The formation of the Nakasone cabinet has evoked varying reactions among economic circles, the governing party and public opinion. According to the Japanese press, the chairman of the Economic Groups Federation and the president of the Japanese Commerce and Industry Council hoped that the new cabinet would unite as one, focus its policies on fiscal reconstruction and administrative reforms and "eliminate economic friction with foreign countries" by means of summit diplomacy. Apart from that, they hoped the cabinet would adopt policies to deal with the gloomy economic scene and support medium and small enterprises. Socialist Party leader Hishima said in a statement that he hoped the new premier would pay attention to the question of "curbing militarization." Komeito Party leader Takeiri said he was worried that the new cabinet would "abandon social welfare" under the pretext of fiscal reconstruction. New Liberal Club leader Tagawa said he was watching carefully to see whether the Nakasone regime would "revise the constitution and increase military strength." Japanese public opinion hopes the new prime minister will resolve to develop "a freshtype of politics," establish "political ethics" and form a cabinet that seriously pushes administrative reform and, in foreign affairs, pays attention to harmonizing relations with the United States, Europe and other countries.

Taking a general view of the Japanese political scene, as Japanese public opinion has pointed out, the Nakasone cabinet is facing "a huge heap" of problems. In particular, in the field of fiscal reconstruction and administrative reforms which the Suzuki cabinet was unable to solve, it is impossible for the new cabinet to take a detour. People here are waiting with uneasy, mixed feelings to see where the "Japanese ship of state" with Premier Nakasone at the helm will head.

PRC DENOUNCES VIETNAM 'SCHEME' IN BEIBU GULF

OW281604 Beijing XINHUA in English 1549 GMT 28 Nov 82

["China Exposes Vietnamese Scheme To Encroach Upon Chinese Territory in Beibu Gulf" -- XINHUA headline]

[Text] Beijing, November 28 (XINHUA) -- The Chinese Government today solemnly declared that "the so-called boundary line in the Beibu Gulf as asserted by the Vietnamese Government is illegal and null and void."

The spokesman of the Chinese Foreign Ministry reiterated in a statement issued here today that "Xisha Islands and Nansha Islands are an inalienable part of China's sacred territory."

The statement says: In its "declaration on base line of Vietnam's territorial waters" issued on 12 November 1982, the Vietnamese Government groundlessly declared that the boundary-delimitation convention signed between China and France in 1887 "had defined" the maritime boundary line in the Beibu Gulf, and even described China's Xisha Islands and Nansha Islands as Vietnam's islands, announcing that base lines would be drawn for their territorial sea. This is a willful distortion of the historical Sino-Vietnamese boundary-delimitation convention and a gross violation of China's sovereignty and territorial integrity.

It must be pointed out that the Sino-Vietnamese Boundary-Delimination Convention signed between China and France in 1887 did not in any way delimit the maritime area in the Beibu Gulf. On 26 December 1973. The Vietnamese Government formally stated to the Chinese Government that "owing to the fact that Vietnam has been in a state of war, the maritime area of the Beibu Gulf has so far not been delimited between the two countries." This clearly indicated that originally, the Vietnamese Government also recognized the fact that China and Vietnam had not delimited the Beibu Gulf.

The statement says: The Vietnamese Government's "declaration on base line of Vietnam's territorial waters" has fully revealed the expansionist designs of the Vietnamese authorities to appropriate a vast sea area of the Beibu Gulf and to encroach upon China's territory. It is also a deliberate new step to further aggravate Sino-Vietnamese relations. The Vietnamese authorities must bear full responsibility for all the serious consequences that may arise therefrom.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Peng Zhen on Socialist Economy

OW270212 Beijing XINHUA in English 0143 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Socialist public ownership of the means of production is reaffirmed in the draft revised constitution as the basis of China's socialist economic system, said Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, in his report to the National People's Congress.

Peng Zhen said that China's economy consists of three sectors -- state, collective and individual. They have their own advantages in different spheres and all of them are indispensable, although they have different status and functions.

He stressed the need to develop diverse economic forms while upholding the leading position of the state sector, so that the whole national economy will flourish.

Ownership by the whole people and collective ownership by the working people are the two forms of socialist public ownership in China, Peng Zhen said. The draft stipulates: "The state economy is the sector of socialist economy owned by the whole people; it is the leading force in the national economy." This is the decisive factor ensuring that the collective economy of the working people advances along the socialist road, that individual economy serves socialism and that the growth of the entire national economy conforms to the overall and long term interests of the working people.

The draft stipulates: "The state protects the lawful rights and interests of the urban and rural economic collectives and encourages, guides and helps the development of the collective economy." The draft also provides for the development in the rural areas of people's communes, agricultural producers' co-operatives, and other forms of co-operative economy such as producers', supply and marketing, credit, and consumers' co-operatives.

Peng Zhen said this is because other forms of economic association for diversified production exist and grow alongside the people's communes in the rural areas. In the cities and towns, where the state economy dominates, the development of co-operative economy is suitable for many kinds of handicrafts, industries, the building trades and transport, as well as commerce and service trades.

On the question of ownership of the land, the draft makes clear-cut stipulations that land in the cities is the property of the state. Land in the villages and suburban areas is the property of collectives except for portions which belong to the state by law. There are provisions of principle regarding private plots of cropland and hilly land that are for the long-term use of rural households but are not their private property.

These provisions are of great significance in ensuring the growth of socialist economic construction in China, and particularly in ensuring the socialist orientation in the growth of the agricultural economy, Peng Zhen said.

The draft affirms that the individual economy of working people in cities and the countryside, within the limits prescribed by law, is a complement to the socialist public economy, Peng Zhen said. It is still necessary for such economy to exist for a considerable period and to grow to a certain extent.

Peng Zhen pointed out that the planned economy is the basic system of the socialist economy and an important hallmark of socialism's superiority over capitalism. While specifying that "the state practises economic planning on the basis of the socialist public ownership," the draft stipulates that "it ensures the proportionate and coordinated growth of the national economy through overall balancing by economic planning and the supplementary role of regulation by the market."

He said that in view of the excessive and rigid control over planning and administration, the draft introduces two specific stipulations:

"The state enterprises have decision-making power in operation and management, within the limits prescribed by law, on condition that they submit to unified leadership by the state and fulfil all their obligations under the state plan".

"Collective economic organizations have decision-making power in conducting independent economic activities, on condition that they accept the guidance of the state plan and abide by the relevant laws."

Peng Zhen said that the present restructuring of China's economic system has already brought significant results, and it will be continued in a comprehensive and deep-going way. The relevant provisions of the draft lay down the principles for this work.

"Proceeding along these lines, we can assuredly build and develop a socialist economy with distinctive Chinese features so as to make China a prosperous and powerful country step by step," Peng Zhen said.

Peng on Spiritual Civilization

OW270238 Beijing XINHUA in English 0205 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Increase of articles on socialist spiritual civilization marks an important step forward taken in the revision of the constitution.

Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, made this statement in his report on the draft revised constitution to the Fifth Session of the Fifth N.P.C.

With regard to the cultural aspects of building socialist spiritual civilization, Peng Zhen said, the draft revised constitution has more articles with richer content on education, culture, science, public health and physical culture than its predecessors.

He said that the expansion of education is not only the foundation for the growth of science and culture as a whole and a condition for raising the people's political consciousness, it is also an indispensable prerequisite for developing material civilization.

The state will allocate adequate resources for educational purposes, Peng Zhen said. It will encourage all social forces, including economic collectives, state enterprises and undertakings, public organizations and individuals who have the approval of the state, to run educational facilities in various forms and with mass support.

Peng Zhen said that modernization of science and technology is a key link in China's modernization. The development of the natural and social sciences, technologies, research in basic and applied sciences, and the popularization of scientific and technological knowledge are of paramount importance for socialist construction.

Public health and physical culture undertakings, literature and art, the press, publishing and other cultural undertakings are also important, he said. Their development cannot rely solely on the resources of the state but requires efforts by all social forces and mass participation in a wide range of activities.

With regard to the ideological aspect of building socialist spiritual civilization, Pen Zhen quoted this stipulation: "The state strengthens the building of socialist spiritual civilization through spreading education in ideals and morality, general education and education in disciplines and the law, and through promoting the formulation and observance of rules of conduct and common pledges by different sections of the people in urban and rural areas."

This means that efforts must be made to imbue more and more citizens with high ideals, moral integrity, general education, and a sense of discipline so that a new standard of social morality is fostered and the nation acquires a revolutionary and vigorous mental outlook, he said.

Peng Zhen said that communist ideology is the heart of socialist spiritual civilization. Only when education in communism among all cadres and the people throughout the country is strengthened will it be possible to keep China's modernization drive in the direction of socialism and to ensure that China's social development keeps heading for the correct goal and retains its ethical motivation.

The draft stipulates that "decadent capitalist ideas, surviving feudal ideas and other decadent ideology shall be combated." This sets the fighting task on the ideological front, Peng Zhen said. "Historical and practical reasons as well as domestic factors and the international environment make this fighting task protracted, and we should in no way relax our efforts," he said.

Peng on State Structure

OW270250 Beijing XINHUA in English 0218 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, has dwelt on a number of new and important provisions about China's state structure, which have been incorporated into the draft of the refised constitution.

Speaking at the Fifth Session of the Fifth National People's Congress here yesterday, Peng Zhen said these provisions have been worked out in accordance with the principle of democratic centralism governing the operations of Chinese state organs. They cover mainly the following points:

(1) Strengthening the system of people's congresses. Some of the functions and powers which originally belonged to the National People's Congress are now delegated to its Standing Committee. The functions and powers of the Standing Committee have been expanded, and the committee has been strengthened organizationally. Both the National People's Congress and its Standing Committee exercise the legislative power of the state.

(2) Restoring the posts of chairman and vice-chairman of the state. Practice since the founding of the People's Republic proves that these posts are necessary for a sound state system and are better suited to the customs and wishes of the people of all nationalities of China.

(3) Establishing the State Central Military Commission to lead the armed forces of the whole country. Its chairman is elected by the National People's Congress and is responsible to it and its Standing Committee.

The People's Liberation Army, created and led by the Chinese Communist Party, has been the national army since the founding of the People's Republic of China. The leadership of the Chinese Communist Party over the armed forces will not change with the establishment of the commission.

(4) The premier exercises overall responsibility for the State Council; executive meetings of the State Council are composed of the premier, the vice-premiers, the state councillors and the secretary-general of the State Council; the premier convenes and presides over executive and plenary meetings of the State Council.

(5) Strengthening the building of the local organs of state power under the unified leadership of the central authorities. The local people's congresses at and above the county level establish their standing committees. The people's congresses of the provinces, municipalities directly under the central government, and autonomous regions and their standing committees have the power to adopt and issue local statutes.

(6) Changing the system of the rural people's commune, which now combines government administration and economic management, and establishing organs of state power at the township level. The people's commune will be solely an organizational form of the rural collective economy. This change will serve to strengthen the organs of state power at the grass-roots level in the rural areas and also to expand the collective economy.

(7) It is stipulated that state leaders, including the chairman and the vice-chairman of the state, the chairman and vice-chairman of the Standing Committee of the National People's Congress and the premier and vice-premier of the State Council, shall not serve more than two consecutive terms. Thus, the de facto system of life-long tenure of leading posts is abolished.

Peng Zhen said these provisions are made for the following purposes: first, to enable the whole people to exercise state power better; second, to enable the state organs to guide and organize the work of socialist construction more effectively; and third, to enable the different state organs to co-operate with one another better on the basis of a proper division of labor.

Peng on Nationality Policy

OW270304 Beijing XINHUA in English 0228 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- It is a basic principle followed by the Communist Party of China and the state to work for the equality, unity and common prosperity of all nationalities of China.

Peng Zhen, vice-chairman of the Committee for the Revision of the Constitution, said this in a report to the Fifth Session of the Fifth National People's Congress.

He said China is a unitary multinational country created by all its nationalities jointly. The system of autonomy in regions inhabited by minority nationalities is the correct system which proves suited to China's conditions through the test of practice, he added.

Peng Zhen said that after the founding of the People's Republic, the nationalities of China established a close political, economic and cultural relationship of interdependence and mutual assistance along the common road of socialism.

Regional national autonomy within a unified country not only can ensure the lawful rights and interests of the minority nationalities and speed up the economic and cultural development of the areas they inhabit, but also serve to resist aggression and subversion from outside and guarantee the independence and prosperity of the country as a whole.

The provisions on regional national autonomy in the draft of the revised constitution have restored some important principles contained in the 1954 constitution and, moreover, acquired new content in line with the changes which have taken place in China, Peng Zhen said. It is stipulated that the chairmanship and vice-chairmanships of the standing committee of the people's congress of an autonomous region, zhou or county shall include a citizen or citizens of the nationality, or the nationalities, exercising regional autonomy in the area concerned; that the administrative head of an autonomous region, zhou or county shall be a citizen of the nationality, or one of the nationalities, exercising regional autonomy in the area concerned; that organs of self-government independently administer local economic development as well as education, science, culture, public health and physical culture in those areas; and that in developing natural resources and building enterprises in the national autonomous areas, the state shall give due consideration to the interests of those areas. It is also stipulated that the state shall give financial, material and technical assistance to the minority nationalities to accelerate their economic and cultural development and help the national autonomous areas train large numbers of cadres at different levels and specialized personnel and skilled workers from among the nationality or nationalities in those areas. All these provisions extending the power of autonomy of the national autonomous areas show that the state fully respects and ensures the democratic right of the minority nationalities to manage their internal affairs.

Li Xiannian Meets Hubei Group

OW280224 Beijing XINHUA Domestic Service in Chinese 1258 GMT 27 Nov 82

[Text] Beijing, 27 Nov (XINHUA) -- Comrade Li Xiannian met at his home this morning with some deputies of the Hubei provincial delegation now attending the Fifth Session of the Fifth NPC and had cordial conversations with them.

Comrade Li Xiannian said to them: This session is another extremely important meeting after the 12th party congress and every effort should be made to hold it successfully. This session is not only to enact the fundamental law of the state but to discuss the Sixth 5-Year Plan.

He pointed out: It took 2 years to draft and discuss the new constitution, and people throughout the country participated in discussions and made suggestions. Therefore, it reflects the will of the people of all nationalities throughout the country. This draft revised constitution, a summing-up of our country's experiences -- both positive and negative -- in the socialist revolution and construction over the past 30-odd years, conforms to our country's conditions and meets the requirements of the four modernizations. It is a relatively flawless draft constitution.

Li Xiannian said: It is essential that we uphold the four basic principles. Our country must develop democracy and strengthen the legal system. After the constitution is adopted, we still need to make some other laws in accordance with the essential principles of the constitution in order to further strengthen our country's legal system.

All workers, peasants, intellectuals and cadres should do a good job in studying and publicizing the new constitution. Squares and circles cannot be made without a compass and a T-square, and the new constitution is our country's great compass and T-square.

During the meeting, a deputy said: Deputies feel that this session is really important, that they are proud to be able to attend the session to adopt the new constitution and decide on the Sixth 5-Year Plan and that the burden on their shoulders is very heavy. Li Xiannian said that as deputies they should have such a sense of responsibility.

Li Xiannian said: The situation in the country as a whole, especially in the countryside, is very good. It is entirely correct to have instituted the agricultural production responsibility system. There are grounds for the 12th party congress to have set the goal of quadrupling the gross annual value of industrial and agricultural production by the end of this century, and we are confident of achieving it. He stressed: Stability and unity are essential to the modernization drive. All people should unite as one and make concerted efforts to successfully build the country under the leadership of the party Central Committee.

Li Xiannian said: People hope for high speed in construction. However, stress should be placed on the quality and marketability of products and on economic results.

He also mentioned the importance of science and technology in the national economy. He said: It is necessary to rely on science to develop agriculture and it is also necessary to rely on science to make developments in industry and communications and on all other fronts. You should have a clear understanding of this point and make efforts to develop scientific and educational undertakings. In carrying out construction, it is of course also necessary to handle correctly the relationship between consumption and accumulation and to concentrate funds properly on key construction projects. It is necessary to practice diligence and economy, to oppose extravagance and waste and to strike at criminal economic activities.

Deputy Chen Pixian said to Comrade Li Xiannian: "You are a deputy from Hubei. We know you are very much concerned about the work in Hubei, and we have come here today to brief you on the situation in the province this year." Deputies mentioned that Hubei's grain output this year was 38 billion jin and its late-rice output topped its highest record in the past.

Li Xiannian happily said: There are also great prospects for fishery in Hubei. He hoped that in the excellent situation people should bear the nation's overall interests in mind and make more contributions to the state. He asked them to give his best regards to all other deputies from Hubei.

Also present at the meeting were Han Nigfu, Zhang Xiulong, Lin Musen, Zhu Yekui, Liu Huinong, Xia Juhua, Wang Yuzhen, Hu Hengshan, Li Xi and Qiu Fazu, deputies from Hubei.

Panel Discussions Begin 27 Nov

OW290111 Beijing XINHUA Domestic Service in Chinese 1536 GMT 27 Nov 82

[Excerpts] Beijing, 27 Nov (XINHUA) -- The 5th Session of the 5th NPC on 27 November began panel discussions on the draft revised constitution. With a high sense responsibility as the masters of the country, NPC deputies from all localities and fronts in the country earnestly studied and discussed the draft revised constitution and Peng Zhen's report on the drafting of the revised constitution. A lively and warm atmosphere prevailed in the panel discussions. The speakers emphatically pointed out: With the four basic principles as overall guidelines, the draft revised constitution reflects the common will and fundamental interests of all nationalities in the country and is the general statute for running the country and ensuring its stability. After it is adopted, it will certainly play a great role in promoting victorious advances in China's socialist modernization.

The Draft Revised Constitution Embodies the Party's Consistent Policy Toward Minority Nationalities

NPC Deputy Ulanhu said: The provisions in the draft revised constitution for the question of nationalities are very good and will inspire the socialist enthusiasm of all minority nationalities in production and cultivate their patriotism, thereby safeguarding the unity of nationalities and the unification of the country.

Ulanhu said: Nationalities work is a major question concerning the modernization program and having a vital bearing on the survival or destruction, as well as the development of the country. After summing up the experience in the past more than 3 decades since the founding of the country, the central authorities have attached great importance to nationalities work and have shown kind concern for minority nationalities. The draft revised constitution reflects the central authorities' kind concern and the party's consistent policy toward minority nationalities. The drafting of the constitution is a major event in the economic, political and cultural development in regions inhabited by minority nationalities. After the adoption of the constitution, it will be necessary to conduct extensive education so that the people of all nationalities can understand the great significance of safeguarding national unity and maintaining good relations with other nationalities. Through the enforcement of the constitution, we will achieve great advances in promoting socialist relations among all nationalities, in economic construction in nationality regions and in the entire undertaking of modernization.

Yang Dezhi on Constitution

OW271620 Beijing XINHUA in English 1555 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Yang Dezhi, chief of the General Staff of the Chinese People's Liberation Army, said today that the draft revised constitution "conforms to the common will and interests of the Chinese people and also reflects the wishes and demands of the 4.2 million men of our army."

General Yang is head of the P.L.A. delegation to the ongoing National People's Congress session.

The over 400 army deputies broke into groups today to discuss the draft constitution and the report delivered by Peng Zhen yesterday.

The concensus of views at the panel discussions is that the draft marks a new stage in the development of socialist democracy and the socialist legal system in China and that upon adoption it will serve to guarantee the fulfilment of the task of pushing forward socialist modernization as set at the 12th party congress last September.

Yang said: "Now that it has entered a new historical period of socialist modernization, China badly needs a constitution that matches the country's political, economic and cultural life and codifies the country's major principles, policies and systems so as to unify the thinking and action of the entire nation.

"The present draft meets this requirement. It conforms to China's conditions perfectly and is the best we have had since 1949."

Since the constitution is the fundamental law of the country, every citizen must abide by it, Yang said. All members of the P.L.A. must perform the basic rights and obligations of the citizens in an exemplary manner and resolutely carry out the tasks the constitution assigns the armed forces.

Yang Dezhi called for greater efforts to build the P.L.A. into a revolutionized, modern and regular army, raise its combat capability in modern warfare and become a vital force in defending the socialist motherland and building socialist spiritual civilization.

Qin Jiwei, commander of the P.L.A. Beijing units, analyzed the necessity and significance of setting up a Central Military Commission of the state. He said that this is in full accord with the basic tenets of Marxism since Marx, Engels and Lenin all described the army as an important component of the state apparatus.

Previous constitutions lacked explicit stipulations on the status of the army in the state, giving rise to the misunderstanding that the P.L.A. is an army of the Communist Party and not of the state. Establishment of a Central Military Commission of the state will serve to perfect the state system.

Army building is closely linked with national construction, Qin Jiwei pointed out. Inclusion of the military leadership in the state leadership will enable the state to give better overall consideration to army building and offer more effective resistance to foreign aggression.

Dong Qiwu, 84, an ex-army commander and now vice-chairman of the National Committee of the Chinese People's Political Consultative Conference, hailed the forthcoming birth of a new national constitution at the present N.P.C. session.

"This constitution will prove to be a national charter that benefits the people and the country," Dong Qiwu said at a panel discussion among N.P.C. deputies.

Dong had taken part in five discussions on the draft revised constitution as a member of the Legislative Affairs Commission. Comments and suggestions had been solicited from all quarters during the nation-wide discussion, he said.

"It is rare in the world that such extensive democracy has been practised in the revision of a constitution," Dong said.

He predicted that the new constitution will remain stable over a long period because it is born at a time of genuine political stability.

Zhu Xingfa, a company officer from the regiment in which the late communist fighter Lei Feng once served, said that inclusions of provisions for building socialist spiritual civilization is of great significance.

He said communist ideology is the core of socialist spiritual civilization, of which Lei Feng was an exemplar. His spirit embodied the glorious tradition of the People's Liberation Army.

Every P.L.A. fighter should emulate Lei Feng, foster a deep love for the motherland and the people, and for labor, science and socialism, display the communist spirit and be a vanguard in building socialist spiritual civilization, Zhu Xingfa said.

Qin Jiwei on Military

OW281431 Beijing XINHUA Domestic Service in Chinese 1142 GMT 28 Nov 82

[Text] Beijing, 28 Nov (XINHUA) -- At the PLA delegation's group discussion on the draft of the revised constitution on 27 November, Qin Jiwei, commander of the Beijing PLA units, talked specifically about the importance of establishing the Central Military Commission for the state.

He said: Establishment of the Central Military Commission for the state completely conforms with the Marxist principle. As early as 1871, Marx already had pointed out: "The primary condition for the dictatorship of the proletariat is an army of the proletariat." Engels also said: "An army is an organized armed group maintained by the state for offensive or defensive purposes." On many occasions Lenin also said that state apparatus is first the regular army.... From here we know the army is an important component in the state apparatus.

He said: Establishment of the Central Military Commission for the state is also absolutely necessary for the state structure. The constitution should make explicit stipulations about the role of the army in the state, otherwise the state structure is not perfect. In the past, China's constitution lacked explicit stipulations in this matter and the people came to misunderstand the army as the army of the party, not the state. The draft of the revised constitution clearly stipulates that the state establishes the Central Military Commission. This not only perfects the state structure but will also improve and strengthen the party's leadership over the army.

Qin Jiwei said establishment of the Central Military Commission for the state is also good for strengthening army buildup and for coping with aggression from without. When the army's leading organs are incorporated into the state leading organs, the state will be able to better consider army building in an all-round way. The draft of the revised constitution contains many explicit stipulations in this respect. It stresses that the state strengthens the work of revolutionizing, modernizing and regularizing the armed forces. The articles on citizens' rights and obligations reaffirm that military service is an honorable obligation of every citizen and that the state safeguards the livelihood of disabled servicemen, takes care of family members of martyrs and gives preferential treatment to armymen's families. This fully shows that the state attaches importance to and is concerned about the army. This will greatly help to reinforce army units. Incorporating the army leading organs into the state leading organs will also help to strengthen unified leadership and will better guarantee that our army will swiftly switch to the wartime system of leadership when the state is subjected to aggression from without.

In conclusion, Qin Jiewi said: This stipulation in the draft of the revised constitution is an important policy decision with tremendous immediate significance as well as far-reaching historical significance. We should work harder to shoulder the honorable and historical task entrusted to the army by the state.

Duan Junyi, Ren Zhongyi Comment

OW271748 Beijing XINHUA in English 1730 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- More than 3,000 deputies to the National People's Congress, including some party and government leaders, began panel discussions on the draft revised constitution here today.

Duan Junyi, first secretary of the Beijing Municipal Committee of the Chinese Communist Party, said that the new constitution to be adopted embodies in legal form the historical experiences since the founding of the People's Republic and especially those acquired over the last few years.

It ensures the correct orientation of socialist construction by upholding the four cardinal principles and stressing both material civilization and socialist spiritual civilization, he said.

Ren Zhongyi, first secretary of the Guangdong provincial party committee, stressed the need to stabilize China's constitution and laws.

"Some of our own people and our foreign friends and business partners are still worried about the changeability of our policy, and this is not without reasons," Ren said.

He quoted Deng Xiaoping as saying that, in the past, what leaders said was regarded as "law" because there was no perfect legal system and that the "law" changed when the attention of the leaders turned. This state of affairs has improved considerably, Ren said.

"In order to ensure the stability of policy and increase people's confidence in its stability," Ren said, "it is necessary to put down in legal form our successful experience, practices, policies and theories that reflect the fundamental interests of the people.

"Thus, our political situation will be more stable and the cadres and masses more steadfast in carrying out the party's line, principles and policies."

Han Peixin, acting governor of Jiangsu Province, said that the provisions in the draft revised constitution concerning the state system, the government system, the political system, the economic system and socialist spiritual civilization are in conformity with the present situation in China. The new constitution will ensure long-term political stability in China.

He spoke highly of the provisions concerning the development of a diversified economy and criticized the previous practice of restricting the cooperative and individual sectors of the economy.

The institutionalization of the status and functions of the three sectors of the economy -- state, collective and individual -- in the new constitution conforms to the actual conditions in China, he said.

Han Peixin reported that, of the 33,800 industrial enterprises in Jiangsu Province, 85 percent are collective enterprises and those in the countryside are mainly collective undertakings.

Lu Dadong, governor of the most populous province in Sichuan, praised the draft constitution as "a good basic law that embodies the interests of the people and the policy of the Communist Party."

Liu Guomin, Communist Party Committee secretary of the Vanguard People's Commune in Jiangjin County, Sichuan Province, said the peasants are satisfied that the revised constitution reaffirms the production responsibility system now prevailing in the rural areas.

Professor Zhou Gucheng from Fudan University, who is also vice-chairman of the Standing Committee of the Shanghai Municipal People's Congress, said the draft constitution will guarantee the building of a modern socialist country with a high degree of democracy and civilization.

He said that the consensus in the nationwide discussion that no organization or individual is allowed to stand above the constitution shows that the sense of rule by law has gone deep into the hearts of the people.

Deputies from Taiwan Province highly commended the provision in the draft constitution that special administrative regions may be set up if necessary. Cai Zimin said this gives due consideration to the present conditions in Taiwan while taking into account the aspirations of the people there.

Fang Zhichun from Jiangxi, an old revolutionary base area, was most pleased with the stipulation that all power belongs to the people. This power was won by the Chinese people through protracted struggle under the leadership of the Communist Party, he said. More than 700,000 revolutionaries in Jiangxi gave their lives for this, he added.

"To safeguard and augment our fruit of victory," Fang said, "we must adhere to the four cardinal principles outlined in the draft constitution and make our socialist country prosperous."

Yin Fatang, first secretary of the Communist Party Committee of the Tibet Autonomous Region, cited achievements in the political, economic, cultural and educational fields in Tibet to illustrate how the party's policy for regional autonomy in minority nationality areas is embodied in the draft constitution.

Politically, he said, equality, unity and mutual help among different nationalities in Tibet have replaced oppression, separation and discrimination. The stipulation in the draft constitution that leading members of the local people's congress standing committees and people's governments in national autonomous areas must be people from the local nationalities is already a fact in Tibet. Cadres at the grassroot level are mostly members of the local nationalities.

In Tibet, Yin added, freedom of religious belief is guaranteed, the Tibetan language is respected, and the local people are assured of the freedom to retain or alter their customs and habits.

Peng Zhen Joins in Talks

OW271852 Beijing XINHUA in English 1831 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Beijing deputies to the Fifth Session of the Fifth National People's Congress (N.P.C.) discussed the draft of the revised constitution at panel meetings this afternoon.

Peng Zhen, one of the deputies and vice-chairman of the Committee for the Revision of the Constitution, joined the second group in their discussion. The group is composed mainly of scientists, engineers, doctors and artists. They all spoke highly of the draft revised constitution and held that it will be a fundamental law with unique Chinese characteristics.

The deputies had a lively discussion on how to maintain the stability of the constitution for a long period to come.

Referring to this question, Peng Zhen said 1,000 million Chinese people are interested in the draft revised constitution. This would be the fundamental guarantee for its long-term stability. The draft constitution has been discussed by the people all over the country. This not only has helped to perfect the draft, but has enabled the people to grasp its meaning and spirit. The stability of a constitution depends on its correctness and comprehensiveness; if it is correct and comprehensive, it is powerful. The better the masses of the people understand it and apply it, the surer the guarantee for the stability of the constitution, he said.

Peng Zhen also spoke on questions the deputies raised during the discussion, such as the significance of the revision, the Chinese Communist Party's role in implementing the constitution, democracy and rule by law.

Deputies on Regional Autonomy

OW281550 Beijing XINHUA in English 1528 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- Provisions concerning national regional autonomy in the draft revised constitution represent a new development of the relevant policy in the new historical period.

This is the consensus of views expressed in panel discussions by leader of autonomous regions who are here for the National People's Congress session.

Tomur Dawamat, chairman of the People's Congress Standing Committee of the Xinjiang Uygur Autonomous Region, said that national regional autonomy is a correct policy suited to China's conditions and tested in practice. This policy has enabled the people of all nationalities in Xinjiang to press forward on the road of equality, unity and common prosperity along with the rest of the Chinese people.

He said experience in Xinjiang shows that training national minority cadres and bringing their role into full play is an important aspect of national regional autonomy. The revlevant stipulations in the draft revised constitution are more explicity and specific than previous ones.

A case in point, Tomur said, is the stipulation that the people's congress standing committee of an autonomous region, prefecture or county shall include at least one citizen from the local minority nationalities serving as its chairman of vice-chairman.

The administrative head of an autonomous region, prefecture or county shall be a citizen of the nationality, or one of the nationalities, exercising national regional autonomy in the area concerned.

National regional autonomy would be out of the question without national minority cadres holding major leading positions.

He reported that the chairman of the people's congress standing committee, the chairman of the people's government, and the heads of 13 prefectures and 76 counties in Xinjiang are member of minority nationalities. Many minority people hold government posts at various levels.

Tomur, who is a peasant of Uygur nationality, said that it was well nigh impossible for a minority person to become a county magistrate before liberation.

Minority nationalities in Xinjiang boast more than 9,000 college students, 1,200 of them now studying in Beijing or other cities outside fo the region, he said. The number of scientific and technical personnel of minority nationalities has increased from 460 in 1950 to almost 30,000.

The draft constitution also calls for respecting the cultural heritage of the minority nationalities, helping them develop their culture and using their languages in areas where they live in compact communities, Tomur said.

Xinjiang radio uses five languages -- Uygur, Han, Mongolian, Kazak and Kirgiz. Regional documents are generally written in Uygur and Han, and prefectural and county deocuments in four or five languages, he said. All this shows that the right of the minority nationalities fully guaranteed.

Ting Mao, chairman of the Standing Committee of the People's Congress of the Inner Mongolian Autonomous Region, said that the draft has clear and specific provisions on the state's commitment to accelerate economic and cultural development in minority areas by way of providing financial aid and training technical personnel.

Due to historical reasons and mistakes arising from the ultra-left line, he said, the economy, culture and education are comparatively poor in minority areas. To change this situation rapidly, the central authorities have given tremendous assistance to this region in funds, materials and personnel.

Since 1979, Ting Mao said, the central government has granted the region one million tons of grain and more than one billion yuan each year. Most of the funds for building the large industrial projects in this region comes from the central government.

Ting Mao said that the rapid development of industry, agriculture and animal husbandry in Inner Mongolia in recent years is inseparable from the support given by the state and other parts of the country. On the other hand, he said, Inner Mongolia has helped the rest of the country by supplying minerals, animal products and certain industrial products.

Ma Qingnian of Hui nationality, who is chairman of the Standing Committee of the People's Congress of the Ningxia Hui Autonomous Region, said that the central government has helped this autonomous region with a population of 3.8 million by extending financial aid totalling 5,600 million yuan since it was established in 1958.

Thanks to the assistance given by the state and other parts of the country, Ningxia has built 1,100 industrial enterprises.

Deputies on Religious Freedom

OW281532 Beijing XINHUA in English 1511 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- A leading Chinese Buddhist said today the provisions for the freedom of religious belief in China's draft revised constitution "meet the wishes of religious circles in the country."

Zhao Puchu, chairman of the Chinese Buddhist Association and the deputy to the National People's Congress (N.P.C.), said in an interview with XINHUA that the new constitution being considered at the current N.P.C. session conforms to China's reality and sets to rights the confused and mistaken ideas that existed before.

He said the draft has stipulated that citizens of the People's Republic of China enjoy freedom of religious belief, that the state protects legitimate religious activities, that no organs of state, public organizations or individuals shall compel citizens to believe or disbelieve in religion, nor shall they discriminate against citizens who believe, or do not believe, in religion, and that no religious affairs may be dominated by any foreign country. He described these stipulations as "a brilliant summation of China's policies on religion and its work in this field over the past three decades."

The provisions relating to religion in the draft, Zhao Puchu said, represent a return to and a development of the correct policy on religion contained in the 1954 constitution, the first of New China. "They have corrected the 'leftist' errors shown in the 1975 and 1978 constitutions," he added.

He said the Communist Party and the government have always stressed that the freedom of religious belief includes both the freedom to believe and the freedom to disbelieve in religion. Considering that this freedom was violated during the "Cultural Revolution," the present draft clearly stipulates that Chinese citizens enjoy freedom of religious belief and the state protects legitimate religious activities. Thus this freedom is guaranteed by the fundamental law.

Professor Ren Jiyu, director of the Institute of World Religions under the Chinese Academy of Social Sciences, said the provisions concerning religious belief in the draft revised constitution represent an improvement on those of the 1954 constitution by stipulating that no organs of state, public organizations or individuals shall compel citizens to believe or disbelieve in religion, nor shall they discriminate against citizens who believe, or do not believe, in religion.

"I say this because in some of the areas where religious people live in compact community, there were cases in which people who do not believe in religion were despised and discriminated against," Ren Jiyu said. "The draft revised constitution forbids such discrimination."

Professor Ren Jiyu said the draft also stipulates that no one may use religion to carry out activities that disrupt public order, harm the health of citizens or obstruct the educational system of the state.

"This stipulation is very important," the professor added, "considering that in some localities there were people who tried to substitute religious education for primary education, and witchcraft for medical care, both in the name of religious belief. Such malpractice must be stopped with the enforcement of the constitution."

Professor Ren Jiyu noted that some foreign religious forces have attempted to interfere with religious activities in China. "Chinese religious circles are resolutely opposed to such interference, and they support the stipulation in the draft that no religous affairs may be dominated by any foreign country," he said.

Guangdong Leaders Comment

HK290257 Guangzhou Guangdong Provincial Service in Mandarin 2350 GMT 28 Nov 82

[Text] According to XINHUA, people's deputy and Guangdong Provincial CPC Committee First Secretary Ren Zhongyi said at a NPC session panel meeting on 28 November: This year there are two major affairs in the political life of the Chinese people. One is the 12th party congress, which formulated the strategic principle of creating a new situation in all fields of socialist modernization and the new party constitution, and the other is the 5th Session of the 5th NPC. This session will formulate the general program for ruling the country, the new PRC constitution and the Sixth 5-Year Plan.

Ren Zhongyi said: Strengthening the socialist legal system is an important guarantee for achieving the four modernizations. To achieve the four modernizations, correct policy alone is not enough; we must also have a soundly based socialist legal system, and especially a state constitution that reflects the will of the people of the whole country and meets the needs of socialist modernization.

Ren Zhongyi said: It is very important to draw up a good constitution, and it is even more important to adhere to it. The CPC has led the people to formulate the new constitution, and it will also lead the people to uphold and implement this new constitution.

People's deputy and Guangdong provincial delegation leader Li Jianzhen said at an NPC session panel meeting on 27 November: After the new constitution is adopted, it will be an important hallmark in developing socialist democracy and putting the socialist legal system on a sound basis since the founding of the state. The most important issue in the future is to ensure the implementation of the new constitution.

She said: To ensure the implementation of the constitution, we must first carry out systematic and deepgoing propaganda and education work.

Second, we must continue to get a good grasp of legislative work in accordance with the basic principles stipulated by the constitution. Third, we must organizationally set up the organs on a sound basis for supervising the implementation of the constitution to guarantee its implementation. Fourth, the party must educate and supervise the party members in taking the lead in adhering to the constitution and the law.

Jilin Leader States Views

SK281238 Changchun Jilin Provincial Service in Mandarin 2200 GMT 27 Nov 82

[Text] According to XINHUA, at the Fifth Session of the Fifth National People's Congress, Qiang Xiaochu, deputy to the National People's Congress and first secretary of the Jilin Provincial CPC Committee, talking to XINHUA reporters, said: The people across Jilin Province are happily expecting the birth of a new constitution. The new constitution that will be approved at the session will be the best since the PRC's founding because it is generally guided by the four basic principles, it inherits and carries forward the correct guidelines and contents of the constitution formulated in 1954 and it is a fundamental and principal law having Chinese characteristics and governing the mission to run the country well and to give the people peace and security. The approval of the new constitution will certainly benefit the work to accelerate the construction of socialist democracy and our countery's legal system and to legally assure long-term order and peace for our country.

Qiang Xiaochu stated: A vast number of people have received an in-depth education on democracy and the legal system through their discussions on the revised draft of the constitution. Therefore, the new constitution that will be examined and approved at the session is based on the opinions of the broad masses of the people, is a crystalization of the wisdom of people of various nationalities throughout the country and will certainly win an active observation and support from all the people. We, as well as the people of various nationalities across Jilin Province, are determined to do a good job in studying, publicizing and implementing the new constitution.

Referring to the state's future major task set forth by the revised draft of the constitution in regard to concentrating of building socialist modernization and referring to the Sixty 5-Year Plan that will be approved at the session, Qiang Xiaochu stated: Over the past 2 years, the situation prevailing in industrial and agricultural production throughout Jilin Province has become better and better. Despite having had this year the most serious drought we have suffered since the country's liberation, by giving a free hand to the masses in enacting agricultural production responsibility systems, Jilin Province has brought into full play the peasants enthusiasm in combating the natural disaster to achieve a bumper harvest, with the result that the serious drought was brought under control and a good harvest was achieved. The industrial production this year was also good.

Jilin Province is endowed with abundant natural resources and has a relatively solid industrial foundation and enough technological forces. It is also endowed with 120 million mu of forests, 40 million mu of grassland and lots of mountain slopes suitable for livestock. The province also has a large capacity for developing special local products including ginseng, antler and herb medicines and has great latent power in both industry and agriculture. Only by doing things according to economic law and further implementing the 12th CPC Congress guidelines and the Fifth NPC session's spirit will Jilin Province be able to totally fulfil the task imposed by the Sixth 5-Year Plan. He said that efforts should be made to bring into full play the province's strong points and make due contributions to bulding socialist modernization in the country.

Gansu's Feng Jixin Comments

HK290549 Lanzhou Gansu Provincial Service in Mandarin 0420 GMT 29 Nov 82

[Text] According to XINHUA: The provisions on economic system stipulated by the draft of the revised constitution accord with China's national condition. This was stated by Gansu Provincial CPC Committee First Secretary Feng Jixin in a panel discussion meeting at the NPC session.

He said: China's economy is rather backward, and there is also great imbalance in economic, technical, cultural and other development between different areas, departments and enterprises. In actual economic life, there are many things that the state cannot manage which are suited to management by the collective. There are also many things related to people's daily life that are uneconomic for the collective to run, and are better operated by individuals. In view of this, the economy of ownership by the whole people, the economy of ownership by the collectives of laboring people, and the economy of individual laborers each has its superior features within a certain scope, and so all of them must exist.

Feng Jixin said: The economic system practiced in China of having a variety of economic forms coexisting cannot lead to capitalism. This is because state-owned and collective economy have absolute predominance in the national economy, and the proportion accounted for by individual economy is very small and cannot affect in the slightest the overall situation of socialist public ownership of the means of production. At the same time, planned economy is the basic system of China's economy. State-owned, collective and individual economic activities must all be guided and constrained by the state's unified plans. The state also controls various effective economic measures, such as prices, taxes credit, raw material supply and so on. These economic measures can be applied to support and help the development of undertakings beneficial to the national economy and the people's life, and to control economic activities that harm the interests of state and people. Apart from that, we can apply the methods of strengthening party leadership, using the functional role of the regime of the people's democratic dictatorship, and carrying out administrative intervention to solve problems in socioeconomic activities.

At present, the problem is that we must deepen understanding of these provisions, clear away leftist influence, further emancipate our minds, broaden our vision, carry out bold innovations, and mobilize the positive factors of all sectors to build and develop a socialist economy with Chinese charactierstics and accomplish the vast goal proposed by the 12th party congress.

Shanxi's Huo Shilian Comments

HK290320 Taiyuan Shanxi Provincial Service in Mandarin 2300 GMT 28 Nov 82

[Text] The 29 November SHANXI RIBAO prints a speech made by people's deputy and Shanxi Provincial CPC Committee First Secretary Huo Shilian at a panel discussion at the NPC session. Comrade Huo Shilian said: The draft of the revised constitution has set down the law of the land. This is a reliable guarantee for achieving a fundamental turn for the better in the entire social mood.

He said: During the 10 years of internal chaos, the Lin Biao and Jiang Qing counter-revolutionary cliques did away with the party discipline and state law that had been based on Marxism-Leninism. They acted lawlessly and did whatever they liked, ruining the party work style and popular practice.

Huo Shilian said: Our party and state are resolved to correct party work style and the social mood.

It is satisfying that the draft of the revised constitution upholds the dialectical relationship between rights and obligations and stresses that citizens' rights cannot be separated from their obligations. It clearly stipulates that no citizen is allowed special rights that go beyond the constitution and the law. When exercising their rights, citizens are forbidden to harm the interests of the state, society and the collective and the legitimate rights of other citizens. This will be better able to thwart the erroneous trends of extreme democracy and extreme individualism. At the same time, the provisions of the draft of the revised constitution regarding the popularizing of education in ideals, morality, culture, discipline and legal system and advocating love for the motherland, the people, labor, science, and socialist morality will certainly be able to play a role in establishing a new social mood. With these provisions, we have the guiding principles that every citizen should observe [words indistinct].

Beijing Television Report

HK270948 [Editorial Report] Beijing Domestic Television Service in Mandarin at 1100 GMT on 26 November carries a 10-minute filmed report on the 26 November opening of the Fifth Session of the Fifth NPC in the Great Hall of the People in Beijing.

The film opens with a long shot of Beijing's thoroughfares. This is followed by several long shots of many buses and limousines in a parking area outside the Great Hall of the People and several hundred deputies to the NPC walking toward or entering an anteroom and many other deputies talking with one another in the room.

The camera then cuts to show a very large national emblem of the PRC which is flanked by 10 red flags on the wall behind the back row seats of the rostrum. After that, the camera zooms in and pans to show all those present on the rostrum and the deputies who are seated in the front rows in the main auditorium of the hall. The first close-up shot is of Ye Jianying (wearing an audiophone), identified by the announcer as "executive chairman of today's session," who is seated at the center of the front row on the rostrum and who is seen holding and looking at a paper. This is followed by a medium shot of Ye Jianying, Peng Zhen, Yang Shangkun and Ulanhu sitting in the front row.

A female attendant is seen standing behind Ye during this medium shot. The film then gives a medium shot of other executive chairmen at the session who are seated on the right-hand side of Ye Jianying. They are: Deng Yingchao, Wei Quoing, Li Jingquan, Liao Chengzhi, Xu Deheng, Xiao Jingguang, Xi Zhongxun and Bainqen Erdini Qoigyi Gyaincain, in this order. Those executive chairmen at today's session who are seated on the left-hand side of Ye Jianying are: Peng Zhen, Yang Shangkun, Ulanhu, Tan Zhenlin, Seypidin, Ngapoi Ngawang-Jigme, Hu Huewen and Shi Liang, in this order. While the film is giving a close-up shot of Ye and several medium shots of the above executive chairmen sitting in the front row, the announcer is heard reading a list of the executive chairmen, in this order: Ye Jianying, Peng Zhen, Deng Yingchao, Yang Shangkun, Wei Guoqing, Ulanhu, Li Jingquan, Tan Zhenlin, Liao Chengzhi, Seypidin, Xu Deheng, Ngapoi Ngawang-Jigme, Xiao Jingguang, Hu Huewen, Xi Zhongxun, Shi Liang and Bianqen Erdini Quogyi Gyaincain. After this, the film gives another close-up shot of Ye, who is seen holding a paper and saying a few words and is also seen and heard saying: "The Fifth Session of the Fifth NPC is now delcared open." Immediately after this close-up shot, a military band is seen and heard playing the national anthem.

During the playing of the national anthem, the camera pans to show the executive chairmen standing on the rostrum. While all those present on the rostrum are shown standing, a male attendant is seen standing behind Liao Chengzhi, a female attendent is seen standing behind Deng Yingchao, a female and a male attendant are seen standing behind Ye Jianying, a male attendant is seen standing behind Tan Zhenlin and a female attendant is seen standing behind Shi Liang. After the playing of the national anthem, Ye Jianying is seen and heard holding a paper and mumbling a few words while the announcer says the following in the voice-over: "After that, NPC Standing Committee Vice Chairman Deng Yingchao presided over the implementation of various items on the agenda." Next, while Deng Yingchao is seen seated in the first row and is heard asking Peng Zhen, vice chairman of the Committee for the Revision of the Constitution, to deliver a report on the drafting of the revised constitution, the aforementioned female attendant is no longer seen standing behind Deng Yingchao. Then, the camera pans to show Ye Jianying, Peng Zhen, Yang Shangkun and Ulanhu applauding. At this point, only a female attendant is seen standing behind Ye Jianying. The camera then gives a close-up shot of Peng Zhen reading the report. During Peng's report, Hu Yaobang is seen sitting in the third row of the rostrum. After this, the film gives a medium shot of Zhao Ziyang and Wan Li sitting in the second row and listening to the report, and a close-up shot of Hu Yaobang and Deng Xiaoping (wearing an audiophone and holding a cigarette) sitting in the third row of the rostrum and listening to the report. The camera then pns to show Xu Xiangqian, Nie Rongzhen, Wang Zhen, Li Desheng (in PLA uniform), Yang Dezhi (in PLA uniform), Song Renqiong and Zhang Tingfa (in PLA uniform) sitting in an unidentifiable row of the rostrum and listening to Peng Zhen's report. According to a XINHUA radiophotograph, Xu Xiangqian is sitting next to Deng Xiaoping on the rostrum. This is followed by several shots of lesser PRC officials on the rostrum and deputies in the auditorium who are seen listening to Peng's report.

The film then gives another close-up shot of Peng Zhen reading the report. During this close-up shot, which lasts more than 1 minute, Zhao Ziyang is seen sitting behind Peng Zhen in the second row and Hu Yaobang is seen sitting behind Zhao Ziyang and smoking a cigarette in the third row of the rostrum. While Peng Zhen is seen and heard reading the report, the announcer summarizes the report in the voice-over. While Peng is heard reading the report and the announcer is heard summarizing the report, the camera pans to show some of the many deputies and foreign diplomatic envoys to China and foreign correspondents in the auditorium listening to Peng's report. After this, the camera gives a medium shot showing Peng Zhen reading the report and Yang Shangkun and Ulanhu listening to the report in the first row of the rostrum; Zhao Ziyang, Wan Li, Yao Yilin and Yu Qiuli listening to the report in the second row of the rostrum; and Hu Yaobang listening to the report in the third row of the rostrum. After that, the film gives one more close-up shot of Peng Zhen reading the report, which lasts half a minute. During this close-up shot, Zhao Ziyang is again seen sitting behind Peng Zhen, and Hu Yaobang is again seen sitting behind Zhao Ziyang. At the end of this close-up shot, Peng Zhen stops the reading. The camera then gives a medium shot showing Yang Shangkun and Ulanhu applauding in the first row; Zhao Ziyang, Wan Li and Yao Yilin applauding in the second row; and Hu Yaobang applauding in the third row of the rostrum. This is followed by a long shot of the deputies applauding in the auditorium.

Next, the film gives a close-up shot of Deng Yingohao, who is seen and heard saying: "Now let us come to the second item on the agenda. The meeting of the Presidium has adopted and put forward a draft resolution on the national anthem of the PRC for deliberation by the congress. Copies of the draft resolution and the notes in explanation have already been made and distributed to all deputies. They are now submitted to you for consideration. The meeting of the Presidium has also adopted the Credentials Committee's written report on the general situation of the deputies and the examination of the credentials of the newly elected deputies. Copies of the written report have also already been distributed to all deputies."

After that, the film shows several groups of people in the auditorium who are identified by the announcer as members of the Fifth CPPCC National Committee; members of the State Council; members of the committees under the NPC; "responsible persons" of the Supreme People's Court, the Supreme People's Procuratorate and the organizations directly under the CPC Central Committee and the State Council; "responsible persons" of the general departments, various arms and services and military academies of the PLA; Chinese diplomatic envoys to foreign countries who are now in Beijing; and foreign diplomatic envoys to China and foreign correspondents. The film ends with a long shot of the deputies applauding in the auditorium. While this last shot is shown, the announcer says the following in the voice-over; "Tomorrow, the congress session will hold group discussions."

At about 1145 GMT, the station shows a 20-minute special news feature which is entitled "Comrade Peng Zhen's Report on the Drafting of the Revised Constitution (a Summarized Account)." This news feature begins with a close-up shot of Peng Zhen reading the first part of the report in the main auditorium of the Great Hall of the People. The camera then pans to show a huge national emblem of the PRC which is flanked by 10 red flags on the wall behind the back row seats of the rostrum of the auditorium. It also gives a long shot of PRC officials on the rostrum. After this segment, which lasts half a minute, the news feature shows a female and a male announcer reading excerpts of Peng Zhen's report, in turn.

WANG BINGQIAN ARTICLE ON FINANCIAL WORK

HK280215 Beijing RENMIN RIBAO in Chinese 26 Nov 82 p 5

[Article by Wang Bingqian [3769 0014 0051]: "Certain Questions of Financial Work"]

[Text] The 12th CPC National Congress put forth the general goals of our country's economic construction, that is, under the premise of constantly raising our economic results we must strive to quadruple the gross annual value of industrial and agricultural production in the next 20 years so that the people's material life will reach a comparatively well-off level. This magnificant goal is based on facts and can be attained. However, it needs great efforts in all trades and professions. As far as financial work is concerned, we must seriously solve three major problems: 1. On the basis of promoting production development and increasing economic returns, we must make a breakthrough in financial revenues. 2. While concentrating funds to guarantee key projects and continuously improve the people's livelihood, we must maintain a basically steady financial balance, strive to achieve a complete balance, gradually increase financial reserves and accumulate strength for vitalizing the economy in the future. 3. We must reform and improve the basic systems in the state's financial work, taxation and financial work in enterprises, further eliminate the methods of "eating out of the same big pot," try as soon as possible to set up the economic responsibility system linking duties with power and interests and give full play to the initaitive of localities, departments, units and workers. If these three problems are properly solved, financial work will change from a passive to an active state and a new situation will be created and consolidated. To achieve this, we must change our ideology, work and style and raise our financial work to a new level.

Shift the Focus of Financial Work To Promoting Production and Increasing Economic Returns

At present, our country's financial situation is changing for the better. In 1981, we achieved a basic financial balance and in 1982, we will maintain this basic balance. At present, the tendency of a drop in financial revenue has been halted, the fiscal currency issue has basically been controlled and market prices are basically stable.

Viewing the country as a whole, most problems caused by "leftist" mistakes in the past years, during the "decade of turmoil" in particular, have been solved by means of readjustment measures taken by the state. The most difficult period in our economy is over and marked progress has been made in economic readjustment. Under these new circumstances, we must make a great change in financial work. Besides continuing to control and cut spending, we should shift the focus of our work to promoting production and increasing economic returns and strive to increase financial revenue by a relatively big margin through a few years of effort.

Financial departments are integrated departments characterized by extensive connections and sensitive reactions. We must make full use of these characteristics and support and promote production development by means of policies, funds and our work. In the past, financial departments "supported, assisted and promoted" production development, and this was much welcomed by the enterprises. In the past few years, we have seldom mentioned work in this respect, and we have not done enough either. We must earnestly strengthen our work in this respect. From now on, financial departments at all levels must be well-informed about market information, analyze economic trends and acquire overall balance in order to increase the production of goods in short supply and light industrial and textile products that are orientated to the market and sell well, promote reorganization and merging of enterprises, support the development of new products, promote the increase of patterns and varieties and improvement of quality, and expand circulation channels. In this way, new financial sources will be developed and stockpiling and waste in production and circulation will be reduced. Financial departments must not only do a good job in managing revenue and expenditure, they must also study economic problems and problems concerning financial and taxation policies, actively support production development, restrict what should be restricted and give full play to the role of economic levers. The broad masses of financial cadres must also make efforts in this respect in order to change the face of financial work.

In supporting and promoting production, financial departments should stress "intension" -- tapping potentials and increasing economic returns by means of technical transformation. This is the chief way to increase revenue. As Comrade Zhao Ziyang said, major technical progress can help the state raise funds. Therefore, we must make great efforts to give financial support to technical transformation in industry, agriculture, old factories and new factories and enable enterprises to base their production on new and advanced technology and create more social wealth. At present, funds allocated by the state and depreciation funds that can be used for tapping potentials, technical transformation and developing new products are quite considerable, totaling about 30 billion yuan. Besides, on the average, loans granted by several banks in the past years have increased by several billion each year.

The problem at present is that the funds used for technical transformation are relatively too scattered and most of them are used in "extension," with relatively low economic returns. How to appropriately manage and use these funds is a big question involving the issue of whether we will be able to carry out technical transformation in the national economy according to plans, step by step and with focal points in order to build a solid foundation for vigorously developing the economy in the future. According to past experience, there are many disadvantages if these funds are entirely centralized and controlled by the state. However, if they are all given to enterprises, they will be too scattered and not much can be achieved. It seems that a better way is for the state to appropriately centralize a portion of these funds and use them for transforming trades and professions or key projects, and for enterprises to control most of these funds and use them for renewing equipment and technical transformation.

However, another thing must be stipulated by law: without the approval of the state, funds concentrated by the state or retained by enterprises may not be used on extension. Otherwise, no matter how much is added, there will not be enough funds in this respect. Besides, the capital construction front will be further extended, minor projects will squeeze out major ones and key projects will be hit. In order to make better and quicker progress in technical transformation, we must also pay great attention to supporting scientific and technical work and scientific research and let achievements in this respect be used and play their part in production as soon as possible.

Whether the financial situation of an enterprise is good or not has a great influence on economic returns and financial income. Viewing the country as a whole, only a small number of enterprises are doing well in financial management. Financial work in most enterprises is chaotic. Losses and waste are serious and necessary rectification is needed. Within 2 or 3 years, financial departments in various localities must seriously produce good results in rectifying and strengthening financial work in enterprises in connection with the enterprise reorganization that is underway. If we do a good job in this respect, we will have a reliable basis for increasing financial revenue. In rectifying financial work in enterprises, while strengthening economic accounting and basic work and keeping an appropriate number of financial workers, we must earnestly strengthen management of assessment targets and link them with the economic responsibility system within an enterprise. At present we have many assessment targets for production and construction units, but we must stress the assessment of several overall targets. We should mainly grasp firmly three "rates" -- the rate of incoming funds of enterprises, the turnover rate of funds for circulation, and the rate of recovery of investment on fixed assets -- in order to assess and reflect economic results in an overall way. These three rates should be linked with profits retained for enterprises. Penalties or awards should be given accordingly. Requirements for the first two rates already exist and the problem is that they are not fulfilled or seriously assessed. As for the third rate, no one has attached enough importance to it, and clear stipulations should be formulated and seriously implemented. According to calculations, if the first two rates can reach a relatively high historical level, over 10 billion yuan in additional tax will be yielded and about 10 billion yuan in circulation funds will be saved each year. We must see that these overall targets are attained within enterprises. In particular, large enterprises and key enterprises with a decisive affect on the overall sitaution of the national economy must act like the Shoudu Iron and Steel Company by separating the targets into several groups within the enterprise, integrating them with the entire professional work of the enterprise and the observation of rules and regulations, ensuring that they will be fulfilled by workshops, work teams and individuals and linking them with distribution, in order to truly establish the economic responsibility system.

In the next few years, besides grasping the work of key enterprises and key trades and professions, each prefecture must plan to grasp the work of some key counties and increase production and income there and use the experience of selected units to promote work over the entire area. Of course, production in counties is mainly production that uses local materials, produces marketable products and does not compete with large industrial enterprises for raw materials. This is particularly true in farming and breeding. In order to make a relatively major breakthrough in financial revenue, we must firmly grasp the work of enterprises and also the financial work counties (municipalities). Only in this way can we have a reliable basis.

Appropriately Concentrate Financial Resources and Do a Better Job in Allocating and Using Funds.

On the basis of achieving a market increase of economic returns and a relatively major breakthrough in financial revenue, we must appropriately concentrate our financial resources and do a better job in allocating and using funds in order to ensure the needs of the three strategic key points in economic construction and to continue to improve the people's living standards.

In the three strategic key points, funds needed for the development of agriculture mainly depend on accumulation in agriculture itself, but the state should also give necessary assistance. Funds for the construction of energy and communications projects mainly come from state investment and construction in this respect will be our key capital construction for several years to come. Funds for education and science are an investment in brains, and education and science are key links in fulfilling the modernization program. We should pay more attention to them and continue to increase spending on them to a certain extent. Viewing the overall situation, the contradiction between the needs and feasibilities of funds will exist for a long time. Therefore, financial resources of the state should be appropriately concentrated. It is necessary to further study and formulate major policy levers in the relationships between revenue and allocation. The percentage of fianancial revenue in the national income, for example, should be appropriately increased. Can it gradually be increased from 25.9 percent at present to 28-30 percent? Again, for a period to come, it is better to maintain the income retained by various enterprises at the level after reorganization. In handling the increasing profits each year, we must adhere to the principle of handling over more to the state and keeping less in the enterprises. Again, at present, various financial subsidies exceed 30 percent of the state's total financial expenditure. It is difficult to keep this up for a long period. This problem should be solved step by step in a few years on the basis of development of industrial and agricultural production and increase of economic returns, and in connection with reforms in pricing and the wage system. We should gradually reduce the amount of fianancial subsidies to about 20 percent of total state financial expenditure. Of course, concentration of funds involves interests in all aspects and is closely linked with policies. We must act according to the principles laid down by the central authorities. We must resolutely change the situation of excessive decentralization of funds, appropriately concentrate a portion of funds and at the same time ensure that various sectors have decisionmaking powers and take their actual needs into account.

Investment in fixed assets and circulating funds are main components of funds. Proper management and use of funds in these two major aspects have an important bearing on attaining the goal of economic development. At present, investment in fixed assets throughout the country totals about 80 billion yuan each year (including funds in addition to those of the budget and loans granted by banks and loans from foreign countries that are used for investment in these aspects), and over 300 billion yuan of circulating funds remain unused this year. Proper management of these funds will greatly increase results in using them. This is the key point in paying attention to using funds. To achieve this, besides controlling scales of construction, properly orientating investment, arranging production according to social needs and attaching importance to the quality of products and their marketability, we can also achieve much by improving the management of funds.

Existing problems in the management of investment in fixed assets are: excessive funds channels, lax management, lack of clearly-defined responsibility, and low economic returns. In order to change this situation, from now on, all funds allocated for capital construction and loans for capital construction must be handled in a unified manner by the construction bank, which must act in strict accordance with the procedures for capital construction.

These funds must be used in accordance with the progress of the construction, and the bank must play its role in supervision. Funds for renewing equipment and transformation of enterprises must be earmarked only for their specified purpose as approved by the state so that they can truly be used for renewing equipment and technical transformation and not for new projects. Funds for technical renovations can be handled by the People's Bank of China and the construction bank, with a rational division of work. Loans should be granted according to plans of technical transformation, the locations fixed for production, and the specified amount for various trades and professions as fixed by the state. The bank should suprevise their use.

In the management of circulating funds, joint management by financial departments and banks is not conducive to giving full play to the function of loans and interests as levers. It would be better for the People's Bank of China to handle them alone and grant loans for whole amounts, in order to enhance rational arrangements for production in enterprieses, expand circulation channels and speed up the turnover of funds and materials through management of funds.

We must effectively dispose of the large amount of stockpiled steel products and mechanical and electrical products according to the State Council's stipulations. After examination and verification, some of them may be regarded as useless and sent back to the furnaces, some may be used after modification, and others may be allocated by the state. In the future, enterprises must seriously pay attention to relationships between production, supply and marketing and to the management of circulating funds. They must not report losses to the state and to the bank resulting from disposing of stockpiled goods, and at the same time continue to purchase and produce commodities that are not marketable or are stockpiled, thus causing additional losses and waste.

We should continue to popularize the system of payment for use of the two major kinds of funds. Our tentative view is that in the future, the rate of payment for using fixed assets can be designated according to requirements for the turnover period of investment, in order to make enterprises economize in investment and increase the rate of utilization of fixed assets. Even if the way of granting loans for whole amounts is not used for circulating funds, charges should still be paid for the use of funds allocated by the state. Since funds allocated by the state are given to enterprises for circulation over a very long period, the rate of charges of using them should be equivalent to the bank's interest rate for loans, in order to make enterprises strengthen their economic accounts and increase the turnover rate of funds.

Besides doing a good job in the above-mentioned work, we must also make great efforts to increase income and cut expenditure and resolutely oppose extravagance and waste. This is also an important measure in guaranteeing the construction of key projects and maintaining basic financial balance. At present, losses and waste are rather serious in various fields. This is not only a loophole in the economy, which scatters and wastes a lot of funds each year, but also gives rise to a corrosive influence, causing damage to the party's work style and corrupting the cadres. We must strengthen supervision over financial work and resolutely struggle against extravagance and waste. We must formulate laws and regulations for punishing serious losses and waste. In this way our economy will be greatly benefited and we will also win political support from the broad masses of the people.

Establish a Stable and Balanced Financial Situation in the Country

To establish a stable and balanced financial situation in the country is a requirement of bringing about a basic improvement in finance and the economy, and also a necessary condition for the fulfillment of the general task in the new period. In order to strive for a basic improvement in the financial position in the coming 5 years, it is necessary first of all to steadily maintain basic financial balance from now on and, on this basis, achieve a complete balance after a period of hard work. Unstable and unbalanced finance not only hampers the progress of economic construction but also undermines political stability and unity.

When serving as minister of finance in 1954, Comrade Deng Xiaoping pointed out that we must establish the national finance on a constant, stable and reliable basis. He said: The policy for building our country must be formulated on the basis of dealing with foreign invasion and unexpected eventualities. As we now have an unstable financial situation in the country, we cannot talk big, and are unable to withstand the severe tests. But we must achieve stable finance in the country. We must spend several years establishing the national finance on a stable base. Therefore, it is necessary for us to strengthen the reserve forces and lay down a good foundation in all fields year by year. With enforcement every year, we will gradually establish a good base. The present financial situation in our country is quite different from that time, and the conditions are much better in all fields. But we are still facing the task of consolidating the balance of revenue and expenditure. We must not only do our utmost to wipe out deficits and achieve balance of revenue and expenditure, but also must gradually increase financial reserves so as to accumulate strength for future economic development.

According to the practical experience since the founding of the PRC, we have two channels for achieving balance of revenue and expenditure. One is, in the circumstance of excessive allotment of funds, to make every effort to cut down expenses and narrow the difference between revenue and expenditure. This method of cutting down expenses is a necessary one, but we have no choice. Therefore, financial balance achieved by this means is unconsolidated. The other one is to proceed from the development of production and the raising of economic returns, and pay attention to the means of making money, accumulating funds and using money to increase income and save expenses. By doing so, we can guarantee the key construction of the country and continue to improve the life of the people. This balance established on the stable base of economic development is consolidated and substantial. In the future, we must swiftly turn to mainly adopting the latter means to achieve balance of revenue and expenditure by creating more money-making channels and in increasing income. Of course, while laying stress on changing the means of achieving balance, we will not abandon strict control and the practice of economizing expenditures. In our future work, we will still adhere to the principle of achieving comprehensive balance and acting according to our own ability. We will adhere to the practice of doing things according to our funds and spending less money to achieve more. We must prevent the practice of carrying out work regardless of plan and budget and the excessive allotment of fufnds. Instead, we must properly allocate funds, strengthen management, arrange national funds according to an overall plan and use money where it is needed most.

While achieving balance of revenue and expenditure in the budget, we must strengthen the management of the funds not covered by the budget and the credit funds, and achieve a unified balance. At present, various funds not covered by the budget have actually become a second budget of the state, holding up half the sky. According to estimates, such funds reached a total of 62 billion yuan in 1981 and they are still increasing. If we take a laissez-faire attitude toward such a large sum of funds that is outside the plan and budget, it will certainly lead to blind construction and to hampering the readjustment and restructuring of the national economy. The amount of loans granted by banks for capital construction projects and technical renovation is becoming larger and larger; and a greater protion of funds have been spent on capital construction projects. It is, therefore, necessary for us to do our utmost to properly use and manage them. As for the funds not covered by the budget we must, under the premise of leaving policies unchanged and protecting the legal interests of all areas, departments and units, coordinate them with the requirements of the macroeconomy of the state through straightening out and strengthening of the management, and bring their economic returns into full play. In the future, we must rigidly establish a budgeting and final accounting system for funds not covered by the budget, bring them into line with the overall plan of revenue and expenditure and arrange and use them according to an overall plan.

Besides regular expenses, these funds should be used for the technical renovation of the old enterprises and the urgent construction projects of the state. We must also strengthen management in a planned way of the loans released by banks for capital construction and technical transformation, and solve the problem of the channels of investment. Loans must be released in a planned way, and the yearly total amount of loans must be controlled to a certain limit; it must not be increased too sharply. It is necessary to adhere to credit requirements. Loans must not be released to units that have no economic returns or repayment ability. While releasing loans, banks must demand that the enterprises concerned retain a certain amount of funds. Only when enterprises have insufficient funds, can they apply for credit from banks. While making repayments, enterprises must first of all use a part of their own funds to repay, and the remainder can be repaid from the newly-yielded profits resulting from the operation of the investment projects. They must not live off their previous funds. When there are no economic returns in the enterprises that obtain loans from banks, the banks and enterprises concerned must bear all economic responsibilities. Financial departments and banks at all levels must have good cooperation and jointly guarantee the release and repayment of loans.

In addition to achieving overall balance in domestic funds, we must also vigorously and effectively use foreign funds and achieve unified balance. According to our experience in recent years, the keys to carrying out this work well are: 1. We must make a good selection of projects for investment and draw up plans for the utilization of foreign funds; 2. We must make good preparations for the work of the initial stages of all construction projects and strengthen research into feasibilities; 3. We must make good arrangements for the proper allotment of domestic funds. As a result of the implementation of the open-door economic policy to foreign countries and the increasing use of foreign funds in construction in various areas, not only must the Ministry of Finance earnestly carry out the above-mentioned three tasks; the financial departments of all provinces, municipalities and autonomous regions must also grasp this work well in cooperation with the departments concerned. In particular, they must do a good job in such fields as the financial examination of foreign capital, the proper allotment of domestic funds, repayment ability, and the appropriation, application and use of funds. In short, we must, together with the departments concerned, make every effort to carry out the above-mentioned work well and to strive for a benign cycle of appropriate loans, accelerated construction, higher economic returns, repayment on schedule, and a sharp increase in financial income.

Three Relationships To Be Handled Well in Carrying Out Financial Reform in the Near Future

Since the 3d Plenary Session of the 11th CPC Central Committee, some reforms have been carried out in financial work, in the financial system and in the tax revenue system. On the whole, the orientation is correct and the results are good. While carrying out financial reforms in the near future, we must stress the proper handling of three relationships to meet the requirements of economic development.

First, we must correctly handle the relationship between the state and enterprises. We must first perfect the system of retaining a certain percentage of profit in enterprises, concentratedly resolve the problem of assessing the target in business operation and implement targets for every workshop, every group and every individual. There are now four targets of assessment, namely, quantity, quality, contract of goods supply, and profit. But in practical implementation, people merely pay attention to the assessment of profit target and neglect that of other targets, thus encouraging the trend of neglecting quality and the practice of making great effort when there is more profit and less effort when there is less profit. It seems that we may, according to the different situation in different trades, add some targets for assessment in order to vigorously strengthen the economic responsibility system in enterprises.

Second, we must speed up the research and implementation of the system of collecting profit tax from state-owned enterprises and submit to the state the greater part of the profits of enterprises as income tax. Due to certain factors such as price and the conditions of production, some enterprises make excessively large profits. Before levying profit tax on them, an extra income readjustment tax or balancing tax should be levied on them. We must appraise and decide on the proportion for the state and that for retention in the enterprises regarding the profits after the levy of income tax, based on the principle of not exceeding the original level of retention and in accordance with the different conditions of different trades. This policy must remain unchanged for several years. It will not only beneficially guarantee a steady increase of financial income for the state but also will help eliminate the present practice of "eating out of a big pot."

Another problem is that we must correctly handle the relationship between the state and the peasants, staff and workers. "First feed the people, second build the country" is the basic principle governing our economic work. In recent years, the party and government have made great efforts to solve the problems left over from history for many years and there has been outstanding improvement in the living standards of the people. This is extremely necessary. In the future, we must, on the basis of developing industrial and agricultural production and raising economic returns, continue to take necessary measures to gradually improve the living standard of the people in the cities and the countryside. In the long run, however, we cannot separate raising the living standard of the people in the cities and countryside from the level of the development of production, and depend on reduction of funds for construction that the state needs most. Otherwise, the basic and long-term interests of the people will be harmed. For example, in the future, peasants must increase their income by relying on the development of production in the fields of agriculture, forestry, animal husbandry, sideline production and fishery, not mainly on the increase of prices for agricultural products or on the reduction of the rate of requisition by purchase and the expansion of the scope of price negotiation. For another example, from now on, staff and workers must increase their average income by relying on the development of industrial production and the raising of economic returns, and the extent of income increase must be lower than that of productivity. All comrades engaged in financial work must master these policies well in our future work.

Still another problem is that we must correctly handle the relationship between central and local finances. The financial system of "division of revenue and expenditure and revenue-sharing" can only be revised slightly in the near future, and a thorough change is not suitable. When there is an overall improvement in the financial and economic situation, a new system with the division of different kinds of tax as its main contents will be introduced on the basis of the reform of tax system, to replace the two-tier finances at central and local level. All the tax income will be divided into central and local income according to the different kinds of tax, and the central and local levels will share the income, to guarantee stable and reliable revenue sources at both levels. In order to meet the requirements of economic development and the reform of the economic system, we must speed up the reform of tax revenue system and further bring into play the role of tax revenue as an economic lever. In order to promote coordinatiom between specialized departments and economic combination, we must levy an all-round tax on increase in value on some trades. We must also study and formulate some new methods of tax revenue in light of the new situation in present economic life.

While promoting reform of the financial system, we must strengthen financial legislation and supervision. It is our intention to first establish and perfect the basic laws and regulations in the fields of budget, tax revenue and finance, and some must be formulated as soon as possible, if conditions are ripe.

Earnestly Promote the Building of the Contingent of Personnel Engaged in Financial and Tax Revenue Work

In order to fulfill the financial task in the new period, we must deeply and thoroughly study the documents of the 12th CPC Congress, closely integrate with the reality and take various measures to raise the financial work to a new level as soon as possible. There have appeared in our country's economic field many new situations, problems and experiences, and more new situations, problems and experiences will emerge in the future when we carry out readjustment, restructuring, reorganization and upgrading in the national economy. We are, therefore, required to constantly study economic trends, provide economic information, master the changing situation and put forward appropriate new policies and measures. For example, reform of the economic system, the further readjustment of economic structure, the reform of price and salary systems, the upgrading and replacement of industrial products and the technical renovation of the existing industrial enterprises, the vigorous development of science and technology, the more effective use of foreign investment, and the appearance of a buyers' market in the domestic commercial field at present, are all closely linked with the financial allotment of revenue and expenditure and the reform of the financial and tax revenue system. Therefore, we must more systematically study financial and economic theories and the party's financial and economic policies and make strenuous efforts to more deeply and thoroughly research practical problems. The financial cadres, and particularly the leading cadres at the levels of the Ministry of Finance and of the provincial bureaus of finance, must further improve their work style and methods, cater to the broad masses, go deep into reality, strengthen investigations and study, get hold of first-hand information, earnestly sum up experiences, integrate themselves with the wisdom and strength of the broad masses, further raise the level of financial work and regain the initiative. All in all, in the new period, we must study diligently and think incessantly. We must be bold in carrying out reform and practice. We must be skillful in handling money and business management and carry out financial work better.

To create a new situation in financial work, we should conscientiously grasp the building of cadre contingent and make it revolutionized, professional, younger and better educated. This is an important problem facing our present work and a key issue that determines whether we can carry forward our present financial work and forge ahead into the future. At present, there are 400,000 cadres working in the departments of finance and taxation throughout the country. Apart from that, there are 2 million financial and accounting workers in various enterprises. Generally speaking, this contingent is comparatively good. The present existing main problem is: the contingent of our finance, taxation and accounting workers is in a transitional period characterized by the succession of the old by the new. The number of young cadres recruited in recent years accounts for about 50 percent of the total number of our contingent. Generally speaking, these young cadres have not received professional training and have not grasped policy well. In addition, they are not familiar with their work. The elderly cadres also have a problem of restudy in the new situation. In recent years, financial departments at all levels have done a lot in training cadres. They should continue to do so in the future. In order to speed up the training of financial and taxation workers, we should establish training schools for cadres and develop correspondence education and sparetime education through television universities. We should regularize and systematize education for staff members and workers and make it a regular practice. We should do well in running secondary and higher financial and accounting schools to extensively train cadres who have both ability and political integrity. After working for another 3 to 5 years, we should considerably change the situation of the contingent of financial cadres. In the meantime, we should strengthen ideological and political work so that the broad masses of workers and staff members will raise their political awareness, consciously resist corrosion by the decadent bourgeois, observe discipline, be honest in performing their official duties, work hard and carry out their tasks devotedly.

ALL-ARMY CONFERENCE ON LOGISTICS WORK HELD

Zhang Aiping Addresses Meeting

OW281814 Beijing XINHUA Domestic Service in Chinese 1438 GMT 28 Nov 82

[Text] Beijing, 28 Nov (XINHUA) -- State Councillor and Minister of National Defense Zhang Aiping said: To meet the requirements of modern warfare and bring about a new situation in logistic work, large numbers of commanders and fighters in the logistics departments of the armed forces must exert themselves to study science, culture and professional knowledge so that they will be competent at their jobs in knowledge and ability. This is a very urgent task now facing us.

Zhang Aiping made these remarks at an all-army conference on logistics work today. He said: "Food and fodder have gone before troops and horses" since ancient times. This always applies to the army no matter how developed its equipment is. In a future war the tasks in this regard will be more important and complicated, and going first should be not only food and fodder needed by troops and horses but also fuel needed for weapons and equipment.

Zhang Aiping said: As our national economy develops, the main characteristics of our army's modern weapons and equipment are: automation, high speed, flexibility and complexity resulting from a high degree of mechanization and computerization [dian zi hua 7193 1311 0553]. This sets ever more arduous and complicated tasks in ensuring logistics support. The means of ensuring logistics support should also be modernized in order to be suited to the automation, flexibility, high speed and complexity of warfare.

Zhang Aiping said: Modern warfare calls for modern weapons and equipment as well as persons who can grasp and use such weapons and equipment. This requires logistics personnel to enhance their scientific, cultural, professional and technical knowledge. One must make great efforts to acquire such knowledge. On the one hand, we should rely on academies and schools to train qualified personnel; and on the other hand, it is more important for personnel to be engaged in planned studies on the job in order to raise their scientific and cultural level. Since weapons continue to develop, we must continue to study.

Yu Qiuli Speaks at Meeting

OW290150 Beijing XINHUA Domestic Service in Chinese 1448 GMT 28 Nov 82

[Text] Beijing, 28 Nov (XINHUA) -- Speaking at today's all-army conference on logistics work, Yu Qiuli, director of the PLA General Political Department, pointed out that while making an all-round and systematic study of the guidelines of the 12th CPC Congress, the whole army must pay particular attention to the section on strengthening army revolutionization and regularization and deepen their study in light of the army units' actual conditions.

Yu Qiuli said, since the conclusion of the 12th CPC Congress, all units of the entire army have regarded conveying and studying the guidelines of the 12th CPC Congress as a task of primary importance. As a result, a vast number of commanders and fighters have enhanced their ideological understanding, changed their work styles and improved their work. At present, it is necessary to seriously analyze the results so far achieved and dig out problems that have not yet been fully resolved, thereby further deepening the campaign of study. Emphasizing political work particularly, Yu Qiuli talked about several problems on studying the guidelines of the 12th CPC Congress.

1. It is necessary to do well in organizational reforms. Organizational reform is a major task in implementing the guidelines of the 12th CPC Congress and building a modern regularized army.

2. It is necessary to be resolute and bold in trying to make the leading groups and the cadre contingent revolutionized, rejuvenated, knowledgeable and professional organs. It is necessary to emancipate our thinking and break rules in order to promote middle-aged and young cadres. At the same time, it is also necessary to adopt all possibile means to raise their scientific, cultural and professional levels.

3. It is necessary to do a good job in the army's ethical, ideological and cultural construction. In ideological construction, it is necessary to vigorously strengthen education in communist ideology so that every member of the army is imbued with a high degree of the spirit of self-sacrifice and a revolutionary style of strictly obeying organizational discipline, for these are important guarantees for building a modern regularized army.

4. It is necessary to reform and build up party organizations at all levels and the contingent of party members as well in accordance with the requirements of the new party constitution in order to fundamentally improve the party style as soon as possible.

Yu Qiuli pointed out emphatically that further eliminating "left" ideological influences is important work for deepening the study of the documents of the 12th CPC Congress, and that it is also necessary to resist tendencies of bourgeois liberalism. Only when these problems are fully resolved can we better implement the guidelines of the 12th CPC Congress, truly maintain a high degree of ideological and political harmony with the party Central Committee, further emancipate our thinking and be daring and resolute enough in opening up new vistas for the fulfillment of various army tasks.

ARMY LEADERS ATTEND BEIJING PLA FOOD EXHIBIT

OW280144 Beijing XINHUA Domestic Service in Chinese 1655 GMT 24 Nov 82

[Text] Beijing, 24 Nov (XINHUA) -- Yang Shangkun, permanent vice chairman of the Standing Committee of the Central Military Commission; Yang Dezhi, chief of staff of the PLA General Staff Department; and Yu Qiuli, director of the PLA General Political Department; on 23 and 24 November visited the farm and sideline production and pickling exhibition sponsored by the Beijing PLA units. They praised the Beijing PLA units for fine achievements in farm and sideline production and their companies for the good pickles they have prepared. They called on the whole army to popularize the experience of the Beijing PLA units in order to offer improved food services at the company level.

In the past few years the Beijing PLA units have reduced the number of soldiers engaged in farm and sideline production and the acreage of cultivated land. This year they have once again gathered an all-round bumper harvest with unprecedented economic gains. Most companies can now meet 85 percent or more of their meat requirements and have become more than self-sufficient in vegetable supply. All companies have basically achieved self-sufficiency in pickle preparation. This practice has played a positive role in offering more diversified dishes to the fighters and ensuring that vegetables are available during slack seasons and do not rot when there is a surplus. Moreover, it also helps to curb expenses and gives expression to our army's glorious tradition of self-reliance and hard struggle. Praising this practice, the fighters say: Pickles and preserves play an important role in diversifying dishes. They are economical and practical. We love them.

Director Hong Xuezhi and Political Commissar Wang Ping of the PLA General Logistics Department highly appreciated this practice of the Beijing PLA units and invited leading comrades of the Central Military Commission, General Staff Department and General Political Department as well as some of the army deputies attending the Fifth Session of the Fifth NPC to see the exhibition and offer opinions.

On display in the exhibition hall are various kinds of farm and sideline products and over 1,000 kinds of pickles and 100 types of side dishes. When viewing this superb collection of delicacies, Yang Shangkun and the other leading comrades made remarks to one another and also sampled some of the soup, sweet, salty and hot foods. They praised the food, repeatedly saying: Not bad, not bad. They said that this practice is immensely beneficial and must be promoted. All PLA units must do a good job in promoting farm and sideline production and popularize their experience to improve this undertaking in order to benefit livelihood, training and combat readiness.

Deputy Directors Xu Guangyi, Li Yuan and Fan Ziyu of the General Logistics Department and Commander Qin Jiwei and Political Commissar Fu Zhongbi of the Beijing PLA units also viewed the exhibition.

DENG YINGCHAO INSPECTS SHANGHAI SCHOOL FOR BLIND

OW290028 Shanghai City Service in Mandarin 2300 GMT 24 Nov 82

[Text] According to a report by (Hong Jinghao), reporter for the Shanghai television station, Deng Yingchao, member of Political Bureau of the CPC Central Committee and vice chairman of the NPC Standing Committee, accompanied by Chen Guodong, first secretary of the Shanghai Municipal CPC Committee, and others recently inspected the Shanghai municipal blind childrens' school to the warm welcome of schoolteachers and students. This school was a so-called charity school established in 1912 by foreigners. After liberation, the government revamped the school and hired teachers to improve teaching at the school, thereby popularizing junior-middle-school education among blind children. In the past 20 years or more, some 600 students have graduated, found jobs and become educated workers who are handicapped but not useless. Many of them were selected as advanced producers at all levels and some were even appointed responsible persons of factories.

After hearing the briefing, Deng Yingchao said happily to the teachers: "As teachers, you have been working very hard and should feel proud of it. Teaching the blind is much more difficult than teaching the sighted. It takes a lot of patience and tenacity. It is a tough job." Deng Yingchao carefully inquired about the blind students' study, lives and health.

Comrades Deng Yingchao and Chen Guodong also attended a concert performed by the blind students. After the concert Deng Yingchao addressed teachers and students of the school, congratulating the students for being able to live happy lives in a new society and under a new political system. She hoped the students would understand how their happy life was made possible, study communist ideology well and become good children with ideals, moral sense, good education and discipline. Chen Guodong also spoke, encouraging the students to study hard and report to Granny Deng with good results in their study.

PRC MAY RECOVER HONG KONG 'AT ANY TIME'

HK290016 Hong Kong SOUTH CHINA MORNING POST in English 29 Nov 82 pp 1, 30

[Text] Details about Hong Kong's future will be announced in a year, a leading industrialist said yesterday following a meeting in Peking with a senior Chinese official.

But the official, Mr Liao Chengzhi, the director of the State Council's Overseas Chinese Affairs Office, warned that China would regain sovereignty over Hong Kong "at any time" if the local economy continues to deteriorate.

The chairman of the Hong Kong Factory Owners Association, Mr Huang Jian, said Mr Liao told his group that the Chinese authorities are now holding talks with the British Foreign Office on "how to recover sovereignty" and how to maintain Hong Kong's prosperity during this transitional period.

Mr Liao said it is the responsibility of the Hong Kong Government and industrialists to tide the territory over its economic hardship, Mr Huang said.

"Mr Liao said in principle, sovereignty over Hong Kong will revert to China in 1997.

"But if the Hong Kong Government and industrialists do not help the ailing economy and if it continues to deteriorate, China will recover Hong Kong at any time."

Mr Huang said they were told that after China regains sovereignty, land here will be owned by China, but individuals will be allowed to own their flats.

Mr Huang said Mr Liao assured investors that Hong Kong would be allowed to retain its capitalist system and continue to prosper "for ever" after China regained sovereignty over the colony.

Mr Huang said Mr Liao told them that China understands that Hong Kong is suffering economically.

He said China hopes the Hong Kong Government will abolish the high land price policy, which is harming the colony's economy.

Mr Huang said that when he discussed with Mr Liao the previously-stated Chinese view that Hong Kong should be ruled by Hong Kong people, the Chinese official told him that the top post would be held by a Chinese.

"The governor or the mayor of Hong Kong will be a Chinese and not 'a gweilo' because 98 percent of the population is Chinese," Mr Huang said.

However, this official would be appointed, not elected by the people, Mr Huang added.

"He will probably be selected through consultation and compromise with various big societies and organisations."

In addition, Mr Huang said he understood that after Hong Kong's sovereignty returns to China, it would become a special administrative zone under Article 31 of the new draft Chinese constitution now under discussion at the Fifth National People's Congress in Peking.

He said that officials he had met in Canton, Shenzhen, and Shekou had been confident that the article would be adopted by the NPC.

"Hong Kong will become a special administrative zone together with Macao and Taiwan," Mr Huang said.

Apart from visiting Peking, the delegation also had a first-hand look at industry and commerce in Shanghai, Canton and Shenzhen.

Mr Huang said that after his discussions in China, he felt "relieved" about Hong Kong's future and was happy to learn what China proposes for Hong Kong after it regains sovereignty in 1997.

He said he will now increase investment in Hong Kong and believed that other delegation members will do the same.

"We industrialists will definitely invest in Hong Kong," he said.

"All our property and money is here and we have never thought of leaving."

In addition to their meetings with Chinese Government officials, Mr Huang said they had met officials of the Bank of China and had learned that the bank is considering offering low-interest loans to help Hong Kong industrialists weather the economic difficulties.

He said his association will shortly meet officials of the Bank of China in Hong Kong to discuss how they can assist local industry.

He said in their talks with top officials at the Bank of China he had been told that the bank would consider offering 25-year or 30-year mortgages to Hong Kong people seeking loans to buy houses or flats.

He had asked the Bank of China officials why they had not followed the example of the Hong Kong and Shanghai Banking Corporation, which had already announced a scheme for 20-year mortgages.

"The top officials of the Bank of China," had explained to him, he said, "that they had been approached by the Hong Kong and Shanghai bank earlier to co-operate on the long-term loan scheme and the Bank of China agreed to consider the scheme.

"However, while the Bank of China had still been considering the proposal, the Hong Kong and Shanhai bank suddenly announced their offer.

"Therefore, the 13 Bank of China branches in Hong Kong could not make a similar offer at such short notice."

On a lighter note, Mr Huang said that after China regains sovereignty, every aspect of Hong Kong's way of life would be preserved -- even horse racing.

"But the Royal Hong Kong Jockey Club will have to be renamed 'the Hong Kong jockey club' with the word 'royal' deleted," he said.

Summing up their visit, Mr Hwang said there were two important points:

-- Hong Kong can keep its capitalist system and continue to prosper indefinitely.

-- Local industrialists now have a better knowledge of China's policy towards foreign investors and this will help to increase and strengthen the contacts between the two sides.

On Shenzhen he said, China is erecting an internal "border" around the zone at a cost of about RMB 90 million (about HK$270 million) and the project will be completed in April. After that, he said, the departure and arrival procedures for Hong Kong businessmen into and out of Shenzhen will be simplified.

HSIN WAN PAO ON 'INTERNATIONALIZING' HONG KONG

HK280838 Hong Kong HSIN WAN PAO in Chinese 28 Nov 82 p 1

["New Talk" column: "Forget About Internationalization"]

[Text] Former British Attorney-General Lord Shawcross recently visited Hong Kong as a guest of top British officials here. An English newspaper published an interview with him 3 days ago, headlined "Shawcross Says: Internationalize Hong Kong." One official made a special point of recommending that people read the interview.

At the same time, an English weekly published here carries a report in this week's issue quoting unidentified sources as asking why the Hong Kong issue should not be internationalized. The report says, the United States and Japan both have big stakes in Hong Kong, and Southeast Asian countries such as Malaysia, Thailand and Australia might also be prepared to get involved for various political, commercial and financial reasons: "Some sources suggest Britain should at least arrange a meeting of countries with significant interests in Hong Kong, to establish common ground and do some gentle lobbying in Beijing."

There is nothing strange that these notions of "internationalizing" Hong Kong should have emerged at this moment. Since China made plain its solemn and just stand on recovering sovereignty over Hong Kong, those people who would like to extend the unequal treaties have felt more and more apprehensive at not being on solid ground, and so they are trying to drag some outsiders in order to feel stronger.

The advocates of "internationalization" cite as their pretext Hong Kong's international value as a commercial and financial center; so they say that the issue is not just a matter for talks between China and Britain, but that other countries should be drawn in.

It is true that Hong Kong has established extensive financial and commercial ties throughout the world, and China has paid full attention to this point. The Chinese leaders have repeatedly stated that three things will remain unchanged after China regains sovereignty, that is, "no change in Hong Kong's system, no change in its inhabitants' ways of life, and no change in its status as a free port and financial center." Moreover the legitimate interests of foreigners in Hong Kong will be protected. This means preserving Hong Kong's international business and being willing to cooperate on the basis of equality and mutual benefit with all countries for a long time. However, all this will be within the scope of sovereignty being exercised by China. Sovereignty over Hong Kong absolutely cannot be internationalized at any time, and it cannot become an international zone.

Even though Hong Kong's financial business has developed very fast in recent years, it can still only boast today of being the third financial center in the world, not the second or first. World financial centers naturally all engage in international business, and if their administration should be internationalized on that account, with every country allowed to interfere in their internal affairs at will, should not "internationalization" first be carried out in London and New York, the world's two leading financial centers? Should China, Japan, France, Germany, the United States, the Soviet Union and other countries that have established banks in London hold joint meetings to establish common ground, study how London should be "internationalized," do some lobbying with the British Government, and tell it how to run London so as to accord with international interests?

The day when a gunboat policy could be applied to force the extension of unequal treaties is gone, and never again will a joint eight-nation army commit aggression against China and carve it up. People daydreaming about "internationalization" had better wake up quickly!

China's guidelines regarding Hong Kong are to recover sovereignty, establish a special region, have Hong Kong people ruling Hong Kong, make no changes in the system, and maintain its prosperity. These are fair and reasonable and provide the guarantee for Hong Kong's future. Many Chinese and foreigners, such as Newbigging of the Jardine Group, have expressed full confidence in Hong Kong's future. Those people who have become isolated because of their stubbornness and want to perform the magic trick of turning beans into brave soldiers will only end up outsmarting themselves.

HSIN WAN PAO EXAMINES HONG KONG'S FUTURE

HK230229 Hong Kong HSIN WAN PAO in Chinese 22 Nov 82 p 1

["New Talk" column: "The 16 Characters Depicting Hong Kong's Future"]

[Text] The future of Hong Kong can be summarized in 16 Chinese characters, that is, regain sovereignty, set up a special zone, let Hong Kong people rule Hong Kong and maintain prosperity.

This outline depicting the future of Hong Kong was sketched recently by the Chinese leaders on several occasions with personages of various circles in Hong Kong. It is obvious that Hong Kong people are most concerned about their own destiny, and in their visits to Beijing, they have seized every opportunity to ask questions and get appropriate answers. Foreigners have also shown their concern for the future of Hong Kong, but that is concern of another kind.

Regaining the sovereignty of the whole of Hong Kong and formally putting an end to the historical vestiges of foreign people ruling Chinese people in a territory of China not only suits the national condition of China today and but also conforms to the contemporary trends of the world. The final solution of the problems left over by the opium war of a century ago is of course the national aspirations of the Chinese compatriots and the people of Britain will also greet it with pleasure.

Regaining its own sovereignty is the sacred right of China and there is no room for compromise. At present, the consultation held between Britain and China in Beijing involves maintaining the stability and prosperity of Hong Kong and not its sovereignty. China's management scheme for the future of Hong Kong is in the range of exercising sovereignty. Hong Kong puts forward questions, Beijing provides answers and both hold cordial consultations. This is fair and reasonable. Some people say that Beijing should not mention sovereignty and administration in the Sino-British talks. As a matter of fact, this has nothing to do with the substance of the talks and is not influential.

After sovereignty reverts to China, Hong Kong will become a special administrative zone. This special zone is somewhat different from the Shenzhen Economic Zone. Shenzhen is a special zone that practices special economic policies under a socialist system, whereas the future of a Hong Kong special zone will be special both in administration and social system, which is different from that carried out in China. There is an old saying in the West: "The exception proves the rule" and it further says: "No exception constitutes a rule." According to the draft of the new constitution, China adheres to socialist system and is led by the communist party. This is the case to the whole country with the Hong Kong special zone as an exception that will practice a capitalist system, and the person who rules Hong Kong need not be a communist party member.

The Chinese leaders have confidence in the future of Hong Kong and at the same time place their confidence in the people of Hong Kong. The people of Hong Kong must get rid of weak and incompetent ideas and have confidence in administering Hong Kong well under the special system. They must not only maintain prosperity but improve it and transform the superficial prosperity of the past to a more practical basis.

Principally speaking, these 16 characters depicting the future of Hong Kong are the most ideal means in the solution of Hong Kong problems at present.

WEN WEI PO NOTES HU YAOBANG'S REFORM WORK

HK230727 Hong Kong WEN WEI PO in Chinese 23 Nov 82 p 1

[Telephone dispatch from Beijing by Cheng Hsiang [4453 5046]: "Hu Yaobang Recently Inspected Various Places To Arrange the Reform of the Administrative Structures in Provinces and Municipalities"]

[Text] After the successful launching of the reform of the administrative structure of the party and government of the CPC Central Committee, the reform of administrative structures at the local government level has recently started. The CPC Central Committee intends a few conditionally prepared provinces and municipalities to lead the way and accumulate experience in the reform of the administrative structure at local government level throughout the country. Recently, Hu Yaobang gave instructions on the reform work of the experimental provincial and municipal units when he inspected various places.

It is understood that those provinces and municipalities selected as experimental units have recently held a mobilization meeting. In accordance with the instructions of the CPC Central Committee, from now up to the end of this year will be the preparatory period for the reform of these provinces and municipalities and from January to March next year will be the enforcement period of the reform.

During the reform, stress will be laid on solving well the following three problems: 1) set up a simplified administrative structure, improve our leading work style and method and raise effectiveness in our according to the principle of simplifying, unifying, economizing and combating bureaucratism; 2) be bold in selecting a number of young cadres who have both ability and political integrity to various leadership groups according to the principle of making the ranks of cadres more revolutionary, younger in average age, better educated and more professionally competent; and 3) reduce staffing levels, establish and perfect the system of personal responsibility and further reform our economic management system, so that the party and government organs can better serve the basic levels and the economy.

The experimental provinces and municipalities will adopt concrete measures, including the following aspects:

1. Reduce the provincial level party and government organs, cut down the amount of staff, establish and perfect the system of personal responsibility and remove all overlapping organizations in the provincial level party and government organs. Those businesses that are similar should be merged, those who engage in independent economic activities should be transformed into economic entities. Administration and enterprises should be separated and administrative structure should not be allowed to replace economic organizations. The levels should also be reduced at the same time by practicing a two level system with the provincial government directly leading the departments and bureaus.

2. Readjust the leading bodies and accordingly arrange the personnel, so that after the readjustment, the leading bodies are more efficient. Select a number of cadres who are in the prime of life to the various leading bodies at the provincial level. All leading cadres at the provincial department, commission and bureau levels who exceed the age of retirement, except those who are the main leading figures and professional backbones, whould be principally withdrawn to the second and third line.

3. Young and middle-aged cadres who have been newly selected to leadership bodies must conform to the stipulations in their age, education and professional requirements. Those "five kinds of people" that have seized leadership through beating, smashing and looting during the "Cultural Revolution" must be seriously cleared out of the leadership bodies.

4. Veteran cadres should be appropriately arranged: those veteran cadres who have reached retirement age, except for a very small number of them who are needed for work and have been appointed by the organizations concerned as advisors, must be retired. After retirmenet, these veteran cadres must be specially cared for politically and the latter part of their life be appropriately arrnaged.

5. The training of cadres in rotation should be actively arranged. From now on, the level of education, qualification and working experiences must be an important basis in selecting, using and promoting cadres. All the provinces, prefectures, municipalities and counties should work out plans to train cadres in rotation.

The CPC Central Committee intends that the experimental provincial and municipal units present their experiences as soon as possible so as to successfully launch the reform of the administrative structure in various localities.

SHENZHEN OFFICIALS FIGHTING RAIL TICKET RACKET

HK240200 Hong Kong SOUTH CHINA MORNING POST in English 24 Nov 82 p 12

[Text] Senior officials in Shenzhen are determined to stop a Guangzhou rail ticket racket involving visitors from Hong Kong and Macao. Many of the racketeers are former Hong Kong residents who have formed links with Shenzhen residents to prey on visitors who are eager to get to Guangzhou on the first available train. The ticket touts use Shenzhen residents to buy Guangzhou tickets with local currency and then sell them in Hong Kong currency to visitors at prices up to 500 percent higher than the face value. The price of a ticket to Guangzhou from Shenzhen is three yuan (about HK$10) but the ticket gangs are known to have sold them for as much as HK$60 each. The Shenzhen authorities, sources said, are aware of this malpractice and they are determined to put a stop to it.

During the first nine months of this year about 550 people -- both Shenzhen and Hong Kong residents -- have been arrested for ticket racketeering, according to statistics issued by the Shenzhen authorities. Many of those arrested were fined for first offences, but they have been warned that heavier punishments will be imposed if they continue with their illegal trade. One source said the racketeers are also illegally exchanging Chinese money into Hong Kong dollars -- at greatly-inflated exchange rates.

Officials said genuine travellers and local residents mingle at Shenzhen railway station and they say it is difficult to detect the racketeers. In an effort to stop the ticket trade a new subway is now under construction beneath the station. It is expected to be completed after the lunar new year and will keep apart commuters and non-travellers.

PRESIDENT REAGAN'S LATIN AMERICA TOUR NOTED

OW292006 Beijing XINHUA in English 1924 GMT 29 Nov 82

["News Analysis: Behind Reagan's Latin American Tour" -- XINHUA headline]

[Text] Beijing, November 29 (XINHUA) -- Following is the full text of a news analysis by Zhou Shuxia and Lin Minzhong, entitled "What Is Behind Reagan's Visit to Four Latin American Countries?":

U.S. President Ronald Reagan is beginning a five-day visit tomorrow to Brazil, Colombia, Costa Rica and Honduras. As this is Reagan's first official visit to Latin American countries since he was sworn in as president, it is commanding much attention in Latin America.

The United States had for a long time considered Latin America as its "backyard" where it had maintained important economic and strategic interests. However, in the past six months, its traditional relations with Latin American countries have been weakened and damaged because of its support for Britain over the Malvinas (Falklands) issue.

Moreover, quite a number of Latin American countries are faced with the gravest economic crisis since the 1930s and some are seized with political unrest -- especially those of Central America where violence is increasing daily. All this has made the United States uneasy. Reagan's visit at such a time might be intended for the following purposes:

First, mending the crack in the U.S.-Latin American relations subsequent to the Malvinas war. During that war, many Latin American countries thought that the U.S., having betrayed pan-American unity at a crucial moment, proved to be an unreliable ally. That also made Argentina and other countries lose confidence in the "pan-American system" which the U.S. had energetically sold as one for "an America of the Americans". As a result, some South American countries have been considering building up their defense capability to safeguard their security on their own. This centrifugal trend of the Latin American countries from the United States is certainly unfavorable to the interests of the U.S. global strategy and beneficial to the other superpower's efforts to infiltrate into Latin America. In fact, the United States is trying desperately to improve relations with Latin America. Washington has voted for the Latin American proposal for the resolution of the Malvinas conflict through Argentina-Britain negotiations, both in the United Nations and the Organization of American States. The fact that Reagan is going to Brazil and Colombia, both playing an important role in Latin American affairs, is another sign.

Secondly, ironing out or solving the series of differences that exist between the United States and the Lation American countries on economic questions. The serious economic recession in the world has greatly affected the Latin American countries. Nearly all have difficulty in export, resulting in a drastic cut in their foreign exchange earnings and a sharp increase in their foreign debts which now stand at 300 billion U.S. dollars.

At the recent annual meeting of the Organization of American States, Peru, Brazil, Colombia, Mexico and Ecuador criticized the United States for its protectionist policies, demanding the establishment of a new international economic order. The United States is Brazil's biggest trading partner. But more than a dozen of Brazilian commodities, including textiles, leather shoes and cast iron, are limited in their access to the U.S. market. Minister of Foreign Affairs of Brazil Ramiro Saraiva Guerreiro said recently that it is still difficult for his country to reach an agreement with the United States on certain global questions such as the establishment of a new international economic order. So it is beyond doubt that Reagan will consider economic problems a major issue in his tour.

Thirdly, strengthening the defence front of Central America to curb further expansion and inroads of the Soviet Union and Cuba. The situation in Central America has grown even more tense since the Malvinas war and has become one of the troubled areas in the world that are worth noting.

In El Salvador, the civil war between the anti-government guerrillas and the army has continued for three years and there has been fierce fighting in the past few months.

Violence is also increasing in Guatemala and there have been repeated border conflicts between Nicaragua and Honduras.

It seemed the White House is quite upset by the strained situation in the region. It was announced that President Reagan is going to meet the presidents of Costa Rica, Honduras, El Salvador and Guatemala while visiting Costa Rica and Honduras. Since the Sandinist National Liberation Front took power in 1979, Washington has always had the fear that Nicaragua would produce an impact on the other countries in the region. Therefore, the United States is planning to increase its military and economic aid to Central American states other than Nicaragua to help authorities surpress the anti-government armed activities in these countries. However, it is hard to predict whether Washington could succeed in achieving the goal.

VICE PRESIDENT BUSH'S AFRICA VISIT ASSESSED

HK261035 Beijing RENMIN RIBAO in Chinese 26 Nov 82 p 6

["Dispatch:" Bush Concludes Tour of Seven African Countries]

[Text] U.S. Vice President Bush visited seven African countries from 10 to 23 November. After concluding his visit to Cape Verde, Senegal and Nigeria, Bush rushed to Moscow to attend the funeral ceremony of Brezhnev and then went on to visit Zimbabwe, Zambia, Kenya and Zaire.

Bush visited these African countries at a time when the United States was at odds with them. Recently, the United States declared a relaxation of restrictions on the entry into U.S. territory of military personnel from South Africa and of the restriction of the export to South Africa of electronic equipment for the army and police forces. It has also decided to supply advanced technical installations and nuclear fuel to South Africa and in particular has approved the decision made by the IMF organization to grant a loan of $1.1 billion to South Africa. All these have further intensified strained relations between the United States and the African countries.

Bush expressed the opinion that his visits to these African countries served the following purposes. First, the United States wants to provide aid to African countries and to establish a new partnership with Africa. Second, the United States is determined to contribute to making Namibia independent as soon as possible and to change the ever more serious and tense situation in southern Africa. Third, the United States wishes to "promote mutual understanding of the important bilateral issues and regional problems between the African countries."

During his visit, Bush held discussions with the leaders of the African countries, centering on the Namibian issue. In addition they held talks on the situation in Africa, the North-South dialogue, the Middle East issue and other relevant international problems. Great differences of opinion existed on the Namibian issue. Bush repeatedly said: "Despite the opposition of the African countries, the United States has consistently held that the Namibian issue can be resolved only if Cuban troops are withdrawn from Angola." But the African countries do not subscribe to the view of the United States which lumps the Namibian issue together with the withdrawal of Cuban troops from Angola. Zimbabwe's Prime Minister Robert Mugabe criticized the United States, saying: "The problem of Namibia is not connected with the presence of Cuban troops in Angola, and no one can deprive Namibia of its intrinsic right to achieve independence and self-determination." Kenya's President Daniel Teroitich arap Moi criticized U.S. behavior, saying it was obviously "a trick to deter Namibia from achieving final independence." Leaders of Nigeria, Cape Verde and Senegal also strongly opposed the "cooperation between the United States and the racist regime of South Africa." They contend that U.S. behavior serves as a block to the progress of peace talks on the Namibian problem and to the end of apartheid in South Africa.

Answering questions put by correspondents, Bush admitted that during his visit, the African countries "flatly and harshly" criticized the United States and he had heard such criticism everywhere in Africa.

Western public opinion holds that the United States hoped to improve its relationship with the African countries through Bush's visit. Some African public opinion also holds that "it was not worth it for Bush to trek all the way to Africa" although he "had promised to help the African countries deal with the present economic crisis." Nevertheless, wherever he went and whichever country he visited, there existed "great differences of opinion between the United States and the African countries" on the Namibian issue and "not a single country supported the view of the United States."

GEORGE SHULTZ MEETS SOUTH AFRICA'S BOTHA

OW272310 Beijing XINHUA in English 1530 GMT 27 Nov 82

[Text] Washington, November 26 (XINHUA) -- U.S. Secretary of State George Shultz met South African Foreign Minister Roelof Botha here today to discuss ways of seeking a negotiated settlement of the Namibia issue.

A senior State Department official explained that this was not a "negotiating session" but an opportunity for the two men to discuss a "sustainable basis for constructive relations" between the United States and South Africa.

Emerging from the meeting, both Botha and Shultz denied to reporters that the negotiations for a Namibian settlement are at an impasse. However, Washington press reports indicated that negotiations over the Namibia issue have been stalled because of South African and U.S. insistence on Cuban troops withdrawal from Angola.

South Africa holds out for the demand that Namibia's independence be linked to the withdrawal of about 20,000 Cuban troops from Angola. The United States, supporting this position out of "security" considerations, insists that the two issues are related. There is a "practical requirement for parallel movement," the U.S. official was quoted as saying today.

During his just-concluded seven-nation African tour, U.S. Vice-President George Bush had referred repeatedly to the withdrawal of Cuban troops as a precondition for a settlement of Namibia.

The U.S. stand has come under strong fire in Africa. Kenyan President Moi characterized Bush's insistence on the linkage as a "delaying tactic" against realizing independence for Namibia. Angola has accused the United States of using a carrot-and-stick approach, holding out the promise of diplomatic recognition and assistance while encouraging incursions by South Africa into Angola.

Under these circumstances, the U.S. official said today that the United States remains committed to seeking an agreement leading to Namibia's independence and will continue to play "the role of catalyst" through intensive diplomacy.

U.S. CLAIMS PROOF OF USSR CHEMICAL WEAPONS USE

OW301123 Beijing XINHUA in English 0741 GMT 30 Nov 82

[Text] Washington, November 29 (XINHUA) -- The U.S. State Department charged with new "convincing evidence" today that the Soviet Union is continuing to use chemical weapons in Afghanistan and supply such weapons to Vietnamese troops for use in Kampuchea and Laos.

A report presented to the U.S. Congress and the United Nations by Secretary of State George Shultz today listed more than ten attacks this year against the people in each of the three countries during which Soviet-produced chemicals were used.

The toxic material was spread by aircraft or helicopters, artillery or armored vechilces, bombs or rockets, in the form of "yellow rain" or sometimes in white or red smoke or powder, which caused illness and deaths.

The report said 350 samples of toxins have been collected with blood and tissue taken from victims.

An earlier U.S. report said that a minimum of 10,000 persons have been killed in these countries by Soviet chemical weapons.

Since 1980, the Soviets have used toxic agents in Afghanistan, the report said. Two Soviet gas masks acquired from Afghanistan have been proved to be contaminated with deadly mycotoxins.

One of them was displayed at a State Department news briefing today. A Soviet chemical attack on September 13 this year caused 73 deaths in Afghanistan. During the recent attacks, the victims' bodies decomposed rapidly, and the flesh peeled away when attempts were made to move the bodies.

Vietnamese and Lao troops, under direct Soviet supervision, have continued to use lethal and incapacitating chemical agents and toxins against resistance forces in Laos, causing victims to experience vomiting, bleeding, blistering, severe skin lesions and other symptoms, according to the report.

The report showed that in Kampuchea, many people were taken ill after Vietnamese-launched chemical attacks. Vietnamese military defectors from Kampuchea have provided information in 1981 and 1982 on the use of chemical weapons and on the Vietnamese chemical warfare program, and have reported that some types of agents are supplied by the Soviet Union.

The Soviet Union is a signatory to the 1925 and 1972 agreements banning the use of poison gases, biological warfare and toxins.

Secretary of State George Shultz stated today that the report "was designed to bring the issue to the attention of the world community."

REAGAN ASKS FOR HIGHER NATIONAL GASOLINE TAX

OW241140 Beijing XINHUA in English 1116 GMT 24 Nov 82

[Text] Washington, November 23 (XINHUA) -- President Ronald Reagan announced here today that he would ask the lame-duck session of Congress to raise the national gasoline tax which he called "user fee" to finance a multibillion-dollar highway-repair and jobs program.

In his announcement today before he left for Thanksgiving vacation at his California ranch, Reagan suggested that the gasoline tax be raised from four cents to nine cents per gallon. This would cost the average motorist 30 dollars a year. By doing this, Reagan hoped to put an estimated 320,000 people to work on the roads.

This is one of the steps the President has decided to take to deal with the deep economic trouble. It came as a surprise to the nation since only two months ago, he told a press conference that he did not "see the necessity" for an increase in gasoline tax.

It is believed that President Reagan changed his mind under the pressure of the 16-month-long recession, especially the jobless rate, now at a 42-year high of 10.4 percent.

The President told the Americans that he would be considering other proposals that would help to give the U.S. economy "a fresh boost as we head into 1983." There is doubt, however, whether the measure could really produce any magic remedy.

SRV DRY-SEASON OFFENSIVE IN KAMPUCHEA FORESEEN

HK250834 Beijing RENMIN RIBAO in Chinese 25 Nov 82 p 6

["Short Commentary": "Be Alert Against a Vietnamese Dry-Season Offensive"]

[Text] All signs point to a dry-season offensive being prepared by the Vietnamese authorities against the patriotic anti-Vietnam Kampuchean forces. This will be the fourth such offensive since Vietnam invaded Kampuchea. The previous dry-season offensives usually started at the beginning of October, but this year there was a delay in its launching. This shows that the Vietnamese authorities have run into still greater difficulty and that the situation on the battlefield is even more unfavorable for them.

The current most unfavorable factor in Kampuchea for the Vietnamese authorities is the formation of the Democratic Kampuchea [DK] Coalition Government and the growth and development of the three groups of patriotic armed forces participating in that government. This is because this event has greatly raised the morale of the patriotic Kampuchean armed forces and people in the struggle for national salvation and against Vietnamese aggression, brought broader support in the world for their just struggle and put the Vietnamese authorities and their supporters into ever greater isolation. This is the first dry season since the formation of the DK Coalition Government. It can be predicted that the Vietnamese authorities' dry-season offensive will be aimed mainly at wrecking the coalition of the three patriotic forces in Kampuchea. According to Western estimates, the Vietnamese army of aggression against Kampuchea first may launch an attack on the armed forces of Sihanouk and Son Sann, striking at the weakest link. However the possibility certainly cannot be eliminated of the Vietnamese authorities launching a sudden attack on the DK patriotic forces while also attacking the patriotic armed forces of Sihanouk and Son Sann. In order to demonstrate that they can still control the battle in Kampuchea in the current international situation, the Vietnamese authorities have made extensive preparations for this dry-season offensive. However, so long as the patriotic army and people in Kampuchea unite as one and maintain a good degree of alertness, no disruptive activities of the Vietnamese authorities will be able to attain their goal.

A new Vietnamese military adventure in Kampuchea will further aggravate tension in Southeast Asia. Thailand is prepared both mentally and materially for "all eventualities" on its border with Kampuchea. It can be predicted that if the Vietnamese authorities dare to burn Thailand with the flames of aggressive war, Thailand certainly will not be alone and unaided.

The trial of strength between the patriotic army and people of Kampuchea and the Vietnamese aggressors has already passed through its most difficult period, and they now have more confidence and organization in the struggle; while the Vietnamese aggressors are on the wane in their strength and are heading irrevocably for a quagmire. There is an old Chinese saying: "A fighter, very bold, fights aggressively in order to finish the fight early, he soon tires, and then becomes exhausted." Under the blows of the patriotic Kampuchean forces, the morale of the Vietnamese aggressor troops on the Kampuchean battlefield is sinking; they have run into all sorts of trouble and now are unable to summon up any boldness. If the Vietnamese aggressors launch a dry-season offensive, it will be as doomed to defeat as in the past.

Soviet Support Scored

HK300648 Beijing BEIJING REVIEW in English 15 Nov 82 p 9

[Li Yongming article: "Vietnam Is Preparing For New Adventures"]

[Text] Hanoi has just sent more than 20,000 troop reinforcements to Kampuchea and has raised its troop strength along the Kampuchean-Thai border to seven divisions in preparation for new, large-scale military actions.

Large quantities of sophisticated military equipment, tanks, armoured personnel carriers and heavy artillery have also been moved into west, northwest and southwest Kampuchea. Reports say that Vietnamese troops have brought several truckloads of chemical weapons to their base near the Kampuchea-Thai border. In the past few months, they have also built highways, bridges, logistic depots and airstrips in the border region.

These manoeuvres followed an "important strategic conference" of the commanders of the invading Vietnamese forces in Phnom Penh not long ago.

Hanoi's Designs

These activities indicate that Vietnam is preparing for new military efforts in Kampuchea to extricate itself from its present predicament.

The Coalition Government of Democratic Kampuchea, formed this past summer by the three patriotic resistance forces, has won increasing support of the Kampuchean people. As more and more Kampuchean people and patriotic forces unite under the banner of the coalition government, the rising morale and effectiveness of the resistance forces pose an increasingly great headache to the Vietnamese aggressors.

Internationally, the coalition government has won support and sympathy from a growing number of nations, as the acceptance of the credentials of Democratic Kampuchea by an overwhelming majority of the members of 37th session of the UN General Assembly clearly proves.

It is clear that Vietnam is beefing up its armed forces in preparation for an attempt to destroy the Kampuchean resistance forces and the coalition government during the dry season which begins this month. By bringing the war to the borders of Thailand, Hanoi is also attempting to force Thailand and the other ASEAN countries to accept the Vietnamese occupation of Kampuchea. While visiting Indonesia recently, Vietnamese Foreign Minister Nguyen Co Thach argued that the ASEAN countries should adopt a realistic attitude. The puppet Heng Samrin regime in Phnom Penh has even threatened the ASEAN countries, saying that its patience has limits.

Moscow's Support

When Truong Chinh, a top Vietnamese leader, visited Moscow last month, the Soviet Union promised Hanoi its "faithful and reliable " support. Moscow then sent a military-political delegation to visit Vietnam, after which hundreds of Soviet-made tanks, large quantities of long-range artillery and other weapons poured into Kampuchea. Moscow must be held responsible for Hanoi's unbridled adventurism.

While strengthening their military forces on the battle-field, the Vietnamese authorities have announced a spurious "partial troop withdrawal" from Kampuchea. They have attacked world opinion opposing and exposing Vietnam's military actions as being motivated by "sinister intentions," but Hanoi's devices fool no one. The world will be watching closely Vietnam's next move.

BANGLADESH'S ERSHAD LEADS DELEGATION ON VISIT

Welcomed at Airport

OW271308 Beijing XINHUA in English 1244 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Lieutenant General H. M. Ershad, president of the Council of Ministers of Bangladesh, arrived here by plane this afternoon for a six-day official visit to China at the invitation of the Chinese Government.

The Chinese Government held a welcoming ceremony inside the Great Hall of the People this evening for the president. Premier Zhao Ziyang shook hands and exchanged greetings with President Ershad when he arrived at the hall at 6:40 p.m. A girl Young Pioneer presented President Ershad with a bouquet.

Premier Zhao Ziyang and President Ershad stepped onto the reviewing stand and the military band played the national anthems of Bangladesh and China. Accompanied by Premier Zhao Ziyang, President Ershad reviewed a guard of honor made up of men from the three services of the Chinese People's Liberation Army.

Present at the ceremony were Huang Hua, state councillor; Wu Xueqian, minister of foreign affairs; Fu Hao, adviser to the Ministry of Foreign Affairs; He Zhengwen, deputy chief of the General Staff of the Chinese People's Liberation Army; Xiao Xiangqian, Chinese Ambassador designate to Bangladesh; A.R. Shamsud Doha, Bangladesh foreign minister; Shafia Khatun, minister of social welfare and women's affairs; and C.M. Murshed, Bangladesh ambassador to China.

Feted by Zhao Ziyang

OW271716 Beijing XINHUA in English 1613 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Chinese Premier Zhao Ziyang gave a banquet here this evening to warmly welcome Lieutenant General H.M. Ershad, president of the Council of Ministers of Bangladesh.

Speaking at the banquet, which was held in the Great Hall of the People, Zhao Ziyang said, "Our two countries share identical views on major international issues; we support each other and conduct close consultations with each other in international affairs; and in the economic, trade, cultural and other fields, we learn from and help each other and are carrying out very fruitful cooperation."

"The amicable relations and cooperation between China and Bangladesh are in the interest of our two peoples and conducive to peace and stability in Asia as well."

He said he believed that the current visit by President Ershad would make a new contribution to the strengthening of Sino-Bangladesh friendly relations.

Zhao Ziyang praised Bangladesh for its active and important role in international affairs. He said, "Adhering to an independent and non-aligned foreign policy, Bangladesh upholds principles and justice and opposes aggression and expansion."

"In recent years, Bangladesh has made an effort to improve relations with its neighbours on the basis of the five principles of peaceful coexistence and to strengthen its unity with other Islamic and Third World countries. The South Asian regional cooperation proposed by Bangladesh has made encouraging progress in the past two years through the common efforts of the countries concerned."

He said, "We share the view with Bangladesh and other South Asian countries that the improvement of relations among the South Asian countries through friendly consultations and on the basis of equality and mutual benefit and the gradual realization of the South Asian regional cooperation will play an important role in enhancing the prosperity and development of the countries concerned and consolidating peace and stability in the region."

Zhao Ziyang also praised the government and people of Bangladesh for their gratifying successes in safeguarding national independence and state sovereignty and developing the national economy.

Concluding his speech, Zhao Ziyang said, "China will, as always, continue to consolidate and develop its friendly relations and cooperation with Bangladesh and other Third World countries and peoples and will work together with them to develop our respective national economies, establish a new international economic order, oppose aggression and expansion and maintain world peace."

In his speech, President Ershad said that Bangladesh continues "to adhere firmly to an independent foreign policy based on a principled stand, arising out of our abiding commitment to the policy of non-alignment and the purposes and principles of the United Nations Charter."

He said: "It is only through consistent and sustained endeavours to strengthen the rule of international law and uphold respect for the principles of sovereign equality, territorial integrity, non-interference in the internal affairs of states, non-use of force or the threat of use of force and the peaceful settlement of disputes that we can hope to usher in a more secure, stable, peaceful and equitable world order."

He said, "Bangladesh cannot condone the violation of the principles of non-intervention and non-interference in the internal affairs of states which is so clearly evidenced in Kampuchea and Afghanistan. Such a violation threatens the very fabric of international conduct and inter-state relations."

"We firmly believe that all foreign troops must be withdrawn immediately and unconditionally from Kampuchea and Afghanistan enabling the peoples of these two countries to decide their own future free from outside interference."

He also demanded a change in the unjust and irrational global economic order.

"I have consistently maintained that our relations with all our neighbours including our largest neighbour India should be based on goodwill, trust and understanding," he said.

"It is our sincere hope that we can together with our neighbours generate new momentum to the process of cooperation and reconciliation which will in time make our region truly a zone of peace and friendship, a region free from conflict and confrontation and more than that an area of friendly and good neighbourly cooperation," he said.

Referring to Bangladesh-China relations, he said the continued contacts between leaders of the two countries have always been imbued with a warm spirit of friendship, understanding and cooperation. The relations between the two countries has been further fortified because of the goals and interest shared by them, he added.

Attending the banquet were: Ngapoi Ngawang Jigme, vice-chairman of the Standing Committee of the National People's Congress; Huang Hua, state councillor; Wu Xueqian, foreign minister, Yang Zhong, minister of forestry; Qin Zhongda, minister of chemical industry; Zhu Muzhi, minister of culture; leading members of other government departments, the headquarters of the General Staff of the Chinese People's Liberation Army, the Chinese People's Association for Friendship with Foreign Countries, the All-China Women's Federation, the Beijing Municipal People's Government and the Islamic Association of China and Xiao Xiangqian, Chinese ambassador designate to Bangladesh.

Among the Bangladesh guests present were A.R. Shamsud Doha, foreign minister, Dr Shafia Khatun, minister of social welfare and women's affairs, and other members of Ershad's party. C.M. Murshed, Bangladesh ambassador to China, was also present.

Confers With Deng Xiaoping

OW290839 Beijing XINHUA in English 0820 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Deng Xiaoping, chairman of the Central Advisory Committee of the Chinese Communist Party, received the president of the Council of Ministers of Bangladesh, H.M. Ershad, at the Great Hall of the People here this morning.

Deng Xiaoping greeted President Ershad cordially and said that China and Bangladesh, both developing countries can count on each other for support. "Our relations are of mutual trust and support," he said. "We share identical views on international issues. Cooperation between our two countries should be very long-term."

President Ershad thanked the Chinese Government and people for their cordial and friendly sentiments towards the people of Bangladesh.

"My current visit is to renew my friendship with China's leaders," the president said. He said his talks with Premier Zhao Ziyang had been very satisfying and that the two countries share the same views on international issues.

Discussing China's future Deng Xiaoping said that the economic readjustment is going smoothly and will help lay a solid foundation for economic development in the 1990s. The on-going fifth session of the Fifth National People's Congress will discuss and approve the country's Sixth Five-Year Plan. "We believe that China's economy will continue to develop smoothly and in proportion," Deng Xiaoping siad. He went on to say that considering the worldwide economic gloom China's economic situation is fairly good.

Present at the meeting were State Councillor Huang Hua, advisor to the Foreign Ministry Fu Hao and Chinese Ambassador-designate to Bangladesh Xiao Xiangqian.

Also present were Bangladesh Foreign Minister A.R. Shamsud Doha, Minister for Social Welfare and Women's Affairs Dr Shafia Khatun and Ambassador to China C.M. Murshed.

Meets Hu Yaobang

OW291602 Beijing XINHUA in English 1542 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Hu Yaobang, general secretary of the Central Committee of the Chinese Communist Party, spoke highly of the good and friendly relations between China and Bangladesh in a meeting with Hussain Mohammed Ershad, president of the Council of Ministers of Bangladesh.

Meeting in the Great Hall of the People this afternoon, Hu said, "Relations between us are the relations of mutual trust and mutual assistance, and our hearts are linked together". He said he is confident that cooperation between China and Bangladesh will expand.

Both Hu and Ershad said they were happy to have the opportunity to make the acquaintance.

Hu paid tribute to the efforts made by Bandladesh for strengthening unity among Islamic countries and for developing good relations with its neighbors. He said China is willing to establish lasting friendly relations with Bangladesh and other South Asian countries.

Ershad said the Bangladesh people take the Chinese people as their true friends. He said he hoped that the relations between the two countries continue to develop.

At the meeting, the two leaders briefed each other on the economic construction in their countries.

Principal members of the president's entourage and China's Foreign Minister Wu Xueqian were present.

Before the meeting, Hu spoke with Bangladesh reporters and answered their questions.

Hu told the reporters that China has good relations with Bangladesh. President Ershad's visit will further such good relations, he said. "The relations between the two countries are those between friends in need. The two countries trust and support each other."

"I hope such a relationship of mutual trust and support will be continued permanently and all countries in South Asia will be good neighbors on the basis of the five principles of peaceful coexistence," Hu said.

On security of the Pacific region, Hu said: "The Pacific is no longer pacific. I hope all peace-loving countries and peoples in the Pacific region will unite and strive to safeguard the peace in the regions of the Pacific, the Indian Ocean as well as in the whole world."

Hu also said China opposes any move harmful to peace. "We were, we are, and we shall be against acts interfering in other countries' internal affairs, particularly armed intervention," he said.

When asked about China's political situation, Hu said: "There have been great changes indeed, but don't overestimate these changes. It will take us 20 to 50 more years to rank China among the economically most advanced."

He said China is now focusing its attention on construction at home. "We wish to coexist peacefully with all countries and develop friendly relations with other countries," he said.

Sees PLA Chief Yang Dezhi

OW280814 Beijing XINHUA in English 0729 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- Yang Dezhi, chief of General Staff of the Chinese People's Liberation Army, went to the state guest house today to call on Lieutenant General H.M. Ershad, president of the Council of Ministers of Bangladesh.

They had a cordial conversation.

Attends Cultural Soiree

OW281748 Beijing XINHUA in English 1626 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- Lieutenant General Hussain Mohammed Ershad, president of the Council of Ministers of Bangladesh, attended a cultural evening in the Great Hall of the People here today.

Accompanied by China's Minister of Culture Zhu Muzhi, Ershad watched a performance by the Beijing Song and Dance Ensemble, the Oriental Song and Dance Ensemble and the China Beijing Opera Theatre.

At the end of the program, Ershad presented the performers with a flower basket and shook hands with them.

Places Wreath at Monument

OW290817 Beijing XINHUA in English 0725 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Lieutenant General H.M. Ershad, president of the Council of Ministers of Bangladesh, placed a wreath at the monument to the people's heroes in the Tiananmen Square this morning in the company of Fu Haq, adviser to the Ministry of Foreign Affairs.

Then, he went to the Chairman Mao Memorial Hall to pay his respects to the remains of Chairman Mao Zedong.

Hosts Return Banquet

OW291612 Beijing XINHUA in English 1550 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Hussain Mohammed Ershad, president of the Council of Ministers of Bangladesh, said his China visit has been successful at a return banquet in the Great Hall of the People here this evening.

Among the Chinese guests present were Zhao Ziyang, premier of the State Council; Ngapoi Ngawang Jigme, vice-chairman of the Standing Committee of the National People's Congress; Huang Hua, state councillor; and Wu Xueqian, foreign minister.

Ershad said in his toast that his China visit "has not only been successful but eminently satisfying."

He said his talks with the Chinese leaders have been comprehensive, educational and extremely fruitful.

Ershad said the talks were held in an atmosphere of "utmost cordiality, goodwill, understanding and openness." He said the talks showed that both sides share identical views and principles on the issues of defending national sovereignty and resistint hegemony, and ensuring regional as well as world peace and stability. China and Bangladesh seek a speedy solution to the problem facing them in West Asia, Afghanistan and Kampuchea, he said.

Ershad said that during his visit he has seen the great changes the Chinese have achieved for the upliftment of the people. He said, "There can be no doubt that with the enlightened and pragmatic policies of the Chinese Communist Party, your collective efforts are bound to usher in a new era of progress and prosperity."

Zhao Ziyang said in his address that Ershad and Chinese leaders had sincere and friendly talks, which have helped to deepen mutual understanding and friendship.

"Our two sides share identical views on a wide range of major international issues," he said. "We are highly satisfied with the development of friendly relations between China and Bangladesh, and are determined to continue our intensive and fruitful cooperation in the economic, trade, technological and cultural fields." He said, "Our two countries have signed a new agreement on economic loans and decided to set up a joint economic committee, which will promote the friendly cooperation between us."

"To strengthen Sino-Bangladesh friendship is the common aspiration of our two peoples and conforms to their fundamental interests. The Chinese government and people will make persistent efforts to this end," he stressed.

In an interview after the banquet, Ershad told Chinese reporters about his impressions of China and regional cooperation between Bangladesh and other South Asian countries.

Loan Agreement Signed

OW291846 Beijing XINHUA in English 1837 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- An agreement on providing a loan by the Government of China to the Government of Bangladesh was signed here this evening.

Zhao Ziyang, premier of China's State Council, and Hussain Mohammed Ershad, President of the Council of Ministers of Bangladesh, were present at the signing ceremony.

We Xueqian, Chinese foreign minister, and A.R. Shamsud Doha, Bangladesh foreign minister, signed the agreement on behalf of their governments.

The loan is provided by the Chinese Government in accordance with the needs of the Bangladesh Government for developing its national economy. The loan will be used to pay for projects provided under the agreement between the two governments.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Group Discussions 29 Nov

OW291928 Beijing XINHUA Domestic Service in Chinese 0257 GMT 29 Nov 82

[Text] Beijing, 29 Nov (XINHUA) -- The Fifth Session of the Fifth NPC today continued to hold group discussions on the draft revised constitution.

Group discussions were held in an enthusiastic atmosphere, and deputies took the floor one after another. While conscientiously discussing the draft revised constitution and Peng Zhen's report according to actual conditions, many deputies earnestly summed up historical experiences and spoke glowingly of the political and economic situation throughout the country that has gotten better and better since the 3d Plenary Session of the 11th CPC Central Committee.

In their speeches, many deputies said: This draft revised constitution has not come easily. We must resolutely support this new constitution which will soon be adopted, implement it in an exemplary way and use it to ensure the realization of the grand objective set by the 12th party congress.

Constitution's Implementation

OW291119 Beijing XINHUA in English 1101 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Deputies attending the current session of the National People's Congress (N.P.C.) have stressed the importance of guaranteeing the implementation of the new constitution and its stability.

During panel discussions of the draft revised constitution, Hu Sheng, leader of the congress working group on the constitution, said the document has made "complete and detailed stipulations" on the rights and duties of citizens.

But the implementation of these provisions needs supervision by the people's congresses at all levels and the people throughout the country, he added.

"Therefore," he said, "all citizens must learn to defend their rights and prevent anyone from undermining the constitution."

Li Jianzhen, a 76-year-old deputy from Guangdong, described the proposed constitution as an important indication of the development of China's socialist democracy and socialist legal system.

Li, who is secretary of the provincial party commission for discipline inspection, said that in order to guarantee the implementation of the constitution, it is necessary, first of all, to widely publicize the constitution among the people so that everybody would understand it, abide by it and uphold it.

Secondly, she said, more laws and decrees should be worked out in accordance with the fundamental principle of the constitution, so that all departments, organizations and individuals would have something to abide by in handling relevant problems.

Thirdly, the organizations supervising the implementation of the constitution should be strengthened, Li Jianzhen said.

Yang Xiufeng, a noted jurist, said at a group meeting of Tianjin deputies that while strengthening legislative work, it is necessary to uphold the authority of the constitution and the law.

"Every citizen must fulfil his duties as required by the constitution, and nobody should have the privilege to transcend it," he stressed.

Ma Wenrui, first secretary of the Shaanxi Provincial Committee of the Communist Party, said the proposed constitution has embodied the line and policies of the party and reflected the will of the people of the whole country.

"Ensuring observance of the constitution is ensuring party leadership," he said. "Therefore, all party organizations and all party members must be models in carrying out the constitution and must act within its limits. This will propel the development of China's socialist modernization."

Peaceful Reunification Viewed

OW291947 Beijing XINHUA Domestic Service in Chinese 1655 GMT 29 Nov 82

[Text] Beijing, 29 Nov (XINHUA) -- At group discussions today, deputies attending the Fifth Session of the Fifth NPC and delegates attending the Fifth Session of the Fifth CPPCC National Committee enthusiastically endorsed the stipulation of the draft revised constitution on "the establishment of special administrative regions." They held that this stipulation completely accords with the aspirations and interests of the people throughout the country, including the compatriots in Taiwan, and embodies the motherland's boundless solicitude and loving care for the people in Taiwan. This stipulation is bound to give an impetus to accomplishing the great cause of reunifying the motherland at an early date.

NPC Deputy Cai Zimin of Taiwan origin said: The draft revised constitution explicitly points out the sacred duty of the Chinese people to accomplish the great cause of reunifying their motherland and provides that the country may establish special administrative regions when necessary. The autonomy of such special administrative regions is different from national and ordinary local autonomy, but it is a high degree of autonomy. On the premise of the motherland's unified sovereignty and territorial integrity, this stipulation ensures no change in a special administrative region's social and economic systems, way of life, and economic and cultural relations with foreign countries. This stipulation confirms in the fundamental law of the country the principles and policies on Taiwan stated repeatedly and clearly by leaders of the central authorities. This is completely in keeping with the aspirations of the compatriots in Taiwan.

He said: After the draft revised constitution was published, I met in Japan in June a number of Taiwan compatriots living abroad or traveling to Japan from Taiwan and discussed this stipulation with them. They all felt inspired and supported the stipulation. They also indicated that they would do their share in promoting the peaceful reunification of Taiwan with the motherland.

Guo Ruiren, NPC deputy and former vice governor of Fujian Province, said: The stipulation on "the establishment of special administrative regions" shows that we are by no means vague on the principle of safeguarding the unified sovereignty and territorial integrity of the country. However, we are very flexible in specific policies and measures. It is guaranteed that the people in Taiwan will be able to engage in production as usual and their living standards will not be lowered after the reunification of the motherland. As to what to do in the future, we can sit down and talk it over.

Tian Fuda, NPC deputy and vice chairman of the General Office of the Taiwan Democratic Self-Government League (of Gaoshan nationality), said: Article 31 of the draft revised constitution clearly deals with the questions about which the Taiwan people are most concerned. So the compatriots in Taiwan now can set their minds at rest because the CPC means what it says. Not only has the CPC said it but the state has guaranteed it in law.

Fei Yimin, NPC deputy and director of TA KUNG PAO published in Hong Kong, said: After the new constitution is adopted, every Chinese citizen has the duty to implement it and to contribute to accomplishing the great cause of reunifying the motherland. He said: After the recovery of Taiwan following the victory of the war of resistance against Japan, I visited Taiwan and deeply felt that the compatriots in Taiwan love the country. He said: Under the impact of the international market Taiwan's economy is now in a serious depression. After Taiwan returns to the motherland, we can supply the raw materials it needs and the mainland has a very good market for its products. I believe that when the constitution is published our principles and policies will soon be understood by the compatriots in Taiwan.

Li Youwen, NPC deputy and chairman of the Standing Committee of the Jilin Provincial People's Congress, said: The stipulation of the draft revised constitution on the return of Taiwan to the motherland provides a legal guarantee for the future of Taiwan after its peaceful reunification with the motherland. It is the trend of the times and the desire of the people to put an end to the separation of Taiwan from the motherland at an early date. The fact that the Kuomintang and the Communist Party cooperated with each other twice in the past shows that the historical trend cannot be resisted by any parties, forces and individuals. The Taiwan authorities should put national interests above everything else, take the road of the Kuomintang cooperating with the Communist Party for the third time, join the patriotic united front stipulated by the constitution and work together with the people throughout the country to achieve the four modernizations and to accomplish the great cause of reunifying the motherland.

Liao Canhui, NPC deputy and chairman of the Tianjin chapter of the Taiwan Democratic Self-Government League, said: The stipulation of the draft revised constitution gives full consideration to the current situation in Taiwan, and its content is feasible, fair and reasonable. I have the hope that the Taiwan authorities will judge the hour, size up the situation, put national interests above everything else, hold Kuomintang-Communist Party talks as early as possible and make concerted efforts to promote the achievement of the great cause of peaceful reunification.

Xu Mengshan, member of the CPPCC National Committee and secretary general of the General Office of the Taiwan Democratic Self-Government League, said: Article 31 of the draft revised constitution on the establishment of special administrative regions fully shows our good faith in solving the Taiwan question by peaceful means. Now the nine-point proposal is given the highest legal guarantee. This shows that the nine-point proposal is not "an expedient measure" but our national policy.

Liang Rongruo, member of the CPPCC National Committee and visiting professor at the Beijing Normal University who returned from Taiwan through the United States to settle down on the mainland in April 1981, said: The draft revised constitution is the product of pooling the wisdom and revolutionary experiences of the people throughout the country. Article 31 of the draft stipulates the establishment of special administrative regions. Ye Jianying and Peng Zhen clearly stated time and again that Taiwan may become a special administrative region and enjoy a high degree of autonomy, including such rights as no change in its current social and economic systems, way of life and economic and cultural relations with foreign countries.

This is a magnanimous way to seek common ground, which shows the utmost tolerance and patience. If the Taiwan authorities obstinately cling to their course they will be unable to justify it in history.

Wang Peidong of Li nationality, woman member of the CPPCC National Committee from Hainan Island, Guangdong Province, said: Taiwan is separated from the mainland of the motherland only by a strait, but the compatriots in Taiwan have been artificially separated from those on the mainland for more than 30 years. As a result, family members cannot be reunited. This goes against the interests and aspirations of the people of all nationalities throughout the country. Article 31 of the draft revised constitution is greatly conducive to bringing this separation to an end at an early date and has a great bearing on the prosperity of Taiwan and the motherland. I earnestly hope that the great cause of peaceful reunification of the motherland can be accomplished at an early date.

Fu Jingxian of Hezhe nationality, member of the CPPCC National Committee, said: We minority nationalities are most concerned about the reunification of the country and the unity of the nationalities because they are of great significance for the prosperity of the Chinese nation as a whole. The great cause of reunifying the motherland has not yet been accomplished, and we must redouble our efforts to accomplish it. Taiwan is part of the motherland's sacred territory, and it is the sacred duty of the people of all nationalities to accomplish the great cause of reunifying the motherland. The draft revised constitution stipulates that "citizens of the PRC are dutybound to uphold the unification of the country and the unity of all nationalities throughout the country." This conforms completely to the fundamental interests and common will of all nationalities throughout the country. We hope that Taiwan will return to the embrace of the motherland at an early date.

At group discussions, Mei Zixin, NPC deputy, chairman of the Guangzhou Municipal Committee of the Chinese Peasants and Workers Democratic Party and vice chairman of the Guangzhou Municipal CPPCC Committee, and Huang Tifei, member of the CPPCC National Committee, standing committee member of the Central Committee of the Kuomintang Revolutionary Committee and vice chairman of the Tianjin Municipal CPPCC Committee, also expressed their views on article 31 of the draft revised constitution. They hoped that the Taiwan authorities would free themselves from doubts and misgivings and contribute to the peaceful reunification of the motherland.

Group Discussions 30 Nov

OW300858 Beijing XINHUA Domestic Service in Chinese 0152 GMT 30 Nov 82

[Text] Beijing, 30 Nov (XINHUA) -- The Fifth Session of the Fifth NPC continued to examine the draft of the revised constitution at group discussions this morning. In their discussions the deputies generally maintained that the draft of the revised constitution reflects the collective opinions of the people of all nationalities in the country and is a crystallization of the people's wisdom. The various meeting places were permeated with a warm atmosphere and many deputies took the floor to speak. Some deputies proposed specific changes in the draft during the discussion. A plenary session will be held this afternoon to hear a report by Premier Zhao Ziyang on the Sixth 5-Year Plan.

Remarks on 1997 Issue

HK300716 Beijing ZHONGGUO XINWEN SHE in Chinese 0113 GMT 30 Nov 82

["NPC Deputy Wang Kuancheng's [3769 1401 6134] Three Sentences on Hong Kong Issue" -- ZHONGGUO XINWEN SHE headline]

[Text] Beijing, 30 Nov (ZHONGGUO XINWEN SHE) -- Because article 31 of the revised draft of the constitution stipulates the establishment of special administrative regions, the future of Hong Kong has become a popular topic of conversation.

In order to hear the views of Wang Kuancheng, deputy to the NPC and chairman of the Hong Kong Chinese General Chamber of Commerce on this issue, our reporter interviewed him.

"The regaining of the sovereignty of Hong Kong is a natural development, since it is provided in the UN Charter that all treaties signed under military pressure are invalid. Hong Kong, like Taiwan, may be turned into a special administrative region after its sovereignty is regained." With this sentence Deputy Wang Kuancheng began the conversation.

"Some people are worried about the stability and prosperity of Hong Kong."

"I would like to make three remarks on this problem," Wang Kuancheng said.

"First of all, I want to point out that the status quo of Hong Kong will remain unchanged in the next 15 years."

"Second, from 1997 on, there will be no more governor, no more British flags, and the modifier 'royal' will no longer be seen in Hong Kong. All other things apart from this will remain unchanged: the social system of Hong Kong will remain the same, the economic system will remain the same, the way of life will remain the same, and so on. The stock exchange will be operated as usual, horse racing will continue, and people will be allowed to patronize ballrooms. What is to be feared if Hong Kong is governed by the Hong Kong people?

"The third thing I would like to say is a fact which is emerging before our eyes but is overlooked by most people. To be sure, Hong Kong will prosper within 4-5 years as rich oil reserves are discovered in the South China Sea and many countries are bidding against one another for the oil exploration projects. A few years later, when the exploitation of oil succeeds, various types of equipment and tremendous funds will be needed and this will open a bright prospect for Hong Kong. Just remember that today Britain's prosperity is based on the North Sea oilfield. Can the Hong Kong economy not prosper with an immense oilfield under exploitation in its neighborhood? Hong Kong is merely a small place like a little bird. How many grains of rice can such a little bird eat? The oil projects will surely be able to feed Hong Kong."

More and more excited, he kept on saying: "It must also be noted that both agriculture and industry are growing in China and the country has become more and more prosperous since the CPC third plenary session. As the 1 billion Chinese people are getting rich, Hong Kong will easily find a great market for its products. The sales volume will be marvelous if everyone just buys one product. Thus huge market equals three European Economic Communities. In fact, there is nothing to worry about."

All of us laughed when hearing Wang Kuancheng's remarks. Laughing loudly, he said: "I have told some of my friends in Hong Kong the above three things. They also laughed when they heard what I said."

Zhao Begins Delivering Report

OW300710 Beijing XINHUA in English 0705 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang began delivering a report on China's Sixth Five-Year Plan (1981-1985) this afternoon at the Fifth Session of the Fifth National People's Congress.

The congress met at 3:00 p.m. for a plenary session today after three days of panel discussions of the draft revised constitution of the People's Republic of China.

Zhao Submits Sixth 5-Year Plan

OW300921 Beijing XINHUA in English 0505 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang said today that China expects to increase its gross value of industrial and agricultural output to 871 billion yuan by 1985, 21.7 percent above the 1980 figure. This represents an average annual rise of 4 percent.

Submitting the Sixth Five-Year Plan (1981-1985) for deliberation at the National People's Congress here this afternoon, the premier reported that total investment in fixed assets for this period is to be 360 billion yuan while a number of modern projects will be built and major technical transformation effected in key enterprises.

He said that funds for developing education, science, culture and public health service will be 96.7 billion yuan, an increase of 68 percent over the 57.7 billion yuan appropriated under the Fifth Five-Year Plan.

The Sixth Five-Year Plan envisages a 22 percent rise in the per-capita consumption level in the urban and rural areas, which means an average annual rise of 4.1 percent, he said. During this period, China will try to strike a balance by and large between revenue and expenditure, and between credit receipts and payments, and keep commodity prices largely stable.

Premier Zhao said that during this period, China will continue the policy of readjustment, restructuring, consolidation and improvement of the national economy.

China will also make further efforts to solve all kinds of problems left over from the past which hamper economic growth, win the decisive victory of achieving a fundamental turn for the better in the financial and economic situation and do better spade-work for economic and social development in the Seventh Five-Year Plan period, he said.

Fulfillment of the Sixth Five-Year Plan is of paramount importance to the future of the whole modernization program and the interests of the people of all nationalities in China, he added.

Zhao on Output Value

OW300927 Beijing XINHUA in English 0910 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang announced today that China's total value of industrial output and that of agricultural output will both rise by an annual average of 4 percent between 1981 and 1985 and efforts will be made to increase it to 5 percent.

Reporting on the Sixth Five-Year Plan at the National People's Congress here this afternoon, Zhao said that the gross value of agricultural output will go up from 218.7 billion yuan in 1980 to 266 billion yuan by 1985 and that of industrial output from 497.2 billion yuan to 605 billion yuan.

By 1985, grain output is expected to reach 360 million tons, an increase of 12.3 percent over 1980; cotton, 3.6 million tons, up 33 percent; coal, 700 million tons, up 12.9 percent; electricity, 362 billion kWh, up 20.4 percent; and steel, 39 million tons, up 5.1 percent.

The premier recalled that, in the 28 years from 1953 through 1980, the gross value of agricultural output grew at an average annual rate of 3.4 percent. So, considerable efforts must be made to attain the 4 to 5 percent annual increase set in the Sixth Five-Year Plan, he noted.

The plan envisages a much lower industrial growth rate compared with the average rate of the previous 28 years, Zhao said. This is because the task of industrial readjustment remains very arduous and complicated, energy output cannot increase markedly in the immediate future and the strain on transport cannot be changed radically in a short period, he explained.

The economic results of industrial growth in the previous 28 years were very poor, whereas the Sixth Five-Year Plan is anchored on better economic performance, he went on.

The targets set in the Sixth Five-Year Plan are safe and appropriate, allowing room for overfulfilment, the premier said. In the first two years of the period covered by this plan, the gross value of industrial and agricultural output increased by an annual 5.2 percent, surpassing the annual average of 4 percent set for the 1981-1985 period.

He predicted that, with the fulfilment of this five-year plan, relations between agriculture, light industry and heavy industry will be more harmonious, and significant headway will be made in the training of personnel and in technological progress. The growth rate in subsequent years will certainly be still higher, thus ushering in a new period of vigorous economic development in China, he added.

Zhao on Capital Construction

OW300937 Beijing XINHUA in English 0918 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- China will work on 890 large and medium-sized construction projects during the 1981-1985 period and 400 of them will have been completed before the end of 1985, Premier Zhao Ziyang announced today.

Addressing the on-going National People's Congress this afternoon, Zhao said total investment in capital construction under the Sixth Five-Year Plan will be 230 billion yuan, roughly the same as under the Fifth Five-Year Plan.

Energy and transport, being priorities, will receive 38.5 percent of the total investment, he said.

A total of 17.9 billion yuan will be invested in the coal industry, chiefly for developing the coal fields in Shanxi, northeast China and eastern Inner Mongolia, and also those in western Henan, Shandong, Anhui, Jiangsu and Guizhou Provinces during the five years, work will begin on coalmines with a total annual capacity of 220 million tons, of which collieries with a combined capacity of 80 million tons will have been completed before 1985.

A total of 15.4 billion yuan will go to the oil industry, to be used mainly for prospecting for oil in the Songliao Basin of northeast China, the Bohai Bay, the Puyang region of Henan Province and the Eren Basin of Inner Mongolia.

Prospecting will also be stepped up in the Junggar Basin of Xinjiang and the Qaidam Basin of Qinghai as well as in the old oil and gas fields in the eastern part of China. Energetic efforts will be made to prospect for and exploit offshore oil deposits.

In the five years ending 1985, China's oil extraction capacity will increase by 35 million tons and that of natural gas by 2.5 billion cubic meters.

The power industry will receive 20.7 billion yuan, mainly for building a number of large hydroelectric stations along the upper reaches of the Huanghe (Yellow) River, the upper and middle reaches of the Changjiang (Yangtze) River, and the Hongshui River.

At the same time, a number of pithead power stations and thermal power plants will be constructed in coal-rich Shanxi Province, eastern Inner Mongolia, Huainan and Huaibei regions, western Henan Province, areas north of the Weihe River, and Guizhou Province, as well as in Liaoning, Shanghai, Jiangsu, Zhejiang, Guangdong and Sichuan Provinces. A nuclear power station will be built with an installed capacity of 300,000 kw. During the five years, work will begin on power projects with a total capacity of 36.6 million kw, of which power plants with a total capacity of 12.9 million kw will be operating by the end of 1985.

A sum of 29.8 billion yuan will be invested in the transport and communications service, mainly for railway and harbor construction, inland navigation projects along the Changjiang and other rivers.

The plan calls for the laying of 2,000 kilometers of rails and the construction of 132 deep-water berths in 15 harbors so that by 1985 the cargo handling capacity of the country's seaports will total 317 million tons as against 217 million tons in 1980.

In agriculture, Premier Zhao Ziyang said, emphasis will be laid on strengthening the anti-flood facilities along the Huanghe, Changjiang, Huaihe and Haihe Rivers. Three large water conservancy works (two reservoirs and one water supply project) will be completed to alleviate the shortage of water supply for industrial and agricultural purposes in the Beijing-Tianjin area.

Efforts will continue to build commodity grain bases in Heilongjiang, Jiangxi, Hunan and Anhui Provinces, as well as the shelterbelt networks in northwest, north and northeast China to check soil erosion in areas along the middle reaches of the Huanghe River and the process of desertation in the northwest.

Premier Zhao said in the five years China will earmark 130 billion yuan for updating equipment and carrying out technical transformation in existing enterprises. This sum accounts for 36 percent of the total fixed asset investment. In the 28 years between 1953 and 1980, funds for such purposes made up just about 20 percent.

Zhao on Education, Science

OW300055 Beijing XINHUA in English 0929 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- China will spend 96.7 billion yuan on education, science, culture, public health and physical culture during the Sixth Five-Year Plan (1981-1985).

This acconts for 15.9 percent of the 1981-1985 government expenditure. Appropriations for the same purpose made up only 11 percent fo the total expenditure under the Fifth Five-Year Plan (1976-1980).

Addressing the National People's Congress session today, Premier Zhao Ziyang said that the 1985 spending on these undertakings will account for 16.8 percent of the year's government expenditure. With the development of China's economy, the premier said, more will be spent in the years to come.

Premier Zhao listed the following major targets in the field of education:

-- By 1985, universities and colleges will have a total of 1.3 million students, 13.6 percent more than in 1980; 1.5 million university students will graduate in five years; there will be a substantial growth of radio, television, correspondence and evening courses in higher education; 20,000 graduate students will be enrolled in 1985, 5.5 times the 1980 figure, and 45,000 graduate students will be trained in five years.

-- Serious efforts will be made to strengthen systematic education of undergraduates and graduate students in the basic theories of Marxism. They must be trained as workers with socialist consciousness as well as general and professional knowledge.

-- Work will continue to restructure secondary education and establish intermediary vocational schools of various types, particularly those relating to farming, forestry, animal husbandry, side-occupation, fishery, medical service, finance and trade, and political science and law. Part of the senior middle schools in the rural areas will be converted into agricultural schools.

-- Efforts will be made so that, by 1985, primary education becomes universal or almost universal in most counties and junior middle school education becomes universal in the cities.

In science and technology, 40 major achievements concerning agriculture, light and textile industries, energy, electronics and machine-building will be popularized and 100 important subjects in 38 areas tackled.

Research in basic theories will be intensified, while the focus remains research for application and development purposes, and all research work should be geared to the needs of economic construction and the expansion of production.

Information centers, analysing-measuring-testing centers, metrological and computing centers, and applied math consulting service centers for public use will be established systematically in various provinces, municipalities and autonomous regions to help scientific research and economic development.

Research will also be intensified in political economy, management, philosophy, jurisprudence, political science, pedagogy, sociology, history, literature, linguistics and philology and efforts made to explain and solve major theoretical and practical problems arising from China's socialist modernization.

Production of feature films will increase from 82 in 1980 to 120 in 1985, and efforts will be made to improve the quality of radio and television programs in terms of ideology, informativeness, artistry and technology, so as to increase the number of listeners and viewers.

An additional 600,000 people will be trained as medical workers and 250,000 new hospital beds added. Great efforts will be made to improve the technical standards of contraception so as to ensure success in controlling population growth.

Zhao Ziyang stressed that all cultural works must have communist ideological content and serve the purpose of raising the scientific and cultural level of the people.

All cultural and research undertakings must serve the people and socialism, he said. They must continue implementing the policy of letting a hundred flowers blossom and a hundred schools of thought contend and the policy of opposing bourgeois liberalization and combating decadent feudal and capitalist culture.

Zhao on Expanding Trade

OW300957 Beijing XINHUA in English 0941 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang said here today that China will expand foreign trade and economic and technical exchanges during the period of the Sixth Five-Year Plan (1981-1985) on the principle of equality and mutual benefit.

He made the announcement at the Fifth Session of the Fifth National People's Congress.

Zhao disclosed that by 1985 the total volume of China's import and export trade will reach 85.5 billion yuan, an increase of 51.8 percent over 1980. The average annual increase will be 8.7 percent.

Out of the grand total, he added, the volume of export trade will reach 40.2 billion yuan, growing at an average annual rate of 8.1 percent, which is higher than the 4 percent growth rate of the gross value of industrial and agricultural production for the same period. The volume of import trade will reach 45.3 billion yuan, increasing at an average annual rate of 9.2 percent, which is slightly higher than the growth rate of export.

The Chinese premier said that efforts will be made to increase the export of textiles and other light industry goods, artware, native produce, and particularly the portion of machinery and electrical products in the total volume of export.

Export of petroleum, rare metals and other such minerals which are plentiful in China will be organized in a planned way, he said.

In line with the needs of national construction, Zhao Ziyang added, China will improve the import mix by appropriately raising the proportion of new technology and major equipment in the total volume of import.

He called for continued efforts to make effective use of foreign loans, accept direct investment by foreign businessmen or start joint ventures with them so as to increase the use of foreign funds on an appropriate scale.

Special attention will be paid to the role of coastal cities in expanding economic and technical exchange with foreign countries, Zhao said. While Guangdong and Fujian continue to implement special policies and flexible measures, Shanghai, Tianjin and other coastal cities will be given greater decision-making power so that they can make use of their advantages and take greater initiative in introducing and assimilating imported technology, utilizing foreign funds, transforming old enterprises and expanding their sales on the international market.

Expansion of economic and technical exchange with foreign countries is aimed at enhancing China's capability of self-reliance and it must in no way harm or even weaken the country's economy, the premier said.

Zhao on Living Standards

OW301003 Beijing XINHUA in English 0948 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- China's total payroll will increase from 77.3 billion yuan in 1980 to 98.3 billion yuan in 1985. This means an average annual increase of 4.9 percent, or 4.2 billion yuan.

Premier Zhao Ziyang said this in his report on the Sixth Five-Year Plan to the National People's Congress session here today.

He said that last year saw a wage increase for part of those working in the fields of education, public health and physical culture. This year and the next three will see a pay raise for other workers and staff; the salaries of middle-aged intellectuals will be increased by a bigger margin, he added.

By 1985, he said, a total of 29 million people in cities and towns will have been employed.

The average net income per capita among the peasants, he said, will grow from 191 yuan in 1980 to 255 yuan in 1985, registering an average annual increase of 6 percent. This is higher than the average annual rate of 4.3 percent over the 26 years between 1955 and 1980, he said.

During the five-year period, the average per-capita consumption in city and countryside is expected to rise by 22 percent, or an average annual rise of 4.1 percent. This is higher than the average of 2.6 percent over the 28 years between 1953 and 1980.

Living conditions for people in both the urban and rural areas will continue to improve. Housing with a total floor space of 310 million square meters will be built by state-owned units in cities. This breaks down to an annual average of 62 million square meters, 2.6 times the average annual figure for the 28 years between 1953 and 1980.

Houses with an estimated total floor space of 2.5 billion square meters and public welfare facilities totalling 300 million square meters in space are expected to go up in the countryside.

There must be strict control of population growth during the period of the Sixth Five-Year Plan, Zhao said. The annual natural population growth rate must be kept under 13 per thousand so that, by 1985, the total population on the mainland of China will be around 1.06 billion.

The premier stressed that practical and feasible measures must be taken to control population growth, or it will affect China's national economy and the improvement of people's living standards.

Zhao on Minority Aid

OW301004 Beijing XINHUA in English 0956 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- The Chinese Government will earmark a special sum of 2.5 billion yuan in the1981-1985 period to help construction work in the national minority areas and economically underdeveloped regions.

The special fund is 2.2 billion yuan more than the appropriations made for the same purpose under the Fifth Five-Year Plan (1976-1980).

Addressing the current National People's Congress session today, Premier Zhao Ziyang said that the government will continue to support the national minority areas with materials and technical personnel.

Financial allowances for these areas will increase every year, he added.

Zhao on State Revenue

OE301007 Beijing XINHUA in English 0957 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang said today that China will rationally arrange and control expenditures to minimize its financial deficit during the Sixth Five-Year Plan period (1981-1985).

He told the National People's Congress that the government will also strictly control the issuance of currency to ensure a basic balance between state revenue and expenditure and between credit and receipts and payments.

He disclosed that the total state revenue in this period is set at 595.3 billion yuan. The sum envisaged for 1985 is 127.4 billion, an increase of 18.9 billion over 1980. The total state expenditure is set at 609.8 billion yuan, of which the 1985 figure is 130.4 billion, an increase of 9.2 billion over 1980.

There was a 2.5 billion yuan deficit in 1981 and efforts must be made to increase revenue, strictly control spending and strive to keep the deficit in each of the remaining four years under three billion yuan.

The premier said that, in planning government expenditures, priority will be given to key construction projects. The government will gradually increase expenditures on educational, scientific, cultural, public health and sports undertakings while ensuring essential military and administrative spending and paying off the principal and interest of foreign loans on time.

Zhao Ziyang emphasized the need to keep market prices by and large stable so as to guarantee a secure life for the people.

Since the beginning of this year, the premier added, various localities have conscientiously implemented the State Council's "Circular on Resolutely Stabilizing Market Prices" and the situation has been good. The general level of retail prices in the January-September period was about the same as at the end of last year.

Zhao Ziyang said that in the next few years the prices of a few commodities which are most unreasonable will be readjusted either upward or downward so as to stimulate production. But such readjustments should be made on condition that the general level of market prices is kept stable by and large.

Zhao on Training Programs

OW301013 Beijing XINHUA in English 1003 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- China will do everything possible to raise the level of cadres, technical personnel and workers in ideological and political consciousness, modern science and culture, and production skills.

Premier Zhao Ziyang made this statement in his report on the Sixth Five-Year Plan to the National People's Congress session here today.

The premier described this as "a strategic task."

Regular colleges, schools and training courses in various forms will be set up to train cadres and workers in different trades.

He expressed the hope that the Communist Youth League, trade unions, women's federation and other mass organizations will pay attention to this work.

Premier Zhao said that regular education for workers requires strict admission standards and examination systems, adequate teaching materials which meet practical needs and qualified and competent teachers. These are essential if the students are to improve their political and professional levels at the end of their study, he added.

He said it is necessary to educate the workers in the history of social development, modern Chinese history and the history of the Chinese revolution, in communist ideology, conviction and ethics, in the communist attitude toward labor, in revolutionary discipline, professional ethics, the legal system, patriotism and internationalism, and in fine aesthetic standards and the socialist way of life so that more and more workers will be imbued with high ideals, moral integrity, general education and a sense of discipline.

Zhao on Social Conduct

OW301027 Beijing XINHUA in English 1009 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Premier Zhao Ziyang said here today that the fostering of fine social conduct and good relations among people is a very important aspect of building a socialist spiritual civilization.

Zhao made this statement in his report on the Sixth Five-Year Plan to the Fifth Session of the Fifth National People's Congress.

The 12th National Congress of the Chinese Communist Party called for effecting a fundamental turn for the better in the standards of social conduct in the next five years, Zhao Ziyang continued.

To this end, efforts should be made in town and country to achieve a general improvement in public order and production and work order, he said. He called for continuous efforts to foster a better attitude toward labor, office work and services, and combat all manifestations of extreme irresponsibility and malpractices for selfish ends and other erroneous behavior.

All this is possible under the firm and correct leadership of the Communist Party and the guidance of communist ideology, and with the socialist system based on public ownership of the means of production, with the powerful state machinery of the people's democratic dictatorship and with progressive public opinion, he said.

It is also possible to foster powerful forces throughout society to resist all unhealthy trends and evil practices and cultivate a new type of relationship between people, namely, mutual respect, care for each other, mutual help and friendly cooperation. All these are characteristics of socialist spiritual civilization, he added.

Premier Zhao said that hard work should be done to improve the standards of social conduct considerably during the Sixth Five-Year Plan period and create a favorable social atmosphere so that the people will gladly devote themselves to the modernization drive.

Zhao on Major Targets

OW301059 Beijing XINHUA in English 1014 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- An average annual increase of four percent in industrial and agricultural output value;

A total investment of 360 billion yuan in fixed assets;

Completion of 400 big and medium-sized projects and construction of 490 others;

An annual 4.9 percent increase in wages and 6 percent increase in peasants' income; and

An increase of 60 percent in expenditure on education, science, culture and public health service.

These major targets announced by Premier Zhao Ziyang today underline China's Sixth Five-Year Plan for economic and social development (1981-1985).

Reporting on the plan at the National People's Congress session this afternoon, Zhao Ziyang said China will carry on the policy of readjustment, restructuring, consolidation and improvement of the national economy in this period.

He envisaged a decisive victory in the endeavor to bring about a fundamental turn for the better in the country's financial and economic situation, thus paving the way for a greater development in the Seventh Five-Year Plan period.

Today's meeting was presided over by Executive Chairman Peng Zhen.

Zhao Ziyang's report consists of three parts: the basic tasks of the Sixth Five-Year Plan; its implementation in the first two years (1981-1982); and the major measures to ensure its all-found fulfillment.

Other important facts and figures mentioned by the premier include:

In 1985, the gross value of China's industrial and agricultural output is expected to reach 871 billion yuan, an increase of 21.7 percent over 1980, or an average annual increase of four percent.

Of this total, the gross value of agricultural output will reach 266 billion yuan and that of industrial output, 605 billion yuan.

An average annual growth of four percent is planned for both industry and agriculture, but efforts will be made to achieve a five-percent rise.

Total investment in fixed assets will be 360 billion yuan. Of this, 230 billion yuan, roughly the same amount for the Fifth Five-Year Plan period, will go to capital construction, while 130 billion yuan will be used to update existing enterprises. Priority will be given to energy and transport.

China will spend 96.7 billion yuan on education, science, culture, public health service and physical culture, a 68 percent increase over the Fifth Five-Year Plan. This sum represents 15.9 percent of total government expenditure, as compared with 11 percent in the fifth plan.

Zhao Ziyang said China will expand its foreign trade and economic and technical exchanges with foreign countries on the principle of equality and mutual benefit. By 1985, the total volume of import and export trade will reach 85.5 billion yuan, an increase of 51.8 percent over 1980, or an average annual increase of 8.7 percent.

He pointed out that China will continue to make use of foreign loans, draw direct investment from foreign businessmen or set up joint ventures with them.

All this is intended to increase China's ability to be self-reliant, Zhao Ziyang stressed. It must not weaken or hamper the development of China's national economy, he said.

The 1985 national payroll will reach 98.3 billion yuan, representing an average annual increase of 4.2 billion, the premier said. The net income per peasant is expected to grow at an annual rate of six percent on the average.

By 1989, the average per-capita consumption level in the cities and countryside will go up 22 percent over 1980, representing an average annual increase of 4.1 percent.

It is estimated that houses with a total floor space of 2.5 billion square meters will be built by the peasants for personal use in the 1981-1985 period. Public welfare facilities with a combined space of 300 million square meters will go up in the countryside. Housing totalling 310 million square meters will be completed in these five years by state-owned units in cities and towns.

During the Sixth Five-Year Plan period, he said, the annual population growth rate must be kept under 13 per thousand. The population on the mainland must be kept around 1,060 million by 1985.

Premier Zhao stressed that it is the firm policy of the Communist Party and government to help the national minority areas and economically backward regions develop their economy and culture. While increasing financial allowances for these areas every year, the government will allocate a special fund of 2.5 billion yuan to help them with their development in the five-year period. This will be 2.2 billion yuan more than in the 1976-1980 period.

In the second part of his report, the Chinese premier listed the achievements of 1981 and 1982, the first two years of the Sixth Five-Year Plan.

He said China's total industrial and agricultural output value in 1981 rose 4.5 percent over 1980 and a further increase of 5.7 percent is expected in 1982.

In agriculture, the output value of 1981 was 5.7 percent higher than that of 1980 and it is expected to go up five percent again this year over 1981. There has been an all-round development in agricultural production, resulting in growing prosperity for the rural areas. This is an important factor accounting for the steady improvement in China's economic and political situation, the premier said.

He said that production of industrial goods has grown rapidly so that there is more and more plentiful supply of commodities in the market, thus considerably relieving the shortage of consumer goods.

Never has there been such a development in China since the late 1950s, he said. The trend of continuous decrease in state revenues over the years has started to change, and there has been a favorable balance of foreign exchange earnings and expenses for two years running.

The above facts, he added, show that the task begun in 1979 in readjusting the proportion between accumulation and consumption and the proportion between agriculture, light industry and heavy industry has been basically accomplished. The readjustment of the national economy has now entered a new and more advanced stage.

In the third part of his report, Premier Zhao Ziyang said that shifting the entire economic work to improvement of economic performance is the key to realizing in the next three years the portion of the Sixth Five-Year Plan about economic development.

To this end, he said, the following measures must be taken:

One. Strictly control the scale of investment in fixed assets and ensure the completion of key projects and the technical transformation of enterprises according to plan.

Two. Carry out resolute readjustment and all-round consolidation of existing enterprises and work hard to improve their management.

Three. Work energetically for technical advances and bring into full play the role of science and technology in promoting economic construction.

Four. Actively and steadly speed up the process of restructuring the economic system. This is an important guarantee for improving economic performance comprehensively and achieving socialist modernization.

Discussing China's agriculture, Premier Zhao said that the main reason for the excellent situation in rural China in recent years has been the implementation of correct policies and various forms of the production responsibility system, which have fired the enthusiasm of the peasants.

For the overall fulfillment of the Sixth Five-Year Plan, the Chinese premier noted, it is imperative to implement firmly the principle of building both socialist material and spiritual civilization.

Efforts must be made to improve the institutions of socialist democracy, perfect the socialist legal system and defend more effectively the right of the Chinese people of all nationalities as masters of the country in accordance with the new constitution to be adopted at the current N.P.C. session, he said.

Premier Zhao Ziyang pointed out that the Sixth Five-Year Plan and the 1983 plan, to be approved and published by the current N.P.C. session, will set clear-cut immediate objectives for the Chinese people and link their present work closely with long-range development, thus encouraging them to advance firmly toward the splendid goals set for the end of this century.

He said that there are still many difficulties ahead and it is essential to bring into full play the enthusiasm of all manual and mental workers and carry forward the revolutionary spirit of hard work. "Our great motherland will surely grow in strength and prosperity from yearto year," he declared.

Premier Zhao's report drew warm applause from the hall.

Members of the National Committee of the Chinese People's Political Consultative Conference attended the meeting as observers.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH CPPCC

Panel Discussions 25 Nov

OW261911 Beijing XINHUA in English 1553 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- Participants in the current session of the Chinese People's Political Consultative Conference expressed satisfaction in panel discussions today with the growing role the C.P.P.C.C. is playing in China's political life and modernization program.

Many commended the organizing of investigations on special subjects as an important way for the C.P.P.C.C. to exercise democratic supervision.

Chen Mingshao, vice-president of Beijing Institute of Technology and a researcher in underground water, and Qian Weichang, a noted specialist in mechanics described their experience in investigating the sources of energy and environmental protection in southwest China and in inspecting six famous cities in historical and cultural significance.

In response to their suggestions, the Yunnan Provincial Government has adopted measures to protect tropical rain forests in the province. The Jiangsu Provincial Government has taken effective steps to stop further damages to historical sites in the picturesque Tianping Mountain area.

Qian Weichang said suggestions and criticisms made by C.P.P.C.C. members on the basis of serious investigation and study have received great attention from the people's government.

Jing Shuping, deputy secretary general of the All-China Federation of Industry and Commerce and member of the board of directors of the China International Trust and Investment Corporation, called for concerted efforts by all quarters to help achieve the country's magnificent goal of modernization by the end of this century.

"Many C.P.P.C.C. members are experienced in economic, scientific, technical and educational work," he said. "It is now the best time for us to contribute our part in improving economic performance, training qualified personnel and raising the people's scientific and technical level.

"I've had the strong feeling these years of participating in a cause full of vitality and have, in turn, drawn fresh vigor from this invigorating cause," he said.

Lhalu Cewangdoji, Standing Committee member of the C.P.P.C.C. Tibet Regional Committee and commander-in-chief of the former Tibetan army of the local government, said that patriots in Tibet are playing an increasing role in the local political, economic, cultural and educational affairs.

Thanks to the correct policies of the party and government, he added, the situation in Tibet is becoming better and better. The last two years saw a big growth in farming and animal husbandry and a marked improvement in the life of the Tibetan people. That is why more and more Tibetans residing abroad wish to come back to visit their relatives or settle down.

"Two brothers of mine who are now abroad have learned about the changes in Tibet through correspondence and both have expressed the desire to come back for an early family reunion."

Pan Chenglian, 73, member of the Standing Committee of the Chinese Peasants and Workers Democratic Party and director of the Hangzhou Institute of Traditional Chinese Medicine, said most of the members of his party are medical and health workers. He and his colleagues established the Qianjin Spare-time Medical School in Hangzhou three years ago when the C.P.P.C.C. called on professionals to help train qualified personnel for China's modernization program. The school has since trained more than 400 professionals for the city's hospitals, factories, mines and army units.

At present, the number of spare-time schools run by units under the C.P.P.C.C. has exceeded 600, with a total enrollment of more than 100,000.

PRC Constitution Discussed

OW271804 Beijing XINHUA in English 1745 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- The new constitution now being examined by the National People's Congress will inspire the socialist enthusiasm of the 1,000 million Chinese people and encourage them to work harder for the prosperity of the country.

This was the unanimous view expressed by members of the National Committee of the Chinese People's Political Consultative Conference while discussing the draft of the revised constitution.

Burhan Shahidi, vice-chairman of the C.P.P.C.C. National Committee, said he took part in drafting both China's first constitution of 1954 and the present revised constitution.

The new draft has made concrete and clear-cut provisions on a series of major questions, including the people's democratic dictatorship, the socialist economic system, socialist spiritual civilization and national unity, Burhan Shadidi said. This, he said, will be a most reliable guarantee for the democratic rights of the Chinese people, for the equality and unity of all nationalities of China and for the success of China's modernization program.

Wu Yifang, member of the Standing Committee of the C.P.P.C.C. National Committee and vice-chairman of the Central Committee of the China Association for Promoting Democracy, said the draft of the revised constitution has incorporated some of the suggestions put forward by the central and local organizations of the association.

"For example, I suggested the constitution should have provisions for the development of pre-school education, because the children today will be the main force in China's modernization drive by the end of the century. We should pay attention to their education and train them into citizens with lofty ideal, moral integrity, knowledge and a sense of discipline. I'm happy to see that my suggestion has been included in the draft of the revised constitution." Wu Yifang said.

Mushayev (of Uygur nationality), member of the Standing Committee of the C.P.P.C.C. National Committee and vice-chairman of the Standing Committee of the People's Congress of the Xinjiang Uygur autonomous region, said that he was satisfied with the draft of the new constitution which will ensure national equality, unity and mutual assistance, strengthen national regional autonomy, and promote the political, economic and cultural development of the autonomous regions.

He said this will provide a legal guarantee for the removal of the de facto economic and cultural inequality and among different nationalities left over from the past.

Xu Zhifu, member of the Standing Committee of the Zhi Gong Party, said that the draft constitution reflects the fundamental interests not only of the people on the mainland but also of the compatriots in Taiwan, Hong Kong and Macao and overseas Chinese.

He said he was sure that overseas Chinese would acclaim the draft constitution which provides for the setting up of a commission for overseas Chinese affairs and for protecting the legitimate rights and interests of overseas Chinese, returned overseas Chinese and the relatives of overseas Chinese.

Hong Kong Issue Discussed

HK280310 Beijing XHONGGUO XINWEN SHE in Chinese 0222 GMT 28 Nov 82

[Text] Beijing, 28 Nov (ZHONGGUO XINWEN SHE) -- At a panel meeting of the Hong Kong-Macao group of the CPPCC, the members discussed their views on the recovery of Hong Kong in light of article 31 of the draft revised constitution concerning the establishment of special administrative regions.

In their speeches the members unanimously supported the motherland's recovery of sovereignty over Hong Kong and refuted the absurd theories of "validity of the treaties" and "continuation of British rule." They held, the central leaders concerned have put the Hong Kong issue very clearly, that is, China will recover sovereignty over Hong Kong, establish a special region, have Hong Kong ruled by Hong Kong people, institute no changes in the system, and maintain Hong Kong's prosperity. They praised this guiding principle.

Li Zisong, a CPPCC member and publisher of the Hong Kong WEN WEI PO, said, NPC Standing Committee Vice Chairman Peng Zhen pointed out in his report that China is absolutely unequivocal on the principle of safeguarding its sovereignty, unity and territorial integrity. At the same time, it is highly flexible as regards specific policies and measures. This is China's basic position in handling problems such as that of Taiwan. I think the same also applies to Hong Kong. Hong Kong will also be established as a special administrative region after its recovery. As soon as Hong Kong is recovered, the shame of losing national territory which has endured more than a century will be washed away. This is highly significant. We Hong Kong and Macao CPPCC members and the compatriots in Hong Kong and Macao bear still greater responsibility and duty in this respect.

Huo Yingdong, a CPPCC member and director of the Hong Kong Yau Lok Company Ltd said, as soon as New China was established it announced the abrogation of all unequal treaties, and so the recovery of Hong Kong has been China's consistent stand, and certainly not something we are only talking about now. Many British officials with whom I have contacts also know that Hong Kong will certainly be recovered. The current problem is that we should preserve Hong Kong's economic stability and prosperity during the transition period prior to recovery. The present economic problems in Hong Kong are mainly caused by the world economic recession; some are also caused by certain people playing tricks. He held: All Chinese agree with the recovery of Hong Kong. After Hong Kong is recovered it will become a special administrative region; article 31 of the draft constitution clearly states that the systems practiced in such regions can be regulated by law according to the specific circumstances. This means that after Hong Kong becomes a special administrative region, there need be no changes in its systems, way of life, management guidelines and so on. The central authorities have firmly stated this principle, so I think everyone can enjoy still more ease of mind.

RENMIN RIBAO ON EDUCATION OF PARTY MEMBERS

OW282042 Beijing XINHUA Domestic Service in Chinese 1647 GMT 28 Nov 82

[Text] Beijing, 28 Nov (XINHUA) -- The 29 November RENMIN RIBAO carries an editorial entitled "Study the New Party Constitution; Be a Qualified Party Member."

The 12th party congress put forward a program for socialist modernization and a program for party building according to the requirements of the historic tasks for the new period. The decisive condition for accomplishing this great undertaking, unprecedented in Chinese history, is to successfully build the party and to make every party member become a Communist Party member worthy of the name, a member who will respond with actual deeds to the expectations of the people and the times.

Ever since our party was in the position to lead the country every Communist Party member has been faced with new tests. The people have entrusted us with power. Should Communist Party members use the power to serve the people better and to fulfill their pledge to fight all their lives for the cause of communism or to seek personal gain? Most problems concerning what are called unhealthy party style, there being no fundamental turn for the better in party style, and impurities in ideology, work style and organization have something to do with this. We must thoroughly assess this situation and firmly believe that there will be a fundamental turn for the better in party style. In the past 30-odd years since the founding of the PRC we have made great achievements in the socialist cause after going through various twists and turns. Particularly in the several short years since the 3d Plenary Session of the 11th CPC Central Committee, the socialist cause in our country has been advancing by leaps and bounds and thriving in every aspect while bringing order out of chaos. We have effected a historic change. All this would have been out of the question without the spirit of devotion displayed and a heroic struggle carried out by tens of millions of Communist Party members. Facts show that the ranks of our party members are good and that our party has a fighting capacity. Our cause is advancing, and so are our people and Communist Party members.

Where there is the brilliant victory of socialism, there are Communist Party members who are fighting. In the Lanzhou oil refinery, 77.7 percent of the model workers are Communist Party members. Communist Party members account for 70 percent of the model workers at the county and commune levels in Zhuanghe County, Liaoning Province. Of the 265 heroes and model persons emerging from the struggle against flood and for relief work in Shaanxi Province, 180 are Communist Party members, accounting for 68 percent of them. The masses said: "Most of the really fine examples are still Communist Party members." Although Communist Party members who are in the "intermediate state" have failed to play their role well as advanced elements, they have made some progress under the party's leadership. This is the basic fact before us, the main aspect of nearly 40 million party members and the effective basis for bringing about a fundamental turn for the better in the party style.

As far as the education of party members -- the ideological and political work within the party -- is concerned, tremendous progress has been made in the past few years. Particularly the study, propagation and implementation of the "resolution" adopted by the 6th Plenary Session of the 11th CPC Central Committee and of the documents of the 12th party congress have played an important role in unifying the understanding of all party comrades and in raising their political consciousness. But we should see that our party has laid down a Marxist line that has been proved correct in practice as well as a series of principles and policies suited to conditions in various fields. In this situation, it is increasingly significant and urgent to step up the education of party members and bring about a fundamental turn for the better in the party style in order to make the qualities of party members meet the requirements of the historic task of socialist modernization.

The new party constitution adopted by the 12th party congress is the best since the founding of the party. This new party constitution, which has summed up our party's historical experiences, is a powerful weapon for strengthening party building. Party organizations at all levels should use the new party constitution to educate all party members. Every Communist Party member should systematically study the new party constitution, first of all, its stipulations on the qualifications, duties and rights of a party member, in order to understand this: A Communist Party member must dedicate his whole life to communism and be ready to make any personal sacrifices, serve the people wholeheartedly, be at all times an ordinary member of the working people and seek no personal gain or privileges, although he is allowed personal benefits and job functions and powers as provided for by the relevant regulations and policies.

Studying the new party consitution is for the purpose of implementing it. Every Communist Party member should strive to be a qualified one while working at his post. Party members who are cadres in leading positions at various levels in particular should set stricter demands on themselves and take the lead in studying and implementing the new party constitution and being qualified party members and cadres.

Party organizations at all levels should put the education of party members as an important item on their agendas. They should change the situation in which the party does not take care of its own work and party work is not separated from government work, a situation which has formed for years. They should free themselves from the situation in which they take on all administrative work in order to effectively educate and supervise party members. The party leads the cause of socialist modernization and our country's work in all fields. In addition to formulating correct lines, principles and policies, the party exercises its leadership by educating all its members to set an example with their own conduct and by playing a leading and exemplary role as vanguard fighters of the working class. Only by doing ideological and political work well within the party first will party organizations at all levels be able, through party members' actual deeds, to draw and unite the broad masses of people to fight together for the victory of the communist cause.

Large numbers of party members are good or basically good. Hostile and degenerate elements who have sneaked into the party are a tiny minority. In addition, some comrades have some shortcomings or mistakes in varying degrees, and some of them do not even understand what a qualified Communist Party member is. An important reason for this situation is that for years the party leadership has relaxed its efforts to educate party members. As long as party organizations at all levels effectively step up the education of party members and our party members and cadres are strict with themselves, we believe that large numbers of party members certainly will gradually raise their Communist and political consciousness and strengthen their sense of political responsibility. Then, the advanced elements will become more advanced, party members in the "intermediate state" will try hard to catch up and those unqualified or basically unqualified will also make some progress. By conducting extensive education in the new party constitution our party will have a stronger fighting capacity and become an increasingly strong leading core for the cause of socialist modernization, and we will be able to win greater victories in the cause of socialist modernization.

STRENGTHENING PARTY MEMBERS EDUCATION STRESSED

OW291123 Beijing Domestic Service in Mandarin 1200 GMT 28 Nov 82

[Station commentary: "Strengthening Party Members Education Is the Central Link in Party Building"]

[Text] In order to reach the magnificent goal proposed by the 12th CPC Congress and fulfill the party's general task in the present stage, we must strive hard to build the party into a staunch leadership core for the cause of socialist modernization. Strengthening political-ideological education among party members is the central lin in party building.

Our party is the vanguard of the working class. It is a staunch contingent which has been educated with Marxism-Leninism-Mao Zedong Thought on a long-term basis and brought up amid tests of repeated success and failure. Though suffering serious damage in the 10 chaotic years, the main current of our party is still pure and strong. Particularly since the party's recuperation and reorganization in the past few years, the situation of our party has greatly improved, while our party's prestige has been restored and is rising.

However, we must be sober-mindedly aware that within the party there do exist questions of impurities in ideology, style and organization. In order to solve these questions, the party Central Committee has decided to consolidate the party by stages and at different times within 3 years from the latter half of next year. To do this work well, it is necessary to deepen education among party members seriously and in a widespread way with the new party constitution as the principal guideline. This is important ideological preparation for consolidating the party well.

To strengthen party members' education, it is necessary to use communist ideology as the core so that each party member will strengthen his belief in communism. It is particularly important for each party member to study well the provisions in the new party constitution on party members, requirements and duties, so that he will wholeheartedly serve the people, dedicate his whole life to the realization of communism and be ready to make any personal sacrifices.

In strengthening party members education, we must pay attention to results and methods and let party members understand clearly at what the education is aimed. It is necessary to persist in integrating theory with practice and conduct criticism and self-criticism. It is necessary not only to prevent the "left" approach of exaggerated and indiscriminate criticism, but also to oppose the liberal attitude of keeping on good terms with everyone at the expense of principle and living in peace with each other. Only in this way can we clearly distinguish between the correct and the erroneous, strengthen unity among comrades and reach the goal of heightening awareness.

To conduct party members education well, it is necessary to first grasp leading cadres' study. It is necessary to overcome the erroneous viewpoint that party members education is only for party members at large and that leading cadres can be exempted. Those who educate others must themselves first be educated. Only by taking the lead in studying the new party constitution, implementing it and setting an example can leading cadres win the party members trust and effectively exercise leadership over the educating of party members. Party organizations at all levels must include party members education work in important agendas of party committees, seriously solve the question of division of work between the party and the government and truly change the situation in which party members education has been long ignored and nobody is paying attention to the party's work. This is the key to conducting party members education well.

HU QIAOMU ON TREATMENT OF LATE SCIENTISTS

HK300900 Beijing RENMIN RIBAO in Chinese 29 Nov 82 p 2

[Article by Hu Qiaomu [5170 0829 2606]: "My Wishes After a Period of Painful Mourning" -- on late scientists Jiang Zhuying, Luo Jianfu]

[Text] For over a month now, practically every day GUANGMING RIBAO has published the deeds of Jiang Zhuying and articles written in memory of him. Jiang Zhuying was a model party member and an associate research fellow of the Changchun Precision Machinery Research Institute in Julin. GONGREN RIBAO has nearly every day published the deeds of Luo Jianfu and articles written in memory of him.

Luo Jianfu was a model party member and engineer of the Lishan Microelectronics Corporation. Of these two comrades, one passed away on 15 June in Chengdu at the age of 43, the other passed away on 16 June in Xian at the age of 47. Comrades Fang Yi [2455 3015] and Ni Zhifu [0242 1807 4395] and other comrades and several important party organizations have written articles or made resolutions to call on the masses to learn from the two deceased comrades. In fact, the deeds of these two comrades are similar to those of the two model party members Zhao Chune and Zhang Hua who died before and after them. All of their deeds are extremely moving. I think most readers must shed tears when they read articles written in memory of them. There are so many noble, holy and pure members in our party and so many faithful, firm and persevering people in our country. Their great quality is almost unbelievable! This is the honor and pride of our party and people, and the guarantee for them to implement the magnificent goal proposed by the 12th CPC National Congress. Meanwhile, we feel sad at the loss of these people; they only reached middle age and they had made many important contributions to the country. How hard we should work to make up for the loss caused by their unfortunate premature death!

At present, it is not necessary for me to tell of their deeds and quality once again; I cannot bear to do so. There are detailed reports; readers should look for them in GUANGMING RIBAO and GONGREN RIBAO (chiefly GUANGMING RIBAO's "The Glorious Model Who Sacrificed His Life for the Rise of China" on 10 October and GONGREN RIBAO's "Luo Jianfu" on 5 November). After a period of painful mourning, I simply want to express my wishes.

First, I certainly wish we (not only the intellectuals, but all party members, CYL members and young people and laborers with high political consciousness) will learn from them. In particular, I wish those who still cannot trust intellectuals and who dare not have confidence in them and those who blindly scramble for wealth and fame, who have no confidence in their socialist motherland and who envy the capitalist "paradise" will read more about their deeds. Much of what they have done cannot be easily achieved by ordinary people. They were experts in the sciences. They were our major hopes in developing science and revitalizing the economy in our country. The specialized knowledge they mastered through continuous hard efforts reached world levels. It is not so easy for us to master it. However, they had firm and unshakable loyalty to their communist motherland and the communist faith (their loyalty did not change whether they were under favorable or adverse circumstances); they thought wholeheartedly about the interests of the people, they were always the first to bear hardships and the last to enjoy comfort, and never considered personal gains; whenever their motherland or the people had problems of science and technology, they bravely and tenaciously studied them regardless of whether or not they fell within the sphere of their job or whether or not they had studied the problems before. They never tired. When they worked, they forgot hunger, thirst and illness; such noble qualities are what every Communist and every patriot (we should not forget that although Comrade Jiang Zhuying filled the membership application form before his death, he was admitted only posthumously as a member of the party by the Jilin CPC Provincial Committee) can and should learn. Even if we learn only half of what they had achieved, what we have learned can be combined to form a formidable force which can overcome all the obstacles and obstructions in our way.

Second, I hope every party organization, every party member and every upright citizen of the organs in which there are advanced persons will be able to be more concerned with these advanced persons. In fact, other than the period which made all of us suffer, we should not blame the Changchun Precision Machinery Research Institute and the Lishan Microelectronics Corporation for not looking after Jiang Zhuying and Luo Jianfu.

However, we should draw a lesson from bitter experience. We should think of the shortcomings in this aspect. Why did we not pay attention to their illness at an earlier stage and save their lives before it was too late? Why could we not adopt more strict "compulsory measures" and let them have better working and living conditions and the necessary rest? People, party members, you do not have the right to be indifferent to the people and things around you. Let us talk about Jiang Zhuying. He had already gone through such a prolonged test. Why was it necessary for the provincial committee to wait until after his death to fulfill his wish to become a party member? Of course, I do not know about the details of the relations between the two party organizations and the two comrades, but precisely because I have not had the opportunity to read the relevant explanations by these two party organizations, I cannot help raising the question. My hopes are not directed only toward these two party organizations and the middle-aged intellectuals, but toward all party organizations and patriotic citizens. In no matter which position, there exist advanced and lovely people. Let us try our best not to wait until they die to learn from them, expressing our regret that we have not cared for them only after their death!

Third, I want to say something to the living Jiang Zhuying's and Luo Jianfu's. Communist Party members fear neither hardship nor death. They are always ready to sacrifice all they have for the interests of the communist cause, the socialist motherland and the 1 billion people. We are not the people who hold that a university student "should not bother" to sacrifice his life for a peasant. Such people, under some other circumstances, certainly would neither risk their lives to save a primary school student nor fight with evildoers who commit armed crime. This is one aspect of the issue. But there is another aspect. I consider it possible that Comrades Jiang Zhuying and Luo Jianfu could have survived (I know nothing about medical science; I do not know whether the "malignant lymphadenoma" which Comrade Luo Jianfu suffered from and the many dangerous diseases which Comrade Jiang Zhuying suffered from could be cured at an early stage or not, I just assume they could). If they were still alive and in good shape, even if the newspapers did not credit them with a lot of space, there is no doubt that they would be able to contribute more to the motherland and the people. We always promote the practice of self-sacrifice, but we do not mean that the life and health of a Communist Party member or an advanced person is not important. Life and health is our asset in defeating all enemies and building the great socialist motherland. It does not belong to ourselves but to the motherland and the people. The health and life of a party member belongs to the party. We object to actions which seek private gain at public expense and cravenly cling to life instead of braving death under the pretext of protecting one's life and health. However, when we are afflicted with diseases, in particular serious diseases, we must receive treatment and be cured. The situation is similar to a battle. In a battle, we must not fear death but we must strive to lower the death rate. The wounded should be cured and strive to return to the front if circumstances permit. Communists are not ascetic monks; the purpose of our self-sacrifice is not to die but to live and to bring happiness to the people (including ourselves, of course), not misery to ourselves (still less to other people). Apart from death which cannot be avoided, we should live and struggle with the spirit of self-sacrifice. In this way, we can lead the people to implement successfully the lofty communist goal.

Finally, I have one more wish related to the press circles. GONGREN RIBAO has used a great deal of space to introduce Luo Jianfu, an engineer of the department of space industry. This shows that GONGREN RIBAO is loyal to the policies of the Central Committee in that it sees both the intellectuals and the workers as equally reliable forces in building socialism. Both GONGREN RIBAO and GUANGMING RIBAO have played their own roles. This is a very good thing.

However, as far as I can see, other than the article "Jilin Provincial Committee Resolves To Develop the Activity of Learning From Jiang Zhuying" published in RENMIN RIBAO, 16 November, p 4, the article "Many Readers Send Letters to GONGREN RIBAO To Express Wish To Learn Luo Jianfu's Communist Spirit of Sacrifice" broadcast by the XINHUA NEWS AGENCY, a report published in JIEFANGJUN BAO on learning from Luo Jiangfu and the large space devoted to reporting the relevant information by the newspapers of both Jilin and Shaanxi, other newspapers have paid little attention to these two model persons who are of national importance. People cannot help feeling sorry that they are so "specialized" in division of labor. GUANGMING RIBAO and GONGREN RIBAO have a large readership, but the scope is still limited. Thus, there are many people in the country who still do not understand the great achievements, virtues and arduous struggles of Jiang Zhuying and Luo Jianfu, the two model party members. I hope that our newspapers, news agencies, broadcasting and television stations will only attend to their own business, and will let the masses of readers, listeners and audience know as many facts as possible. In this way, they can get the education they need.

LAYOUT OF FIRST NUCLEAR POWERPLANT BEGINS

OW270435 Beijing XINHUA in English 0705 GMT 22 Nov 82

[Text] Hangzhou, November 22 (XINHUA) -- A 40-member study team will begin layout of roads, water and power supply facilities and the foundation of China's first nuclear power plant at the end of November, according to Zhejiang provincial authorities.

Groundbreaking will start early next year.

The site is on the northern shore of the Hangzhou Bay, 92 kilometers northeast of that city, and 126 kilometers southwest of Shanghai. The pressurized water reactor will be built on the 22-meter deep bedrock of Qinshan Mountain.

The site was chosen from among 16 places in Jiaxing, Wenzhou and Taizhou Prefectures. An eight-meter-high, 1,700-meter-long protective sea dyke will be built along the coast.

The plant will be divided into six sections: the central, waste treatment, water supply, frontal, repair and power supply and storage. The area for construction will cover 85,000 square meters.

The whole project will take seven years, according to engineers, and the Ministry of the Nuclear Industry and the Zhejiang Provincial Government will form a joint command headquarters to oversee the project.

CHINA POST ON PLOT TO FOMENT CIVIL DISORDER

OW261121 Taipei CHINA POST in English 21 Nov 82 p 2

[Editorial: "Beware of the Plot"]

[Text] In recent months malcontents here have been taking actions that point to a despicable plot to foment civil disorder for the purpose of changing the state of government and the structure of the nation.

In September a meeting was held by some nonpartisan politicians in the Taipei city hall. They made a six-point announcement at the meeting advocating the lifting of martial law, an end to the ban on the organization of new political parties and a reorganization of the parliament, among other things.

There is a questionable motive behind the announcement of these views. The ideas the nonpartisans put forward can do great harm to the country and society as they are contrary to the interests of the people on Taiwan, China's last stronghold of anti-communism. They signal a plot to make this island bastion of national recovery an independent country.

It must be realized that this island bastion is in a potentially dangerous situation, facing a constant threat from communist incursions. The Chinese communists have written into their "constitution" their plan to seize Taiwan, a plan they will never give up. This is because the Government of the Republic of China [ROC] on Taiwan is believed to be the most formidable threat to the survival of the communist rulers on the mainland. The appeal of the comfortable life on Taiwan for the mainland Chinese is causing them to recognize that communism does not work for the Chinese.

This is exactly the reason why the ROC must continue to exist. It does not exist only for the 18 million people now living on this island; it exists for the purpose of freeing all of China from communism and making it a land of affluence and opportunity for all Chinese.

We would be doing a great wrong to the Chinese on the mainland and those overseas if we should ever sever our relations with the mainland, completely putting behind us the fate of the billion mainland Chinese.

Also, any attempt to make Taiwan an independent country would place this island in immediate jeopardy. The communists would soon make an incursion, knowing that the mainland people would hate to see the island's secession. Furthermore, none of the our allies would be able to intervene, for the communists would claim they were trying to "suppress a rebellion."

In the last three decades the ROC Government has been making an earnest and vigorous effort to develop the island into a model province under the guide of Dr Sun Yat-sen's three principles of the people. The result of that effort, as everyone can see, is high living standards for all of the 18 million people and a fair share of freedom and democracy.

Without the leadership of the ROC Government, Taiwan would have been occupied by the communists in the 1960's and the people here would have been deprived of their freedom, human dignity and comfortable life.

The communists are well aware they are at present unable to take Taiwan by sheer military force. The strong armed forces of the ROC and the high morale and solidarity of people on Taiwan would make a communist invasion a suicide. Therefore, they are resorting to their old strategy of "attacking from within" to pave the way for an attack from without. This is why they are seeking to disintegrate this island bastion by colluding with malcontents from Taiwan is sowing discord among people on the island.

The truth of this is evidenced by the visits made to the mainland by some of these malcontents. They have openly declared their intention to practice Marxism-Leninism on Taiwan.

Marxism-Leninism is an aberration that does not suit mankind in general nor the Chinese nation in particular. Its failure began some time ago and its final collapse is inevitable. The ROC on Taiwan, with its tremendous success, is a strong force pushing the mainland away from communism toward freedom and democracy.

That is why we must do everything in our power to preserve the security and integrity of this island bastion. We must not allow anyone or any group to disrupt and destroy the good order that is essential to the ROC's existence.

MONTHLY NOTES TAIWAN'S HUMAN RIGHTS PROBLEMS

OW292349 Taipei PA SHIH NIEN TAI in Chinese Nov 82 p 1

[Editorial: "Message Revealed by Mainland People's Flocking to Freedom"]

[Excerpts] In the past couple of years, people from the Chinese mainland across the Taiwan Strait have been flocking to the Free World in a constant flow, leaving their families behind and even risking their lives. What has made these people of different professions, different family backgrounds and different ages turn their backs on the Chinese mainland, where they grew up, and choose the road of exile to plunge themselves into a completely strange environment?

In a nutshell, this phenomenon is a reflection of the failure of the Chinese communists' rule over the Chinese mainland in the past 30 years. It is true that the problems of the Chinese mainland today should be attributed in part to the impoverishment resulting from a century-long state of national weakness. But a more important factor is the disastrous damage caused by the totalitarian rule of the communist system. In other words, it is nothing more than a demand for basic human rights, which has motivated these people to seek freedom.

People on the mainland yearn for Taiwan because they can find the same kind of society of Han nationality here and they do not need to worry about living under somebody else's roof. But more importantly, it is because they have been convinced by the development respectively of the mainland and of Taiwan under different political, economical and social systems in the past 30 and more years that Taiwan can provide a happy life and restore the dignity of human nature to them. This shows that if the Kuomintang wants to make Taiwan a free and cherished island, where people on the mainland pin their hopes, all it has to do is to ensure a life style of freedom and happiness. The only way for it to achieve this end is to make real, earnest efforts to materialize the ideals of the three principles of the people.

In the past 30 years, in spite of the fact that we have been enjoying a higher level of material life than our mainland compatriots, we have not attained a corresponding level of human rights. According to the indexes of political freedoms in 133 countries compiled by the IMF magazine in 1978, the Republic of China rated in the 8th class, with 42 points, and ranked 50th. The recent human rights reports released by the U.S. State Department, Amnesty International and the World Human Rights Association, all contained considerable criticisms against the current human rights situation in Taiwan.

This shows that, although we have earned many more points than the Chinese communists in human rights, we still fall far behind many countries of the world. Human rights represent a criterion to gauge the degree of democracy and freedom, as well as a goal for a constitutional government. The fact that we have made such a shameful showing in human rights definitely calls for a serious self-examination on the part of our government and people.

Democracy is valuable because it provides the pipeline for government participation by the whole people, and insures the functioning of this pipeline on the basis of reasonable stability as well. Moreover, it makes it possible for us to establish the authority of the rule of law and water down the role of rule by persons exercizing absolute control. The more than 30 years of Chinese communists' rule on the mainland have proved that they are running in the opposite direction in this respect. However, although we have never experienced the kind of political chaos like the Cultural Revolution that occurred on the mainland, we cannot say that there is no problem whatsoever in our political stability. Martial law, bans against new parties, restrictions on newspapers, refusal to open the door to general elections of the provincial governor and city mayors, the unreasonable provisions in the law of election and recall of government officials, military control of the press and publication, and so on -- all this is an indication of restrictions in the pipeline to participation in government and the lack of a reasonable and stable basis. It makes us still more apprehensive when we take a look at such problems as the power structure of the Kuomintang, the personnel changes at the leadership level, the way in which political successors are to come forward and the continued survivability of the parliamentary bodies' legally constituted authorities. We have no idea what those mainlanders feel when they find that, after going through many hardships and reaching Taiwan in their quest for democracy and freedom, Taiwan has yet to establish a really stable political system that can guarantee the government a long and stable rule.

The current wave of freedom-seekers from the mainland has caused a great deal of embarrassment to the Chinese communist regime. On the other hand, the Kuomintang, which has been locked in a protracted struggle with the Chinese communists, has gained a momentary upper hand in propaganda and some encouragement as well. In our view, however, the Kuomintang must guard against becoming conceited just because it has had a winning streak. It should not allow conservatism to become swollen with arrogance and it should never suppress the movement for democratic reform. On the contrary, it should cherish the national resources accumulated through more than 30 years of social development, make progress in practicing democratic constitutional rule and establish a stable and reasonable political system.

PREMIER SUN DISCUSSES SHRINKING EXPORTS

OW260345 Taipei CNA in English 0231 GMT 26 Nov 82

[Text] Taipei, Nov. 25 (CNA) -- Premier Sun Yun-hsuan Thursday instructed related government agencies to take concrete measures to cope with the nation's decreasing exports.

The Economics Ministry, the Board of Foreign Trade, and the Industrial Development Bureau, Premier Sun exhorted, should step up their efforts to find out the real reasons for the decline in exports. They should further provide necessary assistance to help traders and industrial interests make a breakthrough, he said.

Premier Sun gave the directives after hearing a report from K.H. Yu, chairman of the Council for Economic Planning and Development [CEPD], on the nation's economic situation and the new measures to relieve the demands of local enterprises for capital during the yearend and the lunar new year spring festival period.

The government has taken a series of financial and banking measures to help traders resolve problems in the wake of prolonged economic recession, but the nation's exports still show signs of shrinking, he said.

Government units should analyze the situation and compare with other countries to explore the actual causes other than economic recession, and take measures to overcome them, he urged.

He asked the CEPD to put its measures into practice soon so as to bring some benefits to trade and industry.

Free Trade Zone Viewed

OW260351 Taipei CNA in English 0311 GMT 26 Nov 82

[Text] Taipei, Nov. 26 (CNA) -- Premier Sun Yun-hsuan said Thursday the long-term aim of the government is to gradually transform the whole Taiwan area into a free trade zone so as to maintain this nation's continuing economic development.

Speaking at the weekly Executive Yuan meeting, Premier Sun said although the current project of setting up a free trade zone will start from a small area, eventually this area will be expanded into a big zone in order to meet the needs of the nation.

During the meeting, the premier also instructed the related trade organs to carry out market research on Europe, Latin America, and the Middle East in order to further increase this nation's trade with those areas.

Work for Unity Urged

OW300339 Taipei CNA in English 0237 GMT 30 Nov 82

[Text] Taipei, Nov. 29 (CNA) -- Premier Sun Yun-hsuan Monday called on the overseas Chinese to solidify unity and assist the government in promoting constitutional democracy and overcoming difficulties in order to accomplish the task of mainland recovery under the three principles of the people.

Premier Sun made the remarks in a reception held at the Executive Yuan building in honor of members of the Overseas Chinese Affairs Commission.

The government will continue to maintain domestic stability and economic prosperity internally, while at the same time it will make efforts to crush the Peiping regime's United Front tricks and safeguard the nation's status in the international community, Premier Sun said.

He stressed the government will further strengthen trade, cultural, economic and technological cooperation with the U.S., saying that overseas Chinese have also to promote the people-to-people relations with the American people.

"We will also expand our ties of friendship with the free nations in Europe, Latin America, Southeast Asia, and the Middle East," he added.

On national defense, the premier said, the government will spare no effort in establishing its own defense industry and diversifying the sources of weapons supply from foreign nations.

The government is placing special emphasis on the development of missiles and jet fighters, and new breakthroughs on the weaponry system may be achieved in the next few years, Premier Sun pointed out.

He asserted that the government welcomes the overseas Chinese to make investments here, and will open the stock market to foreign capital, transform the nation's economic structure to the technology-intensive level, and set up a free trade and financial zone in the country.

He urge the overseas Chinese to keep vigilant against the Chinese communist infiltration and subversion in the communities of their residence.

PRESIDENT CHIANG ADDRESSES KMT WEEKLY MEETING

OW242329 Taipei CNA in English 1446 GMT 24 Nov 82

[Text] Taipei, Nov. 24 (CNA) -- In his capacity as chairman of the Kuomintang, President Chiang Ching-kuo Wednesday called on the KMT members to emulate the spirit of martyrs by implementing the instructions of Dr Sun Yat-sen and the late President Chiang Kai-shek on the national mission of revolutionary democracy.

Presiding over the weekly KMT Central Standing Committee meeting which coincided with the 88th anniversary of the KMT on Nov. 24, President Chiang delivered a speech on "Tsungli's founding of the Kuomintang and national revolution during the past 88 years."

He said that since Dr Yat-sen launched the national revolution, modern China's history had been written by the revolutionary martyrs with their blood and dedication.

The first Sino-Japanese war in 1894 served as a cataclysm for Dr Sun to establish the first revolutionary party -- Hsiang Chung Hui in Honolulu, what is the forerunner of the KMT -- 88 years ago, declaring his aims to rescue the people from sufferings and the nation from collapse, the president said.

During the last 88 years, the destiny of KMT cannot be separated from the fate of the Republic of China because the KMT had accomplished the task of northern expedition, unified China, led the war of resistance against Japanese aggressors, and restored Taiwan and Penghu back to the folds of motherland. Furthermore, the KMT has continuously opposed the evil communism, launched campaigns to expel communists from its organization, and strived for the national freedom and democracy with full strength from the earliest stage, the president added.

He stressed that the reason for the KMT to struggle with reinvigorated strength is due to the following four revolutionary principles inherited from Tsungli and Tsungtsai:

-- The principle of unselfishness: Every party member has dedicated himself to the three principles of the people instead of to his personal gains.

-- The principle of sincerity and purity: Every party member has used trustfulness and righteousness as his personal guidance in eliminating hypocrisy and treachery.

-- The principle of sacrifice and dedication: Every party member has devoted himself to the services of revolution for the happiness of other people.

-- The principle of continuing reforms: After completing every revolutionary task, the KMT has continued to implement reforms by recruiting new and talented party members so as to carry out other historic missions in the future.

The president expressed his firm belief that humankind will never tolerate the terror, slavery and power struggles of communism and its oppressive regime for long. For example, many young people who were born and bred on the China mainland have decided to seek freedom in the West, giving the Chinese communist regime a strong impact and shock.

President Chiang then pointed out that the glorious achievements made under the three principles of the people in Taiwan have crushed the United Front tricks launched by the Peiping regime.

The common aspiration of the Chinese people on the two sides of the Taiwan straits today is to reunify China under the banner of the three principles of the people, he asserted.

The president quoted [words indistinct] the late President Chiang as saying that winning over the hearts of the people and promoting psychological reconstruction are the most important tasks in the course of national revolution.

Although the nation is still facing many difficulties, the president said, the KMT members should not become despondent but should insist on the revolutionary spirit and principles by winning over the hearts of the people and implementing the policy of benevolence in order to glorify the national mission of revolutionary democracy as instructed by Dr Sun and the late President Chiang.

Chiang's Health 'Excellent'

OW200333 Taipei CNA in English 0241 GMT 20 Nov 82

[Text] Taipei, Nov 19 (CNA) -- President Chiang Ching-kuo's health is excellent. The finding was stated in a report on his routine physical checkup at the Veteran's General Hospital Nov. 17-18, the Government Information Office [GIO] announced in a formal news release Friday. The checkup was jointly conducted by Dr Chiang Pi-neng, chief of the General Medicine Department, and other leading doctors of other departments. The examination employed techniques in radiography, electronics and hypersonic analysis of his lungs, nervous system and brain, the upper parts of his stomach and intestines, and the functions of his liver, kidneys and heart. Results showed they are all functioning normally, the GIO quoted the hospital report as saying. Weighing 66 kilograms, President Chiang showed satisfactory blood pressure readings and urine sugar level, the report said. President Chiang underwent an operation on his left eye last February. Now he has totally recovered. The neuritis of the nervous system in his feet, caused by a long period of diabetes, has responded remarkably well after effective treatment. All the doctors who took responsibility for the checkup expressed their satisfaction over the results.

GOVERNMENT RESTATES CLAIM TO SPRATLYS, PARACELS

OW261443 Taipei CNA in English 1429 GMT 26 Nov 82

[Text] Taipei, Nov. 26 (CNA) -- The Government of the Republic of China Friday reiterated its sovereignty on the Nansha Chuntao (Spratly Islands) and Hsisha Chuntao (Paracel Islands), two groups of islets in the South China Sea.

Liu Ta-jen, spokesman for the Foreign Ministry, said at a news conference that the islets are the territory of the Republic of China. It is an undeniable fact judged in view of historical records, treaties and international law, he added.

(?He made the statement) while answering an query from reporters about the recent wire service news reports that Vietnam has announced that its sea [words indistinct] the two groups of islets.

The Chinese Government has repeatedly reaffirmed its stand on the islets, he said. The stand will not be changed by whatever claims other parties make, he said.

UN VOTE SEEKS USSR TROOP WITHDRAWAL FROM DRA

PRC Envoy Supports Resolution

OW291143 Beijing XINHUA Domestic Service in Chinese 1637 GMT 25 Nov 82

[Excerpts] United Nations, 24 Nov (XINHUA) -- The UN General Assembly began discussing the Afghan issue today. Speaking at the meeting, delegates from China and other Third World countries urged the UN General Assembly to continue to press for the withdrawal of Soviet troops from Afghanistan so as to reach an equitable and reasonable settlement of the Afghan issue.

Pakistan and 44 other countries put forward a draft resolution at the meeting, demanding the immediate withdrawal of foreign troops from Afghanistan and calling for efforts by all countries toward an early political settlement of the Afghan issue.

Addressing the meeting, Chinese permanent representative Ling Qing said: "The Soviet Union has all along disregarded the strong wish of the international society and thus far has refused to withdraw its occupation troops from Afghanistan in compliance with the UN resolution. It has spared no efforts to take advantage of the new tense situation in other parts of the world to divert people's attention in a vain attempt to cool the Afghan issue and to have the international society gradually accept the outcome of foreign invasion of Afghanistan."

Ling Qing said: Over the past year the Soviet Union has, on the one hand, refused to comply with the UN resolution and withdraw its troops from Afghanistan. On the other hand, it has expressed willingness to solve the Afghan problem politically and described the "proposal" which the Karmal regime made on 24 August 1981 as something that provides a "sound basis" and an "opportunity" for a political solution of the Afghan problem. However, the key point of this "proposal" is that the Afghan situation caused by foreign invasion is a question of "Afghanistan's internal affairs" which should not be discussed; that troop withdrawal can be decided upon only through consultations between the Soviet Union and the Karmal regime; and that other countries should "provide an international guarantee" before they decide upon such troop withdrawal. In reality, this proposal still wants to base the political solution on the fait accompli created by foreign invasion and is designed to legitimize that invasion. This attitude of the Soviet Union, of course, can in no way indicate that it is genuinely sincere in solving the problem.

Ling Qing voiced support for the draft resolution put forward by Pakistan and other countries. He said: "China is a neighbor of Afghanistan.... It is China's hope that an early and equitable settlement of the Afghan crisis can be achieved so that an end could be put to the suffering of the Afghan people and peace and stability restored to Southwest Asia. The prerequisite for any political settlement must be the withdrawal of foreign troops." He continued: "There does exist a basis and an opportunity for a political settlement of the Afghan issue, and it is to be provided by strict implementation of the correct principles contained in the relevant resolutions of the UN General Assembly as well as the summit meeting of the Islamic countries and the nonaligned foreign ministers' meeting -- namely, the immediate and unconditional withdrawal of all foreign troops from Afghanistan, which will enable the Afghan people to exercise their right to self-determination without external interference, and the restoration of Afghanistan's independence and nonaligned character."

As pointed out at the meeting by Pakistani, Nepalese, Egyptian, Tunisian and Costa Rican delegates, the Soviet military occupation of Afghanistan has neither a legitimate nor a moral basis.

To ensure that the Afghan people will be masters of their own fate and handle their own affairs freely on the basis of their national aspirations and principles, the Soviet troops must be withdrawn totally and unconditionally from the Afghan land, and all political solutions must be based on upholding Afghanistan's state sovereignty and territorial integrity as a premise.

Delegates from Western countries -- such as Denmark, the United States, Britain, Japan and Australia -- also attacked the Soviet Union for "intending to pursue its goals by using its mighty military potentials." They demanded that the Soviet Union immediately stop its military interference and withdraw its troops from Afghanistan.

In his speech at the meeting, the Soviet delegate showed no willingness to withdraw the troops from Afghanistan immediately and unconditionally but expressed the intention to seek a solution based on the fait accompli resulting from the Soviet invasion of that country.

U.S., UK Demand Withdrawal

OW250810 Beijing XINHUA in English 0743 GMT 25 Nov 82

[Text] United Nations, November 24 (XINHUA) -- Several Western nations joined in demanding the immediate withdrawal of Soviet troops from Afghanistan to pave the way for a political solution to the Afghan question, when the U.N. General Assembly began its debate on the situation in Afghanistan today.

Danish representative Wilhelm Ulrichsen, on behalf of the ten member states of the European Community, said: "The large-scale Soviet military intervention in Afghanistan and its three years of continuing occupation are a clear testimony of the willingness of the Soviet Union to pursue its aims by using its massive military potential."

He called for a political solution enabling Afghanistan to return to its traditional independent and non-aligned status free from external interference, and with the Afghan people having full capacity to exercise their right to self-determination. "This requires above all the immediate withdrawal of foreign troops from Afghanistan," he stressed.

U.S. representative Jeane J. Kirkpatrick said that the aggression committed by the Soviet Union in Afghanistan and its proxies elsewhere had and continued to have a great impact on the climate and course of East-West relations.

She condemned the Soviet Union for its effort to subjugate the Afghan people and impose upon them a form of alien and totalitarian rule. She said that far from respecting the call of the General Assembly to withdraw its forces, the Soviets, over the past year, had augmented their forces in Afghanistan to approximately 105,000.

British representative John Thomson said that it is difficult to imagine a more cynical intrusion by a great power into the internal affairs of a small nation than the Soviet invasion. He called for the immediate withdrawal of all Soviet troops, the restoration of Afghanistan's former independence and non-aligned status, self-determination for the people and the creation of conditions in which the refugees could return in peace and honour.

French representative Pierre Joxe said that France considered unacceptable the Soviet Union's intervention and occupation and had stated that its relations with that country had been affected as a result of their intervention. Whatever arguments were used to justify the occupation, world opinion condemned it as a violation of a nation's sovereignty and territorial integrity, he added.

Masahiro Nishibori of Japan insisted that the Soviet intervention in Afghanistan "should be terminated at once and that the Soviet troops withdraw immediately." He said: "The problem must be resolved in accordance with the principles of non-interference and respect for the right of self-determination of the Afghan people."

He supported the present draft resolution on the Afghan question, saying that "It reflects the will of the international community and confirms the basic principles for the settlement of the problem."

R.A. Woolcott of Australia emphasized that "The starting point to any serious negotiations must be recognition that withdrawal of foreign forces is the central objective." If the new Soviet leadership "is prepared to settle for a neutral and non-aligned Afghanistan, subservient to no great power, more normal relations will be possible," he said.

But, if on the other hand,the new leadership "continues to insist on an Afghanistan under its domination and run by a regime which most of the Afghan people manifestly do not want, the prospect can only be one of continuing travail both in Afghanistan and for international relationships at large," he said.

The Soviet Union showed no sign of willingness to withdraw its forces from Afghanistan immediately and unconditionally. Soviet representative Oleg Troyanovskiy claimed that a solution could be found in the proposals put forward by the Soviet-installed Kabul regime. He unreasonably demanded what he called "an end must be put to armed interference from outside Afghanistan, and there must be no interference in the internal affairs of that state." In other words, such a solution is based on the fait accompli created by the Soviet invasion.

More Envoys Decry USSR Actions

OW270220 Beijing XINHUA in English 0157 GMT 27 Nov 82

[Text] United Nations, November 26 (XINHUA) -- More nations demanded that the Soviet Union withdraw its forces from Afghanistan and respect the rights of the Afghan people to self-determination, as the U.N. General Assembly continued to debate on the Afghan question today.

Saudi representative Gaafar M. Allagany said that the aggressor in Afghanistan was one of the superpowers, a country with special responsibilities for preserving peace and preventing aggression. He urged the Soivet Union to withdraw its troops from Afghanistan and to permit the people of Afghanistan to decide their own future, either through a plebiscite, or through elections conducted under United Nations supervision.

Thai representative Birabhongse Kasemsri said that a militarily stronger country had invaded its weak neighbor. Such a trend could not continue. The presence of Soviet troops in Afghanistan posed a serious threat to world peace.

Thiounn Prasith, representative of Democratic Kampuchea, said that as the Kampuchean people had fought against Vietnamese-Soviet expansion, the Afghan people had struggled against Soviet expansionism. Neither increased equipment nor increased Soviet troops would succeed in subjugating the Afghan people or prevent the differing patriotic forces from uniting for national liberation, he noted.

K.M. Safiullah of Bangladesh reaffirmed the obligation of all states to refrain in their international relations from the use or the threat of use of force against the sovereignty, territorial integrity and political independence of any state.

"We sincerely hope and believe that the momentum of the present diplomatic initiative will be maintained and all parties concerned will make sustained efforts with a view to finding a peaceful solution to the problem," he said. Hernand Duran Dussan, representative of Colombia, pointed out that United Nations resolutions had repeatedly called for Soviet troops withdrawal and for the Afghan people to be permitted to choose their own destiny. Yet the will of the United Nations was being disregarded. Colombia had always supported the principles contained in the draft resolution before the Assembly, of which his country was a sponsor, he declared. Representative of Yugoslavia Ignac Golob called for the withdrawal of foreign forces from Afghanistan, saying that encroachment on the freedom, sovereignty and territorial integrity of any independent state was unacceptable. He stated that Yugoslavia would vote in favor of the draft resolution because it contained elements necessary for the political settlement that would ensure that the Afghan people will be able to determine their own destiny free from outside interference. Bryce Harland of New Zealand charged that the Soviet occupation of Afghanistan had been a disaster. This Soviet action did more than anything else to halt the process of detente, he said.

RENMIN RIBAO Commentator

HK010826 Beijing RENMIN RIBAO in Chinese 1 Dec 82 p 6

[Commentator's Article: "Another Disastrous Defeat"]

[Text] After a heated debate, the 37th UN General Assembly adopted a resolution on the Afghan problem by an overwhelming majority of 114 votes on 29 November. It reiterated the principles affirmed in resolutions passed in previous sessions and demanded the immediate withdrawal of foreign troops from Afghanistan, thereby forcefully smashing the Soviet Union's various ploys to obstruct this resolution. This was yet another disastrous defeat for Soviet hegemonism in the forum of the United Nations.

This was the fourth similar UN resolution on the Afghan problem. However, the Soviet Union has stubbornly refused to implement the resolution because it does not want to withdraw its troops from that country. In the past year, the Soviet Union started a diplomatic "peace offensive" by advocating a "political solution" for the Afghan problem, but at the same time it strengthened its military buildup in that country and repeatedly encircled and suppressed the Afghan resistance forces. All the facts show that the Soviet Union has never given up its hegemonist ambition of long-term occupation of Afghanistan, from where it could thrust southward into the Persian Gulf and the Indian Ocean. The possibility still exists for a political solution to the Afghan problem. However, unless the Soviet Union withdraws all its troops from Afghanistan in accordance with the UN resolutions, the Afghan people cannot determine their own fate and restore the independence and nonaligned status of the country free from outside interference. Nobody will be deceived by the Soviet trick of supporting a "political solution" to cover its reluctance to withdraw its troops from Afghanistan.

The resistance forces of the Afghan people are increasingly growing strong. They are dealing a heavy blow to the Soviet aggressors. Afghanistan has become a heavy burden on the Soviet Union. All peace-loving and justice-upholding states and people in the world should continue to support the Afghan people's struggle against aggression and put strong pressure on the Soviet Union so that the UN resolutions on the Afghan problem will be implemented.

Afghanistan is one of China's close neighbors. Therefore, the Soviet invasion of that country and its massive military buildup on Afghan territory bordering China have posed a great threat to the security of China. In order to relieve the Afghan people from the distress and to restore peace, security and stability in Southwest Asia, the Chinese people, who firmly support the Afghan people's struggle against Soviet hegemonism, will work hard with peace-loving people all over the world to strive unswervingly for the implementation of all UN resolutions on Afghanistan.

U.S. SCORES USSR ON MISSILE DEPLOYMENT ISSUE

OW010909 Beijing XINHUA in English 0831 GMT 1 Dec 82

[Text] Washington, November 30 (XINHUA) -- The U.S. State Department today called the latest Soviet pronouncement on the deployment of new medium-range American nuclear missiles in Western Europe a "propaganda campaign" against the modernization of NATO forces.

The Soviet news agency NOVOSTI said in an article yesterday that the planned deployment of 464 cruise missiles and 108 Pershing by NATO from December 1983 created a new situation.

Soviet military circles, it said, now believed that detection of a nuclear missile approaching Soviet territory would "demand inevitably from the Soviet Union instantaneous action in reply."

The publication of the article coincided with a meeting in Brussels this week of NATO defense ministers who reaffirmed their decision to deploy new nuclear missiles in Western Europe as scheduled.

Responding to the NOVOSTI article, State Department spokesman Alan Romberg said that "The Soviet Union was waged one of the heaviest propaganda campaigns in years" against NATO's LRINF (Long Range Intermediate Nuclear Force) modernization.

"The Soviet objective is clear: To preserve their overwhelming monopoly of LRINF missiles while undermining Western will to redress this imbalance," Romberg said.

He urged the Soviet Union to demonstrate its concern about avoiding deployment of such missiles "at the negotiating table by accepting the U.S. offer to eliminate the entire class of LRINF missiles on both sides."

WEINBERGER DEFENDS DEPLOYMENT OF MX MISSILES

OW290821 Beijing XINHUA in English 0706 GMT 29 Nov 82

["U.S. Defense Secretary Defends Deployment of ICBM" -- XINHUA headline]

[Text] Washington November 28 (XINHUA) -- U.S. Defense Secretary Caspar Weinberger today tried to justify the Reagan administration's decision to proceed with the deployment of the new generation of intercontinental ballistic missile -- the "Peacekeeper" system. As a step for the survival of the U.S. and "for the survival of the Free World."

In an ABC TV interview today, the secretary was asked that in view of the huge budget deficit, if he thought now is the time to spend 26 billion dollars on this program. He stressed that "It is spent because we need it. It is spent because of the nature of the (Soviet) threat against us which is very large, very dangerous, and growing."

Weinberger also repeated President Reagan's theme that the program was designed as an "incentive" to promote "nuclear disarmament" agreements. "The Soviets have no incentive to stay at Geneva if we don't have a credible, in-being plan of maintaining an effective deterrent," he asserted.

President Reagan announced on Nov. 22 that he had chosen the "closely-spaced basing" plan for the new ICBM system, signaling going-ahead for the controversial program. The initial reaction from the U.S. Congress was reported "skeptical," while Representative Joseph P. Addabbo charged that the whole plan was "a waste of money." Senator Carl Levin held Reagan's decision "would make the world more insecure than it is today." Senator Henry Jackson predicted in a TV interview today that the program would face "deep trouble" in the Congress, which reconvenes tomorrow.

The "NEW YORK TIMES" reported on Nov. 24 that there were different opinions among those who opposed to the new ICBM program. One group believed that the new system represented a distortion of national priorities and that the money could be better spent on more pressing domestic and military needs; other critics argued that the system simply would not do the job it was supposed to do; and a third group held that the plan could abrogate existing arms control agreements with Moscow and lead to a new escalation of arms spending by both sides, the newspaper said.

Commentary on U.S. Deployment

OW 291147 Beijing in English to North America 0000 GMT 29 Nov 82

[Station Commentary]

[Text] U.S. President Ronald Reagan has proposed the deployment of MX nuclear missiles in the United States. This is a major step in America's nuclear arms race with the Soviet Union and is worth the world's attention. In the past few years, the Soviet Union has surpassed the United States in the number of intercontinental missiles, and the payload capacity and the quality of its missiles is also improving. To counter Soviet superiority, the United States has been discussing deployment of the MX missiles. However, disputes have been going on for years over how the missiles should be deployed.

Now the Pentagon has decided on the so-called dense pack plan. This calls for the siting of 100 MX missiles in the mountainous areas of Wyoming in the western United States. The missiles would be installed in a cluster of supersolid silos, each about 500 to 600 meters apart. It is said if a Soviet missile got a direct hit on the area, it would destroy only a small part of it and other missiles would not cause further damage because the heat and radiation resulting from the first one could make them explode in midair. Therefore, according to this logic, America would be able to retain the rest of its MX missiles and its ability to retaliate.

Reagan has now accepted the Pentagon's plan. He said if Congress approved it, the first 10 MX missiles would be deployed in 1986 and the rest by 1989. However, not everybody likes the plan. Some think it is ridiculous. They doubt the reliability of this dense pack deployment. They say the Pentagon officials have not considered all possible situations. The officials say only that with this dense pack deployment American land-based missiles will be safe for at least the next 10 years. Opponents also argue that the plan is too expensive. They say it will cost up to $14 billion. In a time of huge government deficits, the opponents say it would be more practical to install anti-missile systems in Minuteman missile bases. They say the MX missile system is too expensive and nobody is sure that it will work.

Apparently there is no way to test how the dense pack deployment would stand up to a nuclear attack. Supporters and opponents can only argue on a theoretical basis and neither can convince the other. Reagan's decision indicates only a tendency in the arms talks between the superpowers and their relationship. The Reagan administration's goal is to strengthen America's position in the nuclear arms race with the Soviet Union. Reagan believes that the Salt II agreement with the Soviet Union negotiated by the Carter administration has vital shortcomings, and therefore, he is against it being approved by Congress.

After more negotiations with the Soviet Union, he put forward a plan aimed at limiting the number of nuclear warheads and the payload capacity of missiles so as to reduce Soviet superiority. At the same time, he stepped up arms programs in the United States. The deployment of MX missiles is one major step in beefing up U.S. military strength.

In his television appearance, Reagan used pictures and charts to try to convince the U.S. that America is inferior to the Soviet Union in nuclear capability. On the one hand, he stressed that the deployment of MX missiles will help prevent war and stimulate disarmament talks. On the other, he said the Soviet Union has been sincere in disarmament talks and he hoped agreement will be reached in those discussions.

Some U.S. newspapers say that Reagan is making a gesture to the new Soviet leaders. At the same time, he is trying to tell the American people and Western European countries that he is willing to improve relations with Moscow, but not to the extent that would hamper U.S. efforts to beef up its military might. The papers say Reagan hopes the deployment of MX missiles would also iron out obstacles to the siting of medium-range missiles in Western Europe, and strengthen America's negotiating hand in disarmament talk.

XINHUA ON PROSPECTS FOR U.S. ECONOMIC RECOVERY

OW010357 Beijing XINHUA in English 1838 GMT 30 Nov 82

["Roundup: Prospects for U.S. Economic Recovery -- by Chen Hegao" -- XINHUA headline]

[Text] Beijing, November 30 (XINHUA) -- The U.S. is still in the grip of a lingering economic recession and there are few signs of a quick recovery.

President Ronald Reagan has taken a series of measures to boost the economy since the recession began in July 1981, but very little good has resulted. For now the economic picture remains gloomy.

Unemployment, which Reagan termed a "dark cloud" hanging over the lives of Americans, is the number one problem in the U.S. economy. Another 291,000 Americans lost their jobs in October as the unemployment rate climbed to a postwar record of 10.4 percent. Total unemployment rose to 11.55 million, up more than 3.7 million in little over a year. Commerce Department chief economist Robert Oetner said, "I think that the unemployment rate will very likely go even higher."

Economist Michael Evans predicted a jobless rate of 11 percent for most of next year because "Business is getting the message a boom is not on the horizon." Under the impact ofthe economic recession, bankruptcies this year doubled that of last year. By the end of November, total bankruptcies had amounted to 22,587, on an average of 491 failures each week. This compared with only 15,243 failures during the corresponding 1981 period.

The U.S. Federal Reserve Board reported on November 17 that U.S. factory use was at 68.4 percent of capacity in October, the lowest rate in at least 35 years. The survey indicated that the October factory use rate declined 0.8 percentage points from the September rate of 69.2 percent. It was the biggest decline since last April and the 13th decline in 15 months since the recession began.

Industrial production also declined at 0.8 percent in October, the sharpest since April and the 13th in the last 15 months. The decline was mainly caused by a big cut back in auto production. Automobiles in October dropped sharply to an annual rate of 4.7 million units from the 5.5 million units in August and September. The American Iron and Steel Institute estimated that the steel industry is operating at only 40 percent of capacity. Imports have captured about a quarter of the domestic steel market. Steel industry unemployment is close to 45 percent with some 200,000 steel workers laid off.

In the third quarter of this year, the top 1,000 U.S. process industries invested only 18.7 billion dollars -- the lowest such figure since the end of 1970, and [figure indistinct] percent less than in the second quarter of this year.

A study, by an employer research institute, predicted U.S. industrial investment will continue to fall and is not likely to recover noticeably before 1984.

The U.S. trade deficit widened to 5.3 billion dollars in October, virtually assuring record red ink for the full year, the government said on November 26. The October figure brought the deficit for the first 10 months of this year to 35.1 billion dollars, fast approaching last year's figure of 39.7 billion dollars and the record 1978 deficit of 42.3 billion.

The federal budget deficit in 1982 reached a record of 110.7 billion dollars, almost double that of 1981. The deficit for fiscal 1982, which ended on September 30, was 52.8 billion dollars higher than in 1981 U.S. Treasury Department said. A Treasury report estimated a fiscal 1983 deficit of 150 billion dollars. Economists are talking in even larger numbers, 180 billion dollars or more.

The president's chief economic adviser, Martin Feldstein, said on November 10 that the United States would experience an unprecedented series of budget deficits in years ahead unless dramatic actions were taken.

In an October [word indistinct], the [words indistinct] predicted that the economy would crawl ahead at a weak 0.8 percent annual rate of growth in the third quarter, but it reported on November 19 that the gross national product increased little during the period. A number of economists now expect that the gross national product in the fourth quarter will decline again, indicating that recovery may not start this year.

However, there are two positive factors in the troublesome economy. The inflation rate has come down within 12 months from 8.9 percent to 5 percent. in 1980 the rate was 12.4 percent. Another is the reduction of interest rates, which have come down from 20.5 percent in May 1981 to 12 percent now.

Reagan's economic record is the worst of any president since World War II, says a statistical analysis by two professors at the University of California at Berkeley. The study scored each president's term on 16 key indicators of economic performance. The Reagan administration ranked last in 10 of the 16 measures and next to last in three others. Because of the failure of Reaganomics, the Republicans suffered some losses in the U.S. midterm election. The Democrats got the upper hand in the election of congressmen and governorships.

Facing the current economic state, economists and government officials differ over the prospects for economic recovery in 1983.

President Reagan says the decline in the interest rates and a drop in inflation indicate an end of the recession. "America is on the road to a lasting recovery," he said. He also hailed the recent surge in stock prices as evidence that his economic program was starting to work. "America is recovery bound," adding that "this one is built to last."

Treasury Secretary Donald Regan predicted that the gross national product will increase 3.5 to 4 percent next year. "This recovery could be one of the great recoveries of all time in duration unless something goes really awry," he said. But he admits that some top government officials are keeping a watchful eye on the possibility of the economy sliding "into a deep recession or even a depression." George Stigler, the winner of this year's Nobel Prize for economics, said the U.S. economy has gone beyond recession into depression.

A CHICAGO TRIBUNE report says that many economists feel that contrary to optimistic estimates, the economy is still weakening, despite aggressive new efforts by the Federal Reserve Board to spur a recovery. C. J. Silas, president of Phillips Petroleum Co. said he expected the economy to improve, but not until [passage indistinct]. "By mid-1983, the nation's total output of goods and services will be only slightly above where it was at the beginning of 1980. [passage indistinct]

ITALIAN COMMUNISTS CONDEMN CSSR, DRA OCCUPATION

OW281844 Beijing XINHUA in English 1831 GMT 28 Nov 82

[Text] Rome, November 28 (XINHUA) -- The Italian Communist Party (PCI) said today the military occupation of Czechoslovakia and Afghanistan violated the principle of independence and impeded the process of detente.

A document adopted by a joint session of the PCI Central Committee and supervisory committee said the party opposes outside interference and adheres to a policy of self-reliance. The document was prepared for the party's 16th national congress to be held next March.

RENMIN RIBAO ON WESTERN EUROPE ECONOMIC 'CRISIS'

HK010605 Beijing RENMIN RIBAO in Chinese 26 Nov 82 p 7

[Article by Ren Zhengde [0117 2973 1795]: "The Serious Impact of the Economic Crisis in Western Europe"]

[Text] The economic crisis in various West European countries which began at the begin beginning of the 1980's is still lingering, industrial production is declining, financial and monetary circles are turbulent, the deficit is hastily rising and unemployment is sharply increasing. The governments of various West European countries are perplexed by all these difficulties. Western press cry in alarm, "The economic panic of the 1930's is coming again." Compared with the economic crisis in the mid-1970's, the present economic crisis -- in addition to the sustained economic stagnation" -- has some new characteristics.

First, the crisis has lasted for quite a long time, since early 1980 West European countries successively have encountered economic recession, but "recovery" as repeatedly estimated by some economists has not appeared so far and the economy is still very weak and bogged down in a deep slump. In 1981, industrial production in Western Europe declined by 2 percent, with a decrease of 0.5 percent in the GNP. The industrial production index of the 10 EEC countries decreased by 2.5 percent in June, July and August this year, compared with that of the corresponding period last year. The total production growth rate of the seven EFTA countries is almost nil this year. West European countries have experienced an economic recession for almost 3 years and such a long-drawn-out recession has been rare since the war.

Second, it is also rare that almost all West European countries are engulfed in the crisis. Previously, crises appeared only in several countries and the economy in other countries was fairly good. It was, therefore, possible for countries which suffered from a crisis to shift the crisis to other countries and still have room to make changes at the international level. However, with rapid development in production and the internationalization of capital, economic relations between West European countries are becoming closer and closer. All countries, without exception, are influenced by the crisis. The tumultuous waves of the present economic crisis have swept over all of Western Europe and even over the entire Western world. Even Switzerland, previously known as "a haven of peace" cannot escape by sheer luck.

Third, a large number of enterprises have closed down and the unemployment has reached a new high after the war. Enterprises in West European countries have gone bankrupt successively with a number surpassing that of the crisis in the 1970's, and reaching even a new high in West Germany and other countries since the war. As a result of the economic recession and enterprises going bankrupt, the number of unemployed persons had doubled and guadrupled. The number of unemployed people in the 10 EEC countries reached a high of 10.9 million in August and increased by 300,000 in September. The EEC countries have an unemployment rate of 10.1 percent, a figure double that of the economic crisis of 1975.

The present crisis has already seriously influenced the situation in the Western Europe.

Struck by the economic crisis, the political situation in West European countries is becoming more and more unstable. Economic recession necessarily leads to hardships. Various political factions are unable to halt the crisis; instead, they shift responsibility onto others and fight one another. As a result, various basic social contraditions are intensifying and governments of West European countries are engulfed in the crisis. Over the past year or so, governments in 13 countries have fallen from power; in Spain, Italy and Denmark, governments have changed twice. Not long ago, the Italian Government was engulfed in a crisis and the Pertini government was forced to resign.

Appalling unemployment and tightening policies -- such as the reduction of welfare expenditures and restrictions on and freezing of workers' wages, adopted by various governments to get rid of the economic recession -- have aroused strong opposition from the broad working masses. Large-scale strikes and demonstrations have been held in some countries. But workers in other countries have done their utmost to contain the strike movement out of fear of losing their jobs. They have created another kind of social trouble by taking part in various antigovernment pacifist movements or organizations to give vent to their grievances against the authorities. Social turbulence is sweeping over all of Western Europe.

Western countries suffering from a crisis are all doing their utmost to shift the difficulties to other countries in order to protect the economy in their own countries, thus intensifying the trade war between various countries and enlarging the rifts within the alliance. Trade protectionism is now prevailing in all Western countries, which are shifting crises to each other. Western Europe, the United States and Japan first engaged in the interest rates war, the steel and iron war and the automobile war, then were locked in a fierce struggle over the issue of the natural gas pipeline project. Although a compromise was reached not long ago by both sides on the trade of iron and steel and the natural gas pipeline project issue, it only helped to ease strained relations temporarily and the contraditions have not yet been resolved. Now a fight has already begun between Europe and the United States on agricultural products.

In such circumstances, Western Europe is experiencing stagnation or even retrogression in achieving economic integration. According to relevant stipulations, tariffs on industrial and agricultural products have been abolished for quite a long time within the EEC. But due to the sustained economic recession all member countries, in order to protect the market in their own countries, have rebuilt non-tariff barriers -- thus causing frequent trade wars within the EEC. Following the establishment of the European monetary system in 1979, the EEC scheduled establishment of the European monetary funds in March 1981 as an advance to the second phase. However, due to the economic predicament and numerous contraditions in these countries, the schedule has been postponed indefinitely. All West European countries are now doing their utmost to deal with the economic crisis and it is impossible for them to give consideration to economic integration.

In seeking a way out, the developed West European countries and the United States are shifting the crisis to the Third World countries. As a result, foreign trade in the Third World countries is deteriorating, deficits are arising and debts are increasing. All this has aroused strong opposition from the Third World countries and undermined relations between the Western countries and the Third World countries. West European countries and the United States once shared different views on the North-South dialogue and the issue of the Third World countries.

Previously, some countries were eager to develop economic connections with the Third World; but now they are obsessed with difficulties themselves, hence force down prices of raw materials of the Third World countries, build tariff barriers and only pay lip service to increasing economic aid.

It is impossible for the economy in West European countries to recover this year and it is also difficult to estimate whether there will be a recovery next year. Anyhow, the serious impact of the economic crisis will be profound and lasting.

EUROGROUP CONTRIBUTION TO NATO DETAILED

OW300555 Beijing XINHUA in English 0219 GMT 30 Nov 82

[Text] Brussels, November 29 (XINHUA) -- NATO's European countries "reaffirmed their determination to help strengthen the alliance by making the European contribution as strong and cohesive as possible", said the Eurogroup in a communique at the end of its one-day winter conference here today.

The communique said that the Eurogroup countries participating in NATO's integrated military structure constitute a substantial and significant contribution to the alliance's military power. Their active armed forces total some 2.5 million men and they provide approximately 75 percent of NATO's readily available ground forces in Europe, 75 percent of the tanks, 65 percent of the air force and 60 percent of the warships. Eurogroup countries plan to introduce a wide range of new equipment into their armed forces in 1983.

John Nott, British secretary of state for defense and chairman of the conference, expressed the "great concern" of the Eurogroup over a bill of amendment in the U.S. Congress on withdrawing U.S. troops from Europe. But, he said, "There was also confidence that the bill would not go through." He hoped that the U.S. Administration would persuade the Congress successfully. The ministers endorsed additional measures to give wider publicity, particularly in the U.S., to the European defense effort, Nott noted.

Another major item on the agenda of the conference was transatlantic cooperation in military procurement. The ministers stressed that it is important to achieve a reasonable balance in the two-way flow of defense material across the Atlantic. They expressed concern over legislation now being considered in the U.S. Congress with respect to the 1983 defense appropriations bill, and urged the U.S. Administration to continue its efforts for overcoming obstacles to genuine cooperation.

The Italian defense minister, who is the current chairman of Eurogroup for 1982, was absent due to the formation of a new government in Italy. At the invitation of the meeting, the Norwegian defense minister agreed to take over the ministerial chair of Eurogroup from January 1983. The ministers agreed to meet again in the spring of 1983.

WAN LI MEETS BELGIUM'S MAYENCE-GOOSSENS 27 NOV

OW271421 Beijing XINHUA in English 1158 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Chinese Vice-Premier Wan Li met here this afternoon with Mme Jacqueline Mayence-Goossens, secretary of state for development and cooperation of Belgium, and her party.

Wan Li thanked the Belgian Government for helping train Chinese harbor administrative personnel. He said it is China's consistent policy to develop trade and cooperation in scientific, technological and other fields with Belgium and other E.E.C. countries. He expressed the hope that China and Belgium would increase exchanges of experience in transport and communications.

Mme Mayence-Goossens said she hoped that Sino-Belgian cooperation will develop at a faster pace.

Also present were Chinese Vice-Minister of Communications Qian Yongchang and Belgian Ambassador to China Roger Denorme.

The guests arrived November 24 at the invitation of the Ministry of Communications. They have discussed ways of expanding economic cooperation between the two countries with leading officials of Chinese economic departments.

BELGIUM'S TINDEMANS OUTLINES POLICY TOWARD USSR

OW251246 Beijing XINHUA in English 1112 GMT 25 Nov 82

[Text] Brussels, November 24 (XINHUA) -- Belgium would remain firmly committed to the collective efforts of the Atlantic alliance to preserve equilibrium of forces and unity of the allies, and to conduct dialogue with the Soviet Union with confidence and dynamism for the sake of world security and limitation of armaments.

This was declared by Leo Tindemans, Belgian minister of external relations, at the parliament today.

He pointed out that Soviet behavior in the past few years was not in harmony with the principles of the Helsinki final documents. He considered it necessary to spell out this position of the Belgian Government at the time of change of Soviet leadership.

On Afghanistan, he stressed that restoration of a really independent, neutral and non-aligned Afghanistan is the only solution to the Afghan problem. This position is shared by the great majority of the U.N. member states, especially China and the Moslem world, he added.

Turning to the situation in the Middle East, Tindemans said that the future of the Palestinian people remains the center of any solution to the Israeli-Arab conflict. Without an equitable settlement of the problem, there could be no peace in the region. Israel must put an end to its policy of colonization in its occupied territories, he said.

DENG XIAOPING CALLS FOR MOBILIZING SCIENTISTS

OW301640 Beijing XINHUA in English 1621 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Deng Xiaoping, chairman of the Advisory Committee of the C.P.C. Central Committee, has called for mobilization of scientists and technologists to tackle China's major development problems.

He said that the preliminary work should be started for major key development projects, which, in accordance with the 12th party congress, involve energy, transport and other branches of the national economy.

"It is not that we do not have talented people, the problem is whether we can better organize them and tap their initiative and use their talents to the full extent," he said.

During a recent conversation with leaders of the State Planning Commission, Deng Xiaoping said that quadrupling gross industrial and agricultural output value by the year 2000 depends on future work.

"At least good arrangements must be made for the next three years," he said. "You (planning commission leaders) have proposed starting the survey and designing of some major projects in addition to the projects already planned for construction, and this work must be done conscientiously so that construction work may begin as soon as conditions are ripe."

"We must press on with determination no matter how difficult it might be. If money and materials are not enough, we would rather cut back on projects undertaken by localities, especially those general processing industrial projects, since small projects, whatever their number, would get us nowhere."

He said it is necessary to seize the opportunity and start the large key projects as soon as possible according to a practicable arrangement. "Otherwise, we would leave them to the next century," he said.

The preliminary stage of work for the construction of those projects includes the development of agriculture, he said, which depends on policy and progress of science. "It is important to rely on policy to mobilize the initiative (of the peasants), but there is a limit and it will not go any further at a given period of time. The development and role of science and technology, however, is inexhaustible."

He said that there is great potential to tap in regard to the introduction of good strains of seeds and the application of fertilizer and other farming techniques. "Freshwater fish raising also promises a bright future, at least in Hubei Province, which is dotted with large and small lakes," he said. "If work is done well, the peasants can become better-off very quickly and the urban fish supply problem can be solved as well."

To do the preliminary work well for the construction of major projects, Deng Xiaoping said, it is necessary to mobilize a large number of scientific and technical personnel.

He called for an end to the enforced idleness due to poor organization of work and the phenomena of learning what is not to be applied and doing what one is not proficient in.

He said that a powerful organ is needed that has the authority to command scientific and technical personnel scattered in the national defense and civilian organizations, research institutes and institutions of higher learning.

"The first thing to do in the mapping of the 20-year development program and in implementing the policy toward intellectuals is to do a good job in the management and use of scientific and technological personnel."

"This is the most pressing problem that must be solved as soon as possible," he said.

He said the planning, designing and examination work of the key projects should be entrusted to people who are most capable of the jobs and they should choose the personnel so that work can proceed faster. Some items may be relegated to universities, with the participation of scientific and technical personnel.

Really capable persons will emerge through practice and they must be boldly promoted and given important jobs, he said. "Only when talented people keep emerging, can we have a bright future."

All talented people (not all intellectuals are talents), if they are really capable, should be given more material benefits, he said. But if one cannot produce any result within a long period of time, he should be transferred to another job and his material benefits should be reduced.

Deng Xiaoping endorsed the practices of advertising for talented people to fill vacancies. He called to work out specific methods for examination and selection of scientific and technical personnel.

38 KEY SCIENTIFIC RESEARCH PROJECTS SELECTED

OW010225 Beijing XINHUA in English 0154 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- China has selected 38 key scientific projects to be tackled in the next three years. This period will coincide with the completion of the Sixth Five-Year Plan (1981 -- 1985).

According to the State Scientific and Technological Commission, altogether about 100 subjects were listed, involving agriculture, light industry, energy exploitation and saving, machinery and electronics, transport and communications.

The projects involving agriculture include selecting and breeding fine seed strains of rice, wheat, soybeans, corn, cotton, sugarbeets, oil-bearing crops and vegetables.

Listed among the industrial items are research on mass production of large-scale integrated circuits, exploitation and long-distance transportation of coal, construction of large hydropower stations, energy conservation, technology and equipment for spinning, weaving and finishing of chemical fibers and fabrics, technology for comprehensive utilization of petroleum, technology for comprehensive utilization of composite minerals, and technology for dressing low-grade haematite.

Also included as key research projects are control of pollution, prevention and treatment of viral hepatitis and cancer, development of better contraceptives and technology for processing and preservation of food.

The 38 research items were selected jointly by the State Planning Commission, the State Economic Commission and the State Scientific and Technological Commission, on the basis of items proposed by the various ministries.

Research and experimental work on some of the items has already been started and progress has been made in some projects.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Zhao on Economic Situation

OW010228 Beijing XINHUA in English 0143 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- China's industrial and agricultural output has grown by an average annual rate of 5.2 percent in 1981 and 1982, the first two years of the Sixth Five-Year Plan.

This was disclosed by Premier Zhao Ziyang when he reported on the Sixth Five-Year Plan to the Fifth Session of the Fifth National People's Congress here yesterday.

The growth rate in 1981 was 4.5 percent and that for 1982 is expected to reach 5.7 percent as against the planned figure of 4 percent, he said.

There has been an all-round development of agriculture in the two years, with the output value growing by an annual rate of 5.3 percent.

China's grain output has risen year after year despite serious droughts and floods, the premier said. It is estimated at 335 million tons this year, increasing by 10 million tons over 1981 and surpassing the record harvest of 1979.

Compared with 1980, the 1982 output of cotton is expected to rise by 21.9 percent; oil-bearing crops, up 39 percent; sugar-yielding crops, up 29.2 percent; tea, up 21 percent; and pork, beef and mutton, up 6.8 percent.

He said production of industrial consumer goods has grown rapidly so that there is a more and more plentiful supply of commodities in the market, thus considerably relieving the shortage of consumer goods.

The output value of light industry in 1981 increased by 14.1 percent over 1980, and it is expected to go up by another 5.1 percent in 1982. This means an average annual increase of 9.6 percent for these two years.

The output of yarns, woolen fabrics, knitting wool, sugar, bicycles, sewing machines, T.V. sets and washers this year will increase by a big margin over 1980, the premier went on. The quality of many consumer goods is improved and variety increased.

In heavy industry, he said, production has turned from decrease to increase, thanks to the efforts to increase the production of energy and economize on its use and to change from serving heavy industry itself to serving agriculture and light industry by supplying them with more materials and equipment.

The gross output value of heavy industry this year is expected to be 7 percent more than in 1981, so that the average annual increase for 1981 and 1982 will be 0.9 percent.

Compared with 1981, the 1982 output of coal is expected to rise 4.6 percent; crude oil, 0.5 percent; electricity, 5.1 percent; rolled steel, 1.9 percent; and cement, 8.6 percent.

Zhao Ziyang said that the upward trend in the output of heavy industry after readjustment is an important indicator of the healthy development of China's national economy.

He said the trend of continuous decrease in state revenues over the last three years will end this year with the improvement of China's economic situation and due to the measures taken to increase revenue and economize on expenditure. It is estimated that state revenues will resume their upward trend next year.

Educational, scientific and cultural undertakings have made new progress in the two years, Zhao said. The number of institutions of higher learning increased from 675 in 1980 to 729 in 1982, and the annual enrolment of freshmen from 280,000 to 310,000. More than 6,000 major research results were reported in these two years, and about 1,000 new materials developed. The recent success in the underwater launching of a submarine-based rocket carrier indicates the new advances in China's science and technology, he said.

Zhao Ziyang attributed the continuous improvement of China's economic situation in the past two years to the intensified effort in building a socialist spiritual civilization and to the resolute struggle against serious offences in the economic sphere.

In short, much has been achieved in carrying out the Sixth Five-Year Plan in the past two years, he said. However, many problems left over from the past remain to be solved, and new problems have cropped up in the economy. There are still many shortcomings and difficulties. It is necessary to work diligently to achieve still greater successes in the next three years.

Zhao on Economic Crime

OW010242 Beijing XINHUA in English 0212 GMT 1 Dec 32

[Text] Beijing, December 1 (XINHUA) -- Premier Zhao Ziyang declared that China has by and large checked the once rampant, unscrupulous activities of smuggling thanks to the recent struggle waged against economic crimes.

A number of serious offenders guilty of graft, offering or accepting bribes, speculation and swindling have been dealt heavy blows, he said. All this has helped safeguard China's socialist economic system and the cause of socialist modernization.

In his report to the Fifth Session of the Fifth National People's Congress yesterday, Zhao Ziyang said that thanks to the measures taken by all quarters, there has been a marked improvement in public order.

The rate of criminal offences in the country between January and September this year was 15.7 percent less than in the corresponding 1981 period.

A total of 136,024 criminal cases in the economic sphere were handled in the same period, of which 44,663 cases have been wound up with 26,227 offenders sentenced according to law. Meanwhile, 44,874 offenders surrendered themselves to the judicial departments and made a clean breast of their crimes.

Among these cases, the Chinese premier pointed out, some were major and appalling ones involving huge sums of ill-gotten money.

However, he added, among the more than one hundred thousand criminal cases so far uncovered in the economic field, only a small number involve, in varying degrees, certain senior leading cadres. For instance, some have been taken in by the offenders because of serious bureaucratism, others have not been strict enough with their children who have thus degenerated into criminals, and still others have themselves tainted with unhealthy tendencies to some extent. These cases either have been or are being dealt with in all seriousness.

He said that until now no senior leading cadres in the party or government have been found guilty of serious economic offences. Facts show that the leading cores at the central, provincial, municipal and autonomous region levels are trustworthy.

Zhao Ziyang said the recent struggle against criminal offences in the economic field has been waged on a very large scale and yet it has progressed satisfactorily. There have been no unfavorable social repercussions and no adverse effect on the country's political stability and unity or on the implementation of the policy of invigorating the domestic economy and opening to the outside world.

This shows that the party and government have greatly improved their art of leadership and are now doing a much better job, he noted.

Zhao on Capital Construction

OW010339 Beijing XINHUA in English 0234 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Chinese Premier Zhao Ziyang said China will strictly control the total volume of investment in fixed assets in 1981-1985 so as to ensure investment for energy, transport and other key projects and for technical transformation of existing enterprises.

In his report on the Sixth Five-Year Plan at the Fifth Session of the Fifth National People's Congress yesterday, Zhao Ziyang said China will allocate 360 billion yuan for launching new projects of capital construction and carrying out technical transformation of existing enterprises. To exercise effective control over and make proper use of this fund will contribute enormously to augmenting China's economic strength, he noted.

Since the founding of the People's Republic, China has suffered several major setbacks in economic construction, all of which, apart from political reasons, could be attributed economically to the blind extension of capital construction. This is indeed a painful lesson for China and China cannot afford to, and must not, make such a mistake again, he said.

Experience gained in China's economic construction over the past 30 years or more has time and again proved that the volume of investment in capital construction must suit the nation's economic strength, Zhao added. This is a basic condition for stabilizing the national economy as a whole.

The premier said in order to exercise strict control over the volume of investment and get greater investment returns, the State Council has made the following regulations:

-- All investments in fixed assets, including those covered by state budget, self-financed or financed by bank loans, must be subjected to overall balancing by the planning departments and incorporated into the state plan.

-- All construction projects must be undertaken in strict compliance with the procedures governing capital construction, including prospecting and designing, feasibility studies and technical and economic confirmation.

-- For all construction projects already decided on, it is imperative to fix the scale of construction, the total amount of investment, the schedule, the investment effectiveness and the conditions for cooperation with other units. At the same time, the system of responsibility must be strictly applied.

Zhao on Technological Progress

OW010836 Beijing XINHUA in English 0817 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Chinese Premier Zhao Ziyang said the fulfillment of the Sixth Five-Year Plan (1981-1985) calls for the effort to promote technological progress and make full use of science and technology in economic construction.

Reporting on the Sixth Five-Year Plan to the Fifth Session of the Fifth National People's Congress here yesterday, Zhao Ziyang said it is all the more necessary to give full play to the enormous role of science and technology in the endeavor to quadruple China's annual gross value of industrial and agricultural output by the end of this century and proceed to scale even greater heights.

Zhao Ziyang asked the State Science and Technology Commission, Planning Commission and Economic Commission to work out development plans for different trades and regions as well as the national program for the development of science and technology, in conjunction with the other departments concerned and specialists in all branches of science and technology.

He said it is necessary to formulate technological policies that suit China's conditions, and set the technological levels to be reached by the end of this century.

The premier stressed the necessity of tapping the specialized knowledge of scientists and technologists and organizing them to tackle key problems in scientific and technological research on the basis of division of labor and cooperation.

Zhao said the import of advanced technology is an important way of promoting China's technological progress. On the basis of investigation and study and unified planning, it is necessary to further simplify the related procedures and take prompt action to import badly needed production technologies which are not available at home in a short period of time. Moreover, scientific and technical personnel and workers should be organized to assimilate and spread such technologies. China plans to import 3,000 items of advanced technology in the next three years in an effort to reinforce the technical transformation of existing enterprises, he said.

Zhao Ziyang also called for the establishment of technological development centers for different trades and enterprises, and multiform associations combining scientific research, designing and production. Future assessment of enterprise performance, he said, should take as a major criterion the manufacture of new products and the adoption of new technologies for lowering costs and increasing production.

He disclosed that the system will be instituted whereby the state issues licenses for the manufacture of major products, banning the making of substandard ones. He stressed the need to carry out the policy of fixing prices according to the quality of products, enact a patent law, practise the system of rewarding the manufacture of new products and technical innovations, and abolish those rules and regulations that hinder technological progress. It is necessary to encourage the enterprises and workers to promote technological progress and improve management.

Zhao Commends Two Scientists

OW010908 Beijing XINHUA in English 0853 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Two middle-aged scientists who scored world-standard achievements were commended as examples for the nation by Premier Zhao Ziyang in his report to the current National People's Congress session.

Jiang Zhuying, 43, an associate research fellow at the Optical Precision Machinery Research Institute under the Chinese Academy of Sciences, was known for his breakthroughs in the study of optical transmission functions and the optical aspect of television technology.

Luo Jianfu, 47, an engineer in an electronics corporation under the Ministry of Astronautics, developed China's first graphics generators.

Both died of illness in June this year while working on important research projects.

But what the Chinese premier commended them for was not just their brilliant scientific achievements but, more important, their selflessness and sense of devotion.

Since graduation from college, Premier Zhao said, they devoted themselves to the development of science and technology in China, always placing the interests of the country above everything else and never thinking of their own gains or fame.

Zhao Ziyang called on all communists, youth league members, young patriots and other workers in science, technology and other fields to follow the example of the two outstanding middle-aged scientists.

Premier Zhao also urged all organizations to improve their attitude toward intellectuals, fully trust and take good care of them, so they can contribute all their talent to the cause of building a modern, socialist country.

Long articles describing the achievements of the two scientists appeared in the PEOPLE'S DAILY today and yesterday.

Earlier, the GUANGMING DAILY, a newspaper for intellectuals, and the WORKER'S DAILY, a trade union paper, had carried a series of articles and reportages on the life and work of the two scientists.

Zhao on Economic Restructuring

OW011154 Beijing XINHUA in English 1129 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- The restructuring of economic system was a major guarantee for improving economic performance and realizing socialist modernization, Premier Zhao Ziyang said.

It is imperative to accelerate this work energetically and steadily he added.

In his report on the Sixth Five-Year Plan (1981-1985) to the Fifth Session of the Fifth National People's Congress yesterday, Zhao Ziyang outlined three things to do for this purpose in the next three years:

(1) Improve relations between the state and the state-owned enterprises by replacing profit delivery with taxation as a measure to collect revenues from them;

(2) Give full play to the role of pivotal cities and solve the contradictions between the departments and regions at different levels; and

(3) Reform the commodity circulation system and promote commodity production and exchange.

He said all-round restructuring of the economic systems is expected to unfold step by step during the Seventh Five-Year Plan period (1986-1990).

Zhao Ziyang reaffirmed the principle of ensuring the leading role of planned economy supplemented by regulation through the market. The state must concentrate on overall balancing of the national economy, and strengthen centralized administration of major economic activities that affect the important relations of proportion between the various branches of the economy.

In actual work procedures, he said, it is imperative first of all to keep tabs on the key enterprises and the manufacture and distribution of the major industrial and agricultural products covered by mandatory planning while adopting flexible measures in regard to small enterprises and small commodities subject to market regulation.

As for the enterprises and products belonging to the intermediate category, that is, those covered by guidance planning, the administration method will be worked out step by step in conjunction with the reform of the pricing, tax and credit systems through more experiments at selected points to gain experience, he said.

The premier said substitution of tax payment for delivery of profit by enterprises to the state is the general way to follow. The tax system should be reformed to accelerate the above process, he added.

Zhao Ziyang stressed the need to give scope to the role of all trades and cities in organizing economic activities. National corporations and a few large key enterprises should be put under the direct administration of the appropriate departments, while vast numbers of other enterprises should gradually come under the administration of city authorities, he noted.

Production and circulation of commodities should be organized under unified guidance, with economically more developed cities as centers to bring along the surrounding rural areas, and economic regions centered around cities should be formed gradually.

It is necessary to reform the system of commodity circulation, Zhao Ziyang went on. While state commerce plays a leading role in commodity circulation, attention should be paid to the positive role of collective commerce and the individual traders and pedlars and the role of the manufacturing enterprises in marketing their own products. It is necessary to explore more avenues for circulation, and reduce the intermediate links so as to form a really unified socialist market and facilitate the flow of commodities, he said.

Zhao on Agriculture

OW011232 Beijing XINHUA in English 1217 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Premier Zhao Ziyang said the institution of multiform production responsibility system in the rural areas has ensured the peasants of their decisionmaking power in production and management and helped overcome egalitarianism in distribution, thus releasing their enthusiasm in production.

The rural situation has been very good these years, he added.

Reporting on the Sixth Five-Year Plan (1981-1985) to the National People's Congress yesterday, Premier Zhao said all kinds of responsibility system should be allowed, including "all-round contracting system" for production teams and the system of contracted responsibilities on household or group basis with remuneration linked to output, which is favored by the peasants. Active support should be given them and steps taken to help solve the problems that may arise, he added.

With the growth of commodity production in the rural areas, formation of economic associations is becoming a necessity dictated by the actual situation and popular demands, the premier went on. Such associations, catering to the expansion of commodity production, help improve services preceding and following the production progress, and facilitate cooperation in such specialized and socialized services as popularization of technology, supply and marketing, processing, storage, transport, plant protection and supply of information.

Through the multi-layered, multiform associations, the contracting system and other means, close economic ties can be formed between the economic activities undertaken by peasant households or groups on the one hand and large state-owned socialist industrial enterprises, transport services, commercial establishments, farms and scientific reasearch institutes on the other.

Such economic ties and cooperation will serve to strengthen planned guidance for the peasants and bring their principal economic activities into the orbit of state planning Premier Zhao said.

Zhao Ziyang said China, with a vast population but limited arable land, must pay great attention to grain production. On the other hand, China should not concentrate all labor power on the limited farmland. Instead, it should set eyes on the vast expanse of its territory and make full use of its rich agricultural resources in the hilly and mountainous areas, on the grasslands and the waters. Diversified undertakings should be boldly developed while ensuring a steady growth of grain production and keeping the ecosystem from further deterioration.

The premier also spoke of the application of science and technology in agriculture, and urged the establishment at the earliest possible date of a network of research and popularization of science and technology to serve agriculture.

Government investment in agriculture will be used mainly for projects beyond the peasants' own resources, such as large-scale water conservancy works, the development of key forest areas, trunk highways and telecommunications facilities.

Zhao on Government Reform

OW011236 Beijing XINHUA in English 1226 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Premier Zhao Ziyang announced the reform of Chinese Government institutions will be completed by the spring of 1984.

In his report on the Sixth Five-Year Plan (1981-1985) to the Fifth Session of the Fifth National People's Congress yesterday, Zhao Ziyang said that, since the beginning of this year, the reform of the departments under the State Council has in the main been completed, so far as the readjustment of the leading bodies and the organizational setup is concerned.

But there is still a long way to go to reach the final objectives, he said. Unswerving efforts must be made to carry on the reform of government institutions, he added.

At present, the premier pointed out, low efficiency and the bureaucratic style of work still persist to a rather serious extent. All departments under the State Council must establish strict systems of responsibility and resolutely eliminate the bad work style of shirking responsibilities onto others and acting dilatorily, he said.

The premier urged government functionaries to go among the masses, get a deep understanding of the realities, make systematic investigation and study and firmly get rid of the bad habit of making decisions on important matters subjectively without any investigation or study.

He said that the reform of government institutions at the provincial, municipal and autonomous region level and at the prefectural and city level will start this winter and finish in the first half of next year. Reform at the county and grass-roots levels is to be completed between the winter of 1983 and the spring of 1984.

Wang Bingqian on State Budget

OW010635 Beijing XINHUA in English 0248 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- Chinese Finance Minister Wang Bingqian said here today that the implementation of the state budget for 1982 has been satisfactory.

He predicted overfulfilment of both the targets for state revenue and expenditure and a basic balance between the two.

With the steady improvement of the economic situation, he said, the downward trend in revenue has come to a halt and a steady upturn can be expected to start from next year.

The switch from a downturn to an upturn in revenue marks a turning point. It shows that the country's financial situation has begun to improve tangibly and that the work of economic readjustment is entering a new and more deep-going stage, he noted.

The minister said this in a report on the implementation of the state budget for 1982 and the draft state budget for 1983 to the Fifth Session of the Fifth National People's Congress here this morning.

Deng Yingchao, executive chairman and vice-chairman of the N.P.C. Standing Committee, presided over this morning's session. Members of the National Committee of the Chinese People's Political Consultative Conference were present as observers.

Minister Wang said total state revenue will increase from 108.95 billion in 1981 to 110.69 billion yuan in 1982, which is 100.2 percent of the budgeted figure, thus reversing the trend of decline prevailing in the previous three years.

Total expenditure for 1982, he said, will be 113.69 billion yuan, or 100.2 percent of the budgeted figure. The financial deficit can be kept within the three billion figure specified in the budget, he noted.

The implementation of the 1982 state budget shows that China has succeeded in striking a basic balance between state revenue and expenditure this year as in 1981, he said.

While the basic balance of last year was attained mainly through drastic retrenchement in expenditure, he noted, this year's balance has been achieved despite increases in expenditure. The fulfillment of this year's state budget marks a new victory in the endeavor for a fundamental turn for the better in China's financial and economic situation, he added.

Although the present economic situation is excellent and augurs well for China, he said, the growth of revenues still cannot keep pace with the needs of economic and social development. It is imperative to work doubly hard to keep a constant balance between revenue and expenditure and further improve the state financial situation.

The finance minister defined the main guidelines for planning state revenues and expenditures for 1983 as:

Continue to implement the policy of readjustment, restructuring, consolidation and improvement of the economy, promote production, improve economic results, tap new financial resources and increase revenues;

Concentrate adequate financial resources to ensure the construction of key projects in energy, transport and other fields;

Develop culture, education, science, public health service and continue to improve the people's living standards; and

Continue to maintain a basic balance between revenue and expenditure through constant improvement of work.

He said the draft state budget for 1983 sets total revenue at 123.2 billion yuan and total expenditure at 126.2 billion yuan, with a deficit of 3 billion yuan. Efforts must be made to reduce this deficit in the course of implementing the budget, he noted.

The total budgetary revenue for 1983 is 11.3 percent above the estimated revenue for 1982. After deducting those items of which no comparison can be made between the two budgets, the 1983 revenue shows an increase of 5.8 percent.

The rate of increase in total revenue set for the 1983 budget, he said, surpasses that of the gross industrial and agricultural output value and it is to be realized mainly through developing production and improving economic results.

The minister pointed out that the present situation in the whole country is excellent and there are many favorable conditions. Moreover, he (?said), the State Council has adopted many important measures to solve the problems in the economic field. It is entirely possible to fulfil this budget, he noted.

Yang Dezhi on Armed Forces

OW301327 Beijing XINHUA Domestic Service in Chinese 1714 GMT 29 Nov 82

[Text] Beijing, 29 Nov (XINHUA) -- The stipulations in the draft of the revised PRC constitution concerning the armed forces' nature, functions and tasks in the nation reflect the state's tremendous trust in the armed forces. This was the unanimous view expressed by the 400 or so PLA representatives attending the 5th NPC session during group discussions. These military representatives indicated that they would resort to actual deeds to accomplish the glorious historical tasks stipulated in the new constitution which will be adopted soon.

Yang Dezhi, chief of the General Staff of the PLA and head of the PLA delegation to the NPC session, said: The stipulation in the new PRC constitution concerning the establishment of a Central Military Commission of the state is very important. Before the founding of New China, the PLA's task was to struggle under the party's leadership to seize political power. Since the founding of New China, the PLA's task has been to struggle to defend and consolidate political power. At this time the armed forces have become an important part of the state apparatus. For this reason, the armed forces belong to the state and are the state's armed forces. Of course, this does not contradict with the party's leadership over the armed forces because it is the party that exercises leadership over the state's affairs in various sectors. The draft of the revised constitution now stipulates that the state will set up a Central Military Commission which will be taken charge of by a chairman and which will hold itself responsible to the NPC and its Standing Committee. This has clearly defined the role of the armed forces' leading organ in the state and this will facilitate the party's and the state's unified leadership over the armed forces. We must, under the leadership of the Central Military Commission, intensify building our PLA into a more revolutionary, modernized and regular armed forces and improve their self-defense capabilities under modern conditions so that they will not only become a great steel wall defending our socialist motherland, but also important forces in building a socialist material civilization and a socialist spiritual civilization.

Meng Xiangcheng, chief of staff of a certain base under the National Defense Scientific and Technological Commission who took part in a submarine-based carrier rocket launching test from under water, said: The draft of the revised constitution has clearly stipulated that "the state will strengthen the building of its revolutionary, modern and regular armed forces in order to strengthen its defense." This is a great encouragement to us. To carry out the tasks the constitution has entrusted to the armed forces to consolidate the national defense, resist aggression, defend the motherland and defend the people's peaceful labor, we must strive to upgrade our country's science and technology for defense and continue to equip our armed forces with modern weapons.

Yang Wenting, NPC deputy and chief of staff of the Second Artillery Corps, said: The constitution's stipulations that the PRC's armed forces belong to the people and the state and that the armed forces' leading organ be incorporated into the state's leading organ reflect the armed forces' wishes and are favorable for military-government and military-people unity and for the modernization of defense. The Second Artillery Corps is a new, highly technical arm with complex weaponry. To accomplish the glorious but arduous tasks entrusted to it by the constitution, it must 1) continue to carry forward the revolutionary spirit of arduous struggle. Its cadres and fighters must have the spirit of sacrificing their personal interests for the interests of the state and the people; 2) it must dare to do practical work and explore a new way for building the Second Artillery Corps; 3) it must diligently study science and technology, intensify technical training, enhance its professional competence and political consciousness and upgrade its tactical and technical levels.

Lin Ziquan, NPC deputy and deputy political commissar of a regiment under the Guangzhou PLA units, said: The draft of the revised constitution stipulates that the state's future fundamental task is to concentrate its strength on socialist modernization. This calls for the need to strengthen the armed forces in order to counter possible foreign aggression and defend the people's peaceful labor, which is a sacred responsibility the state has entrusted to the armed forces. We will never disappoint the state for trusting us and we must do a good job in safeguarding our motherland. Of course, every armyman is also a citizen. We must regard the constitution as the guiding principle for all of our acts and be avid propagators, exemplary followers and brave defenders of the constitution.

Jiangxi's Bai Dongcai Comments

OW291131 Beijing XINHUA Domestic Service in Chinese 1505 GMT 26 Nov 82

[Excerpts] Beijing, 26 Nov (XINHUA) -- "The new constitution to be adopted by the Fifth Session of the Fifth NPC will certainly serve as an extremely important political guarantee for creating a new situation in all fields of socialist modernization in China," said Bai Dongcai, Fifth NPC deputy and first secretary of the Jiangxi Provincial CPC Committee, in an interview with a XINHUA reporter.

Bai Dongcai said that we should fully appraise the significance of holding the Fifth Session of the Fifth NPC and adopting a new constitution and the Sixth 5-Year Plan in the wake of the 12th CPC National Congress. He said, now we can see the important functions of the new constitution to be adopted soon:

-- It provides a new guarantee for implementing the tasks put forth by the 12th CPC National Congress.

-- It will bring to a new stage the work of perfecting socialist democracy and the legal system in China. China is a big country with 1 billion people. Without sufficient democracy it is impossible to extensively arouse the masses' enthusiasm. Without the legal system, all human and natural laws would be defied and it would be impossible to consolidate the achievements already attained, to say nothing of creating new situations. Therefore, we will adopt a new constitution that is characteristically Chinese, that can meet the needs of socialist modernization in the new historical period and that will remain stable for a long period. This signifies a new stage in the development of socialist democracy and the legal system in China.

-- It will provide a new outlook for the work of building political power in China -- the people's democratic dictatorship. The draft of the revised constitution contains many new and important regulations about state organs, such as strengthening the system of people's congresses, restoring the posts of state chairman and vice chairman, establishing the Central Military Council and changing the system of integrating government administration with economic management in rural people's communes. The implementation of these new regulations will definitely help to consolidate the political power in China, thereby effectively promoting the development of a socialist economy so that the whole people can better exercise state powers.

Sichuan's Tan Qilong Comments

HK010408 Chengdu Sichuan Provincial Service in Mandarin 2320 GMT 30 Nov 82

[Text] According to XINHUA, NPC deputy and Sichuan Provincial CPC Committee First Secretary Tan Qilong said at an NPC session panel meeting on the draft of the revised constitution: Every party member must observe the constitution in a model way, beginning with himself and his own family.

Comrade Tan Qilong said: Compared with previous constitutions, the draft of this revised constitution is the best and the most complete. I believe that the new party constitution about to be adopted will certainly further mobilize the initiative and creativity of the people of all nationalities and provide a reliable guarantee for bringing about a long period of tranquillity in the country and creating a new situation in all fields of socialist modernization.

Tan Qilong said: Formulating this constitution is the desire of the masses. The masses are most afraid of turmoil and policy changes. We have now summed up the positive and negative experiences and applied the form of law to make specific provisions regarding the economic system based on the four basic principles and socialist public ownership, which permits the coexistence of various economic components, and the citizens' rights and obligations.

The people's hearts are thus at ease. Hence, the new constitution we are about to adopt is the fundamental law of the land for ensuring a long period of tranquillity.

However, adopting and promulgating the constitution is by no means equivalent to bringing about a long period of tranquillity. We must also seriously implement it. The party committees at all levels and the party members must first take the lead in this respect. They must start with themselves, with their own families, with the leaders at all levels, with the 3,000 people's deputies, and with the party members among them. Our lesson from the past is that we ourselves did not do well in implementing the constitutions we formulated ourselves. This is a painful lesson of history. We now have the conditions for implementing the constitution well. One condition is that the party Central Committee has summed up the positive and negative experiences of history and absorbed the lessons. It profoundly realizes that the authority of the constitution is related to political stability and the destiny of the state. Another is that the Central Committee has instituted democratic centralism and upheld collective leadership. So long as everyone from top to bottom keeps the law, we will have the guarantee for implementing the constitution, and a new situation of long tranquillity and prosperity will emerge in our state, and we will also be able to attain the vast goal set by the 12th party congress.

Xizang's Yin Fatang Comments

HK010337 Lhasa Xizang Regional Service in Mandarin 1130 GMT 30 Nov 82

[Text] According to XINHUA, NPC deputy and Xizang Regional CPC Committee First Secretary Yin Fatang said at a panel discussion meeting at the Fifth Session of the Fifth NPC: The draft of the revised constitution, which reflects the common will and fundamental interests of the 1 billion people, fully embodies the party's nationality policies and the state's concern for the minority-nationality autonomous areas. The promulgation and implementation of the draft of the revised constitution is bound to stimulate more rapid prosperity in Xizang.

He said: Apart from [words indistinct] the draft of the revised constitution sets out the issues of nationalities and nationalities work. It also treats preserving nationality unity as an obligation of the citizenry. The draft of the revised constitution is the general program for ruling the land well and uniting the people of all nationalities to build modernization.

Yin Fatang cited the current political, economic and cultural situation in Xizang to show that the draft's stipulations on the nationality issue accord with the situation in minority-nationality regions. Some of the issues have already been handled in Xizang in accordance with the spirit of the draft. He said: In Xizang, new nationality relations of equality, solidarity and mutual assistance have now replaced the old relations of nationality oppression, separation and discrimination. Tibetans or comrades of other minority nationalities are now the principal responsible persons of people's congress standing committees and governments at and above county level. All the grassroots cadres are Tibetans or other minority nationalities. Xizang can also practice autonomy rights in light of local political, economic and cultural features. When certain state laws are not suitable for Xizang, Xizang can adapt them to its own circumstances. On certain issues on which the state has not promulgated laws, Xizang can formulate its own local laws in light of local conditions and institute them after gaining approval from higher authority.

Yin Fatang said: Economically, the central authorities and fraternal provinces, municipalities and autonomous regions have given great support to Xizang for many years. In this respect, he stressed the series of special policies for enlivening the economy in Xizang. For instance, the proportion of private plots and privately-owned livestock is rather great. In some places the number of privately-owned livestock is 30 to 40 percent of the number owned by the collective.

The peasants and herdsmen have gained tangible benefit as a result of the state's waiving tax and procurement quotas for several years in succession, and raising the purchasing prices of a number of agriculture, animal and sideline products. For instance, as a result of readjustment the purchasing price of Chinese caterpillar fungus in Biru County or Naqu Prefecture, nearly 20,000 people in the county have each gained several tens of yuan in income.

Yin Fatang said: After this session adopts the new constitution, the people of the whole country will have a common charter, and there will be still more of a basis and guidline for us in carrying out the nationality policies. He believed that the new constitution would stimulate economic and cultural construction in Xizang and create a new situation there.

Taiwan Delegate Comments

HK010134 Beijing CHINA DAILY in English 1 Dec 82 p 1

[By staff reporter Liu Dizhong]

[Text] The establishment of a special administrative region upon reunification of Taiwan with the mainland of China, as stipulated in the draft revised constitution, reflects the desire of the Taiwan people and accords with the interests of the nation as a whole, said Cai Zimin, deputy head of the Taiwan Province delegation attending the Fifth Session of the Fifth National People's Congress (NPC) now under way in Beijing.

In an exclusive interview, Cai, 62, told CHINA DAILY that the provision represents a good way to end as early as possible the long-term separation of Taiwan from the mainland and a fundamental way out for the authorities of the island.

"This gives full consideration to the present conditions in Taiwan and shows high flexibility as regards specific policies and measures," he said.

Cai, a native of Zhanghua County of Taiwan Province, is now cultural counsellor at the Chinese Embassy in Tokyo, Japan.

The provision for setting up special administrative region when necessary means, according to the statement made last year by Ye Jianying, chairman of the Standing Committee of NPC, among other things, that the present social and economic systems in Taiwan, its way of life and its economic and cultural relations with foreign countries will remain unchanged.

"This will ensure the Taiwan people a high degree of administration and thus safeguard full exercise of their democratic rights, for which they have fought for decades," Cai said.

In addition, he said, establishment of special administrative region would be highly conducive to prosperity of both the island and the mainland.

"At present," he said, "Taiwan is deeply influenced by the recession in the world economy and finds it difficult to develop further its own economy, which is founded on a lopsided basis. The setting up of a special administrative region would provide Taiwan with a vast and stable market and the island might become more prosperous through trade with other provinces on the mainland."

The draft revised constitution has incorporated suggestions put forward by people of all nationalities, including the Taiwan compatriots living abroad, Cai said.

CENTRAL ORGANS DISCUSS EDUCATING CPC MEMBERS

HK010657 Beijing RENMIN RIBAO in Chinese 29 Nov 82 p 1

[Unattributed Report: "CPC Central Committee Organization and Propaganda Departments Hold Joint Meeting on Education Among Party Members in Jinan 14 - 24 November"]

[Text] Entrusted by the Secretariat of the CPC Central Committee, the Organization and Propaganda Departments of the CPC Central Committee jointly held a work conference on education among party members in Jinan from 14-25 November. Under the guidance of the spirit of the 12th party congress, the conference stressed that at present and in a few years to come, we should strengthen the work of education among party members centering on teaching the new party constitution and called on all the party members to conscientiously study and resolutely implement the new party constitution, strive to become qualified party members that satisfy the requirements of the new party constitution and play exemplary roles in the construction of the socialist material and spiritual civilizations.

Song Renqiong, member of the Political Bureau of and director of the Organization Department of the CPC Central Committee and Deng Liqun, secretary of the Secretariat and director of the Propaganda Department of the CPC Central Committee, attended the conference and gave important speeches.

The comrades who participated in the conference conscientiously studied the relevant documents of the CPC Central Committee and the speeches of the central leading comrades, discussed and analyzed, in light of practical conditions, the present state of affairs in the ranks of our party members and the significance in strengthening the education work among party members, summed up and exchanged experiences in education work among party members in various areas in the past few years, and focused on studying the question of how we are to strengthen education among party members in order to make them mentally prepared for party consolidation that will be carried out in the latter half of next year.

The conference pointed out that our party is a pioneer force of the working class that is armed with Marxism-Leninism-Mao Zedong Thought. At present, it has more than 39 million members and has assembled all the fine elements of the Chinese working class and the Chinese people. In spite of the serious damage caused by the "Great Cultural Revolution," the ranks of our party remain generally pure and powerful. After years of restoration and reorganization, the situation related to our party has greatly improved, the party's fine tradition and work style is being developed, its ties with the masses are being strengthened and its prestige is being increased day by day. However, because we have not completely eliminated the remnant evil influence of the 10 years of civil disorder and because, under the new situation, the various kinds of ideology of the exploiting class at home and abroad have exerted a corrosive influence on our party, problems of ideological, work style and organizational impurity have indeed cropped up in our party. It is urgently necessary for us to strengthen education and overhaul our party.

Since the 3d Plenary Session of the 11th CPC Central Committee, party organizations at all levels have paid attention to the education work among party members. In 1980, 32.09 million party members received rotational training centering on studying the spirit of the 3d Plenary Session of the 11th CPC Central Committee, the "Guiding Principles" and the draft of the revised constitution. In 1981, 31.07 million party members received rotational training centering on studying the "Resolution" of the 6th Plenary Session of the 11th CPC Central Committee. In the past more than 2 years, we have carried out widespread training of party members throughout our party. This large-scale and great number in attendance has seldom been seen for many years.

In quite a few areas, a system of routine party education lessons has been established and the regular activities system of party organization has been perfected. More than 2,000 party schools have been restored or established and 33 educational journals for party members have been established in various provinces, municipalities and autonomous regions. Through diverse forms of education, we have raised the awareness and consciousness of our party members and brought order out of chaos in political, ideological, organizational and other spheres. This has played a very satisfactory role in ensuring the implementation of the party's line, principles and policies formulated since the 3d Plenary Session of its 11th CPC Central Committee and in developing all undertakings of the state. Moreover, it has also created conditions for further strengthening future party building.

The conference emphatically pointed out that the new party constitution is the best of all the party constitutions that we have ever adopted since the founding of the CPC, that the work of education among party members should center on teaching the new party constitution and make all the party members systematically study it, especially the part related to the qualifications and duties of a party member, the spirit of wholeheartedly serving the people and the spirit of not grudging when giving all one has in serving the people, that all party members should strive to correct unhealthy trends and strengthen the ties between the party and the masses and that they should foster a communist world outlook, heighten their firm confidence in communism and consciously practice communism. We should make education in communist ideology permeate all processes of education work.

The conference stressed that in the process of studying the new party constitution we should combine theory with practice, develop criticism and self-criticism, confirm our achievements, overcome our shortcomings and correct our mistakes. This should be carried out in a gentle and mild way by paying attention to methods, as well as being carried out in a serious and careful manner in order to adhere to principles. Thus we will be able to rectify our work style and correct our mistakes while studying and will be able to prevent the formalism and malpractice of making a show of study. Our party member leading cadres should set examples and take the lead in receiving education and making self-criticisms and they should resolutely correct the erroneous viewpoints that education among party members is only limited to common party members and leading cadres can be excluded from those who should receive it. In carrying out education among party members, we can adopt diverse forms and methods. We should combine giving full-time rotational training courses with carrying out day-to-day education and gradually make education among party members regular and systematic.

The conference is of the opinion that strengthening education among party members is an important task and that party committees should take charge and all the party members should take part in fulfilling this task. The party committees at all levels must act in accordance with the stipulations of the new party constitution, carry out division of labor between party and government organizations, strengthen building their organizations and strive to put an end to the previous malpractice of neglecting education among party members and of party organizations failing to take care of their members. The organization and propaganda departments of our party committees should each be responsible for their duties of office, carry out division of labor between themselves and give good proposals to the party committees in order to be good advisers and assistants to the party committees.

Liao Jingdan, an adviser to the Propaganda Department of the CPC Central Committee, and Wang Zhaohua, deputy director of the Organization Department of the CPC Central Committee, presided over the conference and gave speeches. Bai Ru and Su Yiran, principal responsible comrades of the Shandong Provincial CPC Committee, also attended the conference.

Also attending the conference were the secretaries of all the provincial, municipal and autonomous regional CPC committees who are in charge of party and mass affairs, the responsible persons of the organization and propaganda departments of these committees, the chief editors of the journals of education among party members in all areas and the relevant responsible comrades of the central organs of the party and state and those of the PLA General Political Department, totaling more than 250 people.

SHAANXI'S MA WENRUI URGES IMPROVING PARTY STYLE

HK160744 Beijing RENMIN RIBAO in Chinese 10 Nov 82 p 3

[Article by Ma Wenrui [7456 2429 3843]: "Strive To Achieve a Basic Improvement in Party Style"]

[Text] Since the 3d Plenary Session of the 11th CPC Central Committee, our party has attached great importance to the problem concerning party work style, regarding it as a matter of life and death for a ruling party. The 12th CPC Congress has also laid down the goal of bringing about a basic change for the better in party work style as one of the great tasks for the next 5 years in creating a new situation. All these moves have fully shown that the problem of party work style is an extremely important matter. Properly solving this problem conforms to the common will of the whole party and the people; it is a lofty historical mission and an urgent task entrusted by our era to the party. "Without the Communist Party There Would Be No New China." When sung by our people more than 30 years ago, this was a song of praise to our party's achievement in leading the people throughout the country to overthrow the rule of imperialism, feudalism and bureaucratic capitalism in old China. Today, it represents the people's sincere faith in our party's leadership in accomplishing the great cause of building our country into a modernized socialist country with a high degree of civilization and democracy. We should, with full confidence and in accordance with the requirements of the CPC Central Committee, make unremitting efforts to realize the basic change for the better in party style and build our party into a strong core leading socialist modernization.

In the last few years, in unswervingly carrying out the line, principles and policies laid down by the 3d Plenary Session of the 11th CPC Central Committee, party organizations at all levels in our province have come to a deep understanding of the great importance of correcting party work style. Only by upholding a healthy party work style can our party members politically keep in line with the party's Central Committee, unswervingly carry out the party's guiding principles and policies, act in a down-to-earth manner according to the will of the broad masses of the people and promote smooth development in all fields. If our party style degenerates, our party members will not be able to keep in line with the party's Central Committee politically and will be half-hearted about or even go against the party's cause. They will only partially carry out the party's principles and policies, or even overtly agree with but covertly oppose them. In their actual work, they will seek personal gains by making use of their power, violate the law and discipline and infringe upon the people's interests, destroying the party's reputation.

We cannot just depend on one single department or the leading organs at a single level but must mobilize the whole party to engage in the drive to correct party work style. First of all, we must begin from the provincial CPC committee and party committees of all prefectures, municipalities and counties. The leading organs at all levels must take the lead in correcting party work style. Every superior level must take care of its immediately subordinate level and, in particular, the number one responsible persons of the party committees at all levels must set themselves up as examples in correcting party work style, and personally engage in examination so as to produce marked effects.

Since 1979, every year we have transferred more than 1,000 cadres from provincial, prefectural and county organs to form working teams. With leading comrades as their heads, these working teams have been sent all over the province to promote the drive to correct party style and help with the central task. For example, last year our working teams disclosed a total of 1156 cases of breaches of party discipline, of which 166 were handled directly by the teams themselves. The provincial CPC committee even directly intervened in, supervised, and dealt with those typical cases of breaches of discipline which had widespread influence and constituted a serious hindrance. For example, to deal with the case of the Chenghe mining bureau which violated the policy on recruiting workers, the provincial CPC committee sent a working team to conduct a thorough investigation and carry out meticulous ideological work; it then dismissed a total of more than 140 workers, including relatives of certain leading cadres, who got their jobs "though the back door," and dealt seriously with all those who had committed grave mistakes in this case. When the conclusion of this case was published, it immediately caused a shock both inside and outside the party. Our cadres and the masses asserted: "Such methods of correcting party style will never fail."

Going no further than general discussion, applying our energies solely to organizing meetings, and concentrating on trivial matters are not enough to correct party work style. We must also try hard to carry out investigations, select typical problems of universal significance, and then push ahead the drive to redress party work style step by step, in a down-to-earth manner and in a planned way. In the light of the CPC Central Committee's work plan and the actual situation in Shaanxi Province, we have promoted the drive of correcting party work every year, concentrating our efforts on certain aspects. In 1979, because of the incompleteness of previous examinations, we removed all obstacles, vigorously carried out a supplementary exposure, criticism and examination drive to redress party work style, went a step further in breaking down the bourgeois factionalist system, removed a number of elements belonging to the "three types of people" who had managed to sneak into leading bodies at different levels, investigated and processed more than 2,000 major political cases occurring during the 10 years of turmoil, redressed 190,000 unjust, false and wrong verdicts, and thus reduced the discontent of the broad masses of cadres and people, strengthened unity and brought about a new situation in all aspects of our work. In 1980, in order to implement the "Guiding Principles for Inner-Party Political Life" laid down by the CPC Central Committee, we took the lead in encouraging the leading bodies of party committees at various levels to hold democratic life meetings and conscientiously carried out "small scale rectification" in accordance with the "Guiding Principles" and, at the same time, stipulated certain regulations, thus further improving party style. Since last year, we have discovered quite a few malpractices in "recruitments" (the recruitment of workers, students and cadres), the "procedure of changing status" (the procedures of changing one's status from rural to urban resident, from rural youth to school graduate transferred to the countryside, and from casual worker to official employee), and the problem of "housing" (occupying excessive areas of housing owned by the state and illegally building private houses). After conscientious deliberation, we have made up our minds to carry out examination and correction starting this year, while resolutely dealing blows at criminal activities in the economic field. At present the number of cadres proved to be involved in these issues totals more than 4,400, accounting for 1.2 percent of the total number of cadres; of these, 660 are cadres at and above the county level, accounting for 8 percent of the cadres at these levels. Some cadres have practiced fraud in "recruitment" and the "procedure of changing status" by such means as taking others' places by assuming their names, asking privileges from one another, and so on. In distributing houses and building private houses, they have encroached on the interests of the masses, practiced jobbery, illegally occupied land, embezzled public funds and misused the collective's labor force, thus seriously harming the party's prestige and encouraging unhealthy practices in society.

The masses are very discontended with this situation. We have already dealt seriously with all these problems.

In correcting party style, we should not just treat the symptoms without treating the disease. Instead, we should tackle the key problem by strengthening ideological cultivation, enhancing education in party spirit, and setting up and consolidating the philosophy of wholeheartedly serving the people. For this reason, our provincial CPC committee drafted and published in 1980 the following three articles: "Oppose Individualism," "Adhere to Party Spirit and Eliminate Factionalism" and "A Communist Must Be Honest." In these articles we analyzed some major problems existing in the thinking and work style of our party members and cadres, and proposed corrective measures. We printed and distributed these articles as teaching materials in party lectures to the party organizations at all levels. Later, using the "Guiding Principles" and "The Resolution of Certain Problems in the History of Our Party Since the Founding of the PRC" respectively as the basic content, and in the forms of giving lectures to party and cadre schools, organizing rotational training classes and study classes, launching mass discussions on "how to become a qualified Communist Party member," and so on, we carried out an extensive drive for education in party style and party discipline and the party's line, principles and policies laid down since the third plenary session among the 1.24 million party members throughout the province. This year, by carrying out the "five stresses and four beauties" campaign and that of building spiritual civilization, we have promoted education in communist ideology and morality and the thinking of wholeheartedly serving the people, tried to enhance the ideological and political consciousness of the vast number of party members and cadres, and thus facilitated the improvement of party style and increased the combating force of the party.

What we have achieved in correcting party style is still far from the requirements laid down by the party in its new constitution. However, these actual achievements have shown that all pessimistic viewpoints and ideas of inertia which cast doubt on the possibility of achieving a basic change in party work style are utterly groundless. We are aware that correcting party style is indeed a difficult task, and cannot be completed in one go; that it is much more complicated and difficult to heal the wounds left by the Lin Biao and Jiang Qing counterrevolutionary cliques in the fields of ideology, spirit, party style and general social mood than the wounds they inflicted in the economic field. We must make a realistic estimate of this situation. On the other hand, we should also see that we have as our core the strong and united CPC Central Committee, which is highly trusted by the whole party and the people throughout the country; that we have, as our guidance, a complete set of lines, principles and policies which have emerged and been constantly improved since the 3d Plenary Session of the 11th CPC Central Committee; that we have, as our starting basis, the achievements and experiences we have gained in correcting party style in the last few years; that we have, as our models, those heroes and exemplary roles who have emerged on all fronts; and finally, that we can expect the enthusiastic cooperation of the whole party and the strong support of the broad masses of the people. Therefore, we have confidence in restoring our party's fine traditions and style through implementing the spirit of the 12th CPC Congress, redressing the party style and rectifying party organizations step by step and in a planned way, and thus strive for the basic improvement in party style in the next 5 years.

SCIENTISTS, TECHNICIANS SHOULD SERVE PEASANTS

HK300823 Beijing RENMIN RIBAO in Chinese 25 Nov 82 p 3

[Commentator's article: "Undertakings, Ideals, Sentiment"]

[Text] Cherishing feelings of admiration, we recommend this news story to our readers.

After suffering torment for more than 10 years, the first thing Wang Suxiang, a woman stock breeding specialist in her fifties, was to do when she returned to her working post was go to stay in the countryside of Tongwei County, Gansu Province, to gain firsthand experience. She did not ask the people for compensation or consider how to arrange a cozy nest for herself, nor did she take into account her personal honor, disgrace or status. The rural areas of Tongwei County are regarded as the most miserable place in the world. The suffering of the people there deeply grieved her. She thought: "This place needs me. I will stay here." Before she made that decision she could have chosen to stay in a large city and do scientific research or she could have chosen some other place with better conditions. She could even have chosen to retire and lead an easy life in her remaining years. However, this woman comrade, who grew up in an affluent area, came instead to the poorest peasants in Shenjiashan and contributed her scientific and technological knowledge to them, to the people living in the dry areas in Gansu Province. She designed and put into effect a blueprint for eliminating poverty in this mountainous area and bringing prosperity to it. What a lofty sentiment this is! This embodies the spirit of the new generation of intellectuals who have been educated by the party and who are loyal to the party's cause and love the people.

At present, there are still some places in China like the dry mountainous area in central Gansu. Besides their poor natural conditions, these places were not properly transformed in the past. For a long time, there existed a vicious circle that can be described as "the poorer they were, the more their land was subject to reclamation; the more land that was reclaimed, the poorer they became." Peasants in these places could not procure a decent livelihood. The party and the people's government show much solicitude for the people in these places and transfer large quantities of relief grain, funds and materials almost every year to these places and even provide potable water in times of serious drought. However, providing relief is not, after all, a radical measure. The fundamental assistance to the people in these places should be the taking of steps to transform their poor natural conditions in a suitable way and to gradually improve the ecological environment there so as to restore and develop agricultural production. The people in those areas eagerly hope that scientific and technological workers will lead them to struggle against nature.

That is what Wang Suxiang has done. Filled with ardor and sincerity, she brought scientific knowledge to poor Shenjiashan and worked together with peasants there to seek methods for turning vicious circles step by step into benign circles. Now, they have achieved initial results and some useful experiences. By taking the problems that urgently need to be solved in production as her scientific research project, Wang Suxiang links her own ideal and career closely with the desire of the peasant masses. This is the most valuable spirit of our scientific workers and this ideal is the most magnificent and lofty one.

Nowadays, the vast number of peasants are expecting that scientific and technological workers will come among them and solve various problems in production together with them. We hope that more experts in agriculture and animal husbandry and scientific and technological workers who work in mountainous areas will follow the example of Wang Suxiang and go to the forefront of agricultural production in the mountainous areas where difficulties exist, seek ways of developing mountainous areas and create new situations in the development of mountainous areas.

Border Areas Need Experts

HK230629 Beijing RENMIN RIBAO in Chinese 21 Nov 82 p 4

[Commentator's article: "Strengthen the Building Up of the Ranks of Scientific and Technological Workers in Border Areas"]

[Text] The border and remote areas of our country, including the whole of Nei Monggol, Xizang, Gansu, Qinghai, Ningxia and Xinjiang and parts of Heilongjiang, Jilin, Guangxi, Sichuan, Guizhou and Yunnan constitute 64 percent of our country's territory and are inhabited by 11 percent of our population, and many minority nationalities. These areas possess rich natural resources and great potential for developing production. Their strategic position is very important. A rapid development of the economy, science and culture in these areas is of great significance to the recovery of our country's economy, the consolidation of our national defense and the strengthening of the unity between various nationalities.

The construction of these areas requires all kinds of scientific and technical workers. At present, the ranks of scientific and technical workers in these areas are very weak and we are a long way from being able to tap the great potential of economic construction and fulfill the heavy tasks there. These areas have more than 75 percent of our country's forest and waterpower resources and 60 percent of the total number of domestic animals in our country. They have a great variety of industrial crops and a great part of the mineral deposits of our country. However, the number of scientific and technical workers in these areas constitutes less than 10 percent of the nation's total scientific and technical work force. In Qinghai Province, one of the four largest livestock breeding areas, there is, on the average, only one scientific and technical worker for 200,000 mu of grassland. In Yunnan Province, one of the major forest areas in our country, there is, on average, only one forestry scientific and technical worker for 150,000 mu of forest. This is a widespread phenomenon in all these border and remote areas. In order to create a new situation in economic and cultural construction in these areas, we must vigorously strengthen the building up of the ranks of scientific and technical workers there.

From a long-term point of view, we must vigorously raise economic and cultural levels in in these areas and, on this basis, build up the ranks of scientific and technical workers who are minority and Han nationality residents in these areas. These ranks will gradually come to shoulder the main responsibility for economic and cultural construction in these areas. In order to achieve this aim, all these areas must begin by paying great attention to basic education -- middle and primary school education -- in order to raise the scientific and educational level of the people of all nationalities there. They should select some of these people and train a large number of scientific and technical workers. At the same time, they should train -- in a planned manner -- the existing 80,000 minority nationality scientific and technical workers, focusing on training those related to key fields in order to gradually raise their level of competence. None of these measures, however, can bring about many results in a short time. At the present stage, we must simultaneously stress properly doing work concerning the scientific and technical workers who have been sent from the coastal and inland areas to support the border areas. Since the founding of the PRC, batch after batch of professionally competent scientific and technical workers have responded to the party's call and gone from the coastal and inland areas to the border areas. A fairly large proportion of the hundreds of thousands of all kinds of scientific and technical workers working in the border and remote areas are those who have come from other areas. Together with the minority nationality scientific and technical workers, these workers from the coastal and inland areas constitute the scientific and technical force developing the border and remote areas. Under very difficult conditions, these people have made great contributions to construction in these areas.

However, in the past few years, owing to various reasons, some scientific and technical workers there were unwilling to stay and work in these areas and vied with one another to transfer to the big and medium-sized cities of the coastal and inland areas. This has already had an adverse influence on the development of the economic and cultural causes there. We should gradually formulate, on the basis of investigation and study, a set of policies to attract scientific and technical workers to come and work in these areas and give play to their initiative and professional competence. These policies should also ensure that when these workers become old, they can return to their home areas. Thus we will be able to rely on our policies, attract personnel and stabilize the work force.

As our country's territory is very large and the conditions in various border provinces and regions differ greatly, it is bound to take quite a long time for the central authorities to formulate a set of unified policies. At present, these border and remote provinces and regions should promptly do whatever they can in accordance with the unified principle of the central authorities. For example, in some border and remote provinces and regions scientific and technical workers are not willing to stay because the policies related to intellectuals have not been satisfactorily implemented. The scientific and technical workers there suffer political discrimination. They cannot give play to their initiative in their work and are not properly taken care of. This improper practice of looking down upon science and technology and neglecting scientific and technical workers is very harmful to construction in the border and remote areas and must be immediately overcome. Some of the work of implementing the policies related to intellectuals does not incur any expense. It can be done immediately if the leadership really pays attention to it. Some of this kind of work does not cost much and the key to doing the work well lies in appropriate arrangement. Of course, some of this work does incur considerable expense. Giving relatively favorable treatment to the workers in the border and remote areas requires unified arrangement by the state and localities. This problem will be solved step by step. At present, all localities are perfectly able to formulate relevant policies to solve those problems not requiring any specific funds allocated by the state. These problems include transferring separated husbands and wives to work in the same area, giving leave and providing travel assistance for these workers to visit their families, helping them to return to their hometowns when they retire and giving their children preferential treatment regarding education and employment.

Supporting the border and remote areas is the bounden duty of the coastal and inland provinces and municipalities. These provinces and municipalities should consciously set up long-term support relationships with specific border provinces and regions. They should provide them with different forms of assistance such as employing specialists to hold concurrent posts in border and remote areas, organizing people to give lectures and work for a short time there, offering technical cooperation and helping in personnel training.

As far ago as the initial period after the founding of the PRC, we succeeded in establishing among the broad masses of people, especially the youths, a tradition of regarding supporting the border areas and going to these areas to settle down and help develop them as a glorious deed. Now the modernization cause of border and remote areas is calling even more urgently for all kinds of workers. We must vigorously restore and develop this glorious tradition and enable the scientific and technical work force in our border and remote areas to grow rapidly.

TELEVISION COVERAGE OF CPPCC OPENING REPORTED

HK010251 [Editorial Report] Beijing Domestic Television Service in Mandarin at 1100 GMT on 24 November carries a 10-minute filmed report on the 24 November opening of the Fifth Session of the Fifth CPPCC National Committee in the Great Hall of the People in Beijing.

The film opens with a long shot outside the Great Hall of the People. After a medium shot of several Chinese and foreign reporters there is a long shot of the rostrum where unidentified people are seated. This is followed by a medium shot of Deng Xiaoping walking toward his seat on the rostrum. Deng waves to people in the auditorium. Ulanhu and Liu Lantao are then shown following Deng Xiaoping and walking toward their seats on the rostrum. Another medium shot shows other CPPCC leaders walking or taking their seats in the front row of the rostrum. As Deng's arrival is shown, the announcer in the voice-over says: "Attending the opening ceremony are Deng Xiaoping, chairman of the CPPCC National Committee; and Ulanhu, Liu Lantao, Lu Dingyi, Li Weihan, Xu Deheng, Kang Keqing, Wang Shoudao, Pagbalha Geleg Namgya, Zhou Jianren, Zhuang Xiquan, Hu Ziang, Rong Yiren, Hu Yuzhi, Wang Kunlun, He Changgong, Xiao Ke, Cheng Zihua, Yang Xiufeng, Bao Erhan, Zhou Peiyuan, Qian Changzhao and Dong Qiwu, vice chairmen of the CPPCC National Committee."

The camera then zooms in and pans to show all those present on the rostrum and the CPPCC members who are seated in the front rows in the main auditorium of the hall. The first close-up shot is of Deng Xiaoping, who is seated at the center of the front row. Deng says: "Members, the Fifth Session of the Fifth CPPCC National Committee is now declared open. [applause] All rise. Play the national anthem." After this, there is a medium shot of Ulanhu and Liu Lantao standing on either side of Deng and NPC Standing Committee Vice Chairman Hu Juewen is seen in the second row standing behind Deng. A military band is seen and heard playing the national anthem.

This is followed by another close-up shot of Deng, who says: "Now let us come to the various items on the agenda. 1. Discuss the agenda and schedule of this session. The draft agenda of the 5th Session of the 5th CPPCC National Committee was discussed and approved at the 21st session of the Standing Committee of the 5th CPPCC National Committee. Because of lack of time, the Standing Committee did not discuss the draft schedule. We now ask the session to discuss it. According to our usual practice, this session and the NPC session are held simultaneously. During this session, all CPPCC National Committee members will attend the Fifth Session of the Fifth NPC as observers and listen to a report on the drafting of the revised constitution, a report on the Sixth 5-Year Plan and other reports. All discussions in this session will be held in groups. Members, if you have any opinions on the draft agenda and the draft schedule, please express your opinions." This is followed by several long and medium shots of people in the auditorium and on the rostrum putting up their hands. According to the announcer, the show of hands means that the participants in the session unanimously adopted the draft agenda and the draft schedule as well as the namelist of the motions examination committee members.

Another close-up shot shows Deng saying: "Now we come to the third item on the agenda. We now ask Comrade Liu Lantao, vice chairman of the Committee for the Revision of the CPPCC Constitution, to explain the draft of the revised CPPCC Constitution." The camera pans to show Liu Lantao while he is reading.

Deng Xiaoping is then shown in a close-up shot saying: "Now we come to the fourth item on the agenda. We now ask Vice Chairman Hu Ziang to report on the work of the Standing Committee of the Fifth CPPCC National Committee." Hu Ziang is then shown reading the report.

After Hu Ziang's report, Deng Xiaoping is shown in a close-up shot saying: "This session is the last session of the Fifth CPPCC National Committee. Over the past 5 years, particularly since the 3d Plenary Session of the 11th CPC Central Committee, the United Front work and the work of the CPPCC have developed greatly. A vigorous situation has appeared. Our United Front has expanded on an unprecedented scale, comprising not only all socialist laborers but also patriots who support socialism and those patriots who support the unification of the motherland. It is the broadest patriotic United Front. It has a brilliant and bright prospect. We must adhere to the policy of long-term coexistence and mutual supervision and the principle of treating each other with all sincerity and sharing weal and woe, strengthening cooperation with all democratic parties, nonparty democratic personalities and all other patriotic friends outside the party, and working together to create a new situation in the socialist modernization of our country, in the patriotic United Front and in the work of the CPPCC."

Immediately after Deng's speech, there is a medium shot of many people applauding on the rostrum. The film ends with a long shot of many CPPCC national committee members applauding in the auditorium.

NPC, CPPCC DEPUTIES ATTEND CONCERT 28 NOV

OW291135 Beijing XINHUA Domestic Service in Chinese 0325 GMT 29 Nov 82

[Excerpts] Beijing, 29 Nov (XINHUA) -- According to a report from XINHUA correspondent Tang Xiaoke, wonderful singing echoed in the CPPCC Auditorium in Beijing on the evening of 28 November. It was punctuated by warm applause from the audience. The Shanghai storytelling and ballad troupe gave an excellent performance for the deputies attending the Fifth Session of the Fifth NPC and the Fifth Session of the Fifth National CPPCC Committee, and let the deputies who come from all parts of the country enjoy this artistic performance from south China.

Among the audience were Ni Zhifu, Deng Liqun, Bo Yibo, Rong Yiren, Zhou Weizhi, Hu Lijiao, Zhong Min and other comrades.

Sponsored by the Ministry of Culture, this is the last performance of the Shanghai storytelling and ballad troupe in Beijing. Showing no regard for their own fatigue, they had visited the Beijing No 2 cotton mill, Beijing University, Qinghua University and other units to entertain the workers, teaching staff and students, in addition to their regular performances in the theater. Their performances were warmly praised by the people in the capital, who hope that the Shanghai artists will come to Beijing more often.

The Shanghai storytelling and ballad troupe will leave Beijing for Tianjin tomorrow.

UN RESOLUTION URGES TROOP WITHDRAWAL FROM DRA

OW300547 Beijing XINHUA in English 0214 GMT 30 Nov 82

[Text] United Nations, November 29 (XINHUA) -- The United Nations General Assembly today adopted by an overwhelming majority a resolution calling for the immediate withdrawal of foreign troops from Afghanistan.

The resolution, the fourth of its kind since Soviet troops invaded Afghanistan in 1978, was approved by a vote of 114 to 21 with 13 abstentions. It once again showed the international community's strong demand for an end to the military aggression and occupation of Afghanistan by the Soviet Union.

The resolution reaffirms the right of the Afghan people to determine their own form of government and to choose their economic, political and social system free from outside intervention, subversion, coercion or constraint of any kind whatsoever.

The document urges all parties concerned to work for the urgent achievement of a political solution, the preservation of the sovereignty, territorial integrity, political independence and non-aligned character of Afghanistan is essential for a peaceful solution of the problem, it says.

It also calls for the creation of necessary conditions which would enable the Afghan refugees to return voluntarily to their homes in safety and honor. It renews its appeal to all states and national and international organizations to continue to extend humanitarian relief assistance, with a view to alleviating the hardship of the Afghan refugees.

The General Assembly expressed its appreciation and support for the efforts and constructive steps taken by the U.N. secretary-general in the search for a solution to the problem. It also decided to include in the provisional agenda of its thirty-eighth session the item entitled "The Situation in Afghanistan and Its Implications for International Peace and Security".

Ling Qing Addresses UN

OW250539 Beijing XINHUA in English 0254 GMT 25 Nov 82

[Text] United Nations, November 24 (XINHUA) -- Chinese permanent representative Ling Qing today urged the U.N. General Assembly to continue to press for the withdrawal of foreign troops from Afghanistan so as to pave the way for a genuine settlement of the Afghan question.

Addressing a plenary meeting of the General Assembly, Ling Qing said: "The crisis in Afghanistan has resulted from a superpower's hegemonist strategy of expanding southward. The question of Afghanistan is, in essence, that of armed invasion against, and military occupation of, a non-aligned Islamic Third World country by a superpower."

He said: The Soviet invasion and occupation of Afghanistan "have also wantonly trampled upon the U.N. Charter and the norms of international relations and seriously jeopardized peace and security in South Asia, the Gulf region and the world at large."

He censured the Soviet Union for refusing to withdraw from Afghanistan in compliance with the U.N. resolution. On the proposal put forward by the Babrak Karmal regime which the Soviet Union describes as a "sound basis" for a political settlement of the Afghan question, Lirg Qing said: "The political settlement called for by this proposal is, in effect, still based on the fait accompli created by foreign invasion and designed to legitimize that invasion. "There does exist a basis and opportunity for a political (?solution) of the Afghan problem, and it is to be provided by the strict implementation of the correct principles contained in the relevant resolutions of the U.N. General Assembly as well as the summit meeting of the Islamic countries and the nonaligned foreign ministers' meeting. Namely, the immediate and unconditional withdrawal of all foreign troops from Afghanistan, which will enable the Afghan people to exercise their right to self-determination without external interference, and the restoration of Afghanistan's independence and nonaligned character," he continued. "The grave situation in Afghanistan resulting from foreign intervention cannot but cause grave concern to China. We hope that an early and equitable settlement of the Afghan crisis can be achieved so that an end could be put to the suffering of the Afghan people and peace and stability restored to South-west Asia," he said.

He stressed that "the prerequisite for any political settlement must be the withdrawal of foreign troops." "The Chinese delegation wishes to reaffirm that after the Afghan issue is settled in accordance with the principles set forth in the U.N. resolutions, China is ready to join other countries concerned in an international guarantee for non-interference, by whatever means, in the internal affairs of Afghanistan and non-occupation or use of Afghan territory to violate the independence and sovereignty of any other state in the region." He added [words indistinct] that the Chinese delegation is in favor of the [word indistinct] resolution cosponsored by Pakistan and 44 other Third World countries, "The Situation in Afghanistan and Its Implications for International Peace and Security", which reaffirms the basic principles of the three previous resolutions of the General Assembly. He proposed that the (?General) Assembly consider and adopt it.

PAKISTAN TIMES Hails Vote

OW020646 Beijing XINHUA in English 0149 GMT 2 Dec 82

[Text] Islamabad, December 1 (XINHUA) -- "PAKISTAN TIMES" in an editorial today hailed the adoption of the resolution on Afghanistan at the 37th session of the U.N. General Assembly as a reflection of "the stance consistently taken by Pakistan" on the Afghan problem. The votes that endorsed the resolution, the editorial said, "have been cast to uphold the U.N. Charter that obliges the member states to refrain in their international relations from the threat or use of force against the sovereignty, territorial integrity and political independence of any states." The editorial said: "Pakistan cannot keep a low profile on the issue and allow it to stagnate simply because it cannot indefinitely offer shelter and succour to the 2.8 million Afghan refugees now exiled on its soil." "The refugees can return home only if the conditions outlined in the U.N. resolution are met by the parties concerned," it stressed.

REAGAN BEGINS LATIN AMERICAN TOUR 30 NOV

OW010837 Beijing XINHUA in English 0708 GMT 1 Dec 82

[Text] Washington, November 30 (XINHUA) -- U.S. President Ronald Reagan left here this morning to begin his 5-day Latin American trip to Brazil, Colombia, Costa Rica and Honduras.

Before his departure, Reagan said: "I have long held that one of the highest priorities of this administration would be to improve our relations with our neighbors in this extraordinary hemisphere." "Our trip is an opportunity to demonstrate first hand our concern for our neighbors," he added.

This shows the main purpose of his trip is to heal the ill feelings among the Latin Americans caused by U.S. support for Britain during the British-Argentine war over the Malvinas (Falkland) Islands.

Some Latin American governments have reportedly sought to maintain a distance from the United States following its involvement in the Malvinas (Falkland) conflict.

Observers here believed that Reagan will also discuss with leaders of the four Latin American countries their serious national economic difficulties and the U.S. role in the region.

Latin American governments have reportedly been blaming the United States for high interest rates which, they held, had aggravated their financial and economic problems, and for the U.S. protectionist measures against Latin American commodities.

Reagan acknowledged in his departure statement that "The steps we all need to take to get our domestic economies back on the path to growth" was one of the critical issues "we certainly have a lot to discuss."

But a government official made it clear earlier that "This is not a trip designed to produce spectacular new assistance programs for any country."

Political analysts here have paid special attention to Reagan's visit to Costa Rica and Honduras as well as his scheduled talks with provisional President Alvaro Magana of El Salvador in San Jose, Costa Rica, and with President Efrain Rios Montt of Guatemala in San Pedro, Honduras.

This is because Central America is now in a great turmoil, and the United States has been engaged in a "covert war" against Nicaragua by training and supporting the Nicaraguan exiles in Honduras, while increasingly meddling in the civil war in El Salvador.

An article in today's NEW YORK TIMES accused the Reagan administration's Latin American policy of "fueling the arms race in Latin America."

"The Reagan administration by using Honduras to wage its 'secret war' against Nicaragua, by discouraging negotiations in El Salvador, by abandoning neutrality in the Falklands war, and by actively seeking to increase arms sales to Latin America in effect has approved military solutions to regional conflicts," the article said.

Arrives in Brazil

OW011214 Beijing XINHUA in English 1203 GMT 1 Dec 82

[Text] Brasilia, November 30 (XINHUA) -- U.S. President Ronald Reagan arrived here tonight to begin his 3-day visit to Brazil, the first stop in his 4-nation Latin American tour.

Reagan was greeted at the airport by Brazilian President Joao Figueiredo and Foreign Minister Ramiro Saraiva Guerreiro.

In his welcome speech, President Figueiredo expressed the hope that the visit will promote the understanding and cooperation between the two countries.

The visit took place when Brazil was tormented by economic difficulties, particularly by its huge foreign debts and troubled trade relations with the United States.

In an interview before his departure from Washington, Reagan told three Brazilian newspapers that the aim of his visit is to strengthen bilateral relations, reexamine the existing problems between the two countries and explore the possibility of bilateral relations.

During the visit, Reagan is scheduled to have two rounds of talks with President Figueiredo. He will go to Sao Paulo on December 2 and fly to Colombia the following day.

The Brazilian Foreign Ministry has announced that no agreement or specific accord will be signed at the end of Reagan's visit.

U.S. OPPOSES REDUCTION OF TROOPS IN EUROPE

OW010939 Beijing XINHUA in English 0701 GMT 1 Dec 82

[Text] Washington, November 30 (XINHUA) -- The U.S. Government today warned against congressional proposals to reduce the number of American troops in Europe, indicating that the proposed cuts would affect U.S. interest and a unified Western alliance, and allow the Soviet Union to exploit the situation.

The administration is concerned about the Senate version of the proposed 1983 appropriations act which called for the reduction by 18,900 troops of the American force planned for the end of fiscal year 1983, the elimination of funds to procure heavy equipment for prestocking at two sites provided by Belgium and the Netherlands, the elimination of the American portion of the funding for 93,000 German reservists and cuts in funding for the ground-launched cruise missile.

Testifying before the Senate Foreign Relations Committee, Under Secretary of State Lawrence Eagleburger said that "U.S. interests cannot be insulated from events across the Atlantic." He said U.S. alliance with other Western countries is "vital to our nation's security and prosperity." "We cannot retreat to a fortress America, nor safely disengage from European affairs," he added.

In addition to the fact that the United States and Western Europe are trading and political partners, he said, "Western Europe is quite literally our first line of defense. It is the center of our global competition with the Soviet Union and by far the most alluring object of Soviet ambitions."

Pointing out that Soviet foreign policy has become "more assertive and aggressive," he said, "If they (the new leadership in Moscow) see an America drawing inward, a demoralized Western alliance, and our European partners in doubt about the U.S. commitment, their incentive to act with greater restraint will be diminished,"

Talking of the effects of a possible enacting of the force reduction provisions, Eagleburger said U.S. allies would interpret these cuts "as the beginning of a more general American retreat from Europe."

"The Soviets would undoubtedly try to exploit the inevitable doubts and fears of the Europeans," he said. "Dividing us from our allies and pushing us out of Europe are, of course, central goals of Soviet foreign policy." Besides, he said, reductions, especially reductions in the number of American troops in Europe, would send the "worst possible signal" to the European public "about the importance of a strong defense" and unilateral U.S. troop withdrawals would "damage prospects for arms control."

U.S. OFFERS ADDITIONAL MILITARY AID TO TAIWAN

OW020237 Beijing XINHUA in English 0220 GMT 2 Dec 82

[Text] Washington, December 1 (XINHUA) -- The Reagan administration has offered to provide another 97 million dollars of military vehicles for Taiwan in addition to the previous decision to extend the agreement on co-production of F-5E aircraft in Taiwan which was announced immediately after the Sino-U.S. joint communique was released in mid-August.

In a notification to the U.S. Congress, made public yesterday, the U.S. Defense Department said that it was to send a "letter of offer" to the Coordination Council for North American Affairs for the sale of 164 M113A2 armored personnel carriers, 72 M125A2 mortar carriers, and 31 command post vehicles. The estimated cost of this sale is 97 million dollars. "These vehicles will be used by Taiwan to equip armored units," the notification said. "The sale of this equipment and support will not affect the basic military balance in the region," it asserted.

According to the U.S. legality procedure, the U.S. Congress has 30 days to consider this proposal and the "letter of offer" would be delivered then if not objected by the congress.

This new deal was projected for the current fiscal year 1983, a Defense Department press officer said today.

RENMIN RIBAO RAPS PRAVDA EDITOR AFANASYEV

HK020756 Beijing RENMIN RIBAO in Chinese 2 Dec 82 p 6

["International Jottings" by Cun Shu [1317 3219]: "How Can You Gain?"]

[Text] Afanasyev, chief editor of "PRAVDA," recently told American reporters that the Soviet Union's continued presence in Afghanistan was "a great waste of manpower and materiel" which "could not yield any good result" and was the root of "international irritants." These words acknowledge that the Soviet Union has worked fruitlessly, with losses outweighing gains, in its invasion of Afghanistan. They merit attention.

Afanasyev hoped for a "political solution" to the Afghan issue. Actually, there is nothing difficult about this, nor would anyone oppose it. If Soviet troops withdraw from Afghanistan, the Afghan people will be able to decide their own destiny without external interference. Is this not a "political solution?" However, Afanasyev actually demanded that the so-called "problem of an undeclared war" against Afghanistan" be solved first. This gets us back to square one again. People recall that the pretext given for the Soviet invasion of Afghanistan 3 years ago was the so-called existence of "external aggression" against Afghanistan. Yet who but the Soviet Union has been waging "undeclared war" in Afghanistan for the past 3 years? Afanasyev wants to get out of the mess without discarding the pretext for invading Afghanistan. How can you have both the fish and the bear's paw?

JAPAN'S NAKASONE TELEPHONES ZHAO ZIYANG 1 DEC

OW011534 Beijing XINHUA in English 1501 GMt 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- The new Japanese Prime Minister Yasuhiro Nakasone from Tokyo called China's Premier Zhao Ziyang at 5:30 p.m. today to express his willingness to further develop Japan-China friendship, according to the Chinese Ministry of Foreign Affairs.

Nakasone said it is one of "the pillars of Japan's foreign policy to develop friendly and stable relations between Japan and China."

Zhao Ziyang thanked Prime Minister Nakasone for his phone call and congratulated him on his becoming Japan's prime minister, the Foreign Ministry said.

Nakasone conveyed the resigned Prime Minister Zenko Suzuki's greetings to Zhao. He said Suzuki expressed his thanks for the warm reception given to him during his China visit two months ago. Premier Zhao asked Nakasone to convey his regards to Suzuki.

Noting that this year is the 10th anniversary of the normalization of diplomatic relations between China and Japan, Premier Zhao said: "In the past 10 years, China-Japan relations have developed satisfactorily."

Premier Zhao said he hoped that the friendly relations and cooperation between the two countries will grow on the present basis after Nakasone assumes the office of prime minister. "The Chinese Government is willing to make common efforts for this purpose together with the Japanese Government under the leadership of Prime Minister Yasuhiro Nakasone," he said.

According to the Foreign Ministry, the Japanese prime minister said he shares converging views with Premier Zhao on the development of Japan-China relations. Nakasone said conditions are favorable for Sino-Japanese relations marked by timeliness, topographical advantages and harmony between the peoples. He said he hoped to work for the further development of friendly relations and economic cooperation between the two countries.

JAPAN'S NAKASONE RECEIVES PRC ENVOY, VIEWS TIES

OW301251 Beijing XINHUA in English 1211 GMT 30 Nov 82

[Text] Tokyo, November 30 (XINHUA) -- Japanese Prime Minister Hasuhiro Nakasone told Chinese Ambassador to Japan Song Zhiguang here today he will continue to work for Japan-China friendship and for developing relationship of mutual trust between the two countries.

Song Zhiguang extended his congratulations to the new prime minister and thanked him for his meeting him soon after he took office.

Prime Minister Nakasone said Japan will not change its policy towards China although the Cabinet has been reshuffled.

He said he will continue to work for the development of friendship and economic cooperation between the two countries.

Recalling his three visits to China since 1954, Nakasone asked the Chinese ambassador to convey to the Chinese Government and friends his wish that Japan and China "should develop the relationship of mutual trust and economic cooperation."

JAPAN'S FOREIGN MINISTER DISCUSSES POLICIES

OW281455 Beijing XINHUA in English 1118 GMT 28 Nov 82

[Text] Tokyo, November 28 (XINHUA) -- Foreign Minister Shintaro Abe said Saturday the Japanese Government will develop a diplomacy based on the principles that Japan is an Asian country and that "Japan-U.S. relations are the axes of its foreign policy."

In an interview with Japanese reporters yesterday, the new foreign minister said the diplomacy of the new government led by Prime Minister Yasuhiro Nakasone will give priority to deepening relations of trust with the United States on the basis of the Japan-U.S. security treaty.

Referring to the frictions caused by Japan's huge trade surplus with the United States, Shintaro Abe said that the two packages of market opening measures announced in 1981 and earlier this year have been well received by the United States.

Asked about the relations between Japan and the Soviet Union, he said the Japanese Government would maintain its demand for the return of Japan's four northern islands occupied by the Soviet Union. The Japanese Government would carefully watch the attitude of the Soviet Government towards Japan, he added.

As for the concern shown by the other Asian countries about the revival of militarism in Japan, the foreign minister siad that the charge is "groundless."

He cited Japan's basic defense policy based on its war-renouncing constitution.

JAPAN'S EDUCATION MINISTER DISCUSSES TEXTBOOKS

OW261929 Beijing XINHUA in English 1849 GMT 26 Nov 82

[Text] Tokyo, November 26 (XINHUA) -- Japan has decided to take a step forward to solve the history textbook issue.

In the 1981 authorized school history textbooks, Japan's aggression against other Asian countries including China and Korea in World War Two was whitewashed as an "advance," which met strong protests.

Education Minister Heiji Ogawa told a press conference here Wednesday that new criteria for screening textbooks will be employed to improve the concrete wording of the textbooks now already in use.

Ogawa said the new textbook screening standards will become effective this year. However, he said, no errata will be made to the textbooks approved in 1981. But he said that the new standards will be applied to the textbooks to be revised in 1983, one year ahead of schedule.

He reiterated Japanese adherence to the Japanese-Chinese joint communique signed in 1972 when the two countries normalized diplomatic relations.

Ogawa said the Education Ministry considers it extremely important to respect for the spirit upheld by the Japan-China joint statement and work hard to promote mutual understanding and friendly cooperation with neighboring countries.

He demanded that schools and education departments work in light of the spirit of international understanding and coordination with Japan's Asian neighbors and other countries. Observers here believe Ogawa's announcement Wednesday is a further step towards the correction of mistakes in the textbooks. Chief Cabinet Secretary Kiichi Miyazawa said last August the Japanese Government would heed the amendment of the controversial history textbooks but he didn't say when and how.

Both Ogawa's talk and the newly revised textbook screening standards will be carried in the "Education Bulletin" of the Education Ministry and distributed to schools and education committees throughout Japan.

Ogawa revealed the new content in the revised textbook screening standards:

"Due consideration should be given in light of international understanding and coordination when dealing with facts and phenomena in connection with Asian neighboring countries in modern and contemporary history."

Now that Ogawa's speech was published, observers held the Japanese Government should keep its word and earnestly correct the mistakes in the history textbooks.

BO YIBO MEETS JAPANESE TRADE DELEGATION

OW011618 Beijing XINHUA in English 1544 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- State Councillor Bo Yibo met here this afternoon with a delegation from Japan Association for the Promotion of International Trade ledby Shigeichi Koga, vice-chairman of the association.

Bo Yibo briefed the Japanese guests on China's Sixth Five-Year Plan for economic construction and expressed the wish for further strengthening Sino-Japanese cooperation in economy and trade.

Wang Yaoting, chairman of the China Council for the Promotion of International Trade, was present at the meeting.

JAPANESE CULTURAL EXCHANGE GROUP VISITS PRC

Meets Deng Yingchao

OW231958 Beijing XINHUA in English 1834 GMT 23 Nov 82

[Text] Beijing, November 23 (XINHUA) -- Deng Yingchao, vice-chairman of the National People's Congress Standing Committee and honorary president of the Chinese People's Association for Freindship With Foreign Countries, met this evening with a delegation from the Japan-China Cultural Exchange Association led by its Chairman Yasushi Inoue.

Deng Yingchao said Yasushi Inoue and the others present had worked for Sino-Japanese friendship for nearly 30 years. "I express thanks for this. The friendship between the two countries will be long-standing. Non-governmental exchanges will play an important role in the enhancement of our relations," she said. She said she hoped to see cultural exchanges grow.

Inoue said: "All of us are very excited to be received by Vice-Chairman Deng in Beijing. We shall carry out our forerunners' efforts for Japan-China friendship, and work actively to promote it." After the meeting, Wang Bingqian, president of the Chinese People's Association for Friendship With Foreign Countries, gave a banquet in their honor. The delegation arrived this afternoon as the guests of the Chinese People's Association for Friendship With Foreign Countries.

Meets Liao Chengzhi

OW270807 Beijing XINHUA in English 0747 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- Liao Chengzhi, vice-chairman of the National People's Congress Standing Committee, met with a delegation from the Japan-China Cultural Exchange Association led by its Chairman Yasushi Inoue in the Great Hall of the People here today.

ZHAO HOLDS TALKS WITH BANGLADESH'S ERSHAD

Beijing Reports Talks

OW281210 Beijing XINHUA in English 1108 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- Premier Zhao Ziyang held talks here this morning with H.M. Ershad, president of the Council of Ministers of Bangladesh.

It is learned that the two leaders exchanged views on international issues of mutual concern and on bilateral relations in an atmosphere of cordiality and harmony.

Explaining Bangladesh foreign policy, H.M. Ershad said that his country works for the maintenance of world peace and hopes to see comprehensive and thorough disarmament. He called for the withdrawal of foreign troops from Afghanistan and Kampuchea so as to let the people there decide their own destinies. He reiterated that Bangladesh wants to foster relations of understanding, trust and goodwill with neighbouring countries. He once again voiced support for Nepal's proposal of making Nepal a zone of peace.

Discussing the international situation, Zhao Ziyang said that superpower contention for world hegemony remains the root cause of the tense and turbulent situation in the world today. Therefore the maintenance of world peace calls for opposition to hegemonism. China will continue to strengthen unity with other Third World countries and their people and join all countries and people that love peace and uphold justice in the struggle against hegemonism and for world peace.

The Chinese premier showed appreciation of Bangladesh efforts to promote regional cooperation in South Asia. He expressed the hope that countries in South Asia, big or small, will treat each other as equals, live in friendliness and develop regional cooperation among them. This will promote the social development of these countries and help maintain peace and stability in the region as well.

Zhao Ziyang said that China and Bangladesh are in agreement on a large number of important international issues. He paid tribute to Bangladesh for adhering to principle and upholding justice on the Afghan and Kampuchean problems.

The two leaders expressed satisfaction at the smooth development of the friendly cooperation between China and Bangladesh in political, economic and other fields over the past few years. They were confident that such cooperation will continue to expand in years to come.

Taking part in the talks on the Bangladesh side were Foreign Minister A.R. Shamsud Doha, Minister of Social Welfare and Women's Affairs Shafia Khatun, Ambassador to China C.M. Murshed, Major General A. Mannaf and additional Foreign Secretary Reaz Rahman.

On the Chinese side were Foreign Minister Wu Xueqian, Advisor to the Foreign Ministry Fu Hao, Deputy Chief of General Staff of the Chinese People's Liberation Army He Zhengwen, Vice-Minister of Foreign Economic Relations and Trade Wei Yuming and ambassador-designate to Bangladesh Xiao Xiangqian.

Talks were also held this afternoon between Chinese Foreign Minister Wu Xueqian and Bangladesh Foreign Minister A.R. Shamsud Doha. They exchanged views on international issues of mutual interest.

Dhaka Notes Talks

BK300515 Dhaka Domestic Service in English 1705 GMT 29 Nov 82

[Text] Chief Martial Law Administrator [CMLA] Lt Gen H.M. Ershad has said his current visit to China has not only been satisfactory but [words indistinct]. He was speaking at a return banquet hosted by him in honor of Premier Zhao Ziyang at the Great Hall of the People in Beijing tonight. The CMLA said one of the fundamental objectives of his visit was to renew and reaffirm the close ties of friendship existing between Bangladesh and China. He said I am happy to say that this objective has been achieved.

About his talks with the Chinese leaders General Ershad said the discussions have been comprehensive, educative and extremely fruitful. The talks, he said, have (?fastened) every aspect of bilateral relations including internal, regional and international (?issues). The utmost cordiality, goodwill and understanding shown during the talks gave testimony to the special relations existing between the two countries. The CMLA referred to Bangladesh government's commitment for the creation of a strong, stable and self-reliant society and noted with satisfaction that his visit has resulted in creating an arrangement enabling China to enter into a long-term economic cooperation with Bangladesh. We eagerly look forward to the operation of the joint economic commission, he added.

About our foreign policy, General Ershad said it is firmly anchored to an independent and principled stand while seeking friendship with all nations. It is on this principle that both China and Bangladesh seek a speedy solution of the problems in the Middle East, Afghanistan and Kampuchea. In this connection, the CMLA referred to the Bangladesh Government's decision to establish diplomatic relations with Democratic Kampuchea whom Bangladesh has already accorded recognition.

General Ershad deeply appreciated the role that China has played in supporting the cause of the Third World in every significant aspect of the current global economic issues. Extending his invitation to Premier Zhao Ziyang to visit Bangladesh, General Ershad expressed the hope that the people of Bangladesh will soon be able to see the Chinese leader in Dhaka.

In reply, Premier Zhao Ziyang said General Ershad's visit to China has made a new contribution to further consolidating and developing Sino-Bangladesh friendship. He said they are highly satisfied at the development of friendly relations between China and Bangladesh and are determined to continue intensive and fruitful cooperation between the two countries in the economic, trade, technological and cultural fields.

The Chinese premier said during General Ershad's visit the two countries have signed a new agreement on economic loan and decided to set up a joint economic committee to promote more friendly cooperation between them. He referred to General Ershad's meeting with General Secretary of the Chinese Communist Party Hu Yaobang and Chairman Deng Xiaoping and said these meetings and talks have consolidated mutual understanding and friendship. The two countries have identical views on a wide range of major international issues. Premier Zhao said China and Bangladesh have similar historical experiences and now face the common cause with a constructive [word indistinct].

Earlier, CMLA Lt Gen H.M. Ershad had an hour-long meeting with Chinese Chairman Deng Xiaoping. Social Welfare and Women's Affairs Minister Dr Shafia Khatun, accompanying the CMLA, had a separate meeting this morning with the vice chairman of the All-China Women's Federation and exchanged views on matters of mutual interest. Foreign Minister A.R. Shamsud Doha, accompanied by some members of the entourage, visited the Great Wall of China this morning.

Bangladesh Paper Hails Visit

OW011740 Beijing XINHUA in English 1604 GMT 1 Dec 82

[Text] Dhaka, December 1 (XINHUA) -- The official newspaper "THE BANGLADESH TIMES", [words indistinct] editorial today Bangladesh and China have come even closer due to Chief Martial Law Administrator Lt. General Hussain Muhammad Ershad's visit to China.

The editorial, entitled "Friendship Strengthened," says "Not only has been a real scope for long-term bilateral cooperation created, the two countries now look forward to bridging their efforts on an international plan for strengthening world stability."

The editorial says it is particularly significant that the two [word indistinct] "have been holding identical views" on important international issues.

The editorial points out that the areas in which Bangladesh and China can cooperate are "really immense."

Ershad Leaves For Hebei

OW301634 Beijing XINHUA in English 1542 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Hussain Mohammed Ershad, President of the Council of Ministers of Bangladesh, left here this morning for a visit to Shijiazhuang. He was accompanied by Fu Hao, adviser to the ministry of Foreign Affairs, to the Hebei provincial capital, a few hundred miles south of Beijing.

Premier Zhao Ziyang went to the guest house to bid farewell to the Bangladesh guests before their departure. Zhao said Ershad's China visit has been very fruitful. Despite its short span, the visit has enhanced mutual understanding and friendship, he said. "I believe the friendly relations existing between our two countries will continue to develop," he said.

Ershad said he was leaving Beijing with " a very pleasant feeling." He said his talks with Chinese leaders were satisfactory, and both sides have a much better understanding of each other's views. "I have no doubt that the friendly relations between our two peoples will increase steadily," he said.

Upon his arrival in Shijiazhuang, Ershad was greeted by Hong Yi, Vice-Governor of Hebei Province. The Bangladesh guests visited an army school where they watched a demonstration of light weapons and inspected domitories.

This evening, Ershad attended a banquet hosted by the Hebei Provincial People's Government.

Ershad Feted in Guilin

OW011612 Beijing XINHUA in English 1551 GMT 1 Dec 82

[Text] Guilin, December 1 (XINHUA)-- Hussain Mohammed Ershad, President of the Council of Ministers of Bangladesh, was guest of honor at a banquet given by the people's governments of the Guangxi Zhuang Autonomous Region and Guilin City.

Zhou Guangchun, vice-chairman of the autonomous region's people's government, and Ershad proposed toasts at the banquet, wishing for continued development of the friendship between the two countries.

The Bangladesh guests, accompanied by Fu Hao, adviser to the Ministry of Foreign Affairs, arrived here this morning. After their arrival, the guests took a cruise on the Lijiang River and visited reed flute cave.

AGRICULTURE-FISHERY DELEGATION VISITS BANGLADESH

OW011608 Beijing XINHUA in English 1536 GMT 1 Dec 82

[Text] Dhaka, December 1 (XINHUA) -- Bangladesh President Assanuddin Chowdhury said Bangladesh and China should further cooperate and exchange experience in agriculture, fishery and animal husbandry to benefit the two peoples.

He added Bangladesh and China have not only cooperated in major international issues but also in developing the two countries.

He made these remarks while receiving Lin Hujia, minister of agriculture, animal husbandry and fishery and leader of the Chinese agricultural delegation, at the presidential house here today.

The president said Bangladesh is proud to have China as her friend and his government and people have always treasured the friendship with China.

He expressed the hope that friendly relations and cooperation between the two countries will be further consolidated and strengthened in the future.

The president expressed his thanks to the Chinese Government for the warm welcome to Hussain Muhammad Ershad, president of the Council of Ministers of Bangladesh, who is now visiting China. He also expressed his satisfaction with the results of the talks held between the leaders of the two countries in Beijing.

Science Pact Signed

OW232003 Beijing XINHUA in English 1852 GMT 23 Nov 82

[Text] Dhaka, November 23 (XINHUA) -- Bangladesh and China signed a protocol here today on scientific and technical cooperation.

Chinese Vice-Minister for Forestry Dong Zhiyong and Secretary of the External Resources Division of the Bangladesh Ministry of Finance and Planning Mafizur Rahman signed the protocol.

Under the agreement, in 1983, Bangladesh will study China's silk industry, mini-hydropower station, bio-gas and renewable energy technology, cottage industries and pottery. China will study Bangladesh's management and utilization of bamboo groves; medium- and small-scale jute and textile enterprises; production, technology and equipment of jute carpet backing; flood control and harnessing of water resources along the lower reaches of the Ganges River; and fishery and aquatic products.

ALBANIA CELEBRATES INDEPENDENCE ANNIVERSARY

OW301038 Beijing XINHUA in English 0740 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Albanian people of all circles held a rally on November 28 in the city of Vlora, where the country's independence was declared, in celebration of the 70th anniversary of independence, according to an ATA report. Albanian Chairman of the Council of Ministers Adil Carcani delivered a speech at the rally. Ramiz Alia, the new president of the Presidium of the People's Assembly, and others attended the rally.

Beijing Embassy Reception

OW291223 Beijing XINHUA in English 1157 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Albanian Ambassador to China Janus Mersini and Mrs Mersini gave a reception at the embassy here this afternoon to mark the 70th anniversary of the independence and 38th anniversary of the liberation and the victory of the people's revolution of Albania. Among the guests at the reception were Qian Qichen, Chinese vice-minister of foreign affairs, Wang Pinqing, deputy to the minister of foreign economic relations and trade, and leading members of other government departments. Foreign diplomatic envoys were also present.

BEIJING RECEPTION MARKS YUGOSLAV NATIONAL DAY

OW242143 Beijing XINHUA in English 1546 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- The 39th anniversary of the founding of the Socialist Federal Republic of Yugoslavia was marked at a reception given here this evening by the Chinese People's Association for Friendship with Foreign Countries. Wang Bingnan, president of the friendship association, and Sava Obradovic, Yugoslav ambassador to China, toasted further development of the friendship between the two peoples. Present at the reception were Qian Qichen, vice-minister of foreign affairs, Li Shuzheng, deputy head of the International Liaison Department of the Chinese Communist Party's Central Committee, and Chi Haotian, deputy chief of the General Staff of the Chinese People's Liberation Army.

Officials of the Yugoslav Embassy and Yugoslav experts and students in Beijing were also present.

QIAO SHI MEETS RCP WORKERS GROUP IN BEIJING

OW291347 Beijing XINHUA in English 1254 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- Qiao Shi, alternate member of the Secretariat and head of the International Liaison Department of the Chinese Communist Party's Central Committee, met here this afternoon with a group of Romanian Communist Party vactioning workers led by Gherghisan Dumitru, first vice-chairman of the People's Council of Dimbovita County.

UN OBSERVES PALESTINIAN SOLIDARITY DAY

OW301223 Beijing XINHUA in English 0710 GMT 30 Nov 82

[Text] United Nations, November 29 (XINHUA) -- The international community today called for an equitable and early resolution of the Palestinian problem at the special meeting to commemorate the international day of solidarity with the Palestinian people.

Opening the meeting, Massamba Sarre (Senegal), chairman of the Palestinian rights committee, said the events in the past few months highlighted more than any event in the past the urgent need for an equitable resolution of the Palestinian problem. He pointed to Israel's invasion of Lebanon and the atrocities committed in the Sabra and Shatilla refugee camps. He stressed that to settle the problem the Palestinian people must be permitted to exercise their inalienable rights in their own independent state, and the security of all states in the area must be guaranteed.

Imre Hollai, the current General Assembly president, pressed for the early solution of the Palestinian problem. A solution to this problem "is one of the utmost urgency if we are to prevent further violence and bloodshed," he said. "As long as the problem of the Palestinian people is not solved, international peace and security will continue to be endangered."

U.N. Secretary-General Javier Perez de Cuellar noted that "the tragic culmination of the events in Lebanon this past summer underlined once more, and with telling poignancy, the urgent need to seek a peaceful solution." He called for the withdrawal of the Israeli forces from the occupied Arab territories and the recognition of the rights of all states in this region to live in peace, including the rights of the Palestinian people to self-determination.

Chairman of the Palestine Liberation Organization (PLO) Yasir 'Arafat in a message criticized the United States for its support to Israel. Its continued military aid to Israel reinforced Israeli intransigence, and the new plan announced by President Reagan needs to be backed by action, he stated. He urged that there must be absolute recognition of the inalienable right of the Palestinian people to self-determination and to an independent state under the leadership of the PLO, its sole, legitimate representative. The revolution would continue until victory, he vowed.

An annual observance of 29 November as the day of solidarity with the Palestinian people was decided by the U.N. General Assembly in 1977 to reinforce the international support to the Palestinian struggle for national liberation and independence.

Zhao Ziyang Message

OW280810 Beijing XINHUA in English 0701 GMT 29 Nov 82

[Text] Beijing, November 28 (XINHUA) -- Chinese Premier ZhouZiyang sent a message to the New York meeting marking an international day of solidarity with the Palestinian people, expressing his sympathy with and support for the Palestinians and other Arab peoples in their just struggle.

The message reads: "On the occasion of the international day of solidarity with the Palestinian people, I wish to extend, on behalf of the Chinese Government and people, our high respects and cordial greetings to the Palestinian people.

"The situation in the Middle East has become increasingly turbulent over the past year. In particular, beginning from 4 June this year, Israeli troops launched an unscrupulous and massive invasion into Lebanon and massacred in cold blood large numbers of innocent Palestinian and Lebanese civilians in an attempt to eliminate the Palestinian armed forces and deny the Palestinian people their national rights. This has aroused strong condemnation by the just opinion of the world. The heroic Palestinian fighters, in defiance of brute force, have waged a valiant struggle, fully demonstrating the Palestinian people's spirit of dedication and their conviction that they will win victory. Their just cause has gained increasing sympathy and support from the international community.

"The Chinese Government and people have always sympathized with and supported the Palestinian and other Arab peoples in their just struggle. Our firm position is that Israel must withdraw from the Arab territories occupied since 1967, including Jerusalem, that the Palestinian people must regain their national rights, including the right to return to their homeland, the right of self-determination and the right to establish a state. I am convinced that under the leadership of the Palestine Liberation Organization headed by Chairman Yasir 'Arafat, the Palestinian people who have stood the test of arduous struggle will close their ranks, strengthen their unity with Arab countries and all the other justice-upholding countries and peoples in the world and continue to win victories in their just fight to regain their national rights."

XINHUA 'Roundup' on Mideast

OW280918 Beijing XINHUA in English 0717 GMT 28 Nov 82

["Roundup: Palestinians Continue Struggle for National Rights" -- XINHUA headline]

[Text] Beijing, November 28 (XINHUA correspondent) -- The Palestinian fighters have shifted the focus of their struggle for the restoration of their national rights to the political and diplomatic front after their withdrawal from Lebanon last August.

The Palestinian people withstood a rigorous test last June when more than 90,000 Israeli troops supported by over 10,000 armored vehicles and hundreds of planes thrust into Lebanon and besieged West Beirut. The isolated Palestinian fighters bravely fought the invaders for more than 70 days. After arduous negotiations with the United States and Israel through Lebanese leaders, the Palestine Liberation Organization (PLO) decided to withdraw from Lebanon in order to preserve its strength. This decision crushed Israel's plot to wipe out the PLO's military strength and write off the national rights of the Palestinian people.

The 35-year-old Arab-Israeli conflict has seen four wars and ten Israeli intrusions into Lebanon. Israel has occupied vast Arab territories, and about four million homeless Palestinians have gone into exile. Under the blessing of the United States, the Begin regime has been obstinately clinging to its policy of aggression and expansion in an effort to annex all occupied Arab territories and bring the neighboring countries under its control.

The past and the present show that the Palestine issue constitutes the crux of the Middle East problem. Unless this issue is solved, there could be no peace in the Middle East. The Arab League summit, which was held in September in Fes, Morocco, adopted a peace plan that decided the common strategy of the Arab countries. The plan suggested that the U.N. Security Council assure coexistence among the countries of the region on the basis of Israeli withdrawal from all Arab territories occupied since 1967 and respect for the right of the Palestinian people. The plan provided a reasonable basis for a just solution to the Palestinian issue. Yasir 'Arafat, chairman of the PLO Executive Committee, held that the success of the Arab League summit is of positive and great significance.

Since early September, 'Arafat has visited eight Arab states, encouraging the PLO fighters there to persist in the struggle and in training. He also discussed strategies with the leaders of these countries. The Palestinians living on the West Bank, Gaza and the Golan Heights have never stopped fighting against the Israeli occupation, combating Israeli expansion and annexation in every way.

In an attempt to gradually annex the West Bank, the Israeli authorities in the occupied West Bank fired five Arab mayors of Gaza and four other towns in the occupied territories last March, thus arousing the local Palestinians' indignation. More than half a million people on the West Bank held demonstrations last September to protest against the massacre of Palestinian civilians in two refugee camps following the withdrawal of the Palestinian forces from West Beirut. Teachers and students from colleges and schools on the West Bank went on strike in protest against the killing of a 15-year-old secondary school student by an Israeli soldier last month. This struggle is still going on.

The Palestinian people's just struggle against Israeli aggression and expansion have won support from the people all over the world. So long as they sum up their experience, both positive and negative, and persist in struggle, they will surely bring their revolution to victory despirte the temporary difficulties and setbacks they have suffered.

RENMIN RIBAO Commentary

HK290756 Beijing RENMIN RIBAO in Chinese 29 Nov 82 p 6

["Short Commentary": "Unite for Struggle and Create a New Situation"]

[Text] Today is the "international day of solidarity with the Palestinian people." Peace-loving people who uphold justice all over the world are expressing support in various ways for the struggling Palestinian people.

The Chinese people take this opportunity to again extend sincere regards to the Palestinian people who are struggling for their national existence, and pledge resolute support for them.

The Palestinian people are heroic people. They have waged an extremely hard and difficult struggle against imperialism and Israeli expansionism for several decades for the sake of recovering their expropriated political rights and rebuilding their homes. Although their struggle has encountered numerous setbacks due to a great disparity in strength, the Palestinian people, who dearly yearn for peace, have certainly not become pessimistic or hopeless; instead they have continually summed up the lessons and continued to unite for struggle. Their will has become still stronger because of the cruelty of the struggle, and their pace has become more in step because of the roughness of the road. The just struggle of a strong and unyielding people like this will certainly gain final victory.

The persistent and dauntless struggle of the Palestinian people has won the high admiration of the world's peoples and the evergrowing support of the international community. The UN General Assembly has on numerous occasions held special debates on the Palestinian issue and has also adopted resolutions demanding that Israeli aggression and expansion be curbed and that the inalienable rights of the Palestinian people be realized. At present, a total and fair solution to the Palestinian problem has become a major issue closely related to peace and stability in the world and in the Middle East. This issue is gaining more and more concern and attention of the people of all countries.

That the Palestinian people have been wandering in strange lands for more than 30 years now is mainly because, with U.S. connivance and protection, the Israeli authorities have stubbornly pushed a policy of aggression and expansion. The Israeli authorities have seized and occupied the homeland of the Palestinian people and large tracts of Arab land. This culminated with the launching of an invasion of Lebanon and carrying out bloody massacres in West Beirut in a vain attempt to strangle the Palestinian people's just struggle. Contrary to their subjective wishes, however, the Palestinian cause is still developing and forging ahead. It has gained still warmer sympathy from peace-loving states and peoples all over the world who uphold justice, while the Israeli aggressors have incurred unprecedented condemnation and opposition at home and abroad. If the Israeli authorities are stubborn to the end, they are bound to eat their own evil fruit.

The Chinese people have always taken the side of the Palestinian people and resolutely supported their just struggle. Although the Palestinian people's just struggle has for the moment encountered difficulty, so long as they strengthen unity, persistently wage struggle, and strengthen ties with the Arab states and the peoples of the world, they will certainly be able to get through the difficulties and create a new situation in their struggle.

RENMIN RIBAO COMMENTS ON ISRAEL, BEIRUT MASSACRE

HK020857 Beijing RENMIN RIBAO in Chinese 2 Dec 82 p 6

["Short Commentary": "The Begin Authorities Can Hardly Evade Responsibility for the Crime"]

[Text] The Israeli judicial commission investigating the Beirut massacre has demanded that Begin and others defend their actions of "neglect and dereliction of duty" in the West Beirut massacre. The truth of this crime plotted by Begin, Sharon and others is gradually coming to light. The facts are these: They took advantage of the discord between cerain people in Lebanon and the Palestinians to deliberately perpetrate this incident, in an attempt to strike at the Palestinian revolutionary forces by making use of others to get rid of their adversaries. The Begin gang of murderers now stand in the dock before just and fair world opinion.

The Israeli investigation commission only said that Begin, Sharon, Shamir and others should bear the responsibility for "neglecting their duties" in the Beirut massacre. This in fact is not going far enough. There was absolutely no "dereliction of duty" or "morality and justice" on the part of the aggressors with regard to their victims. The true essence of the "dereliction of duty" of Begin and company is only that their actions were too stupid and had too many weak points.

At present the Israeli investigation is still going on. It is not hard to predict that Israel's self-investigation will not be able to make public all the facts of the crime, still less pronounce a final, just sentence on it. Still more is it like asking a tiger for its skin to expect the Begin authorities to bow their heads and admit their guilt and receive the punishment they deserve. However, no matter what the results of the investigation are, it is absolutely impossible for Begin, Sharon and company to evade responsbiliity for the Beirut massacre they caused.

UN GENERAL ASSEMBLY DISCUSSES PALESTINE ISSUE

OW011003 Beijing XINHUA in English 0726 GMT 1 Dec 82

[Text] United Nations, November 30 (XINHUA) -- Israel was urged to withdraw from the occupied Arab territories and recognize the Palestinian people's rights to self-determination and independence, when the U.N. General Assembly began its debate on the question of Palestine today.

Massamba Sarre (Senegal), chairman of the committee on the exercise of the inalienable rights of the Palestinian people, said that the Palestinians must be granted their inalienable rights to self-determination and independence, and the security of the countries in the Middle East must be guaranteed. He reiterated that the settlement of the problem must be based on the return of the Palestinians to their homes, their self-determination and independence, the participation of the Palestine Liberation Organization (PLO) on an equal footing with other parties in conferences and deliberaitons on the Middle East, Israel's total withdrawal from the occupied Arab lands and the right of the countries of the region to live in peace.

Faruq Qaddumi, observer from the PLO, condemned Israel for its aggressive and expansionist policy, saying that this policy was solely responsible for the permanent tension in the Middle East. He also called upon the United States to shoulder its responsbility and stop supplying Israel with weapons and funds and to adopt a balanced policy. Referring to U.S. President Ronald Reagan's Middle East proposals, he said that these initiatives were "devoid of the basic components" without which there could be no lasting and comprehensive peace in the Middle East, namely, the recognition of the PLO and its role as the sole legitimate representative of the Palestinian people, the recognition of the rights of the Palestinian people, including their right to establish an independent state on their national soil, and the necessity of a complete and unconditional Israeli withdrawal from Palestine and other occupied Arab territories, including Jerusalem.

Bolivian President Hernan Siles Zuazo called for Israel's withdrawal from all occupied territories and for the creation of a free and sovereign state of Palestine. The Palestine Liberation Organization was the sole legitimate representative of the Palestinian people, he declared.

Ahmad Meguid of Egypt noted that Israel must withdraw from the occupied territories and a Palestinian state must be established. Both the Palestinian people and Israel must have the right to exist and have their security, he added.

Om Pradhan of Bhutan urged Israel to pull out from all the occupied territories and to remove the settlements established in those territories. He asserted that any solution must take into account the recognition of the true status of the PLO by all, and the PLO must be fully involved in the negotiations.

Konstandinos Mousioutas of Cyprus said the question of Palestine was the most dangerous hotbed of crisis in the world, primarily because of Israel's aggressive and expansionist policy and its denial to the Palestinians their rights. Israel must withdraw immediately and unconditionally from all occupied territories, and Jerusalem must be returned to Arab sovereignty, he stressed.

PRC UN Envoy Speaks

OW020453 Beijing XINHUA in English 0230 GMT 2 Dec 82

[Text] United Nations, December 1 (XINHUA) -- Chinese permanent representative to the United Nations Ling Qing today renewed his demand for the withdrawal of Israeli troops from all the occupied Arab territories and the restoration to the Palestinian people of their rights to self-determination and independence.

[Words indistinct] plenary meeting of the U.N. General Assembly, he said that the crux of the Middle East question is the restoration to the Palestinian people of their legitimate national rights and the first step towards easing tension in the region is the immediate, total and unconditional withdrawal of Israeli troops from Lebanon.

He said: "In order to achieve a fair and comprehensive solution to the Middle East question, it is essential that Israel should withdraw from all the Arab territories occupied since 1967, including Jerusalem, that the Palestinian people should recover their legitimate rights, including the right to national self-determination, to return to their homeland and to establish a state of their own, that (?the Palestine Liberation) Organization as the sole legal representative of the Palestinian people should be entitled to participate in all negotiations with a bearing on peace in the Middle East and that all countries in the region should enjoy peace and the right to existence."

He strongly condemned Israel for its serious crimes against the Palestinian and Arab peoples during the past year and expressed the deep sympathy of the Chinese Government and people for the victimized Palestinian, Lebanese and other Arab peoples.

"Israel's audacity to invade Lebanon in open violation of the territorial integrity of a sovereign state and its obstinate persistence in a course of aggression and expansion are attributable to the United States' connivance, shielding and support. The United States has not only provided Israel with powerful military support but has also done everything possible to give it diplomatic protection. Therefore, the United States bears an unshirkable responsibility for the grave consequences of Israel's invasion of Lebanon and the deterioration of the situation in the Middle East," he noted.

"The problem of Palestine has always been the core of the Middle East question. There can be no peace or stability in the Middle East until the Palestinian people have regained their legitimate national rights and a just solution to the Palestine question has been achieved," he stressed.

He acclaimed the eight-point plan presented by [words indistinct] last September at Fes as "a sound basis" for the just and equitable solution [words indistinct] of Palestine and the Middle East.

In conclusion, Ling Qing declared that the Chinese Government and people will unswervingly support the just cause of the Palestinian and Arab peoples and will join all the governments and peoples that love peace and uphold justice in striving to seek a just and reasonable settlement of the Middle East question.

UN SECURITY COUNCIL EXTENDS GOLAN FORCES MANDATE

OW300535 Beijing XINHUA in English 0226 GMT 30 Nov 82

[Text] United Nations, November 29 (XINHUA) -- The U.N. Security Council today decided to extend for another six months the mandate of the U.N. Disengagement Observer Force (UNDOF) dispatched to the Golan Heights, Syria, to separate the Israeli and Syrian forces there.

A resolution to this effect was adopted unanimously by the Security Council this afternoon.

The present six-month mandate is due to expire on November 30, 1982.

'ARAFAT CITED ON MIDEAST, HITS REAGAN, HABIB

OW281106 Beijing XINHUA in English 1100 GMT 28 Nov 82

[Text] Damascus, November 27 (XINHUA) -- The Palestine Liberation Organization (PLO) leader Yasir 'Arafat said Friday that there will be no solution to the Mideast problem nor peace in the region until the establishment of an independent Palestinian state.

Speaking at a memorial service for the late PLO deputy military commander Abu Walid at the Damascus university, 'Arafat pointed out that Ronald Reagan and Menahem Begin planned to solve the Mideast issue by ignoring the PLO and the Palestinian people's national rights. That was pure illusion.

He said that the situation in Lebanon had entered a new stage since the PLO withdrew from Beirut. The PLO must rely on the Palestinian people and the Arab nation to foil all plots, he added.

The PLO leader also repudiated U.S. envoy Philip Habib's idea of weakening the Palestinian forces through their dispersal, saying the PLO had instead obtained nine new revolutionary bases.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Wang Bingqian On 1982 Budget

OW020253 Beijing XINHUA in English 0109 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Chinese Finanace Minister Wang Bingqian said that China's total revenue for 1982 is estimated at 110.69 billion vuan as compared with 108.95 billion yuan in 1981.

This means a reversal of the trend of decline in revenues prevailing in the previous three years, he noted.

Reporting to the Fifth Session of the Fifth National People's Congress here yesterday, Wang said the estimated state revenue for 1982 represents 100.2 percent of the budgeted figure.

According to present estimates, he said, the total expenditure for 1982 reaches 113.69 billion yuan, or 100.2 percent of the budgeted figure. The financial deficit can be kept within the budgeted three billion mark. There is a basic balance between state revenue and expenditure this year, as in 1981, he said.

Of the total state revenue for 1982, taxes amount to 67.95 billion yuan, or 105.2 percent of the budgeted figure: income from economic enterprises 31.1 billion yuan, or 90.4 percent fo the budgeted figure; income from state treasury bonds 4.2 billion yuan, or 105 percent of the budgeted figure.

Wang Bingqian pointed out that the continued improvement of the contry's financial situation in 1982 is a composite result of the steady growth of the national economy in the course of readjustment this year.

This country's gross value of agricultural output in 1982 is expected to rise by five percent over that of last year and the gross value of industrial output is expected to exceed last year's by about six percent.

There is an increasingly plentiful supply of commodities on the market, and prices have remained stable by and large. This ensures the smooth implementation of the 1982 budget, he added.

The continued improvement of China's financial situationin 1982, he said, is closely related to the correct financial and tax policies such as subsidizing the purchasing prices of farm and sideline produce and stabilizing agricultural tax even if output increases, and to the institution of the multiform economic responsibility system in state-owned enterprises.

Of the total state expenditure in 1982, appropriations for capital construction amount to 30.27 billion yuan, or 101.8 percent of the budgeted figure; funds for tapping the potential of existing enterprises, financing their technical transformation and trial manufacturing new products total 6.07 billion yuan, or 112 percent of the budgeted figure; additional allocations of circulating funds account for 2.3 billion yuan, or 95.8 percent of the budgeted figure; expenditures for aid to rural people's communes and other operating expenses amount to 7.65 billion yuan, or 100.5 percent of the budgeted figure; expenditures on culture, education, science and public health work total 19 billion yuan, or 109.6 percent of the budgeted figure; expenditures on national defence and preparations against war account for 17.87 billion yuan, or 100 percent of the budgeted figure.

The finance minister said that investment for capital construction is appropriately increased in 1982. Funds directly appropriated in the state budget are estimated at 1.6 billion yuan above the 1981 outlay, and the increased portion is mainly for building energy, transport and other infrastructural projects.

Funds allocated this year for culture, education, science and public health work are estimated at 1.86 billion yuan more than in 1981. Allocations in this field account for 16.7 percent of the total expenditure this year as against 15.4 percent in 1981.

By the end of this year, he said, the state will have provided jobs for more than five million people in cities and towns. Because more people are employed and the pay of part of the workers and staff is raised, the total payroll this year is 7.6 percent more than last year.

The peasants' income continues to rise this year with the growth of production and the expansion of diversified undertakings following the raise of the purchasing prices of agricultural and sideline products in the previous few years.

Generally speaking, the finance minister said, the implementation of the 1982 state budget has been good. However, he added, problems still exist in economic and financial work.

The economic effectiveness in the spheres of production, construction and circulation is still very low. There has not been much change in the chaotic management in many enterprises. Financial control and supervision is inadequate. The growth of revenues has not been able to keep pace with the increase of industrial production, he noted.

The minister called for redoubled efforts to do a good job and further improve the financial situation.

Draft Budget for 1983

OW020259 Beijing XINHUA in English 0123 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- China's draft budget for 1983 sets total revenue at 123.2 billion yuan and total expenditure at 126.2 billion yuan, 11.3 percent and 11 percent more than the estimated revenue and expenditure for 1982 respectively.

This was announced by Finance Minister Wang Bingqian at the Fifth Session of the Fifth National People's Congress yesterday.

In his report on the draft budget for 1983, Wang Bingqian outlined the guidelines governing the arrangement of budgetary revenues and expenditures for 1982 as:

Continue to implement the policy of readjustment, restructuring, consolidation and improvement of the national economy, promote production, improve economic results, tap new financial resources and increase revenues;

Concentrate adequate financial resources to ensure the construction of key projects in energy, transport and other fields while continuing to bring into play the initiative of all concerned;

Support the development of culture, education, science, public health service and continue to improve the people's living standards on the basis of rational arrangement of expenditures in accordance with the needs and possibilities; and

Do a better job in overall balancing and budget management through constant improvement of work and continue to maintain a basic balance between revenue and expenditure.

The Chinese finance minister said that the increase of revenues for 1983 is to be realized mainly through developing production and improving economic results. This marks a good beginning of gradual expansion of the state financial resources, he noted.

Wang Bingqian gave the breakdown of the budgetary expenditures for 1983 as follows:

(1) Appropriations for capital construction total 36.18 billion yuan, an increase of 5.91 billion yuan over the estimate for 1982.

(2) Funds for tapping the potential of existing enterprises, financing their technical transformation and trial manufacturing new products amount to 6.57 billion yuan, of which funds for the development of technologies and the trial manufacture of new products are 900 million yuan more than in 1982.

(3) Additional circulating funds allocated to enterprises total 2.25 billion yuan, slightly less than the estimate for 1982.

(4) Expenditures for aiding rural people's communes and other operating expenses for agriculture total 7.75 billion yuan, slightly more than the 1982 estimate.

(5) Operating expenses for culture, education, science and public health work total 20.4 billion yuan, an increase of 1.4 billion yuan or 7.4 percent over the 1982 estimate.

(6) Expenditures on national defence and preparations against war amount to 17.87 billion yuan, the same as the estimate for 1982.

(7) Administrative expenses come to 8.5 billion yuan, an increase of 500 million yuan over the estimate for 1982.

(8) Funds for the disabled or families of the deceased and social relief funds amount to 2.4 billion yuan, and funds for creating jobs for school-leavers in cities and towns 380 million yuan, both on a par with the estimates for 1982.

(9) Expenditures for repaying the principal and interest of foreign loans total 5.1 billion yuan, an increase of 130 million yuan over the 1982 estimate. By the end of 1983, the total sum of outstanding foreign loans borrowed as part of the state revenue will be estimated at some four billion U.S. dollars.

(10) General reserve funds amount to two billion yuan.

Wang Bingqian said that the estimated expenditure in the 1983 draft budget exceeds the estimated revenue by three billion yuan. Efforts will be made to reduce that deficit in the course of implementing the budget, he added.

In order to ensure a satisfactory implementation of the 1983 budget, the finance minister set out the following measures:

Promote production and tap potential so as to increase state revenue.

Reorganize and improve the management of financial affairs in the state-owned enterprises.

Maintain an appropriate relationship between national construction and improvement of the people's livelihood and give attention to both.

Push ahead the reform of the financial and tax systems and step up legislation related to financial work; and tighten financial control.

Television Covers 30 Nov Meet

HK020734 [Editorial Report] Beijing Domestic Television Service in Mandarin at 1100 GMT on 30 November carries a 10-minute filmed report on Premier Zhao Ziyang delivering a report on China's Sixth 5-Year Plan (1981-85) on 30 November at the Second Plenary Session of the Fifth Session of the Fifth National People's Congress which is being held in the Great Hall of the People in Beijing.

The film opens with a long shot of many deputies to the NPC sitting in the main auditorium of the hall. It then gives a medium shot of NPC Standing Committee Vice Chairman Peng Zhen and Premier Zhao, who are seated in the front row of the rostrum of the auditorium and who are seen speaking to one another. Several people, including NPC Standing Committee Vice Chairmen Wei Guoqing, Hu Juewen and Ulanhu are seen walking toward or taking their seats on the rostrum. The announcer says that "executive chairmen of today's session are: Peng Zhen, Ngapoi Ngawang Jigme, Yang Shangkun, Yan Dakai, Li Huang, Xu Jiatun, Yang Shangkui, Wan Da, Li Tinggui, Wang Shitai and Ba Sang." A close-up shot of Peng Zhen addressing the session is shown. During this shot, the announcer says that "Peng Zhen, executive chairman of the session and vice chairman of the NPC Standing Committee, is presiding over the session." An attendant is seen standing behind Peng Zhen. At the end of this close-up shot of Peng Zhen, which lasts less than half a minute, Peng Zhen states: "We now ask the premier of the State Council, Premier Zhao Ziyang, to deliver a report on the Sixth 5-Year Plan."

When Peng Zhen announces Zhao Ziyang's name, the camera pans to show the premier, sitting on the right-hand side of Peng Zhen, putting down his teacup and preparing to deliver the report. Hu Yaobang is seen sitting in the third row of the rostrum; Deng Xiaoping is seen sitting on the left-hand side of Hu Yaobang and putting on headphones; and Gu Mu, Fang Yi, Chen Muhua, Yang Shangkun and Wan Li are seen walking toward their seats on the rostrum. After this, Peng Zhen is seen applauding; Zhao Ziyang is seen looking at the audience in the auditorium and is then looking at a paper in his hands: Hu Yaobang is seen applauding; Deng Xiaoping (wearing headphones) appears to be waiting for Zhao's report; and Chen Xilian (in PLA uniform) is seen sitting behind Hu Yaobang in the fourth row of the rostrum and is applauding.

Next, Premier Zhao is shown in a close-up shot and is heard reading the report. The camera pans to show people on the rostrum listening to Zhao's report and the huge PRC emblem hanging on the heavy curtain at the back of the rostrum. This is followed by another close-up shot of Zhao reading the report. The film then gives several medium shots showing Zhao reading the report; Hu Yaobang and Chen Xilian (wearing glasses) listening to Zhao's report: Ngapoi Ngawang Jigme sitting on the right-hand side of Premier Zhao and listening to the report: Deng Yingchao sitting behind Zhao Ziyang in the second row of the rostrum and a female attendant whispering in Deng Yingchao's ear; Ulanhu sitting on the right-hand side of Deng Yingchao and listening to the report; and Wei Guoqing (wearing glasses) sitting on the right-hand side of Ulanhu and listening to the report: Seypidin, Liao Chengzhi and Hu Juewen sitting in the second row of the rostrum and listening to the report; Yang Shangdun sitting on the left-hand side of Peng Zhen and listening to the report: Wan Li, Yao Yilin and Yu Qiuli listening to the report in the second row of the rostrum; Gu Mu speaking with Fang Yi in the second row of the rostrum; and Chen Muhua listening to the report in the second row of the rostrum. The camera then gives one more close-up shot of Premier Zhao reading the report. After this shot which lasts half a minute, the film gives a medium shot of Deng Yingchao, Ulanhu and Wei Guoqing listening to the report in the second row of the rostrum. This is followed by another medium shot of Hu Yaobang and Deng Xiaoping listening to the report in the third row of the rostrum. After this, Wan Li, Yao Yilin, Yu Qiuli and Fang Yi are shown listening to the report in a medium shot; and Wang Zhen, Li Desheng (in PLA uniform), Yang Dezhi (in PLA uniform), Song Renqiong and Zhang Tingfa (in PLA uniform) are all wearing glasses and listening to the report in a medium shot. the film then shows the following PRC leaders on the rostrum listening to the report: He Changgong, Liu Lantao (wearing headphones and glasses), Ni Zhifu, Gu Mu and Chen Muhua.

Next, the film gives several long and medium shots of many deputies to the NPC in the auditorium listening to Zhao's report. While Premier Zhao is heard reading the report, the announcer summarizes the report. After these shots, the aforementioned leaders on the rostrum are shown listening to the report in several medium shots. After that, Zhao is shown reading the report in another close-up shot which lasts half a minute. This is followed by several more medium shots of PRC leaders on the rostrum including Xi Zhongxun and Banqen Erdini Qoigyi Gyancan. The camera also shows many people in the auditorium listening to the report. They include Yang Jingren and some PRC ministers who are attending the session as observers. Some foreign correspondents are also shown listening to Zhao's report in the auditorium. More shots are given of Zhao reading the report and people in the auditorium listening to it. A 1.5-minute close-up shot of Zhao concluding his report is given. The film then ends with a medium shot of Zhao sitting on the rostrum and Hu Yaobang, Deng Xiaoping, Chen Xilian and many unidentifiable people in the rear rows applauding.

At approximately 1144 GMT, the station carries a 22-minute special news feature entitled "Comrade Zhao Ziyang's Report on the Sixth 5-Year Plan (A Summary)." This news feature begins with a shot of a female and a male announcer. The female announcer says that this news feature will give a summary of the first part of Zhao's report. A film is shown, with a close-up shot of Zhao who is seen and heard reading the first portion of the first part of the report. It also shows many deputies to the NPC listening to Zhao's report in the main auditorium of the Great Hall of the Peoplel After this segment which lasts 4 minutes, the film shows a male and a female announcer reading excerpts of Zhao's report, in turn. After this, Zhao is seen and heard reading the "conclusive portion of the first part of the report" in a close-up shot, as explained by the female announcer. This segment lasts 1.5 minutes and ends with a long shot of many people applauding in the auditorium. Immediately after this long shot, the male announcer is shown and says that the station will report on the second part of Zhao's report tomorrow.

PLA Delegates Comment

HK020653 Beijing RENMIN RIBAO in Chinese 30 Nov 82 p 3

[Report by Ji Xichen [4764 1585 2525] and Luo Zisu [5012 5261 5685]: "NPC PLA Deputies Pledge To Carry Out and Defend New Constitution, Saying It Is Above Everything"]

[Text] When examining the revised constitution draft, the PLA deputies to the Fifth Session of the Fifth NPC unanimously stated that the constitution is supreme and that the PLA must faithfully implement and defend it.

Comrade Xiao Hua, a deputy to the NPC and political commissar of the Lanzhou PLA units, said: The formulation of the new constitution is an important matter with a bearing on the future and destiny of our Chinese nation. We must make the commanders and soldiers of our troops realize that the constitution is a general charter for us to govern and administer the country. It is supreme above everything. The army must consciously safeguard the sanctity of the constitution and thoroughly eliminate the evil practice described as "however great a national law is, it cannot compare with a single word of the senior officer."

Comrade Xiao Hua siad: The new constitution has three characteristics: 1) It has complete and substantial content. By summing up the positive and negative experience of the past 30 years and more since the founding of the PRC, the new constitution has new stipulations and expressions about our country's national system, the appointment of a state chairman, and the rights and obligations of citizens.

2) It has clear and concrete guiding ideology and has eliminated the influence of "leftist" mistakes. The new constitution has made revisions on the points of dictatorship, strikes, continuous revolution and the four big freedoms. This is perfectly correct. 3) It is based on reality and takes the future into account, thus it accords with conditions in China. The army is the mainstay of the state power and has a tradition of observing discipline and law. In the joint pledge of supporting government and cherishing the people formulated by the Eighth Route Army's rear garrison in the border region of Shaanxi, Gansu and Ningxia in 1943, the first article was "Observe Government Decrees." Today when our socialst legal system is being perfected, our army should be the model of implementing and defending the new constitution.

Comrade Yang Chengwu, the deputy to the NPC and commander of the Fuzhou PLA units, said: The revised constitution draft embodies the will of the whole nation. The army should take the lead in implementing the constitution. First of all, it is necessary to study earnestly and understand the guideline of the constitution and the implications of its articles. We should link the study of the constitution with the study of the documents of the 12th party congress. We should study them on a word-for-word basis. Only thus can we gain a thorough understanding of the constitution and implement it faithfully.

He said: Our army has its own characteristics. Each year we have a problem of recruiting new soldiers and old soldiers retiring. Therefore, it is necessary to conduct systematic and realistic education and propaganda in a repeated and persistent manner. To lead and organize the study of the constitution, we can run study classes and train backbone members to act as guides, and should also go to the units to make investigation and study so as to find timely solutions to problems and continue the elimination of "leftist" influence. Therefore, we should further emancipate our minds and take bolder steps. So long as we act in this way, we will achieve good results in our study, really unify our thinking and actions, and arouse the enthusiasm of cadres and soldiers.

Marshal Ye has instructed the units to implement and defend the constitution. We must actively publicize and resolutely implement his instruction so that the constitution can become the action guideline for all commanders and soldiers of the whole army.

Comrade Chen Zaidao, a deputy to the NPC and commander of the PLA Railway Engineering Corps, pointed out: The constitution is a great historical document. It reflects and embodies the people's aspirations and fundamental interests. It guarantees the long-lasting order of our country.

Our nation has experienced many twists and turns and many sufferings. During the "Cultural Revolution," Lin Biao and the "gang of four" led our country into a lawless situation. The new constitution sums up the historical experiences and lessons. It is formulated on the basis of Marxism-Leninism-Mao Zedong Thought and the four basic principles. This fundamental law is supreme over everything. No political party, organization or individual can violate it. Only thus can we maintain a situation of stability and unity for socialist modernization.

He said: Our country has entered a new period of socialist construction. Great changes have occurred in industrial and agricultural production. The people's livelihood has also been greatly improved. In Huanggang Prefecture of Hubei Province, the 1979 per capita income was 80 to 100 yuan, but this year the figure has increased to 195 yuan. Practice has proved that stability and unity can promote economic development. The constitution stipulates that the army should actively participate in state construction. Since its founding in 1948, the PLA Railway Engineering Corps has participated in the building or rebuilding of 12,325 kilometers of railway lines, among which 9,105 kilometers are new railway trunk lines and feeder lines. These achievements are remarkable. I believe that inspired by the new constitution, a new production upsurge will emerge throughout the country and economic construction will speed up.

Yang Yichen Comments

SK020055 Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 1 Dec 82

[Text] On the afternoon 27 November, Yang Yichen, deputy to the NPC and first secretary of the provincial CPC committee, spoke at the panel discussion on the draft revised constitution at the Fifth Session of the Fifth NPC. He said: We should link our study of the new constitution with the study of China's modern and contemporary history, conduct education among the people on patriotism, collectivism, internationalism and communism and education on dialectical materialsm and historical materialism and oppose capitalist corrupt ideas, remnant feudal ideas and other corrupt ideas.

Yang Yichen said: The study of modern and contemporary history will, first, enable the people, particularly young people, to know history and understand the history of the struggles waged by the Chinese people under the leadership of the Chinese Communist Party; second, enable the people to understand that only the Communist Party could lead the Chinese people to victories and that only with the working class and the Communist Party could the new democratic revolution and the socialist transformation be completed; and third, enable the people to understand that without economic and military strength and without advanced science and culture, we will always be suppressed. As we often say, without the Communist Party, there could have been no New China; only socialism can save China. Our success will be out of the question without achieving socialism and promoting economy.

Shanxi's Huo Shilian Comments

OW020818 Beijing XINHUA in English 0752 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Shanxi, one of China's leading coal mining areas, is planning to double its output in support of the country's modernization drive. Huo Shilian, first secretary of the Shanxi provincial party committee, told XINHUA today that the province saw an annual increase of more than 10 million tons in coal output over the past few years. He expected its output to surpass 140 million tons this year, overfulfilling the state quota.

By the end of the century, he said, Shanxi's annual coal output will exceed 300 million tons, more than double the 1981 figure.

Huo Shilian is here attending the National People's Congress. He said: "It's encouraging that Premier Zhao Ziyang, in his report to the congress, has listed the development of the Shanxi coal-fields among the major projects for increasing China's energy supply during the Sixth Five-Year Plan period."

He said Shanxi has a verified coal reserve of 202.1 billion tons, or one third of the national total. It's coal is of good quality, buried close to the surface and easy to mine.

"While increasing our coal mining capacity, we will build more power plants and chemical works to make better use of coal," Huo Shilian siad.

He said Shanxi has one of the country's ten major iron and steel complexes and a sizable manufacturing industry capable of making locomotives, cars, giant mining machinery, communications equipment and precision instruments.

This, he said, will help the province improve the transport system which now handicaps the development of its coal industry.

He said that Shanxi plans to update trunk railways throughout the province and build more feeder lines and highways, in addition to the inter-provincial railways now being built by the state.

He estimated that the capacity to ship coal out by train will be doubled by 1990.

Another measure to ease the strains in railways, he said, is to turn coal into electricity and transmit it out of Shanxi. In the past few years, Shanxi's power generating capacity has increased by more than 600,000 kilowatts, More power plants are being built or expanded. A 500,00-volt transmission line now under construction will carry electricity from Datong in Shanxi to Beijing, Tianjin and other places.

"We are also studying the gasification and liquefaction of coal," Huo Shilian said. "This will both boost the chemical industry and enable us to send the products out of the province through pipelines."

WORKERS, PEASANTS VIEW ROLE OF INTELLECTUAL

OW020806 Beijing XINHUA in English 0743 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- The important role of Chinese intellectuals in the country's modernization drive should be fully appreciated and their social status and well-being improved.

This is a consensus of views of workers and peasants attending the Fifth Session of the Fifth National Committee of the Chinese People's Political Consultative Conference (C.P.P.C.C.).

Speaking at a discussion, they responded positively to the call made by Premier Zhao Ziyang in his report to the National People's Congress that the whole nation should emulate the fine qualities of Jiang Zhuying and Luo Jianfu, the two outstanding scientists who died in their forties recently.

Statements made by the worker and peasant delegates at the discussion were carried in the PEOPLE'S DAILY today.

Sun Jianzhong of the trade union council of Jiangsu Province, east China, said he was deeply moved by the deeds of Jiang and Luo.

"They displayed the fine qualities of the working class such as selflessness, far-sightedness, lofty ideal, fine ethics and a strong sense of discipline," Sun said. "They are outstanding respresentatives not only of the Chinese intellectuals but also of the Chinese working class."

Guo Shude, a former chief engineer of the locomotive named after Mao Zedong, said: "The Chinese revolution could not have succeeded without intellectuals, and they are all the more indispensable to China's socialist modernization."

Ma Liuhai, a model worker from Shanxi's Datong coal mines, said: "We workers have practical experience, but intellectuals have theoretical knowledge. The gigantic task of quadrupling the annual gross value of industrial and agricultural output by 2000 requires efforts of not only the workers and peasants but also the intellectuals. Workers, peasants and intellectuals must work in concert for its fulfilment."

Xue Guobang from the Daqing oilfield, Wu Xuzhi from the Kailuan coal mines, and Ni Haibao from the Shanghai No. 9 cotton mill cited instances to show how intellectuals in these enterprises worked to boost production through technical innovation.

Wang Jiming, a peasant from Guanghan County, Sichuan Province, southwest China, said that an outstanding issue in the rural areas today is the application of agricultural science.

"We need science not only in seed breeding, soil improvement and the use of chemical fertilizer and insecticides, but also in the processing of farm produce.

"Our newspapers should give more coverage to the role played by our intellectuals like Jiang Zhuying and Luo Jianfu," he added.

Speakers suggested that intellectuals should not only enjoy a higher social status than it is now but should be provided with better working and living conditions.

Lian Weidong of a factory under the Ministry of Aviation industry pointed out: "Intellectuals often have to work extra hours in the evening, studying and doing research. Their work load is usually very heavy. Yet generally their pay is fairly low and their living conditions are far from adequate. We workers can fully appreciate the need to improve their working and living conditions."

Nie Rongzhen Writes Book Title

OW010101 Beijing XINHUA Domestic Service in Chinese 0322 GMT 28 Nov 82

[Text] Beijing, 28 Nov (XINHUA) -- According to a GUANGMING RIBAO report, on 25 November Comrade Nie Rongzhen inscribed the title for the Book "Jiang Zhuying, an Outstanding Representative of Intellectuals" compiled and published by the GUANGMING RIBAO Publishing House. The 70,000-character book comprises correspondence, stories, notes and letters of Jiang Zhuying, memoirs of his colleagues, relatives and friends, as well as photographs.

Comrade Jiang Zhuying was an associate researcher at the Changzhun Optical Precision Machinery Research Institute under the Chinese Academy of Sciences. He dedicated himself to the life-long struggle for revitalizing the Chinese nation. He was an outstanding example of contemporary intellectuals. Since his deeds were published in newspapers, an ardent response has been aroused among the reading public, particularly in the science and technology circles. Campaigns of learning from Jiang Zhuying are being extensively unfolded in intellectual circles throughout the country. This book is intended as learning material for the reading public.

ECONOMIST XUE MUQIAO EXPRESSES OPTIMISM

OW020621 Beijing XINHUA in English 0135 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- A leading Chinese economist said today China is fully able to quadruple its industrial and agricultural output value by the end of the century.

Xue Mugiao, director general of the State Council Economic Research Center, said in an interview here that the target "is not something within easy reach. But it can be attained and may even be surpassed if we apply ourselves to it."

Analysing the question from a theoretical and historical point of view, he said:

1. To reach the goal, China needs to increase its gross industrial and agricultural output at an average annual rate of 7.2 percent. Actually, in the 32 years 1950-1981, we already achieved an annual rate of 9.2 percent.

Of course, the first three years after the founding of New China was a period of economic rehabilitation, when the growth rate was exceptionally high. Even if we deduct that period from the calculation, we still had an annual rate of 8.1 percent.

Statistics show that in the 32 years, we surpassed the 7.2 percent mark in 21 years, equalled it in one year and fell below it in 10 years, including four years when production suffered greatly from an erroneous guideline and the "Cultural Revolution." But for those setbacks, we should have advanced even faster.

2. Some people believe economic growth rates would diminish with the increase in base figures. This is a one-sided view. According to Marxist theories, surplus labor, a prerequisite for expanded reproduction, grows with the development of production. The primitive society produced little surplus labor, so its development was the slowest. Several hundred thousand years had passed before the Stone Age was replaced by the Bronze and the Iron Age.

A higher growth rate was recorded with the increase of surplus labor in the slave society, and then the feudal society. Yet it still took 3,000 to 4,000 years to reach the age of the steam engine.

Capitalist society produces far more surplus labor than was ever conceivable before. That's why its development in the past 200 or 300 years has far exceeded what was accomplished in 3,000-4,000 years in the slave and the feudal society. Despite the periodic economic crises caused by the contradictions inherent in capitalism, its growth rate has gone up from century to century, so it's groundless to say that growth rates would inevitably be smaller when the base figures become bigger.

3. Developing countries may advance faster than developed capitalist countries where the average annual growth rate is about 3-4 percent in general and a 5-6 percent increase would be considered fairly high. Our economy already has a firm foundation. The problem is with technology and management. This points to our potential. By learning from advanced experience we can catch up with the advanced or even surpass them.

The most developed capitalist countries are today faced with the problem of unemployment and a dwindling market for huge amounts of idle capital, and their industries are operating about 30 percent under capacity. We are in a different position. Our supply of producer and consumer goods still falls behind the demand. With a population of one billion and a relatively low standard of living, we don't have to worry about the market even when we have tripled or quadrupled our output. When we complete our economic readjustment, which will ensure a balanced development, we will be able to go faster in increasing production and raising our living standards, advancing in a benign cycle in which higher output would bring a higher standard of living, which in its turn would stimulate production.

4. China's policy of self-reliance enables it to keep free from the impact of the world economic depression, which is the end-result of a shrinking market. Some developing countries and regions also suffered from the depression because they are largely dependent on the world market -- about 40 percent of their goods are for export. As a socialist country, China develops its economy self-reliantly. It sells more than 90 percent of its products on the home market. That's why we have been able to avoid the blow of the world depression.

Though we have purposefully lowered our growth rate in recent years during the economic readjustment, it is higher than that of many developed countries.

The Sixth Five-Year Plan outlined by Premier Zhao Ziyang will pave the way for a somewhat faster development in the Seventh Five-Year Plan period. The two five year plans will usher in a new period of vigorous economic growth in the 1990s.

An important factor to be considered in this calculation is that China has gained much experience, both positive and negative, in the past three decades. It enables us to keep our heads cool and to spot and solve problems as soon as they come up, thus preventing any major policy reversal.

FOREIGN CONTRACTS CONFERENCE HELD IN BEIJING

HK011129 Beijing RENMIN RIBAO in Chinese 1 Dec 82 p 4

[Report by correspondent Hui Yuanying [1920 0337 5391] and reporter Zhang Yushu [1728 37 8 2579]: "First National Conference on Foreign Contract Projects and Labor Service Cooperation Recently Held in Beijing"]

[Text] The first national work conference on foreign contract projects and labor service cooperation was held in Beijing recently. The conference stressed that it is necessary to act concientiously in accordance with the basic principles of "abiding by contracts, ensuring quality, making small profits and laying stress on righteousness" and act with courage and confidence in order to do a good job of foreign contract projects and labor services cooperation.

In the past 3 years and more, we have set up 23 foreign contracting corporations in succession, which have signed 808 contracts for engineering projects and labor-service cooperation with 43 countries and regions with a total volume of business of more than U.S. $1.2 billion. At present, more than 30,000 people are carrying out the tasks abroad. The engineering projects for which we have signed contracts include the building of highways, bridges, power stations, and housing, well-digging, parks, geological drilling, dredging of navigation lines and construction of habors. The scope of labor service cooperation is more extensive than of contract projects.

Since the 1970's, contract projects and labor service cooperation have speedily developed internationally. They are large in scale. Particularly in the Middle East, the volume of contracts for various projects increased to U.S. $81.6 million in 1981. Compared with this, the volume of our contract projects is very small. In the past few years, our foreign contracting corporations have mainly sent laborers abroad or cooperated with a third party in undertaking certain engineering projects. The proportion of independent contracting projects is relatively small. In the future, we should increase this proportion. With respect to labor service cooperation, we should bring our superiority into play and adopt various forms of cooperation.

Chen Muhua, state councillor and minister of foreign economic relations and trade, spoke at the conclusion of the conference. She pointed out that foreign contract projects and labor service cooperation constitute an important aspect of China's policy of opening to the outside world. Every contracting corporation should gradually become an economic entity and promote the development of foreign trade.

RENMIN RIBAO 1 Dec Editorial

HK011303 Beijing RENMIN RIBAO in Chinese 1 Dec 82 p 4

[Editorial: "Abiding by Contracts, Ensuring Quality, Working for a Modest Profit and Attaching Importance to Obligations -- On Actively Developing Foreign Contract Projects and Labor-Service Cooperation."]

[Text] Foreign contract projects and labor service cooperation is an effective means to develop our country's foreign economic contacts and a new cause beneficial to the socialist modernization of the country.

China has gradually developed foreign contract projects and labor service cooperation since the 3d Plenary Session of the 11th CPC Central Committee. Practice in the past 3 years or so has shown that the development of this cause can accumulate funds for the socialist construction for modernization, give an impetus to the export of China's mechanical equipment and construction materials and promote technical exchanges between China and other countries. Particularly, a whole variety of economic and technical cooperation including contract projects and labor service cooperation between China and the Third World, characterized by mutual assistance, is an important channel to develop China's friendly relations with the Third World on political and economic affairs.

Foreign contract projects and labor service cooperation is a means of economic cooperation popular in many countries. At present, the amount of money involved in the contracts signed between China and other countries accounts for only 1 percent of the total amount of money on the international market, a very small percentage. China has many favorable conditions for developing this cause. We have already established a great variety of departments in the national economic system and are able to export full sets of equipment. We have abundant labor resources and have established a comparatively good technical contingent. Through many years' work of aiding foreign countries, we have accumulated experiences and our technology and installations are relatively practical, to better meet the requirements of the developing countries. China's engineering and technical personnel and workers are both law-abiding and hardworking. They have already established a good reputation in the world. Many Third World countries are willing to further strengthen economic ties with us. Some contractors of developed countries also wish to have more cooperation with us. There are bright prospects for developing this cause.

Hearing that labor service personnel would be sent abroad, some people recalled the misery suffered by the "Chinese laborers" of the old society in foreign countries. These are matters of two entirely different natures, which cannot be mentioned in the same breath. Laboring people in the old society were oppressed and exploited by imperialism, feudalism and bureaucrat-capitalism and lived miserably. They were compelled to leave their native places to sell their labor. At that time, the fact that the "Chinese laborers" wandered destitute abroad demonstrated the suffering of the Chinese nation. Today, our country has stood on its own feet in the family of nations and the laboring people have become the masters of their own country, labor service personnel, mandated by the state and people, are sent abroad in a guided and organized way. The party protects them politically and cares for their wellbeing. They use their own labor and knowledge to make contributions to the efforts of establishing political and economic relations with foreign countries. They are also accumulating funds for the "four modernizations" of the motherland. This is a very glorious task. Developing foreign contract projects and labor service cooperation is neither an expedient measures nor a temporary, inessential task. We should not neglect it while we are heavily engaged in production tasks at home. The practice of carrying it out only when we are not busy is not appropriate either.

This work should be included in the economic plans of the state and regions and placed on the agenda of leading persons concerned. It should be regarded as an undertaking to be done positively and well.

Abiding by contracts, ensuring quality, working for a modest profit and attaching importance to obligations constitute our fundamental guiding principles for conducting economic relations with foreign countries. Abiding by contracts means that we should stand by an agreement, do our work well and strictly fulfill contracts which are legally binding. Those who are sent abroad should observe laws and decrees and respect the customs and habits of the masses of the countries concerned. Ensuring quality means that we should be conscientious and meticulous in construction and production according to agreements and technical standards to ensure the quality of the contract projects and facilities. At the same time, all personnel who are sent abroad should meet the requirements and accord with demands. Working for modest profit means that the rate of the contract projects and labor service should be based on scientific economic analysis and economic accounting. By so doing, we will be able to act according to market situations and promote more business based on modest profit. Attaching importance to obligations means that we should carry forward the lofty style of a socialist country for carrying on economic work in foreign countries, value friendship and unity and regard construction in friendly countries as our own affair and refrain from doing things harmful to the developing nations. Some specific policies should be worked out or improved according to this fundamental guiding principle and the relevant stipulations of the state. The implementation of this fundamental guiding principle and various policies has a direct bearing on our country's prestige in foreign countries and our ability to compete on the international market. We should on no account treat it lightly.

So far, our management system, organizations, material supplies, labor contingent, information service and so forth are not yet able to meet the demands of the work of developing foreign contract projects and labor service cooperation. We should adopt effective measures to conscientiously solve existing problems. In accordance with the principle of implementing unified plans and policies and taking concerted action to deal with foreign countries, all departments concerned should strengthen leadership and coordinate their management. All companies concerned which are engaged in foreign contract projects should actively create conditions to gradually separate the work and responsibility between the government and the enterprises, promote vocational work, and strengthen technical training and political and ideological work among workers.

We have just started our work for developing foreign contract projects and labor service cooperation. Since we have good prospects in this respect, we should broaden our field of vision and make great efforts to do our work well.

YUAN BAOHUA ON LABOR ORGANIZATIONS CONSOLIDATION

OW261133 Beijing Domestic Service in Mandarin 1200 GMT 20 Nov 82

[Text] Yuan Baohua, vice minister of the State Economic Commission and leader of the national enterprise consolidation leading group, said today that leaders should shift the focus of their energy in time to consolidate labor organizations after reorganization of leading bodies of the enterprises has been basically completed, and strive to achieve good progress in this area. He was speaking in the seventh regular meeting of the various State Council departments on the work of consolidating enterprises.

Yuan Baohua pointed out that, based on the experience of those units which have achieved improvements in labor organizations, the key to the successful accomplishment of this task lies in the following points: 1) leaders must firmly resolve to be tough and have the courage to resist pressure from all quarters; 2) unnecessary personnel must be reduced, given training or job placement by establishing labor and everyday life service corporations; 3) labor and other concerned departments at all levels should actively coordinate their efforts to see that the work is carried out well.

Yuan Baohua noted that, in consolidating labor organizations, it is important to know how to give due consideration to both providing employment and enhancing labor efficiency with unified planning and how to adopt economic means to make the enterprises and their workers and staff display motivation for the reasonable use of the labor force and a higher level of fixed quotas.

Yuan Baohua said that next year would be crucial to achieving all-round streamlining of enterprises. This consolidation work should be carried out in the manner of all-round consolidation, with emphasis on key links, guiding the work in accordance with different categories of professions and checking and approving the results accomplished by the various enterprises by groups.

STATE COUNCIL ISSUES COAL-SAVING DIRECTIVE

OW270739 Beijing Domestic Service in Mandarin 1200 GMT 20 Nov 82

[Text] The State Council recently issued its No 5 directive on energy conservation, stressing the need to develop selective coal processing and promote reasonable use of this source of energy.

The directive noted that only about 30 percent of the over 600 million dun of coal now produced in China each year is going through the processing step of selection. This leads to a high percentage of gangue and ash, unqualified specifications of coal and low heat efficiency. As a result, we have suffered great losses and waste of coal. The transportation facilities have also to shoulder an added load and coal customers added processing expense as well.

The directive called for developing coal processing by selection in order to gradually abandon the practice of supplying and using raw coal and adopt the practice of mainly supplying and using processed commercial coal. This is an important matter pertaining to both technical and economic policy.

Currently, price parity between coal products is unreasonable. This has dampened the enthusiasm of the production departments in developing selective coal processing.

The State Council's directive set out specific requirements to be met in order for the coal production departments to the practice coal selection process by stages and groups before 1990 and new policy regulations on coal supply to be gradually implemented. It called for setting the price of commercial coal supplied according to its quality to ensure certain economic profits for both coal mines and customers.

LI DESHENG ATTENDS SHENYANG PLA CONGRESS

SK200547 Shenyang Liaoning Provincial Service in Mandarin 1100 GMT 19 Nov 82

[Text] The Sixth CPC Congress of the Shenyang PLA units was held in Shenyang from 9 to 19 November. The congress penetratingly studied the documents of the 12th party congress, examined the work report of the Fifth CPC Committee of the Shenyang PLA units and the work report of its discipline inspection committee and elected members of the Sixth CPC Committee of the Shenyang PLA units and members of its discipline inspection committee.

At the first session of the Sixth CPC Committee of the Shenyang PLA units, Comrade Li Desheng was elected first secretary; Comrade Liu Zhenhua, secretary; and Comrade Jiang Yonghui, deputy secretary.

Li Desheng delivered the opening speech. Liu Zhenhua made a work report on behalf of the Fifth CPC Committee of the Shenyang PLA units. Jiang Yonghui spoke at the closing ceremony.

Comrade Li Desheng said: The 12th CPC National Congress urges us to strengthen the building of the PLA and build our's into a strong, modern and regular revolutionary army so as to enhance our army's self-defence capacity under conditions of modern warfare. We must, under the guidance of the guidelines of the 12th party congress, enhance our spirit, be firm and indomitable, work hard and remain unyielding, strive to make new contributions to building a socialist spiritual civilization, a regularized army, a modernized cadre contingent and to building the party so as to improve training for war preparedness, logistics work and militia work.

Participants in the congress freely spoke their minds and put forward many good suggestions on building the army and creating a new situation in this regard.

ZHU MUZHI ADDRESSES MEETING ON CULTURE, ART

OW011313 Beijing XINHUA in English 1846 GMT 29 Nov 82

[Excerpts] Beijing, November 29 (XINHUA) -- China published about 1.5 billion children's books, picture-story books and journals last year, Luo Ying, secretary general of the national council on cultural and art work for children, said today.

Speaking at a council meeting, which opened here today, she said the circulation of children's books and journals last year quadrupled the 1977 figure and more than 1,400 children's libraries and reading rooms have been set up at county level and above.

On cultural exchanges with foreign countries, Luo said that these activities have enhanced the friendship between Chinese children and children of other countries.

Addressing the meeting, Zhu Muzhi, minister of culture, stressed the importance of the work for children and pledged "great efforts" by the Ministry of Culture in this field.

The six-day conference will sum up the council's work and work out a new program.

SCIENCE, RESEARCH EXHIBITION OPENS IN BEIJING

OW011311 Beijing XINHUA in English 1836 GMT 27 Nov 82

[Text] Beijing, November 27 (XINHUA) -- An exhibition of science and research opened today at the Nationalities Palace of Culture.

The exhibition focuses on achievements in agriculture, industry, energy, natural resources, computer technology, lasers, semi-conductory, remote sensing technology, nuclear technology, new materials, scientific instruments, environmental protection, basic research and training.

A spokesman for the exhibition said its purpose is promotion of both scientific exchange and relations between the academy, technology, consumers and institutes of higher learning.

One of the exhibition's most prominent displays is a model of a computer, now in trial operation, capable of 10 million calculations per second.

Also on display is nickel-less stainless steel, zeolite cement, a continuous wave ring dyed laser, a fast laser punch, molecular beam extension equipment, ballistic cameras, a scanning electronic microscope and energy-saving technology and products including fast electroplating solution, high-voltage sodium bulbs, for infrared heat coating and laser heat treatment.

During the exhibition, the academy will discuss the transfer of technology of more than 1,000 research results with consumer organizations, and future cooperation. Eighteen lectures will be given on such subjects as prevention of metal corrosion, material science, application of computer, laser and remote sensing technology and polymer chemistry.

ANHUI HANDLES SERIOUS POLITICAL INCIDENT STERNLY

OW230826 Beijing XINHUA Domestic Service in Chinese 1420 GMT 22 Nov 82

[Text] Hefei, 22 Nov (XINHUA) -- According to a report by XINHUA correspondents Chen Baoshan and Tian Xuexiang, in early November the Anhui Provincial CPC Committee issued a circular approving and circulating a report submitted by its discipline inspection commission on a serious political incident sternly handled by the Huainan municipal party committee. Personnel who had played a major role in the incident were severely dealt with.

In May of this year Yin Xueli, a convicted criminal sentenced to reform through labor, was allowed to go to Huainan Municipality under the "escort" of two cadres responsible for his internment and reeducation. The municipality was the place of his residence before his arrest. Upon arrival, he openly engaged in speculation in coal supply by using the tactic of "getting in through the back door." His under-the-table dealings were not only uninterrupted but supported by a number of leading cadres and Communist Party members.

During the "Cultural Revolution," the convicted criminal Yin Xueli was "chief for operations" under the Huainan municipal "rebellion general headquarters" and concurrently "commander of the Huainan peasants rebellion headquarters." He committed serious crimes by plotting and organizing an incident of armed struggle in which 13 persons lost their lives. He was arrested in 1978 according to law and was sentenced to 10 years' imprisonment in 1980. The sentence passed on him was later reduced to 6 years' imprisonment. He was sent to the eighth production brigade under Anhui's Baihu farm to undergo reform through labor.

On 25 May of this year, Luo Rufa, head of the production brigade, instructed two cadres responsible for internment and reeducation to take Yin Xueli to Huainan in order to use this convicted criminal's long-established relations with the local organizations there to get coal for the brigade-run smeltery by dealing under the table. Upon their arrival in Huainan, the two "escorting" cadres immediately checked into a hotel, setting the convicted criminal Yin Xueli free to go home. On the same evening, Yin Xueli installed a 200-watt lightbulb at the entrance to his house and gave a banquet in his home, serving two tables of food and drinks to entertain 18 guests. In the following 20 days, he gave dinner parties at home on six occasions and was invited to 13 banquets hosted by others. Among the 34 guests and hosts were 18 Communist Party members. They included Zhang Xiaowu, director of the Huainan Municipal No 1 Light Industrial Bureau and deputy secretary of the bureau's party committee; Zhang Xinggui, secretary of the party committee of the municipal petrochemical machinery plant; Gao Wenpeng, deputy secretary of the discipline inspection commission of the municipal supply and marketing cooperative; and Wang Huayi, head of the Bagongshan public security subbureau's internment station. The two cadres responsible for internment and reeducation from the Baihu farm's eighth production brigade were invited to almost every banquet or dinner party. The local residents indignantly commented: Yin Xueli does not look like a criminal who has been sentenced to reform through labor. He looks like a high-ranking official who has returned with high honors and granted great powers.

How could a convicted criminal, sentenced to reform through labor, be so arrogant? How could some Communist Party members and leading cadres treat him so well? The answer is they were "friends of a faction" during the "Cultural Revolution" with serious factionalist ideas and that they were not thoroughly screened. Zhang Xiaowu, a cadre who joined party work in 1945, was a deputy commander directing struggles by force during the "Cultural Revolution."

Being a leading member directing armed struggles, his notoriety attracted Yin Xueli. Upon Yin's return to Huainan Municipality, Zhang Xiaowu wrote four letters maneuvering to open a "back door" for Yin's speculation in coal supply. During a drinking spree, he said to Yin Xueli: You have 4 months to go before you will be free and return. Unfortunately, others cannot be a substitute for you in serving prison terms. If it were possible, I would be more than willing to be your substitute in serving the remaining 4 months imprisonment.

While drinking to renew their friendship, Cui Xinyi, also a Communist Party member, expressed to Yin Xueli his grievances. Zhang Xinggui invited Yin to his home to celebrate the former's remarriage and his wife's giving birth to a child. The convicted criminal Yin Xueli was honored at a hotel "welcome-home" banquet hosted by Zhou Changqing, deputy secretary of the party committee of Dongshan Commune, who resorted to deceptive means to help Yin get motor vehicles for transporting coal.

The Huainan Municipal CPC Committee and the Anhui Provincial Public Security Bureau paid great attention to this incident. Yin Xueli was arrested by the Huainan Municipal Public Security Bureau during his third trip to the municipality and an investigation of personnel involved in the incident was conducted by the municipal CPC committee's discipline inspection commission. After instructing the Baihu farm party committee to investigate the incident and punish those of the farm who were responsible for the offenses, the Anhui Provincial Public Security Bureau issued a circular on the incident to public security cadres, police and units in charge of reform through labor throughout the province.

The Huainan Municipal CPC Committee decided to dismiss Zhang Xiaowu from the party, remove him from the post of deputy secretary of the municipal No 1 light industrial bureau's party committee and recommend his removal from the post of director of the bureau; to dismiss Zhang Xinggui from the post of secretary to the municipal petrochemical machinery plant's party committee; and to remove Gao Wenpeng from the post of deputy secretary of the discipline inspection commission of the municipal supply and marketing cooperative. Others involved in the incident were sternly dealt with, criticized and educated respectively. The Huainan Municipal CPC Committee proposed to various departments of justice that the case of the convicted criminal Yin Xueli be reviewed once again and that he be given additional years of imprisonment. The party committee of the provincial public security department's labor-reform bureau decided to give a serious warning to Luo Rufa, head of the eighth production brigade under Baihu farm, to give him the administrative penalty for rendering a discredit to public service and to remove Liu Yulin from the post of deputy head of the farm's internment and reeducation division.

In their respective circular and report, the Anhui Provincial CPC Committee and its discipline inspection commission pointed out in explicit terms: the above was a serious political incident created by the "gang of four's" remnant elements. We must resolutely deal telling blows to these elements. The circular urged party organizations at all levels, Communist Party members and cadres to earnestly discuss this incident, strengthen the concept of adhering to the legal system and enhance principles of party spirit.

JIANGSU'S XU JIATUN ON DEVELOPING MODEL WORKERS

OW011317 Nanjing Jiangsu Provincial Service in Mandarin 1100 GMT 24 Nov 82

[Text] The forum of representatives of model workers in Jiangsu Province opened in Nanjing this morning. Attending were nationally known model workers in the industrial, transport, finance, trade and capital construction fields and representatives of provincial and municipal model workers from 14 prefectures and municipalities as well as responsible persons of trade union organizations.

Among them were (Ji Jinbao), vice manager of the Wuxi pharmaceutical plant, who has carried out 19 technical renovations in the past 19 years and made remarkable contributions in socialist construction; (Wu Yucai), a worker of the Suzhou farm chemical machinery plant, who performed good deeds for the masses and was selected a pace setter in learning from Lei Feng; and (Wang Lanman), keeper of the Changzhou mass general store, who made outstanding achievements in developing spiritual civilization.

Also attending was Comrade Xu Jiatun, first secretary of the provincial CPC committee, who spoke about launching a campaign to develop more advanced producers and advanced workers in the province in an extensive and deepgoing way.

Comrade Xu Jiatun said: Advanced personalities are fine representatives of advanced levels of productivity. They are glorious fighters who have advanced ahead of time. They have used their advanced deeds to influence, help and lead others around them to move ahead together promoting both production and work. They have also set good examples in attracting, inspiring and encouraging the masses to promote the new communist mood. Therefore, the leading role of these advanced personalities must be put into play at all times.

How can we promote the campaign to develop more advanced producers and advanced workers? Comrade Xu Jiatun outlined the following five points:

1. It is necessary not only to put the role of veteran model workers and veteran advanced personalities into play but also to discover and bring up new model workers and new advanced producers, especially those young model workers and young advanced personalities.

2. It is essential not only to bring up advanced individuals who work diligently in defiance of hardships but to also discover and select Zhu Geliang-type advanced personalities who study painstakingly and dare to attempt new things.

3. It is necessary not only to select model workers from among productive workers but also from among scientific, technical and management personnel. We should not exclude intellectuals of true ability and knowledge who have made outstanding achievements in scientific and technological work.

4. It is necessary, in launching this campaign, to emulate the advanced not only in state- and collective-run enterprises but also in commune- and brigade-run industries as well as advanced individual workers. All those who have made important contributions to social development should be commended and awarded, especially those key, specialized households that have emerged in the rural areas to help develop agricultural economy with high productivity. Naturally, these advanced personalities should be recognized and respected in society.

5. It is necessary to vigorously develop this campaign not only in the economic field but also in the science, education, culture, physical culture, public health, public security and judiciary fields and in other professions and trades so as to mobilize a mighty army of advanced workers to create a new situation in all fields of socialist modernization with concerted efforts.

Comrade Xu Jiatun hoped that the model workers and advanced producers attending the forum would maintain the distinctive character of an ordinary worker, remain modest and prudent, guard against arrogance and rashness, play an exemplary and leading role in building a material and spiritual civilization and make new contributions toward realizing the lofty goal set by the 12th CPC National Congress and in advancing the socialist cause.

CHINA NORTH SEA FLEET CONDUCTS NAVAL PARADE

SK301051 Jinan Shandong Provincial Service in Mandarin 2300 GMT 29 Nov 82

[Text] According to our sources, the China North Sea Fleet recently conducted a naval parade to comprehensively review the achievements scored by naval forces in military and political training so as to create a new situation in building the navy. Yang Li, commander of the China North Sea Fleet, and other leading comrades reviewed the naval forces. This parade was conducted while the China North Sea Fleet was vigorously making the year-end inspection on military and political training. Over the past year, large numbers of commanders and fighters of the China North Sea Fleet have remarkably accomplished the tasks of tactical training, tactical patrol, escort and protecting fishing boats and fishermen. In the meantime, many units have advanced in training work. Participating in the parade were new-type guided missile destroyers that were designed and made by China and have outstandingly and repeatedly fulfilled the ocean-going tests; submarines that have submerged many times and have successfully completed the war preparedness tasks; and minesweepers that have navigated safely for 22 consecutive years and have been awarded the collective merit citation class II. The review has fully manifested the unity between navy officers and sailors, the spirit of solidarity and militancy and the sailors' solemn discipline and appearance.

SHANDONG READJUSTS MILITIA ORGANIZATIONAL WORK

SK020438 Jinan Shandong Provincial Service in Mandarin 2300 GMT 1 Dec 82

[Text] The provincial people's armed forces departments and militia organizations at all levels have conscientiously eliminated the leftist influence, exerted efforts to study the new situation and solve new problems in militia work and scored pronounced achievements in building the militia. In line with the guidelines of the central directives, our province has successfully conducted a readjustment of militia organizations. Through readjustment, the militia ranks have become more capable. Militia work has been carried through organizationally and the militia cadre ranks have greatly improved. At present, the average age of militia company leaders has dropped 2.6 years as compared with the past and the proportion of party-members in the militia is 85 percent. The political work of the militia has greatly strengthened. About 38 percent of the militia companies in the province has established youth homes for militiamen and many militia companies have instituted the system of giving a political class every day. Militiamen throughout the province have launched activities on five stresses and four beauties and thousands and thousands of learn-from-Lei Feng groups have been formed to do lots of good deeds for the people in every corner of the urban and rural areas. Since last year, a number of heroes and model personages have emerged in our province, including (Xu Zhaozhong), a Lei Feng-type militia platoon leader; (Zhang Xixiang), a good militiaman who sacrificed his life to save another; (Sun Yuxian), a first-grade citation militiaman who saved persons at sea on four occasions; and (Zhang Zishan), a model militia instructor. Some 20,000 advanced units and individuals have attended the experience exchange meeting on building the spiritual civilization, sponsored by the Jinan PLA units. The quality of militia military training in the province has greatly improved and the conditions for taking care of weapons for the militia have much improved. This year, our province's militiamen have made relatively good achievements in the first phase of training and about 82.2 percent of the militiamen have taken part in training in 2 successive years. About 83 percent of communes have attained the new requirements for taking care of weapons for the province's militia.

WEN HUI BAO COMMENTS ON 'DOUBLE HUNDRED' POLICY

OW300911 Shanghai WEN HUI BAO in Chinese 22 Nov 82 p 1

[Commentator's article: "Correctly Implement the 'Double Hundred' Policy"]

[Excerpts] In the course of studying the 12th CPC National Congress' documents, scientists and cultural workers have had warm discussions on the question of how to create a new situation.

In their study, some comrades raised this question: "The 'double hundred' policy was not mentioned in the 12th National CPC Congress or in the draft of the revised constitution. Has this policy changed?" In his speech at the recent national conference on the planning for philosophy and social sciences, Comrade Hu Qiaomu gave an explicit reply to this question. He said: "Letting a hundred flowers blossom and a hundred schools of thought contend" is not written into the draft of the revised constitution because it is an artistic, not juristical, phrase. The "double hundred" policy was not mentioned in the report to the 12th party congress because the report had to be terse. Because of its limited space, the report did not dwell on policies that had been implemented all along the repeatedly affirmed. This does not, in the least, imply that our party has wavered on the "double hundred" policy.

The positive and negative experiences in the past two decades and more since the policy was set forth have shown that whenever the "double hundred" policy was properly implemented, our literature and art flourished and science advanced, and whenever the policy was interfered with and impaired, our literature, art and science suffered.

For a long period in the past, under the influence of the "left" ideas, many comrades indiscriminately regarded dissenting views in academic research and literary and art discussions as direct manifestations of a struggle between the "two classes, lines and world outlooks." They handled the question of academic contention in science and art as they did class struggle. Practice showed that this yielded poor results. Along the long river of understanding truth, man invariably comes across spindrifts of all kinds. Class struggle is by no means the only cause of dissension and disputes. Man's cognitive process is filled with all kinds of contradictory factors such as cognition and practice, subjectivism and objectivism, phenomenon and essence, onesidedness and all-sidedness, and relativity and absoluteness. This is why man will always have different views and disputes in understanding concrete things.

Even when disputes occur between Marxists and non-Marxists and even when the nature of the disputes truly reflect problems in world outlook, we should not treat every dissenting view as a matter of principle and wage a class struggle against it or try to solve it through political struggle. We should solve the problem through discussions and criticisms and reason things out. Since the 3d Plenary Session of the 11th CPC Central Committee, our party has firmly demanded that science, literature and art be guided according to their laws of development and has achieved good results.

In order to correctly implement the "double hundred" policy, it is imperative to uphold the four basic principles which are the common political foundation for the unity of the whole party and the whole people and are the fundamental guarantee for the success of socialist modernization. The key lies in correctly carrying out criticism and self-criticism. Implementing the "double hundred" policy is, by no means, "opening up" without "contending." Criticism and self-criticism are indispensable. Creation is one form of contention and so is criticism. We should not be nervous and afraid to make contention when we are criticized.

We should modestly accept the criticism if it is right to the point. If the criticism is off the mark, we can counter it with criticism. Erroneous things will be eliminated only through criticism and correct things will be developed only through struggles.

In our approach toward criticism, we should be aware of two tendencies: On the one hand there are people who tend to infinitely exaggerate other's mistakes, pin labels and wield clubs when they find people in the wrong. This kind of "criticism" is undesirable because it will only hamper the implementation of the "double hundred" policy. On the other hand there are those who are unwilling or afraid to make criticism, who are too careful not to hurt other's feelings and who ignore principles; or those who refuse to accept correct and well-meaning criticism by arguing that the criticism is a "club." The attitude of the latter is also incorrect. If erroneous things cannot be criticized, then the line of demarcation between truth and falsehood, proletariat and bourgeoisie, and socialism and capitalism will be blurred. "Do not make flagrant interference" does not mean that there is no need to uphold truth and rectify mistakes, that there is no need for correct and positive criticism and that we can let things go unchecked. Correct criticism is not "flagrant interference" but an important method for the party to exercise leadership over literature and art.

On our road of advance toward the grand goal laid down by the 12th party congress, we are bound to encounter many new situations and problems that need to be explored, studied, experienced and solved. Therefore, we should continue to implement the policy of "letting a hundred flowers blossom and letting a hundred schools of thought contend." We will certainly make greater contributions as long as we uphold the four basic principles, uphold the correct line since the 3d Plenary Session of the 11th CPC Central Committee, oppose the "left" deviation that attempts to revert to the "Great Cultural Revolution" and the preceding period, and oppose the right deviation of bourgeois liberalization that doubts and negates the four basic principles.

SHANGHAI GARRISON STUDIES CPC CONGRESS DOCUMENTS

OW010153 Shanghai City Service in Mandarin 1130 GMT 27 Nov 82

[Text] At the meeting of leading cadres in charge of political work, which ended today, the party committee of the Shanghai Garrison District made arrangements for deepening the study of the 12th party congress documents, stressing the need to eliminate the influence of the "left" and other erroneous ideas and to strive to create a new situation in the work of army units.

The garrison district party committee has inspected and analyzed the results of study in the previous stage. In his speech, Political Commissar Zheng Chen urged all subordinate units to prevent laxity and to deepen their study. He pointed out that, after the meeting, it is necessary to systematically solve the common problems encountered in the study and see to it that cadres at and above regimental level earnestly apply themselves to study. Leading cadres should take the lead in integrating study with the actual situation, earnestly review the process of straightening out the ideological line since the 3d Plenary Session of the 11th CPC Central Committee, sum up past experiences and lessons and continue to eliminate the influence of erroneous ideas, particularly the "left" ideas. At the same time they should also experiment with the study of the new party constitution in selected units. He also urged all units to take practical and effective steps to create a new situation in the work of army units.

PRC CLAIMS UK TURNS DOWN SELF-RULE FOR HONG KONG

HK020114 Hong Kong HONG KONG STANDARD in English 2 Dec 82 p 1

[By Christine Cheung]

[Text] The British Government has turned down a Chinese proposal for self-rule in Hong Kong after China regains sovereignty, local industrialists said, quoting Chinese Politburo member Liao Chengzhi.

Tam Po-nan, a member of the 30-member delegation of the Hong Kong Factory Owners Association, said they were not told when this proposal was made. He said members were told explicitly that Hong Kong would be administered by local people after July 1997.

Mr Tam, speaking at a press conference yesterday, quoted Mr Liao as saying that Hong Kong would be allowed to retain its capitalist system "for a few centuries."

"Hong Kong and Macao as well as Taiwan would be special administrative zones and this proposal would be included in the draft constitution to be submitted to the National People's Congress at present in session in Beijing," Mr Tam said.

Reading from his notes at the press conference yesterday, Mr Tam said: "China had long decided to have Hong Kong people administer this as a special economic zone...but talks with the British on this point is deadlocked."

Reporting on British Prime Minister Mrs Margaret Thatcher's visit to Beijing, Mr Tam said they had been told there had been no concrete agreement reached during those sessions. He quoted Chinese officials as saying that Mrs Thatcher failed to specify "the obligations of the British Government on Hong Kong."

The vice-chairman of the delegation, Mr Lau Chi-hung, also quoted Liao Chengzhi's remarks. He claimed that Mr Liao had said China would "learn from the experience of Hong Kong though it will not follow its pattern of development."

Mr Lau added that Mr Liao remarked that to have Hong Kong absorbed into the Chinese system "will take at least one or two centuries."

The factory owners repeated China's oft-expressed intention to "maintain Hong Kong's prosperity and ways of life."

They said that Mr Liao expressed the hope that "during the next 15 years, the Chinese Government will hope to cooperate with the British authorities in maintaining Hong Kong's stability and prosperity."

Huang Jian, chairman of the Hong Kong Factory Owners Association, at the press conference said that Mr Liao told them "only the governor and the flag would change after China regained sovereignty.

"Liao's message was that Hong Kong people will be free to travel overseas and there will be freedom of speech and publication as at present. While China will take over defence responsibilities and foreign policy matters, the local police will maintain law and order. China does not intend to send a single soldier or staff member here..."

Along other things, the delegations said Mr Liao Chengzhi told them:

-- Land: In China the land belongs to the government while the people may own the properties on them. In the case of Hong Kong, it will be up to the local people to decide.

-- Immigrants: Legal entries will be allowed at the most 10 per cent of the present number per year.

-- Finance: China will recover Hong Kong's reserves from Britain and apply them to local needs.

-- Law: The legal system in Hong Kong will be retained but there will be no appeal to the Privy Council.

-- Civil Service: This will remain as it is. Expatriates will be allowed to stay if they so wish.

-- Currency: The Hong Kong dollar will still be an international currency with the two banks continue to issue banknotes.

"Both the Chinese Government and Hong Kong will have the same aim of an improved livelihood for Hong Kong people; and China would tolerate differences if the common goal remains," Mr Huang said.

PENG CHONG INSPECTS SHENZHEN SPECIAL ZONE

HK020851 Hong Kong WEN WEI PO in Chinese 2 Dec 82 p 1

[Telephone dispatch on 1 December by Kuang Yu: "Peng Chong Inspects Shenzhen Special Zone"]

[Text] While making an inspection of the Shenzhen special zone today, Peng Chong, vice chairman of the Standing Committee of the NPC, pointed out: The policy of the central authorities to develop special economic zones will remain unchanged and special zones must be continuously developed. He also affirmed the achievements made during the short period of 3 years since the trial implementation of the Shenzhen special zone and particularly the snowballing principle in business operations of the holiday resort in Shenzhen's Xili Reservoir, which is worth promoting and learning from.

The vice chairman of the Standing Committee of the NPC arrived at the Shenzhen special zone for a visit today, accompanied by Qing Wenjun, vice-director of the Guangdong Provincial Management Committee for Economic Special Zones. They and their entourage were greeted by Zhou Ding, vice-mayor of the Shenzhen Municipal People's Government, and Zhen Xipei, secretary general of the municipal people's government.

Vice Chairman Peng Chong arrived at the Shenzhen special zone this morning on train No 95. In the afternoon, he and his entourage visited the holiday resort of Xili Reservoir and some enterprises involving Chinese and foreign capital in the Shekou industrial zone. During the inspection, he made detailed inquiries of the enterprises in the special zone. Later that evening, he listened to the introduction made by Vice Mayor Zhou Ding and other people concerned on development in the Shenzhen special zone over the past 3 years. He also gave some instructions.

Peng Chong came to Shenzhen special zone for a visit after a short rest in Guangzhou following his tour of Thailand and Malaysia. Vice Chairman Peng will go to big and little Meisha to make an inspection on 2 December and then leave Shenzhen after the inspection.

U.S., ISRAEL SIGN AGREEMENT ON WEAPONS STUDY

HK030922 Beijing RENMIN RIBAO in Chinese 3 Dec 82 p 6

["International Jottings" by Huang Qing [7806 2532]: "Devils' Feast"]

[Text] The United States and Israel have signed an agreement to study the Lebanon war and to compare the effect of the military installations and weaponry of the United States and the Soviet Union. Israel will "obtain the results of the United States' study and improvement of weaponry," and the United States will "share the experience gained by Israel in the Lebanon war."

The United States and Israel launch their study at a time when the gun smoke of the Lebanon war still hangs in the air and the bloodstains of the Beirut massacre have not yet dried. This shows that the Lebanon war was not only a step taken by Israel to expand its aggression but also another round in the United States' and the Soviet Union's struggle for world hegemony. They fought to control important strategic positions and strategic materials in the Middle East and treated it as a testing ground for their weapons. After carrying out tests at the cost of the flesh and blood of the people of the Middle East, Israel will of course make its weaponry more excellent and the United States will also greatly improve its military installations and weaponry. As a result, the people of the Middle East once again will be used for conducting tests. No one would deny that it is appropriate to call the Lebanon war but another "devils' feast."

U.S.-SOVIET ARMS REDUCTION TALKS ADJOURN

OW030353 Beijing XINHUA in English 0127 GMT 3 Dec 82

[Text] Geneva, December 2 (XINHUA) -- Both the strategic arms reduction talks (START) and the talks on medium-range nuclear weapons in Europe between the United States and the Soviet Union have recessed here without any results announced by either side.

According to a press communique issued by the U.S. Mission in Geneva today, the START talks will resume on February 2 next year, while the medium-range nuclear weapons talks will open again on January 27.

The press communique says that the recess of the two parallel talks will enable the negotiating delegations of the two countries to "consult their national capitals".

Observers here noted that the marathon-type nuclear disarmament negotiations between the two superpowers have now come to a deadlock. No sign indicates that there will be any possible breakthrough or even major progress in the talks.

UN URGED TO INVESTIGATE CHEMICAL WEAPONS USE

OW010923 Beijing XINHUA in English 0716 GMT 1 Dec 82

[Text] United Nations, November 30 (XINHUA) -- U.N. member states have called on Secretary-General Javier Perez de Cuellar to investigate the illegal use of chemical weapons in warfare.

The call was made in a resolution adopted by the General Assembly's Political Committee last night by a vote of 70-18 with 31 abstentions.

The resolution also asked the Secretary-General to arrange for a group of qualified experts to collect on-site evidence of possible violations of the 1925 Geneva Protocol Banning the Use of Chemical Weapons in War.

The U.S. State Department said yesterday that it has evidence that the Soviet Union has used deadly chemical weapons in Afghanistan, Kampuchea and Laos.

Last week, the committee approved an appeal for a negotiated ban on the production and stockpiling of chemical weapons "as a matter of high priority."

NATO GROUPS MEET, PLAN MILITARY STRATEGY

Nuclear Planning Debated

OW010953 Beijing XINHUA in English 0756 GMT 1 Dec 82

[Text] Brussels, November 30 (XINHUA) -- The NATO Nuclear Planning Group ended its one-day winter ministerial meeting here today with a communique stressing the necessity of possessing a spectrum of forces in face of a significantly increased Soviet threat. During the conference, the ministers discussed a wide range of security matters including trends in the balance of nuclear forces of NATO and the Warsaw Pact, preparations for NATO's intermediate nuclear force (INF) missiles deployment and the status of the Soviet-American nuclear talks in Geneva.

Sources said U.S. Defense Secretary Caspar Weinberger gave a report on the strategic nuclear situation. The communique said that other participants expressed support for the recent U.S. decision on the MX missile basing and for the U.S. negotiating position in Geneva. They also welcomed the continuous and close consultations among allies on the progress of these negotiations.

NATO Secretary General Joseph Luns told a news conference at the end of NATO's Nuclear Planning Group meeting: "The U.S. Government is ready to discuss any proposal at Geneva. The zero option is an ideal solution but we never said it was the only solution."

Britain's Defense Secretary John Nott told reporters that the West would be ready to look at any alternative or lower proposal in a constructive spirit. Diplomats said although NATO has said from the start that the number of new missiles to be deployed in Western Europe would depend on the outcome of the Geneva negotiations, it was the first time today that NATO officials and ministers stressed alternatives to the zero option.

The Nuclear Planning Group final communique said: "The ministers again welcomed the fact that the United States remains prepared to give full consideration to any serious Soviet proposals which would enhance chances for effective and verifiable arms control agreements and would take into account legitimate Western security concerns."

But Caspar Weinberger reacted angrily to further questions on a shift of emphasis at Geneva, saying he did not want to undermine the U.S. negotiating position there. "What we will do in Geneva is not up to defense ministers sitting here," he added.

The Soviet news agency NOVOSTI suggested on Nov. 29 that Moscow might adopt a "launch on warning" military policy if new NATO missiles were deployed in Europe. But Weinberger rejected the Soviet charge that Western alliance missiles scheduled for deployment next year would increase the danger of accidental nuclear war.

John Nott described the Soviet assertion as "utterly unscrupulous propaganda."

The NATO Nuclear Planning Group meeting pointed out that the Soviet Union has not yet made any move on the central issue in Geneva talks, but continues to improve the entire spectrum of its nuclear forces from strategic to short-range, particularly longer-range INF. It has now deployed 324 SS-20s with 972 warheads.

The American defense secretary told the press conference today that the first aim of the Soviet Union is to destroy NATO territories and the second, to prevent NATO from deploying new missiles. The British defense secretary strongly supported a credible second strike force for NATO.

Against this background, the meeting reiterated that in the absence of a concrete arms control agreement, the deployment of 572 Pershing 2 and cruise missiles in NATO's Europe would begin according to schedule at the end of 1983. However, sources said, two of the basing countries -- the Netherlands and Belgium -- have not yet adopted their formal positions.

In view of recent reports in news media about General Rogers' proposal on the strengthening of NATO's conventional forces, the meeting also reaffirmed that NATO's strategy of deterrence remained unchanged. Problems in this context are going to be discussed in the defense ministers' conference beginning tomorrow.

Conventional Buildup Discussed

OW030153 Beijing XINHUA in English 0104 GMT 3 Dec 82

[Text] Brussels, December 2 (XINHUA) -- NATO's Defence Planning Committee ended a routine two-day winter conference of its ministerial session here today reiterating the views of the NATO Bonn summit last June on the military balance, strategy and plan, and the outside area security.

In contrast with the Nuclear Planning Group meeting right ahead, this conference focused on the conventional build-up. A communique said that the ministers discussed the 1982 annual defence review and adopted the NATO force plan for 1983-1987, and agreed to provide resources to implement the necessary force improvements against the background of the continuing numerical superiority of Soviet conventional forces and the growing application of advanced technologies.

The conference re-emphasized the importance of continuing presence of the U.S. forces in Europe and reaffirmed the intent to give due attention to the "fair burden-sharing" among allies. Secretary-General J. Luns stressed at a press conference here that the Soviet Union showed no signs of change and continues to devote 14 to 15 percent of its national income to defence. But he noted that in this context NATO allies also have made significant progress, with the United States achievement of 6.5 percent increase of its annual defence budget. The figures are 6 percent for the United Kingdom and 4 percent for Turkey and Norway.

The other nations are difficult in the economic field that they cannot reach the 3 percent target, he added. [sentence as received]

The ministers stressed their common interest in the stability of the countries outside the NATO area and the respect for a genuine non-alignment.

Concerning the military strategy, the conference received a U.S. paper on taking advantage of the emerging technologies to improve conventional capabilities. Reaffirming their adherence to the "flexible response" strategy, the ministers endorsed the effort for seeking ways to exploit new technologies. Reports said that the European nations urged continued common efforts to restrict the transfer of militarily relevant technology to the Warsaw Pact.

During the conference, Turkey and Greece restated each other's stand on their bilateral disputes, creating an unpleasant atmosphere for the alliance, and as in last year Greece reserved her position on several sentences in the communique on problems such as nuclear weapons.

Military Strategy Agreed

OW011936 Beijing XINHUA in English 1929 GMT 1 Dec 82

[Text] Brussels, December 1 (XINHUA) -- NATO's Military Committee unanimously agreed that the strategy of "forward defence and flexible response" was entirely appropriate both to present circumstances and to the foreseeable future, said Admiral R.H. Falls, chairman of the committee at a press conference here this afternoon.

But, of course, the admiral continued in briefing reporters on the Military Committee meeting held last Monday, the implementation of that strategy -- the tactics -- would be modified from time to time due to the accelerated pace of technological change. He stated that the development of tactical concepts and long term planning guidelines for each of their commands is the responsibility of the major NATO commanders, and the Military Committee is responsible for the overall implementation of alliance strategy. Referring to the new doctrine made public by General Bernard Rogers, supreme allied commander in Europe, in some widely reported speeches, Admiral Falls noted that the Military Committee is in complete accord with him. And "indeed, there would be something seriously wrong with Western military thinking if we were to refuse to adapt our tactics in the light of scientific progress."

Answering questions, Admiral Falls stressed that the new doctrine should not in any way lead to the conclusion that NATO would have a "no early first strike with nuclear forces", though it is expected to have impact on the time and place of using them. Study is underway in NATO's high level group of reducing the battle field nuclear weapons after reassessment of the total requirements of NATO. He also expressed optimism over the prospect of more money to be spent on defence by NATO member countries whom he expected to have an upturn in economy next year.

Admiral Falls did not give his usual report on the military threat of the Warsaw Pact at the meeting of the Defence Planning Committee (DPC) which began here this morning. Instead, it has now become traditional for the three major NATO commanders to brief the ministers on the state of their commands at the annual DPC conference.

U.S. SUPPORTS JAPAN'S CLAIM TO NORTHERN ISLANDS

OW251655 Beijing XINHUA in English 1641 GMT 25 Nov 82

[Text] Tokoyo, November 24 (XINHUA) -- Washington today reaffirmed support for Japan's reclamation of its northern islands from Soviet occupation, the YOMIURI SHIMBUN reported.

During a meeting in Washington with Naohiro Dogakinai, head of the "Hokkaido Representatives to Promote the Return of Northern Islands." U.S. Assistant Secretary of State John Holdridge said Washington firmly supports Japan's demand for the return of the four northern islands.

Soviet occupation of the islands is unreasonable and the United States was watching Soviet buildup of military bases there, Holdridge said.

Holdridge believed the northern islands issue will be an outstanding problem demanding the attention of the new Japanese prime minister, and said Washington will try to help solve the problem.

Dogakinai, who is governor of Japan's northern prefecture of Hokkaido, held talks with officials of the U.S. National Security Council this afternoon, seeking U.S. cooperation on the issue.

The Japanese delegation went to the United States Nov. 21 and will visit the United Nations to request help with this problem.

U.S. READJUSTS ENERGY CONSUMPTION STRUCTURE

OW021315 Beijing XINHUA in English 1206 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Daily oil consumption in the United States will fall by 17.6 percent this year, from 18.8 million barrels in 1978 to 15.5 million barrels, the U.S. Energy Information Administration anticipated.

According to U.S. press reports, the United States' energy consumption, following a 7.6 percent drop in the past three years, declined by one percent in the first five months of 1982 as compared with the same period of the previous year.

Accordingly, the United States has steadily reduced its energy imports, particularly oil products. Last year, the country's oil imports stood at a daily average of 5.4 million barrels, 37.2 percent lower than the daily 8.6 million barrels in 1977. For the first seven months of 1982, 45 percent of all U.S. oil imports were from OPEC countries as compared with 69 percent in 1978.

The drop in energy consumption, especially in oil consumption and imports, is certainly connected with the prolonged economic recession in the country. A large number of enterprises are now operating under capacity. For instance, the utilization of capacity of the steel and iron and of the automobile industries, whose energy consumption are relatively high, is only 40 and 50 percent respectively.

However, the readjustment of energy consumption structure and the policy on increasing coal production and consumption also played an important part in reducing oil consumption and imports. The five bills on energy including "The Law on Use of Fuel", passed on October 15, 1978 made it clear that oil and natural gas must not be used in principle in newly-built electric generating equipment and most of industrial burners, which must use coal as fuel.

The statistics of the U.S. Coal Association show that the United States' coal output increased to 805 million tons last year, 823.1 percent higher than that of 1978, and coal consumption jumped from 625.2 million tons to 738 million tons.

In addition, the United States has achieved good results in its energy saving activities. Some U.S. newspapers disclosed that millions of individuals have turned to smaller cars. A large number of inhabitants insulated their homes, turned down their thermostats in winter, settled for less air-conditioning in summer, and concerved their use of electricity. In 1980, residential oil use was 31 percent below its 1970 peak.

Virtually every industry has found ways of using less energy: more energy efficient equipment is being purchased, energy-saving methods of production have been developed, and excess heat has been recovered and reused. U.S. oil consumption in 1980 was 10 percent below the 1978 level while the GNP increased by three percent. Technology assessment researchers warned recently that "substantial contributions to oil import reductions from production of synthetic fuels appear to be less certain than substantial contributions from the (oil conservation) options."

Energy consumption in the United States is known to be the highest in the world and there is much waste in energy as well. Since oil still accounts for 40 percent of the country's energy consumption, it is not easy for the country to reduce its energy consumption by a big margin and to change the existing energy structure whoch is mainly made up of oil.

In a report entitled "Energy Projections to the Year 2000" published in July, 1982, the U.S. Department of Energy predicted that oil imports in 1985 will be about (figure indistinct] million barrels per day and in the year 2000, 4.6 million barrels per day.

U.S. MILITARY MEDICAL DELEGATION FETED 30 NOV

OW301528 Beijing XINHUA in English 1516 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Hong Xuezhi, director of the General Logistics Department of the Chinese People's Liberation Army, held a banquet here this evening in honor of a U.S. military medical delegation led by John Beary, assistant secretary of defence (health affairs) of the United States.

Hong Xuezhi said in his toast that the contacts between the military medical personnel of China and the United States will help enhancing friendship between the people of the two countries.

The delegation arrived here November 29 for a friendly visit at the invitation of the Chinese Ministry of National Defense.

U.S. REJECTS ADDED RESTRAINTS ON PRC MUSHROOMS

OW010858 Beijing XINHUA in English 0837 GMT 1 Dec 82

[Text] Washington, November 30 (XINHUA) -- President Ronald Reagan has decided not to impose additional restraints on imports of canned mushrooms from China, trade representative Bill Brock announced here today.

Brock said Reagan has accepted the view of the two U.S. International Trade Commission (USITC) members that imports of China's canned mushrooms are not disrupting the U.S. market.

The American Mushroom Institute filed a petition with the USITC on June 30 saying that mushroom imports from China have disrupted the U.S. domestic market and restrictions should be imposed.

After two public hearings in August and September, the USITC was evenly split on the question of market disruption.

Two members of the commission held that canned mushroom imports from China have not disrupted in any was the American market and there is not need for restrictions.

The other two members urged the administration to impose a maximum quota of 21 million pounds annually on mushrooms imported from China for three years. However, the USITC presented on September 22 the two different recommendations to the President for his final decision.

In his announcement today, Brock said that since the administration's relief program for mushroom has been in effect in November 1980, imports of canned mushrooms from China have risen substantially. However, he noted that this increase has been offset by falling imports from other countries, resulting in an overall decline in mushroom imports.

The U.S. trade representative added that the president had directed him specifically to monitor imports from China for the purpose of considering whether future action may be appropriate.

While the American Mushroom Institute's petition was being investigated, a Michigan based mushroom corporation filed on October 13 an "anti-dumping" petition with the USITC against canned mushrooms from China. On October 19, the USITC voted for the petition. The case now is being handled by the Department of Commerce.

SOVIET VIEWS ON NATO DEPLOYMENT OF PERSHING II

HK030929 Beijing RENMIN RIBAO in Chinese 3 Dec 82 p 6

["International Jottings" by Zheng Yuan [6774 0955]: "Special Function"]

[Text] The Soviet news agency is another Soviet semi-official propaganda organ. Therefore, it can exercise a kind of special function. This news agency recently published an editorial, saying that if NATO persists in deploying the U.S.-made Pershing II guided missiles and others which can be launched at the Soviet border in a short time, the Soviet Union would "carry out a retaliatory nuclear attack to punish it." The editorial added that such "retaliatory attack" would destroy not only the launching sites of the U.S. guided missiles, but also "populous areas in Western Europe" where "a number of arsenals are located."

If the views of the Soviet news agency are tenable, might Western Europe not also announce that it will carry out a "retaliatory attack to punish" the Soviet Union and other countries of the Warsaw Treaty on the pretext that the Soviet SS-20 missiles might be launched at the border of the Western European nations in a short time? The nuclear deterrent competition between the Soviet Union and the United States is a kind of contested game. Both sides pretend to be fierce and arrogant, but neither of them dares to perish together with the other side. The more the Soviet news agency talks about nuclear retaliation, the more impractical its attitude is. Due to the fact that the Soviet news agency irresponsibly unleashed nuclear threats, some responsible Soviet politicians asserted that they bear no responsibility for its views. What special functions the Soviet news agency is exercising!

PRC, USSR SCHOLARS ATTEND MEETING IN PAKISTAN

OW010927 Beijing XINHUA in English 0735 GMT 1 Dec 82

[Text] Islamabad, November 30 (XINHUA) -- The first international conference on the strategy for peace and security in South Asia today called on the South Asian countries to promote their cooperation.

The three-day conference was sponsored by Pakistan Institute of Strategic Studies and Quaid-E-Azam University's regional studies centre.

A statement issued here this evening by the conference said "The peace and security of South Asia is the responsibility of the states of the region itself and its maintenance and promotion require faithful observance of the principles of peaceful coexistence."

"Through better mutual understanding, the states of the region could also strengthen an environment free of outside intervention or interference in the internal affairs of any of the countries of the region. The policy of non-alignment provides a framework conducive to the avoidance of outside involvement in the peace and security of the region," the statement added.

It stressed the importance of further cooperation among the South Asian countries in the fields of science, technology, education, commerce, tourism and culture.

The statement also welcomed frequent contacts between Pakistan and India.

Among the participants in the conference were also scholars from China, the Soviet Union and the United States.

JAPAN'S CURRENT POLITICAL SITUATION REVIEWED

OW020217 Beijing XINHUA Domestic Service in Chinese 0129 GMT 27 Nov 82

["Japan's Political Situation Following Nakasone's Election as Prime Minister -- by Xu Wixin" -- XINHUA headline]

[Text] Beijing, 26 Nov (XINHUA) -- The turbulent political situation in Japan caused by the internal struggle within the Liberal-Democratic Party [LDP] has finally calmed down for the time being, following the election of Yasuhiro Nakasone as president of the LDP and prime minister of Japan. When the results of the LDP presidential primary election were announced on 24 November Nakasone, one of the four candidates, took the lead by winning an overwhelming majority of nearly 560,000 votes (accounting for 58 percent of the total vote). Although Toshio Komoto and Shintaro Abe were qualified for run-off, they decided not to run because Nakasone had obtained a large majority in the primary. Thus, at an extraordinary session of the LDP held on 25 November, Nakasone was elected its 11th president. He was elected the 71st prime minister of Japan at an extraordinary session of the Diet on 26 November.

Commenting on the reasons for Nakasone's victory, public opinion in Japan noted that the most important reason is that Nakasone had the backing of the powerful Tanaka and Suzuki factions during his presidential campaign. To assure Nakasone's victory, these two factions did not nominate their own presidential candidates in order to help Nakasone win more votes. Since there were no serious differences in the political views of the four candidates, the key to winning more votes lay in securing the support of the various factions. The Tanaka, Suzuki and Nakasone factions organized a powerful campaign in various areas, took control of the votes commanded by the Diet members of their factions and won over uncommitted voters -- as well as some supporters of their opponents -- through the use of carefully planned ballot-winning tactics such as telephoning voters, writing to them and visiting them at their homes.

Since 1947, Nakasone has been elected member of the House of Representatives 14 times and has held the post of secretary general and executive council chairman of the LDP. His prestige far exceeds that of his three opponents. A Japanese newspaper commented: "Unlike the last election, Nakasone did not reveal his hawkish stance on such policy matters as constitutional amendments and defense buildup, thus weakening the resentment of the party rank and file. This also constitutes one of the reasons for his victory."

In addition, because local elections are to be held nationwide next spring, influential LDP members --largely local LDP Diet members -- supported Nakasone at the polls after finding him in a comfortable lead during the month-long primary in order to draw support from the three mainstream factions. A number of LDP members voted for Nakasone in order to save the party from a split over the conflict between the mainstream and nonmainstream factions.

The Japanese press held that the pillars of support for the Nakasone cabinet are the Tanaka and Suzuki factions. Hence, the composition and policy of his cabinet will be strongly pro-Tanaka in nature. However, after becoming LDP president, Nakasone said he would select competent personnel for his cabinet by putting factional interests aside.

After assuming power Nakasone indicated that, internally, he would continue Suzuki's policy on carrying out administrative and financial reforms, seeking stable economic growth and tackling problems brought about by the economic recession.

In foreign affairs, he indicated that he would "strengthen the relations of mutual trust between Japan and the United States" and attach importance to relations with neighboring countries in Southeast Asia. During his tenure as cabinet member of past administrations, Nakasone attached importance to the fundamental policy of strengthening Sino-Japanese relations and cooperation and supported the government in strengthening this policy. He said: "Japan and China should strengthen good-neighborly relations and economic cooperation. This will benefit the world."

DEMANDS FOR U.S. WITHDRAWAL FROM S. KOREA CITED

OW271544 Beijing XINHUA in English 1522 GMT 27 Nov 82

[Text] Pyongyang, November 27 (XINHUA) -- Many countries have demanded that Washington withdraw its troops from South Korea, Korean Central News Agency (KCNA) reported.

These demands were made on the occasion of the seventh anniversary of the resolution adopted at the United Nations General Assembly which asked all foreign troops pull out from South Korea. But the United States has turned a deaf ear to the resolution.

A statement by the "International Liaison Committee for Korea's Independent and Peaceful Reunification" said Korean reunification cannot be achieved with 40,000 foreign troops stationed in South Korea. A U.S. pullout from the Korean Peninsula is a prerequisite for the Korean reunification which is an affair of the Koreans, which should be interfered by nobody, said a statement from the committee's Peru branch. The U.S. presence in South Korea is an interference in Korean internal affairs and a violation of both the Korean armistice agreement and the U.N. Charter, said the Committee's Ghana branch. The Committee's Zimbabwe branch demanded that Washington accept Pyongyang's proposal on turning the Korean armistice into a peace agreement.

In a letter to U.N. secretary general Perez de Cuellar, Iranian parliamentarian Zalheulli said a U.S. pullout from South Korea will help ease world tension. In a message to Perez De Cuellar, the Sweden-Korea Friendship Association said it would try to get the U.N. resolution carried out.

PRC, DPRK BANKS SIGN TRADE AGREEMENTS

OW281124 Beijing XINHUA in English 1116 GMT 28 Nov 82

[Text] Beijing, November 28 (XINHUA) -- The Bank of China and the Foreign Trade Bank of the Democratic People's Republic of Korea signed here this afternoon three agreements on the trade and non-trade payment and settlement and the exchange of the currencies of the two countries.

The documents were signed by President of the Bank of China Jin Deqin and President of the Foreign Trade Bank of Korea Pang Ki-Yong.

BANGLADESH'S ERSHAD ENDS VISIT; LEAVES FOR HOME

Leaves Guangxi for Guangzhou

HK030226 Nanning Guangxi Regional Service in Mandarin 1130 GMT 2 Dec 82

[Text] Having concluded their visit to Guilin, General Hussain Mohammad Ershad, president of the Council of Ministers of Bangladesh, and his party left the city for Guangzhou by special plane at 0930 this morning. Zhou Guangchun, vice chairman of the regional people's government; Liang Shan, mayor of Guilin; (Jiang Jinghe), director of the foreign affairs office of the regional people's government and other leading comrades went to the airport to see them off.

As the Bangladesh guests were boarding the plane, Vice Chairman Zhou Guangchun and others hastened forward to shake hands with them, cordially saying good-bye and wishing them a pleasant journey.

The Bangladesh guests arrived in Guilin at 1130 yesterday morning, in the company of Fu Hao, adviser to the Chinese Foreign Ministry, and other officials. They toured the Li Jiang and the Ludi Grotto. In the evening, Ershad and his party were feted by the Guangxi Regional and the Guilan Municipal People's Governments.

Visits Guangzhou

HK030942 Guangzhou Guangdong Provincial Service in Mandarin 1000 GMT 2 Dec 82

[Text] General Hussain Mohammed Ershad, president of the Council of Ministers of Bangladesh, and his entourage arrived in Guangzhou from Guilin by special plane this morning for a visit, accompanied by Fu Hao, adviser to the Ministry of Foreign Affairs. Li Jianan, vice governor of Guangdong Province; (Yang Yi), vice mayor of Guangzhou Municipality; and responsible persons of the quarters concerned went to the airport to warmly greet the guests. Young Pioneers offered flowers to President Ershad.

At noon, the provincial people's government gave a banquet at the oriental guest house to welcome the visit of the guests from Bangladesh to Guangzhou. At the banquet, which was charged with a warm atmosphere, Vice Governor Li Jianan and President Ershad toasted the continuous development of the friendly cooperative relations between China and Bangladesh and the friendship between the people of the two countries. Adviser Fu Hao, Vice Mayor (Yang Yi) and others were present at the banquet.

This afternoon, accompanied by Vice Governor Li Jianan and others, President Ershad and other guests from Bangladesh went to visit the Lianhe Commune in the suburbs of Guangzhou.

Leaves for Home

OW021331 Beijing XINHUA in English 1252 GMT 2 Dec 82

[TExt] Guangzhou, December 2 (XINHUA) -- Hussain Mohammad Ershad, president of the Council of Ministers of Bangladesh, wound up his China visit and left here for home this evening. Seeing him off at the airport were Fu Hao, adviser to the Foreign Ministry, and Li Jianan, vice-governor of Guangdong Province. Prior to his departure, Ershad said his visit was a success, and he felt very satisfied. He said he believes the frienship between the Bangladesh and Chinese peoples will develop. Ershad and his party arrived here from Guilin this morning, and were given a luncheon by the Guangdong Provincial People's Government. This afternoon, the guests visited a people's commune and inspected an irrigation works.

GREETINGS MESSAGES SENT TO ALBANIAN OFFICIALS

Ye Jianying to Alia

AU021206 Tirana ZERI I POPULLIT in Albania 28 Nov 82 p 3

[Telegram of congratulations to Ramiz Alia on his election as chairman of the Presidium of the People's Assembly of the People's Socialist Republic of Albania]

[Text] From Ye Yianying, chairman of the Standing Committee of the National People's Congress of the People's Republic of China:

On the occasion of your election to the post of chairman of the Presidium of the People's Assembly of the People's Socialist Republic of Albania, I beg you to accept my sincere greetings. I wish you success in carrying out this high function.

Zhao Ziyang to Carcani

AU021230 Tirana ZERI I POPULLIT in Albanian 28 Nov 82 p 3

[Telegram of congratulations to Adil Carcani on occasion of his election as chairman of the Council of Ministers of the People's Socialist Republic of Albania]

[Text] From Zhao Ziyang, premier of the State Council of the People's Republic of China:

I express my cordial greetings on the occasion of your reappointment to the post of chairman of the Council of Ministers of the People's Socialist Republic of Albania. I wish you success in your work.

BULGARIA'S FILIPOV RECEIVES OUTGOING PRC ENVOY

OW030358 Beijing XINHUA in English 0130 GMT 3 Dec 82

[Text] Sofia, December 2 (XINHUA) -- Grisha Filipov, chairman of the Council of Ministers of Bulgaria, today received Chinese Ambassador An Zhiyuan who will be leaving for home at the end of his term of office.

During their conversation which was permeated with a friendly atmosphere, the two sides expressed the common desire to further develop their bilateral relations.

Bulgarian Foreign Minister Petur Mladenov also received An Zhiyuan and gave a dinner in his honor the same day.

GDR'S AXEN ON NORMALIZING RELATIONS WITH PRC

OW260800 Beijing XINHUA in English 0722 GMT 26 Nov 82

[Text] Berlin, November 25 (XINHUA) -- Hermann Axen, Politburo member and secretary of the Central Committee of the German Socialist Unity Party (SED), today expressed his country's wish to normalize relations with China.

In his report to the fifth plenum of the 10th party congress, Axen pointed out that further normalization of the relations with China would be in the interest of safeguarding world peace. He said: "Our party earnestly hope that the Sino-Soviet talks would have positive results. The German Democratic Republic is taking constructive steps to seek normalization of relations with China on the basis of the principles of equality, mutual respect for sovereignty and territorial integrity, and mutual non-interference."

FURTHER ON VISIT OF OMANI DEPUTY PRIME MINISTER

Zhao Ziyang Meeting

OW242119 Beijing XINHUA in English 1509 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Chinese Premier Zhao Ziyang met this afternoon with Fahar ibn Taymur Al Bu Sa'id, deputy prime minister for defense and security of the Sultanate of Oman.

Zhao Ziyang said Sino-Omani diplomatic relations, since their establishment, have developed very well. "We express satisfaction with this," he said.

Zhao Ziyang said he hoped to see further development of relations between the two countries.

The Chinese premier said that under the leadership of Sultan Qabus ibn Sa'id Al Bu Sa'id and the Omani Government, the Omani people have achieved great success in defending their national independence and developing their national economy. "The Chinese people rejoice at your success," he said.

He said the talks between the deputy prime minister and the Chief of the General Staff of the Chinese People's Liberation Army Yang Dezhi showed the two sides shared identical or similar views on many international issues.

He said Sultan Qabus and the Omani Government follow a peaceful, neutral and nonaligned policy. They oppose hegemonism and have developed wise policies to enhance the unity and strength of the Gulf countries and the unity among Arab countries, he said.

"We always regard unity among the Arab countries as the crux of solving the Middle East question," Zhao Ziyang said.

Fahar said "During our visit, we saw China's achievements. We wish China prosperity.

"The contacts between Oman and China have a long history. Oman-China relations have developed in recent years. We are glad to have China as our faithful friend," he said.

Present were Wen Yezhan, vice-minister of foreign affairs; Xu Xin, assistant to the chief of the General Staff of the P.L.A.; and Zhang Tong, director of the Foreign Affairs Bureau of the Ministry of National Defense.

Also present were Mohammed Sa'id Zahran al Ruqaishi, private assistant to Fahar, and 'Awad Badr Mar'i ash-Shanfari, Omani ambassador to China.

Yang Dezhi at Reception

OW242150 Beijing XINHUA in English 1656 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Omani Ambassador to China 'Awad Badr Mar'i ash-Shanfari gave a banquet in his embassy this evening for visiting Deputy Prime Minister Fahar ibn Taymur Al Bu Sa'id.

Among the Chinese guests present were Yang Dezhi, chief of the General Staff of the Chinese People's Liberation Army; Wen Yezhan, vice-foreign minister, and Xu Xin, assistant to the chief of the General Staff of P.L.A. This morning, the deputy prime minister and his party visited the Great Wall and the Ming tombs.

Leaves for Home

OW250455 Beijing XINHUA in English 0106 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- Omani Deputy Prime Minister for Defense and Security Fahar ibn Taymur and his party left here by air this morning at the end of their successful visit to China. They were seen off at the guesthouse by Yang Dezhi, chief of the General Staff of the Chinese People's Liberation Army, and Xu Xin, assistant to the chief.

In a cordial conversation, the hosts and guests agreed that there will be more exchanges between the peoples and armed forces of China and Oman who are bound by very friendly ties.

JORDAN'S KING HUSAYN TO MAKE OFFICIAL VISIT 7-9 DEC

OW021129 Beijing XINHUA in English 1101 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- His Majesty Husayn ibn Talal, king of the Hashemite Kingdom of Jordan, will pay an official, friendly visit to the People's Republic of China between December 7 and December 9 at the invitation of the standing Committee of the National People's Congress and the Chinese Government.

To Lead Arab League Group

OW021648 Beijing XINHUA in English 1639 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- A delegation of the seven-member committee of the Arab League led by His Majesty King Husayn ibn Talal of the Hashemite Kingdom of Jordan will pay a visit to China beginning December 5.

Members of the delegation include 'Abd al-Halim Khaddam, Syrian vice-premier and minister of foreign affirs; Sa'ud al-Faysal, minister of foreign affairs of Saudi Arabia; M'hamed Boucetta, Moroccan minister of state in charge of foreign affairs; Marwan Qasim, Jordanian minister of foreign affairs; Beji Caid es-Sebsi, Tunisian minister for foreign affairs; Ahmed Taleb Ibrahimi, Algerian minister of foreign affairs; Mahmud 'Abbas, member of the Executive Committee of the Palestine Liberation Organization, and Chedli Klibi, secretary general of the Arab League.

MORE COUNTRIES AT UN CRITICIZE ISRAELI POLICY

OW021043 Beijing XINHUA in English 0723 GMT 2 Dec 82

[Text] United Nations, December 1 (XINHUA) -- More countries today condemned Israel's policy of aggression and expansion and demanded its unconditional recognition of the legitimate rights of the Palestinian people as the General Assembly continued its debate on the Palestine problem.

Clovis Maqsud, permament observer of the Arab League to the United Nations, declared that the issue between the Arabs and Israel "is not whether we acquiesce in a state of Israel but whether Israel acquiesces in the right of the Palestinians to build an independent state in their homeland."

Referring to U.S. President Reagan's September 1 plan, Maqsud said: "The Arab states and the Arab people, including the PLO, neither reject outright the entirety of the Reagan initiative or plan, nor do they accept the Reagan plan in its entirety."

Syrian representative Diya' Allah al-Fattah said it was time to force Israel to give the rights which had been continuously denied to the Palestinians. He also accused the United States of its support for Israel, saying that the U.S. assistance to Israel was 675 dollars per capita per annum.

Saudi representative Ja'far al-Ghani said Israel's purpose was to turn all of Palestine into a Jewish state where there would be no resident Arabs. Israel resorted to the argument of security to justify its colonization program and turned down initiatives for peaceful settlement, the most recent being the declaration of the Fes summit by Arab leaders.

The only way out of the impasse, he went on, was to remind Israel and its friends that defying international law was a perilous course and would only increase Arab resistance.

Muhammad Abu al-Hasan of Kuwait noted that the Israeli leaders did not want any solution which would deal with the core of the Middle East crisis, namely the Palestine question, but rather wished to leave for itself freedom of action in the region after establishing its military domination.

Abdul al-Hadawi of Iraq charged Israel with occupying Arab lands, turning Jerusalem into its own capital, trying to stop refugees from returning to Palestine, and perpetrating massacres.

He said the Palestinians' resistance had been reinforced through recent struggles and they would never give up their struggle.

Danish representative Wilhelm Ulrichsen, speaking on behalf of the 10 member states of the European Community, said events of the past year had once again demonstrated the need for a negotiated, comprehensive settlement of the Arab-Israeli conflict. They confirmed that there could be no real peace or stability in the Middle East unless the legitimate rights of the Palestinian people were recognized, he said.

The 10 European Community countries, he noted, had recently said a settlement should be based on the principles of security for all states in the region, including Israel's right to exist, justice for all peoples, including the right of self-determination for the Palestinians with all that implied, and mutual recognition by all the parties involved.

Ignac Golob of Yugoslavia said the inalienable rights of the Palestinian people to self-determination, national independence and establishment of their own state were at the core of the Middle East crisis. Stubborn attempts by Israel to solve the question of Palestine by war and terror were a constant threat to security in the Middle East and the world.

GOVERNMENT DELEGATION ENDS BENIN VISIT 1 DEC

OW021734 Beijing XINHUA in English 1711 GMT 2 Dec 82

[Text] Lome, December 2 (XINHUA) -- A Chinese Government delegation concluded its visit to Benin and left for home yesterday evening.

During its visit, the delegation, headed by Lu Jindong, vice-minister of the Chinese Commission of Physical Culture and Sports, attended a ceremony for handing over to Benin a comprehensive stadium built with Chinese aid.

The Chinese delegation exchanged views yesterday with Justin Gnidnehou, Benin minister of yourh and sports, on sports cooperation between the two countries.

Benin Minister of Foreign Affairs and Cooperation Tiamiou Adjibabe received the delegation yesterday.

RENMIN RIBAO RAPS SOUTH AFRICA'S 'AGGRESSION'

HK280743 Beijing RENMIN RIBAO in Chinese 28 Nov 82 p 6

["Short commentary": "What Are the South African Authorities Up To?"]

[Text] Under the pretext that Mozambique had supported a "terrorist" attack on Komatipoort on the South African border, the South African racist regime recently concentrated large numbers of troops for military exercises on the Mozambique border and also threatened to take "military action" against Mozambique, in order to "punish a neighboring country that supports terrorists." The affair is now developing further. The Chinese Government and people strongly condemn this new military provocation and armed threat of the South African racist regime, and resolutely support the anti-aggression struggle of the Mozambique and African peoples.

The move of the reactionary South African authorities in repeatedly carrying out armed aggression and making armed threats against neighboring countries and causing tension in southern Africa is obviously linked to the Namibia issue. Since Zimbabwe gained independence, the Namibian people's struggle for national independence has developed vigorously, and the international community's demands that the Namibian independence issue be solved as soon as possible have grown ever louder. As a result, the reactionary South African authorities are in an unprecedentedly difficult position. They have been forced to accept the new three-stage scheme put forward on the Namibian independence issue by five Western countries. Just as the forces concerned were about to sign the cease-fire agreement, the South African authorities have again deliberately raised obstacles, proposing that agreement can only be reached on the Namibian independence issue if Cuban troops are withdrawn from Angola. The Namibian independence talks have thus reached deadlock again.

The aim of the South African racist regime in creating pretexts now for threatening Mozambique is to force the African frontline states to make still more concessions at the negotiating table and to solve the Namibian issue in the way the South African authorities want, so that they can continue to practice colonialism in that country. This conspiracy of the South African authorities will certainly not succeed.

It should be noted that the South African authorities carried out this armed threat against Mozambique as soon as the U.S. vice president had visited Africa, and also that they used the same method that Israel had used in invading Lebanon. As everyone knows, the South African authorities have consistently enjoyed U.S. favor and support. People are right to point out that the United States will bear unshirkable responsibility should the South African authorities turn their threat to invade Mozambique into reality.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Presidium Meets 3 Dec

OW030736 Beijing XINHUA in English 0725 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- The Presidium of the Fifth Session of the Fifth National People's Congress today decided to submit the draft revised constitution, which was further improved on the basis of panel discussions in the last few days, to the current session for approval.

The meeting held here this morning, which was the second of the Presidium, heard a report made by Hu Sheng, leader of the group working on the constitution.

Hu Sheng said that, starting from the afternoon of November 27, the deputies have discussed the draft revised constitution and the report delivered by Pend Zhen, vice-chairman of the Committee for the Revision of the Constitution. While expressing satisfaction with the draft in general, Hu Sheng said, the deputies also put forward proposals for further revision.

The working group made additional changes in the draft after a detailed study of the suggestions, he said. He then gave an account of the specific revisions.

Peng Zhen, one of the executive chairmen of the Presidium, spoke on the basic principles for the revision and ways of ensuring the enforcement of the constitution.

After discussion, the Presidium approved Hu Sheng's work report and decided to submit the further revised draft to the congress for approval.

Today's meeting also adopted draft resolutions on the functions and powers of the Fifth National People's Congress Standing Committee and the anthem of the People's Republic of China, and decided to submit them to the congress for approval.

In accordance with a decision of the Presidium, the current congress will vote on the constitution by secret ballot. The Presidium meeting also approved a draft list of scrutineers and the chief scrutineer which will be submitted to the congress for approval.

Yang Shangkun, another executive chairman of the Presidium, presided over today's meeting.

Zhao, Others At Group Talks

OW021610 Beijing XINHUA in English 1529 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Premier Zhao Ziyang's report on China's Sixth Five-Year Plan has won warm acclaim from people's deputies for its "down-to-earth spirit" and "deep insight."

Analysing the report with statistics from their own areas, provincial leaders agreed that the planned targets are "both encouraging and practical," having made a due allowance for unforeseen circumstances.

Discussion of the report started this morning when the deputies to the National People's Congress met in some 100 groups. A number of provinces began discussing their own development programs in the light of the national plan.

Deputies from Daqing announced the oilfield had produced 47,498,000 tons of crude oil by the end of November, 277,000 tons more than in the same period last year. Its annual output is expected to reach a record 51.85 million tons by the end of the year and to stay around 50 million tons in the next three years.

Wang Luming, vice-governor of Heilongjiang Province, who attended the meeting, told the Daqing deputies that the whole province "will support you in your effort."

Zhong Min, vice-chairman of the Shanghai Municipal People's Congress Standing Committee, described the Sixth Five-Year Plan as having embodied China's 30 years experience in economic construction. "It fits in with the realities of the country," he said.

Noting the plan's emphasis on good economic results, he said it's important to "update existing enterprises in order to improve economic results, and Shanghai as China's largest industrial city will do its share in fulfilling the national task."

Huo Shilian, first secretary of the Communist Party Shanxi Provincial Committe, outlined a program to turn the province into a leading coal center of China. Xu Bin, mayor of Qinhuangdao, presented a plan to build the city into one of the world's leading coal ports.

Premier Zhao Ziayng, a deputy of Sichuan, joined other deputies from the province this morning in discussing how to improve economic results. He was first secretary of the Sichuan provincial party committee from 1975 to early 1980.

Tie Ying, chairman of the Standing Committee of the Zhejiang Provincial Congress, said he believed that the Sixth Five-Year Plan "can be overfulfilled through our common efforts." Zhejiang saw an annual increase of 15.5 percent in the total output value of industry and agriculture in the four years 1978-1981.

Ren Zhongyi, first secretary of the Guangdong provincial party committee, said he fully supports the decision to go on expanding economic, technological and cultural exchanges with foreign countries on the principle of equality and mutual benefit.

"We are opposed to the corrosive influence of decadent bourgeois ideas," he said, "but we are not xenophobes."

Ren Zhongyi on Trade Expansion

OW021616 Beijing XINHUA in English 1522 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- A leader of Guangdong Province today pledged full support for continuing the policy of opening to the outside world as proposed by Premier Zhao Ziyang at the current National People's Congress.

Ren Zhongyi, first secretary of the Communist Party Committee of Guangdong Province, said at a panel discussion that facts in recent years have proved the policy to be correct.

Introduction of foreign funds and technology has helped the growth of industry and agriculture in Guangdong which has, in turn, increased its contributions to the state in terms of revenues, foreign exchange earnings and major factory and farm products, Ren said.

With their income and livelihood improved, the local people are very glad and eager to have such a good policy continued, he added.

Ren Zhongyi said the people in Guangdong favor in particular the special policies and flexible measures which Premier Zhao said in his report should be continued in Guangdong and Fujian, the two coastal provinces in southern China.

Ren also supported the ideas of increasing the use of foreign funds to an appropriate extent and giving the two largest coastal cities, Shanghai and Tianjin, greater power of decision in economic exchange.

Foreign trade and technical and cultural exchange are essential to social progress and this is true of any country, Ren said. A country which pursues a close-door policy would inevitably fall behind, he added.

Opposing decadent influence from other countries does not mean rejecting everything foreign, he said. "Advanced science and technology from capitalist countries and their progressive culture should be welcomed."

Ren Zhongyi recalled how China was favorably influenced by the outside world during the 1911 revolution and the "May fourth movement" of 1919 which paved the way for a thorough-going democratic revolution in China.

The Chinese Communist Party itself was founded thanks to the influences of Marxism and Leninism, and all these influences helped promote social progress in China, he said.

On the other hand, Ren said, China has influenced the rest of the world tremendously with its ancient civilization and particularly the four great inventions -- compass, gun powder, printing and paper making -- as well as Mao Zedong Thought. "Therefore, influence is reciprocal."

Huang Huoqing on Legal System

OW021359 Beijing Domestic Service in Mandarin 1000 GMT 28 Nov 82

[Text] During the group discussion at the Fifth Session of the Fifth NPC on 27 November, Huang Huoqing, NPC deputy and chief procurator of the Supreme People's Procuratorate, commented on the issue of democracy and the legal system. He said: The draft of the revised constitution contains more specific sitpulations on a citizen's rights and how such rights will be protected. The strengthening of the people's congress system and the expansion of the NPC Standing Committee's authority are organizational means to ensure the NPC's role as the highest power organ and to further ensure the people's role as the masters of their own country.

Huang Huoqing pointed out: While socialist democracy must be strengthened and the people's democratic rights and other rights must be fully ensured, the socialist legal system must also be safeguarded. These two are closely integrated. If there is no strict legal system and if a small number of people are allowed to do whatever they want and infringe upon other people's rights, the democratic rights of the broad masses of people cannot be safeguarded. For this reason, our country must continue to formulate and perfect its various laws and intensify the propagation of the legal system. The judicial organs must strictly abide by the law when doing their work, and they must strike harshly at those criminal elements who have jeopardized socialism so that socialist modernization can progress smoothly.

Huang Huoqing added: After the new constitution has been adopted and promulgated for implementation, we must organize all the cadres to study and implement it earnestly. We must also intensify the training of cadres so that their political consciousness and professional capability can be further enhanced. We must continue to improve our procuratorial work and work hard to create a new situation in procuratorial work.

CHEN YUN SUPPORTS CONSTITUTION, ZHAO REPORT

OW021321 Beijing XINHUA in English 1149 GMT 2 Dec 82

[Text] Beijing, December 2 (SINHUA) -- Chen Yun, one of the Chinese Communist Party's top leaders, said today he fully endorsed the draft revised constitution and Premier Zhao Ziyang's report on the Sixth Five-Year Plan.

He said the task of quadrupling China's total annual output value of industry and agriculture by the end of this century should be accomplished in two stages. The first decade should be devoted to the laying of a solid foundation so the economy can enter a period of vigorous growth in the second decade.

Chen Yun, a Standing Committee member of the Political Bureau of the C.P.C. Central Committee, and also an N.P.C. deputy, is unable to attend the current session because of his advanced age. He welcomed the visitors from Shanghai to his home with warm handshakes.

Since the Sixth Five-Year Plan covers the first five years of the first decade, he said, the rate of economic growth scheduled under the plan cannot be too high.

Chen Yun said he approved Zhao Ziyang's proposal that emphasis should be laid on improving economic performance during the Sixth Five-Year Plan period.

Provided the relationships in the economic field could be straightened out and the ground work for the major construction projects done well during the Sixth and Seventh Five-Year Plan periods, he said, the rate of growth in the second decade would be much faster and the goal of quadrupling total industrial of agricultural output could be fulfilled.

He said it was necessary for the state to earmark adequate funds for strengthening the weaker links such as the energy industry, transport services, science and education and to ensure the construction of key projects.

Chen Yun emphasized the importance of subordinating local interests to national interests in organizing economic construction.

He supported Zhao Ziyang's proposal that construction of large and medium-sized projects must be approved by the State Planning Commission and that additional, unscheduled large and medium-sized projects must first be reviewed for overall balance by the commission and then submitted to the State Council for approval.

Technical transformation of existing enterprises is a major task in the Sixth Five-Year Plan, Chen Yun said. This should be a new road for developing China's industry.

In most cases, he said, the practice of raising the rate of depreciation to accelerate the updating of equipment, introduce advanced technology and carry out technical transformation of existing enterprises, yields better results than building new enterprises.

Shanghai, which has a lot of old enterprises, should pay particular attention to this, Chen Yun said.

He described the stiff competition with Shanghai products offered by consumer goods from other parts of the country as a welcome development. Shanghai should not use administrative measures to block their entry but should take up the challenge and compete with them by stepping up technical transformation to improve quality and cut production costs, he said.

Chen Yun stressed the need to invigorate the economy under the guidance of state planning.

He compared the relationship between enlivening the economy and economic planning to that between the bird and the cage. "You mustn't hold the bird in your hands too tightly, or it would be strangled. You have to turn it loose, but only within the confines of a cage; otherwise it would fly away," he said. "The size of the cage should be appropriate. It is not necessarily confined to a province or a region. It may go beyond the limit of a province or region, and may even reach out to other countries and continents."

Chen Yun added that the cage itself should be readjusted from time to time just as the five-year plan should be revised when necessary.

"In short," he said, "enlivening the economy and regulation through the market can only operate within the framework of state plans, and must not depart from the guidance of planning."

Chen Yun said that remarkable results have been achieved by following the policy of invigorating the economy since the third plenum of the 11th party Central Committee in December 1978.

Shops are now stocked with goods, and the seller's market is changing into a buyer's market. "This is a very good situation we have not seen for a long time," he noted. [Beijing XINHUA Domestic Service in Chinese at 0852 GMT on 2 December adds that visitors from Shanghai were led by "Hu Lijiao, chairman of the Standing Committee of the Shanghai Municipal People's Congress," and included "Rong Yiren, vice chairman of the CPPCC National Committee, chairman and president of the China International Trust and Investment Corporation; Shen Hong, adviser to the State Machine Building Industry Commission under the State Council; Liu Jingji, chairman of the Shanghai committee of the China Democratic National Construction Association"; and others]

GUANGDONG, HUBEI, JIANGXI REPORT GOOD HARVESTS

OW021139 Beijing XINHUA in English 1104 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Agricultural departments in Guangdong, Hubei and Jiangxi Provinces report good grain, including rice, and industrial crop harvests, with resultant rises in peasant incomes.

Guangdong -- one of China's major rice producers -- harvested 18.75 million tons of grain, mainly rice, 2.3 million tons more than 1981 and 750,000 tons above the peak year of 1980, according to the provincial agricultural department.

The province, also a major sugarcane producer, reaped 16.23 million tons of the crop, hitting an all-time high, and 645,500 tons of peanuts, also setting a record. The province, a major fruit-growing center, also recorded increases in fruit output.

Following the harvests, Guangdong peasants expect an average per-capita net income of 380 yuan this year, 16.9 percent higher than last year, the department said.

The department attributed the harvests to popularization of good rice varieties to reduce losses from cold and typhoons.

The province planted early-maturing hybrid rice varieties on 667,000 hectares, 70 percent of the total, resulting in an average increase of 0.75 to 1.5 tons per hectare more than conventional varieties.

One traditionally low-yield prefecture in southern Guangdong harvested 650,000 tons more rice this year, as a result of popularization of hybrid varieties.

Hubei Province -- another major grain producer -- harvested 1.94 million more tons of grain this year than last or an increase of 11.4 percent, the provincial agricultural department reported. Average per-hectare grain output was 375 kilograms more than last year.

The harvest is due largely to popularization of fine grain varieties, application of soil survey results, increased use of fertilizer and improved management. High-yield rice varieties were planted on 90 percent of the total rice acreage, cotton varieties on 91 percent, and oil-bearing crops on 81 percent, all the biggest percentages ever, the department said.

The provincial commercial department topped the state grain purchase quota by the end of November 20 -- three million tons -- 850,000 tons more than the same 1981 period.

Despite a serious flood, Jiangxi Province expects grain output to be 13.25 million tons this year, 300,000 tons above the record year of 1979, an increase of two percent. The figure also represents a four percent increase from last year, the department said.

Under the responsibility system, peasants have transformed low-yield fields into fertile farmland. As a result, 14,000 families in Nanchang County alone each sold five tons of grain to the state. Many people's communes and production brigades will supply five tons of grain per household to the state, while some peasant families will each sell 15 tons to 50 tons.

ZHAO ZIYANG PRAISES SUN YEFANG'S 'GOOD ARTICLE'

HK030410 Beijing RENMIN RIBAO in Chinese 2 Dec 82 p 1

[Unattributed report: "Zhao Ziyang praises Sun Yefang for Writing a Very Good Article on Main Reliance on Technical Transformation -- The Noted Economist, Though Seriously Ill, Is Still Highly Concerned About Socialist Construction"]

[Text] In his report on the Sixth 5-Year Plan at the Fifth Session of the Fifth NPC, Premier Zhao Ziyang said that, though seriously ill, Comrade Sun Yefang, noted economist, was still highly concerned about socialist construction and wrote a very good article entitled " There Are Not Only Political but Also Economic Guarantees for Quadrupling Output Value in 20 Years," expounding the question that it is necessary to rely chiefly on technical transformation in order to quadruple output value.

Sun Yefang pointed out that the phenomena characterized by "big base, low speed" does not constitute a law of development for social production but is the result of overlooking technological transformation of existing enterprises; and that, so long as we no longer "freeze technology" and "reproduce outdated equipment" but carry out technological transformation on the hundreds of thousands of existing enterprises with emphasis and step by step, the development of production will certainly accelerate. He deemed it necessary to gradually raise the depreciation rate for fixed assets and shorten the depreciation time.

Zhao Ziyang said that the State Council considered these arguments correct. In the future, it is necessary to adopt a positive attitude and gradually raise the depreciation rate according to the state's financial capabilities.

The State Council has instructed the State Planning Commission, the State Economic Commission and the Ministry of Finance to study this problem together and put forth concrete plans for implementation so that enterprises can gradually command more financial resources to renovate equipment and engage in technological transformation.

ZHANG AIPING MEETS ZHEJIANG MILITARY COMRADES

OW030644 Hangzhou Zhehiang Provincial Service in Mandarin 1030 GMT 2 Dec 82

[Text] Comrade Zhang Aiping recently met with Kang Mingcai, commander of Zhejiang Provincial Military District; (Luo Tingtao), political commissar; other leading comrades and some retired veteran comrades in Hangzhou. Comrade Zhang Aiping said: The key to implementing the guidelines of the 12th CPC congress and creating a new situation in the work of PLA units lies in strengthening the building of leading bodies.

Comrade Zhang Aiping pointed out: Only the cooperation between old and new cadres and the succession of the new to the old can guarantee that our leading bodies at all levels are filled with a new and dynamic atmosphere at all times and that our revolutionary cause can be carried forward and developed. At present, in the course of the succession of the new to the old, we old comrades must do our work in the following three aspects:

1. It is necessary to pick the good. It is necessary to select for leading posts comrades who have both ability and political integrity and who are in the prime of life and can competently do their jobs. Each old comrade has the responsibility to recommend to leading bodies at all levels middle-aged and young cadres who meet the requirements.

2. It is necessary to yield one's position to a more talented person. When revolution calls for our advance, we must be able to press on in the teeth of difficulties; when revolution calls forus to yield our positions to others, we should resolutely retire at the height of our official careers.

3. It is necessary not to feel jealous of the good. Middle-aged and young comrades are knowledgeable and full of vigor. They are courageous and resourceful. We must foster them and help them work well.

PLA LOGISTICAL MEETING STRESSES BETTER WORK

OW020319 Beijing XINHUA Domestic Service in Chinese 1429 GMT 29 Nov 82

[Text] Beijing, 29 Nov (XINHUA) -- The all-army logistical work conference, which ended today, pointed out that only by earnestly studying the documents of the 12th CPC National Congress, conducting in-depth investigation and study to get a clear picture of the situation at the grassroots level and creating a new situation for logistical work can a solid and reliable foundation be laid for future work.

The conference emphatically discussed how to create an all-round new situation for logistical work with the spirit of the 12th CPC National Congress as the guide and in compliance with the directive of the Military Commission of the CPC Central Committee. The participant comrades held that modern warfare and army building have put forth new demands on logistical work. What kind of logistical system should be built in order to cope with the needs of building the PLA into a regular, modern and powerful army is an important question that should be studied and solved conscientiously by comrades engaged in logistical work. The broad masses of logistical cadres should, under the guidance of the spirit of the 12th CPC National Congress, first of all adapt their own thinking to the new situation before they can make progress in logistical work.

The General Logistics Department was commended by the Military Commission of the CPC Central Committee for organizing work teams to conduct investigation between February and October this year in frontier islands to get a clear picture of the situation and for solving problems in a realistic way.

Discussing other topics in the light of this event, participating comrades held that conducting in-depth investigation and study in the realities of life is an important matter relating not only to the method of leadership and the style of work but also bearing on whether or not the party's ideological line is consistently implemented. In order to create a new situation, we must enhance our spirit and conduct investigation deep in the realities of life. We must grasp this work in all fields and study the problems one by one and work out principles, policies and measures for solving problems with a definite object in view so as to lay a good foundation steadily creating a new situation.

The conference discussed and mapped out specific plans and measures for creating a new situation for logistical work.

Attending the conference were leading cadres from major units in the army responsible for logistical work and representatives of advanced units in logistical work in various army units.

Hong Xuezhi, director of the General Logistics Departments; and Wang Ping, political commissar; spoke separately at the closing session today.

DENG YINGCHAO, LIAO CHENGZHI AT ALLEY BANQUET

OW021856 Beijing XINHUA in English 1551 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Rewi Alley, an old friend of the Chinese people, was given the title of honorary citizen of Beijing at a banquet to celebrate his 85th birthday here this evening.

The title was conferred on him by the People's Government of Beijing Municipality at the banquet given by the Chinese People's Association for Friendship With Foreign Countries.

Deng Yingchao and Liao Chengzhi, vice-chairmen of the Standing Committee of the National People's Congress; Huang Hua, state councillor; and Hu Ziang, vice-chairman of the National Committee of the Chinese People's Political Consultative Conference, talked with Alley and extended their congratulations.

Shaking hands with Alley, Deng Yingchao said: "We wish you a long life and an ever-deepening friendship with the Chinese people along with each passing day."

Wang Bingnan, president of the Friendship Association, speaking at the banquet said: "This is no ordinary birthday party, but an occasion to express our gratitude to Comrade Alley."

Wang said: "During his 85 years of life, Alley has spent 55 in China. In more than half of a centruy, he shared the common lot, weal and woe with the Chinese people. He consistently sympathizes with, supports and participates in the Chinese people's struggle. Despite his age, he still keeps up with his writing and concerns himself with various problems encountered in China's construction."

Wang Bingnan said in the past year Alley played host to more than 300 hundred visitors from abroad, briefing them on China's history and present condition. He also replied to more than 1,000 letters from Chinese people and people from other countries.

"With more than 50 years in China," President Wang said, "Comrade Alley has always kept close links with the common Chinese People. Though in Beijing, he has always been concerned with the development of rural and mountainous areas."

While celebrating the birthday of Alley, Wang said, "we should learn from his spirit of sparing no effort in the performance of his duty for a cause he believes in. [Word indistinct] should also emulate his spirit of being concerned about the weal and woe of the people, maintaining close ties with the masses and follow his example as a man of action."

Quoting Deng Xiaoping's comments on Alley's 80th birthday five years ago, Wang said: "It is not easy for Comrade Rewi Alley to have done so much for the Chinese people 50 years on end, whether in the years when we experienced untold difficulty, or when we were fighting for the victory of the revolution, or in the post-victory years. That is why he commands the due respect of the Chinese people."

Mayor Jiao Ruoyu of Beijing said in his toast that during his 50 plus years in China, Alley has lived and worked in Beijing for nearly 30 years. He said Alley's long sojourn in Beijing has resulted in "profound friendship" with the people of the capital. "he concerns himself very much with the construction and development of Beijing. His solicitude is indeed a great impetus to our work," the mayor said.

On behalf of the Beijing people's government, Jiao presented Alley with the certificate and badge of honorary citizen of Beijing.

Alley said in his speech that he felt greatly honored this evening and found it hard to put into words his gratitude. He said he feels proud to share some of the struggles of the Chinese people for about 56 years. "It has been their spirit of self-sacrifice, their ability to work together, whoch has inspired me to carry on through the years, and which has laid the foundations for the immense changes that are now taking place, bringing China once more to the forefront," he said.

He said he has been to many places in China in his years here and gained strength from "the sight of people doing things, and doing them better, making two blades grow where but one grew before, cooperating and ever adding meaning to their lives."

He thanked the leaders and people of Beijing for making him an honorary citizen. He said he felt it a great honor. "I hope that I can continue to be worthy of your trust and regard."

Present at the banquet were Alley's close friends, including Xia Yan, Hu Tunan, Zhang Wenjin, Ou Tangliang, He Biao, Ma Haide (George Hatem), Rose Smith and Feng Jixin (first secretary of the Chinese Communist Party Committee of Gansu Province).

F.A. Small, New Zealand ambassador to China was also present.

RENMIN RIBAO ON REALISTIC, PRACTICAL LEADERSHIP

HK030241 Beijing RENMIN RIBAO in Chinese 29 Nov 82 p 5

[Article by Zhou Zijian [0919 1311 0256]: "Go Deep Into Realities, and Deep Among the Masses"]

[Text] In his report to the 12th party congress, Comrade Hu Yaobang put forward to the comrades throughout our party that we should "pluck up our spirit, blaze a path of progress and perseveringly carry on our ceaseless struggle on the basis of going deep among the masses and deep into realities." Going deep into realities and among the masses is a basic concept in upholding dialectic materialism and historical materialism.

It is also our party's basic method for exercising its leadership and its fine tradition. Now that we have entered a new historical period, we must create a new situation in our socialist modernization and buld a high degree of socialist material and spiritual civilization. History has assigned us a very arduous task which demands that we conscientiously change our work style in exercising our leadership, improve our method of leadership, go deep into realities and among the masses, conduct investigation and study, sum up experiences and do our work soundly.

In understanding and changing the world, one can never divorce oneself from practice. Practice is the source of knowledge and the only criterion of truth. By practice we mean the social practice of the millions of the masses of people. This is why going deep into realities and among the masses is an important channel for communists to understand and change the world. Since the 3d Plenary Session of the 11th CPC Central Committee, in the process of making decisions, some of our central leading comrades have often gone to factories, villages and other basic-level units to investigate the situation, sum up fresh experiences, guide work and solve problems. This work style of going into realities and among the masses has set an example for us and greatly educated us. Under the influence of the central leading comrades, I have also made some efforts in this respect in the 2 years and more since I came to work in Anhui. Though what I have done is very limited, my experience has made a deep impression on me. In the process of practice, I have come to realize that it is very important for people assigned leading jobs in the new period of socialist modernization to fix in their minds the concept that the masses of people are the creators of history, adhere to the work method of mass line and formulate principles and policies which conform to reality.

Only by going deep into realities and among the masses can we genuinely manage to seek truth from facts and proceed from reality in all our actions.

As Comrade Deng Xiaoping said: "Seeking truth from facts is the foundation of the proletarian world outlook and the ideological foundation of Marxism-Leninism. By relying on seeking truth from facts we have achieved all our revolutionary victories in the past. Equally, at the present, only by relying on seeking truth from facts can we achieve the four modernization." Seeking truth from facts is the essence of Marxism, but it is not easy to really practice this principle. In order to do this, we must go deep into realities and among the masses to discover and understand their immediate interests and demands. If we depart from this basic point, seeking truth from facts will be merely empty talk, and it will naturally be impossible for us to exercise correct leadership. Take for example, the managing of the mountainous areas in our province. In the spring of last year I went to make an investigation in the Dabie Mountain areas in the Liuan, Jinzhai and Huoshan Counties of western Anhui. At that time, the grain quotas for the masses in the mountainous areas had already been raised to the stipulated standard, but the malpractice of reclaiming land by destroying forests remained uncurbed. In some areas, the practice was "reclaiming hills up to the top, and high mountains to the middle of the slopes, so that every family living deep in the mountains lacked fuel." This had not only hampered the development of forestry and construction in the mountainous areas, but also water and soil conservation and the ecological balance. What is the cause of this problem? Why should this malpractice continue to prevail since the grain supplies had already been raised to the stipulated standard? After going deep among the masses to discuss the matter with them, we found that the problem was that people in mountainous areas had to climb mountains and do heavy labor, therefore, the stipulated quantity of grain was insufficient for their basic needs. Moreover, farm land was in very short supply deep in the mountains. That is how things really stood there.

After investigation and study, the provincial CPC committee consistenely proceeded from reality and solved the problem of insufficient grain supply standards by seeking truth from facts. As soon as the correct policy and measure was implemented, the malpractice of reclaiming land by destroying forests was eliminated and the development of forestry in the mountainous areas was promoted. This has proved that only by going deep among the masses to discover the real situation can we understand and solve problems.

Let me give another example. Over the past few years agricultural production in Anhui has developed quite speedily because the policy has been implemented fairly well and the production responsibility system of assigning land to each household in exchange for fixed levies, and of fixing output quotas for individual households was implemented at a relatively early date. However, as far as agricultural production is concerned, due to the complicated natural conditions and vast regional differences in the province, such as between the plain to the north of the Huai He, and the hilly areas between the Chang Jiang and the Huai He, and the areas along the rivers, and the mountainous areas in western and southern Anhui, agricultural production is still restricted to a large extent by geographical locations and weather conditions. It is impossible to follow a uniform pattern in guiding agriculture. We can only adjust measures to local conditions. To this end we went to the four types of areas enumerated above and carried out relatively thorough investigations and study. We discussed with cadres and masses the principles for developing agriculture and forestry and determined the main areas in which we should concentrate our efforts. This enabled the various areas to develop speedily according to their special features. We especially conducted repeated investigations and studies in the area to the north of the Huai He frequently hit by natural disasters. This area suffered from extraordinary floods this year. There was a drop in production in the more that 10 million mu of crops along the Huai He hit by natural disasters. More than 4 million mu of crops which were soon to be harvested were flooded and completely lost. The broad masses of people in the flooded area suffered huge losses. Recently we went deep into the disaster area in an effort to solve the problems of the people in both production and livelihood and to discover a way to solve the problems once and for all. Through investigation and study we found out the crux of the problem. For many years we have made great efforts to regulate the upper and lower reaches of the Huai He and this has played a great role in agricultural development. However, the flow on the upper reaches of the river is rapid and it has many tributaries in the province, which have not been completely brought under control. When there is a heavy rainfall, the lower reaches often reach a high water level. If we block the water up at the lower reaches, this inevitably causes floods and waterlogging. The area to the north of the Huai He is an important grain-producing area in our province, accounting for 50 percent of all its cultivated land. In order to make it an area with high and stable yields, it is necessary to bring the Huai He permanently under control. At the same time, we should also transform the 17 million my of sandy soil. Great efforts should be made to solve these problems. Provided that the two problems are solved, grain production will double and redouble. The commodity percentage of grain and industrial crops will also be raised by a big margin. Therefore, it is very import for us to make a thorough investigation, proceed from actual conditions, formulate plans and measures for bringing the Huai He under control, step up capitia construction in agriculture and improve conditions in agricultural production. This also conforms to the interests and the demands of the broad masses of people.

Only by going deep into realities and among the masses is it possible to ensure the implementation of the party's line, principles and policies.

In order to ensure the implementation of the party's line, principles and policies, we must avoid degenerating into subjectivism and acting recklessly without regard for the actual conditions. It is necessary to conscientiously guide the masses in correctly understanding the party's line, principles and policies through practice and conducting vigorous, creative activities. As far as our province is concerned, it is vast in territory and widely different in its conditions. The consciousness and demands of the people also vary. Moreover, objective conditions change constantly. Even though the instructions of the higher authorities are correct, we should also put forth feasible suggestions and methods in the light of specific conditions in our locality. In this way we can effectively mobilize the broad sections of cadres and masses to strive for this common objective. No unit or leading cadre should act as an "office for receiving and dispatching mail" or copy and transmit instructions word for word. In our practical work, we often discover the following cases: When the leading comrades of some units effectively transform the party's line, principles and policies into conscious action by the masses, the work in the units is vigorous and highly fruitful; but where this is not the case, there is no improvement in the work. For example, after the implementation in our province of the agricultural production responsibility system of assigning land to each household in exchange for fixed levies and of fixing output quotas for individual households, a new issue in our rural work is how to stabilize and improve it. The principal leading members of the provincial CPC ommittee and party organizations at various levels promptly went deep into the rural areas. After summing up typical experiences, they extensively popularized the contract system in the rural areas and, on the basis of full discussions and giving consideration to the interests of the state, the collective and the individual, they signed contracts with the peasants. This method of doing things received the warm welcome of the broad masses of peasants. The contract system not only enables the state to guide production through planning, but also helps the grassroots units to exercise leadership and arouses the initiative of the peasants for production. By signing contracts we can rationally adjust the interests of various parties and ensure that the peasants have autonomy in their production work.

With respect to the policy of purchasing farm produce and sideline products, in order to strengthen planned guidance of the state on agricultural production, better meet the needs of state construction and the people's livelihood, and give consideration to the economic interests of the producers, we determined, on the basis of investigation and study, the basic purchasing figures of 28 major farm produce and sideline products. The amount in excess of the basic figures may either be purchased by the state at higher or at stipulated prices, or handled by the peasants themselves. In this way we integrated a sense of principle with flexibility in implementing policy, gave consideration to the interests of the state, the collective and the individual and vigorously implemented the principle of the leading role of the planned economy and the supplementary role of regulation by market mechanism. The results are satisfactory.

In short, it is necessary for a leader to determine his working principle according to actual conditions, constantly analyze new situations, sum up new experiences, solve new problems and integrate the party's line, principles and polices with the specific conditions in a locality.

Only by going deep into the realities of life and among the masses is it possible to constantly improve the level and art of leadership.

The level and art of leadership should be gradually cultivated and improved through practice. It is absolutely impossible for a leading cadre to enhance his abilities by shutting himself in a house, divorcing himself from the masses and from reality without going into the realities of life and engaging in painstaking work.

Naturally, it is also impossible for him to lead the masses to create a new situation. This is a fundamental reason why we should oppose the way of thinking of the coward and the sluggard. At present, some comrades still lack an adequate understanding of this point and they also lack the experience of conducting thorough investigation and study. Therefore, it will be difficult for them to understand the ideas of the masses and appropriately arouse their initiative. Some comrades fail to adapt themselves to the new situation because they rely on their past experience and because they have a lot of conventional ideas. Consequently they fail to open up a new situation. Comrade Chen Yun said: In formulating a policy, the leading bodies should spend more than 90 percent of their time on conducting investigation and study and spend less than 10 percent in finally discussing and deciding on the policy. Practice has proved that this is entirely correct. By going deep into the realities of life and among the masses, leading cadres can prevent bureaucratism, get rid of routinism and free themselves from conference tables, piles of documents, and routine work. They can concentrate their energies on implementing the party's line, principles and policies and on grasping major work that has a strong bearing on the overall situation. If we act like this, we shall be able to understand the true situation, directly grasp first-hand material, and know how things stand. We shall be able to put forth correct proposals and avoid giving vague, general, arbitrary or impracticable directions. Comrade Mao Zedong said: A commander's correct orders stem from correct decisions, his correct decisions stem from correct judgments, and his correct judgments stem from thorough and necessary reconnaissance and from pondering on and piecing together the data of various kinds gathered through reconnaissance. Although this refers to war, the principle applies to the improvement of the level and art of leadership as well. In the past 2 years we have gained the initiative in our work because we have paid considerable attention to going deep into the realities of life and conducting investigation and study. We have come into contact with a lot of vivid and lively new things, nourished by the masses of people, and broadened our knowledge.

The CPC committees at various levels and the various units at the provincial level in our province are conscientiously studying the documents of the 12th party congress, grasping the essence of the documents and, by proceeding from the actual conditions in their own localities and units, realistically formulating the objective of struggle and plans for the next 20 years and the next 5 years in order to make their due contribution to the cause of building socialism with Chinese characteristics.

RENMIN RIBAO ON FARM MACHINERY POPULARIZATION

HK010305 Beijing RENMIN RIBAO in Chinese 28 Nov 82 p 3

[Commentator's article: "Select and Popularize Farm Machines With Good Quality"]

[Text] Since the introduction of the production responsibility systems in the rural areas, most places have increased output and income for several years running. The vast number of peasants now have the eager desire to continue the expansion of reproduction and also have the purchase power for acquiring more capital goods. This has provided a favorable condition for the development of the farm machinery industry. The new starting point of improving farm machinery work in a down-to-earth way is to select and popularize some low-cost and applicable agricultural machines so as to meet the demands of the peasants.

Why should we popularize farm machines after selection? Because we have to take into account the economic results of their on-the-spot utilization. Our country has a vast territory and natural and economic conditions differ greatly from one place to another. Really applicable farm machines should be selected in accordance with local conditions and be popularized in various places so that the peasants can afford them and really benefit from them.

Only when farm machines are welcomed and trusted by peasants can we have a good market for farm machinery products and thus rapidly develop agricultural mechanization. For a long time in the past, under the guidance of erroneous "leftist" ideology, farm machines were blindly required to be used in a big way and to be popularized within a set time. Moreover, farm machines were not treated as commodities which users have the right to choose, but instead were popularized by mandatory administrative means from top to bottom. Little attention was paid to the economic results in both the production and utilization of these machines. As a result, many farm machines were poor in quality and high in price, and some were even inapplicable, thus causing great economic losses to the peasants. At the same time, these poor products stemmed their markets and were stockpiled. This in turn hindered the development of the farm machinery industry. At present, things have greatly changed. The departments in charge of farm machinery production have summed up experiences and drawn lessons. Rural production collectives and peasants now have decisionmaking power. The work of manufacturing and popularizing farm machines must be greatly improved. Only by selecting and popularizing applicable farm machines with good quality and low prices can peasants' demands be met and their interests be conformed with and only thus can the market be opened widely.

When selecting and popularizing farm machines we must pay attention to the development level of productive forces in the rural areas and the level of peasants' purchasing power. Under the current condition that energy is insufficient, we should select and popularize those farm machines which consume comparatively less energy or those which can utilize manpower, wind power and solar energy in place of fuel and electric power. When household operations have become more and more popular, we should also pay attention to small-sized, diverse and convenient farm machines with good quality and low prices, because the achievement of the best economic results is always based on actual production and economic conditions. Otherwise, no matter how advanced the farm machines are, they will be of no use in the countryside or the peasants will not be able to afford them, and these machines will play no role after all.

Selecting and popularizing farm machines can also promote technical innovation in farm machinery production. In the past, the farm machinery department had the exclusive right to sell farm machines. Farm machinery plants did not pay attention to the quality of their products and the utility results of these products. They did not worry about sales and handled production by sticking to old conventions. Some products even stayed at the 1950's level. The situation in which they did not make efforts to carry out innovation thus became more and more unfavorable to production development. Now when we select and popularize products with good quality, the situation of "eating from the same big pot" can be overcome. We popularize whichever products are good, and the factory which can produce better products can gain more returns. This will certainly encourage the progressive, spur the backward and stimulate competition, so that technical innovation in farm machinery production will be greatly promoted.

When we select and popularize a number of low-priced and applicable agricultural machines throughout the country, we should also further strengthen the work of farm machine management, technological services and energy conservation. In particular, we should give timely technological training to individual and associated peasant households who have bought farm machines and rationally distribute fuel among them. In this way, we can guarantee the smooth popularization and utilization of farm machines and achieve satisfactory economic results.

MANAGEMENT ENCYCLOPEDIA TO BE PUBLISHED

OW011305 Beijing XINHUA in English 1109 GMT 29 Nov 82

[Text] Beijing, November 29 (XINHUA) -- China has decided to compile and publish a "China Enterprise Management Encyclopedia" to provide a useful tool for managerial, research and teaching personnel.

The decision was made by the Propaganda Department of the Central Committee of the Chinese Communist Party and the State Economic Commission.

Yuan Bachua, minister in charge of the State Economic Commission, will head the editorial board composed of economists and scholars including Ye Lin, Ma Hong, Fang Weizhong, Hua Luogeng and Chen Yu, and economist Deng Liqun will be advisor to the editorial board.

Preliminary design of the layout and entries was made in August and September at work conferences called by the State Economic Commission and the China Enterprise Management Association. Articles will include the evolution of enterprise management in China, experience in enterprise management and an introduction to management theory and practice in foreign countries.

The writing, which is to be undertaken by teachers and experts in the field, is expected to be finished by next spring and prepublication copies will be out in the spring of 1984.

HAO JIANXIU WATCHES DRAMA ON FAMILY PLANNING

OW011347 Beijing XINHUA Domestic Service in Chinese 0920 GMT 29 Nov 82

[Summary] Beijing, 29 Nov (XINHUA) -- "The Three Brothers and Their Wives," a drama about planned parenthood presented by the Qingdao municipal drama group, greatly amused the audience during its premiere in the capital on 28 November.

The drama tells the story of a production team leader who is busy making money and is totally unaware of the fact that his wife is pregnant with their third child, whereas one of his brothers still wants a boy to inherit his property although he already has a girl. It also tells the story about the fiancee of his other brother whose first job in the commune's family planning clinic is to perform surgery for her future sister-in-law.

Over 170,000 people watched the drama when it was staged in Shandong on 150 occasions. The drama is being staged in Beijing at the invitation of the Beijing Planned Parenthood Committee and the Beijing Cultural Bureau.

"Hao Jianxiu, alternate member of the Secretariat of the CPC Central Committee, and Qian Xinzhong, minister in charge of the State Family Planning Commission, watched the drama. They hailed the Qingdao municipal drama group for having successfully used artistic form to propagate the fundamental national policy of family planning. They hoped that the drama will add color to the month-long activities to promote family planning during the new year and Spring Festival."

SHANGHAI'S CHEN GUODONG REVIEWS PRODUCTION PLANS

OW291431 Shanghai City Service in Mandarin 1130 GMT 26 Nov 82

[Text] The Shanghai Municipal CPC Committee and the municipal people's government held a cadres meeting on 25 November calling on all party organizations and leading economic departments to extensively mobilize all cadres and masses to fulfill this year's production plans, make preparations for next year's work and make even greater contributions to creating a new situation for the development of socialist modernization in the country. At the meeting, Chen Jinhua, vice mayor of Shanghai, and responsible persons of departments concerned conveyed the instructions issued by the leading comrades at the central level on economic work and the guidelines laid down by the economic departments at the central level at various vocational meetings.

Attending and addressing the meeting were Chen Guodong, first secretary of the municipal CPC committee, and Wang Daohan, secretary of the municipal CPC committee and mayor of Shanghai.

They hoped that the cadres and masses in all fields of work would fully realize the current favorable situation. They said: It is necessary to realize that the emergence of the buyers' market at present constitutes a major turning point in our economic work and a gigantic motive force to improve our economic work. We must feel the pressing need to improve our work in all fields. They emphatically pointed out: We must politically and ideologically identify ourselves with the central authorities. We must earnestly implement the guidelines laid down by the 12th CPC National Congress and strive to create a new situation.

As for the production plans for next year, they called on all units and departments to pay full attention to production speed and the market and to making progress in science and technology, improving management and increasing economic results. They called for efforts to work harder than ever before in order to continue developing Shanghai's economy to meet competition at home and abroad.

SHANGHAI WORKERS CRITICIZE IMPRACTICAL IDEAS

OW240521 Beijing XINHUA Domestic Service in Chinese 1242 GMT 23 Nov 82

[Excerpts] Shanghai, 23 Nov (XINHUA) -- XINHUA correspondent Shen Yongyue and reporter Zhou Yongkang reported: In organizing party members in the plant to study documents of the 12th CPC National Congress, the CPC committee of the Shanghai silicon sheet steel plant has, in the light of prevailing conditions, launched criticism and self-criticism against the "three cannot's" ideas of "cannot see," "cannot reach" and "cannot wait" being cherished by some party members towards the strategic target of quadrupling the total annual industrial and agricultural output value by the end of this century. Through discussion and self-criticism, the party members all raised their ideological awareness, enhanced their revolutionary spirit, strengthened confidence and pledged to "plant more trees, cover greater distances and climb more slopes" for the realization of this lofty strategic target.

From "Cannot See" To "Planting More Trees"

Cherishing this "cannot see" idea are mostly workers and staff members over 50 years of age, who will soon retire. They felt that, in view of their advancing age, they would possibly not live to see the day when the annual gross industrial and agricultural output value would quadruple and the people's living standard reach a comfortable level.

Reaching this goal, therefore, would not have much bearing on them. In the course of study, by referring to the oath they took on joining the party and by comparison the revolutionary vision of the proletarian revolutionaries of the older generation and the different happenings in the old and new societies, as well as the profound changes that have taken place in various fields since the downfall of the "gang of four," especially since the third plenary session, they came to realize that this "cannot see" idea is incompatible with the lofty ideals of a communist.

From "Cannot Reach" To "Covering Greater Distances"

This "cannot reach" idea is popular among middle-aged party members, who are about 40 years of age and are the backbone force in the plant. Their wage income is comparatively low, but their financial burden is heavy, having to take care of both young and old in their families. Pragmatic ideas have grown more noticeably among these party members in recent years. After the closing of the 12th CPC National Congress, some party members figured that they would have retired by the year 2,000 and that they "would reach old age before becoming well-off and the fruits of distribution would be out of reach."

From "Cannot Wait" To "Climbing More Slopes"

Some young party members cherished the "cannot wait" idea to a varying degree. They held that becoming well-off by the year 2000, like distant water, cannot quench the present thirst. Some young married couples hoped that "electrification" would be realized in their small families; other young people getting married are planning to save up more money for the happy event. What kind of "sense of urgency" do the young people have after all? How can they put the individual interests and the lofty goal in the proper prospective? These have become issues that should be clarified among young party members in the plant in the course of studying the documents of the 12th CPC National Congress.

The First Step in the Journey of 1,000 Li Has Begun

The broad masses of party members of the silicon sheet steel plant reached a unanimous view in discussing the lofty goal put forth by the 12th CPC National Congress: The reaching of the targets of struggle in the next 20 years does not happen suddenly, whether in quadrupling the annual gross industrial and agricultural output value or in attaining the comfortable level in the people's standard of living throughout the country. In fact, our economic work has been reinvigorated and the people's livelihood gradually improved since the party adopted the correct line, principles and policies after the third plenary session. Many party members said: By looking back at the previous 4 years and looking forward to the next 18 years, our confidence has strengthened. Their mental outlook has undergone considerable changes since they straightened out their way of thinking. They have achieved excellent production results since October.

SHANGHAI USES LOANS, IMPORTS TO BOOST INDUSTRY

OW291017 Beijing XINHUA in English 0712 GMT 29 Nov 82

[Text] Shanghai, November 29 (XINHUA) -- Shanghai in the past three years has used nearly 200 million U.S. dollars to import technology and equipment for the revamping of 300 projects of existing enterprises, municipal authorities said. Light industry and textile items account for 60 percent of the imports. Textile mills have imported about 1,000 sets of equipment, resulting in an annual additional output value of 750 million yuan.

The projects were undertaken with short-term loans from the Bank of China, or in the forms of compensation trade, processing with materials supplied by overseas clients, buyers' credit, joint ventures or co-production.

Between January 1978 and September 1982, the Shanghai branch of the Bank of China loaned 180 million U.S. dollars to 246 projects for importation of technology and equipment, and purchase of materials in short supply in China. Most of these projects have begun operation, and the loans for 145 projects have been repaid.

Of nearly 8,000 factories in Shanghai -- China's largest industrial city and leading foreign trade port -- 1,700 turn out products for export.

A polyacrylic fiber mill of the Shanghai Jinshan general petrochemical plant recovered total investment in eight months and increased its annual output by 45 percent, following installation of equipment imported from Japan and West Germany, which is capable of producing 8,000 tons of imitation wool polyacrylic knitwear annually.

The Shanghai bulb plant recorded an extra output value of 45 million yuan, in one year of operation of a production line imported from Japan and designed to produce 1.6 million 12-inch black-and-white TV picture tubes each year. The plant has thus repaid foreign exchange loans and will be able to recover total investment this year.

The city's garment industry has imported 700 special sewing machines for 55 production lines making shirts for export. As a result, it exported eight million more shirts a year.

SHANGHAI INSTALLS LARGE BLAST FURNACE

OW240438 Beijing XINHUA in English 1136 GMT 22 Nov 82

[Text] Shanghai, November 22 (XINHUA) -- Installation of China's largest blast furnace was completed Saturday at the Baoshan Iron and Steel Complex near Shanghai, following placement of gas discharge facilities and an auxiliary platform.

The No 1 blast furnace -- with a volume of 4,063 cubic meters -- is 113 meters high and 17 meters in diameter. It weighs about 30,000 tons, including 11,000 tons of steel structural parts.

The computer-controlled furnace will be able to produce more than 10,000 tons of pig iron daily. Installation began in July 1980.

Construction of the Baoshan complex, which will be the largest in China and equipped with modern technology, was started in December 1978.

The No 1 furnace is one of the 22 projects to be built in the first stage of construction, including two 300-ton pure oxygen top-blown converters.

RENMIN RIBAO ON PUNISHING SHENZHEN SMUGGLERS

HK240331 Beijing RENMIN RIBAO in Chinese 23 Nov 82 p 1

[Unattributed report: "Shenzhen Municipal CPC Committee and Party Group of Ministry of Electronics Industry Decide To Expel Zhou Zhirong and Xu Zhiliang From Party and Abolish Temporary Party Committee of Shenzhen Branch"]

[Text] Recently, the Shenzhen Municipal CPC Committee and the Ministry of Electronics Industry respectively made the following decisions: to expel Zhou Zhirong, a former leader of the Shenzhen branch of China Electronics Import and Export Corporation and secretary of the branch's provisional party committee, and Xu Zhiliang, a former leader of the branch's storage and transport department, from the party; to remove them from their former administrative posts; and to disband the branch's provisional party committee and set up a new provisional leading group of the branch.

Zhou Zhirong and Xu Zhiliang defied party discipline and the law and took part in smuggling and tax evasion, thereby committing serious economic crimes. They have completely lost even the most rudimentary qualifications for members of the Communist Party. When approving the "decision on expelling Zhou Zhirong and Xu Zhiliang from the party," the Shenzhen Municipal CPC Committee pointed out: When working in the Shenzhen branch, both Zhou and Xu practiced smuggling and tax evasion by mean tricks. According to the decision of the judicial department, they have committed a serious criminal offense. In accordance with the "Constitution of the CPC" and the spirit of the "Decision on Cracking Down on Serious Economic Criminal Activities" issued by the CPC Central Committee and the State Council, and after investigation, it has been decided to expel Zhou Zhirong and Xu Zhiliang from the party.

At the same time, the ministerial meeting and the party group of the Ministry of Electronics Industry also decided to remove Zhou Zhirong and Xu Zhiliang from their administrative posts as leaders of the Shenzhen branch and the branch's storage and transport department respectively to disband the CPC Provisional Committee in the Shenzhen branch of China Electronics Import and Export Corporation, and to set up another provisional leading group to take charge of the overall affairs of the party and the administration of the branch.

On the afternoon of 12 November, the Shenzhen branch held a meeting of all party members, cadres, workers and staff members. At the meeting, members of the investigation group sent by the CPC Central Discipline Inspection Commission and responsible comrades of the Jiulong Customs Department gave an account of the facts involved in this case and the progress of the investigation. Relevant leaders of the Shenzhen Municipal CPC Committee and the Ministry of Electronics Industry respectively read the above mentioned decisions and the name list of the new provisional leading group of the Shenzhen branch.

Increased Vigilance Urged

HK231405 Beijing RENMIN RIBAO in Chinese 23 Nov 82 pp 1, 2

[Commentator's article: "Raise Understanding and Deepen the Struggle"]

[Text] After more than a year's investigations of the case of the Shenzhen branch of the China Electronics Import and Export Corporation, the Guangdong Provincial People's Procuratorate recently found Zhou Zhirong, a former responsible member of the Shenzhen branch, and others, guilty of the serious economic crime of smuggling and tax evasion, approved the arrest of Zhou Zhirong and Xu Zhiliang and investigated the responsibility for the crime.

Why did they take so much time to investigate and deal with the case? This of course reflects the complexity of the case, but more important, is partly due to the resistance encountered as a result of the differences of view among some comrades. In investigating and dealing with this case, some erroenous views have been exposed. Such views are somewhat typical at present, and they hinder the penetrating development of the struggle of some localities to crack down on serieus criminal activities in the economic field. Therefore, analyzing the conditions of the case of the Shenzhen branch and raising our understanding will further help us to exploit the victory and unswervingly carry out the struggle to crack down on serious criminal activities in the economic field through to the end.

First, in the process of investigating and dealing with the case of the Shenzhen branch, although some of the comrades acknowledged that Zhou Zhirong and others had problems, they nevertheless stubbornly emphasized the objective reasons and did not consider the activities of Zhou Zhirong and others as economic crimes, but only mistakes caused by lack of work experience. Such views are wrong and try, in fact, to absolve Zhou Zhirong and others from blame.

Since the 3d Plenary Session of the 11th CPC Central Committee, our country has implemented the policy of promoting economic exchanges with foreign countries and livening up the economy at home. This is necessary and correct. However, because we temporarily still lack experience, the appearance of this or that kind of problem is difficult to avoid. In handling problems of this nature, we should take into consideration the objective conditions of the time and generally sum up experiences and draw on lessons. However, we must point out that the policies of the party and the laws and decrees have never permitted at any time or under any condition such illegal activities as smuggling and tax evasion. At any time or under any conditions, they have never permitted any unit to illegally import things, pass them on and resell them throughout the country for exhorbitant profits. Compared with problems that occur through lack of experience, smuggling, tax evasion and giving and accepting bribes are prlbems of another nature. They are illegal criminal activities that have always been prohibited by state laws and decrees. Could it be possible that Zhou Zhirong and others are not aware of this? No, it is precisely because Zhou Zhirong and others are fully aware of the nature of their deeds that they have adopted the disgusting means of importing more and reporting less, as well as smuggling. If not, why did they do it? Why did they engage in such shameful activities? Since Zhou Zhirong and others have violated the law, it is entirely correct to punish them according to the law. Otherwise, we will violate the principle of seeking truth from facts and will not be able to uphold the dignity of party discipline and state law.

We must point out here that the criminal activities of smuggling and tax evasion mainly took place after January 1981. In January that year, the State Council issued its stipulations on the importing of machinery equipment (including television sets and tape recorders). The Juilong Customs, 2 months before, had investigated the tax evasion violations of the Shenzhen branch, and on many occasions issued warnings and imposed fines. However, for the sake of making exhorbitant profits, Zhou Zhirong and the others still ignored the laws and decrees of the state, continued to collaborate with lawless Hong Kong merchants, adopted the method of signing lopsided contracts, wrangled import permits from the state and imported large quantities of television sets and tape recorders. Could we say that Zhou Zhirong and others had done this because they lacked experienced? Naturally, we can not. This was a deliberate violation of the law. For the sake of ill gotten gains, they had collaborated with lawless Hong Kong merchants to undermine the foundations of socialism.

Some comrades said: "Zhou Zhirong and his company did not put their gains from smuggling and tax-evasion into their personal pockets. Therefore, they cannot be considered as committing criminal offenses. At most, this is a problem concerning the relationship between the public interests of a big group and the public interests of a small group."

It is also necessary to clarify the problem raised by this confused idea. According to the stipulations of China's law, whether a person commits a criminal offense is not judged by his motive, which may be to seek private interests or seek interests for a collective. It should instead be judged by whether his actions has offended the law. If he has violated the ciminal law and caused serious harmful consequences, then he has committed a crime. In the economic field, reaping staggering profits by illegal means, such as smuggling and evading taxes, definitely constitutes a criminal offense and this cannot be negated whether the offender directly pockets these gains or uses them for a small collective. This will be taken into consideration only in the measurement of the penalty. Serious economic criminal activities, whether committed by individuals or in the name of a collective, all undermine the socialist cause and harm society and the state. Crimes committed in the name of a collective are even more harmful than those committed by individuals.

In the case occurring in the Shenzhen branch, Zhou Zhirong and Xu Zhiliang reaped ill gotten gains under the signboard of a state organ and state-owned enterprise. Although the two accused did not directly pocket their illegal gains, their criminal activities have harmed the interests of the state and the masses, had a bad effect on China's foreign trade, disturbed the domestic market and interferred with the development of China's electronic industry, thus causing a serious consequences.

We must take the stand of safeguarding the overall interests of the state and uphold a clear notion of enforcing the legal system when we draw a line between criminality and noncriminality. We must never be blindfolded by the interests of a small group or a small collective. Moreover, a great deal of facts have shown that some people committed criminal offenses under the pretence of seeking benefits for the collective. They did not keep their hands clean as some comrades think, rather, most of them did reap some private profits directly or indirectly.

In the current serious struggle of hitting at economic crimes, the reasons why these erroneous viewpoints arose can be found in the following points: 1) Some comrades did not earnestly study the relevant party documents, thus they did not have a correct understanding of the party's line, principles and polcies and class struggle under the new historical conditions. They did not realize the importance, necessity and urgency of the struggle to hit at economic crimes. 2) Onesidedness still exists in the thinking method of some comrades. They tend to see superficial phenomena but fail to catch the essence. As a result, they are apt to be misled by false appearances and unwittingly plead for criminals. 3) Some people themselves are not clean either. They have also gained some advantages from the illegal activities. Therefore, they spare no efforts to pleading for the criminals. In order to guarantee the healthy and profound development of the struggle of hitting at economic crimes, we must stop various erroneous ideological tendencies. We must strengthen political and ideological work, and overcome erroneous ideas by waging a proper ideological struggle. As for some comrades who have violated the party and administrative discipline, we should still take necessary disciplinary actions against them.

Since the party Central Committee issued the "urgent circular" and the party Central Committee and the State Council jointly issued the "Decision on Hitting at Serious Criminal Activities in the Economic Field," the struggle has scored initial achievements because party committee at all levels take it seriously. This struggle has dealt heavy blows at a large group of diverse economic criminals who have take part in smuggling and the selling of smuggled goods, corruption and embezzlement, the giving and acceptance of bribes, and speculation and swindling. By dealing these blows we defend our socialist economic base and the construction of the four modernizations and guarantee that our nation can better advance along the course of the four cardinal principles.

However, this struggle is far from at an end. We are still faced with an arduous and complex task. We should never relax our efforts, but rather, we should make mental preparations for carrying out a protracted struggle. In his report at the 12th party congress, Cormade Hu Yaobang pointed out: "The whole party must enhance its understanding of this struggle, take a firm stand on it and unswervingly carry it through to the end. This will be an important guarantee for our adherence to the socialist road." We firmly believe that under the inspiration of the 12th party congress, comrades of the whole party will certainly make persistent efforts and carry the struggle of cracking down on serious economic crimes through to a more profound extent.

SHENZHEN PUNISHES, WARNS HONG KONG TRIADS

HK020615 Guangzhou Guangdong Provincial Service in Mandarin 2350 GMT 1 Dec 82

[Text] The Shenzhen Municipal Public Security Bureau issued a notice on 1 December announcing that 7 persons including (Li Xianhua] and (Wu Yanqiang), who had taken part in criminal activities of Hong Kong Triad organization, had been sent for education through labor for 1 to 3 years, in accordance with the law. On 20 November, the municipal people's government issued a notice banning Triad organizations that have infiltrated into Shenzhen from Hong Kong. (Li Xianhua) and the other six were caught and dealt with before the notice was promulgated.

According to the municipal public security organs, since the municipal government's notice was issued, several score Triad members have voluntarily registered at the public security organs. However, there are also some who are trusting to luck and attempting to get by under false pretenses. Hence, it is 1 December notice, the municipal public security bureau severely warned all Triad members engaged in illegal activities in Shenzhen to register with the public security organs by 10 December, otherwise they will be mercilessly punished.

CHENGDU PLA UNITS HOLD WORK CONFERENCE

HK160144 Chengdu Sichuan Provincial Service in Mandarin 2300 GMT 15 Nov 82

[Text] The Chengdu PLA units held a work conference from 9 to 13 November. Commander Wang Chenghan delivered a report on behalf of the units CPC Committee entitled "Seriously Implement the 12th Party Congress Spirit and Strive To Create a New Situation in Work in the Units." Political Commissar Wan Haifeng made a speech. Also present were Deputy Commanders Chen Mingyi, (Yan Shouqing) and, Zhang Zhili, and Deputy Political Commissars (Wang Jinquan) and Niu Ji.

Commander Wang Chenghan pointed out in his report that the orientation of endeavor in creating a new situation in work in the units is: Under the guidance of the 12th party congress spirit, and aiming at fulfilling Central Military Commission Chairman Deng's instruction on building our army into a powerful, modernized and regularized revolutionary army, to work in concert with great efforts and do a thoroughly sound job in all work. We must cultivate cadres and fighters with relatively high political awareness, advanced military thinking, and relatively high standards of science and culture, and build the Chengdu PLA units into a force with keen-witted and capable administrative structure, agile command, fine training quality, rapid in response, high efficiency, and strong combat effectiveness.

Hence, in 1983 we must fulfill 10 work tasks: study and implement in depth the 12th party congress spirit; seriously do a good job in system reform, streamlining and reorganization; further promote preparedness against war; vigorously step up military training; seriously promote management education; vigorously step up the building of socialist spiritual civilization; continue to hit at criminal activities in the economic and other fields that sabotage socialism; strive to do a good job in logistics work; further improve militia work; and tangibly strengthen party building.

Political Commissar Wan Haifeng stressed in his speech that at present the primary task of the units is to study completely and appreciate the 12th party congress spirit and bring the thinking of every comrade onto the track guided by the 12th party congress. There will then be a common standard and guiding principle for our action, and we will then be able to more spontaneously maintain a high degree of ideological and political unity with the Central Committee. We must make big efforts in three respects in order to deepen study of the 12th party congress spirit: 1) in reading the documents with care; 2) in solving problems of understanding; 3) in correcting the style of study.

Political Commissar Wan also pointed out: The firm unity of the leadership groups is an important guarantee for creating a new situation. The mental attitude of the leading cadres is the decisive factor for whether or not a new situation can be created. The leadership groups at all levels must seriously implement the party's democratic centralism, rely on the wisdom of the collective, strengthen collective leadership, do a good job of cooperation between new and old cadres and replacement of old by new in the course of streamlining and reorganization, and fulfill the task of making the cadre force revolutionized, younger, better educated and more specialized.

XIZANG CONFERENCE ON PLA PERSONNEL RESETTLEMENT

HK291120 Lhasa Xizang Regional Service in Mandarin 1130 GMT 24 Nov 82

[Summary] The first Xizang regional conference on the resettlement of retired servicemen and retired cadres in the army was held in Lhasa from 10-16 November.

Attending were leading comrades of all prefectures, municipalities, military subdistricts, divisions, some county people's governments and county people's armed forces departments and relevant departments. Regional people's government Vice Chairman Yang Zongxin and regional military district Deputy Chief of Staff (Li Xingnie) attended and spoke at the conference.

Yang Zongxin said: Doing well in resettling retired servicemen and retired cadres in the army is an extremely important work. All places must strengthen ideological education for retired servicemen, seriously mobilize them to study the documents of the 12th party congress and universally carry out the activities of building socialist spiritual civilization, with having ideals, stressing morality and observing discipline as the central work. We must teach retired fighters to establish ambition and play the role of models and vanguards at their new work posts.

Yang Zongxin went on to say: At present and in the future, in our region's resettlement work, we must continue to implement the State Council's principle of returning to the places where we came from and mainly resettle retired servicemen in rural and pastoral areas. The policy in resettling retired army cadres is to step up preparations, receive them on schedule, make proper resettlement so that each is in his proper place, and to shoulder responsibility to this end. Governments and relevant departments in all places must help demobilized servicemen who return to rural and pastoral areas resolve their practical difficulties in production, livelihood, housing, medical treatment and marriage. They must vigorously help them to do well in agricultural, livestock and sideline production and take the road of becoming wealthy through labor. They must promptly resettle demobilized servicemen in urban areas in accordance with relevant regulations. It is necessary to strictly implement the policy, adhere to the principle, handle a matter impartially and resolutely resist unhealthy trends. We must promptly correct violations of policy and deal severely with serious cases of violation.

In his speech, (Li Xingnie) expressed hopes that the army and local relevant departments will closely coordinate and cooperate with each other. All military subdistricts and county and municipal people's armed forces departments must serve as assistants of the CPC committees and governments of localities as well as civil affairs departments.

The conference studied and arranged for the work of the resettlement of retired army cadres. It also made specific demands.

NGAPOI NGAWANG JIGME TALKS ON XIZANG AUTONOMY

OW230321 Beijing XINHUA in English 0157 GMT 23 Nov 82

[Text] Beijing, November (XINHUA) -- The key to national regional autonomy is having sufficient minority nationality cadres said Ngapoi Ngawang Jigme, chairman of the Tibet Autonomous Regional People's Government, in an interview with BEIJING REVIEW, a Chinese weekly published in five foreign languages' editions. The interview was carried in the latest issue of the journal.

"Today the proportion of full-time cadres of Tibetan nationality in the region has increased to 54.4 percent from 31.9 percent in 1965," he said. Ngapoi Ngawang Jigme, who is also vice-chairman of the National People's Congress Standing Committee, added: "Already, most of Tibet's prefectural commissioners, county heads, bureau directors and heads of mass organizations are Tibetans."

He talked about use of the Tibetan language and how it reflects the correct implementation of the party's policy on national regional autonomy.

"Ever greater importance is being attached to the use of the Tibetan language in schools," he said. "To gradually make Tibetan the principal language in the region's school, more Tibetan personnel are being trained and more teaching materials are being compiled and translated into Tibetan." At present, Tibet has more than 6,000 primary schools, 74 middle schools and technical schools and three institutes of higher learning. There were no schools in Tibet before its liberation in 1951.

More official documents are printed in the Tibetan language. He told BEIJING REVIEW that during his recent visit to a county in Tibet, "I saw that all county documents and notices are now in Tibetan and the people there were truly applying themselves to learning the Tibetan language."

In judicial affairs, the minority leader said local laws and regulations stipulate that Tibetan is the principal language used in investigation, prosecution and trial. However, he stressed: "This does not mean that the Han language is neglected. Only by learning and using both languages, can the development of Tibet be benefitted and unity and exchange among the different nationalities strengthened", he said.

The chairman spoke highly of the advances Tibet has made in revising and developing Tibetan culture and art. Regulations on elections in Tibet have also been issued and changes made in the laws in accord with the special characteristics of the region. "For instance, the proportion of Tibetan and other minority nationality deputies to the people's congresses at all levels in the region must not be less than 80 percent," he explained, "and the right of Tibetans who have gone abroad to vote and to be elected are guaranteed when they return."

Now in his seventies, Ngapoi Ngawang Jigme was one of the highest officials of the former Tibetan local government. In 1951, as chief representative of the former Tibetan local government, he signed the agreement on the measures for the peaceful liberation of Tibet with representatives of the central government.

One major element in the agreement was "practice of national regional autonomy under the unified leadership of the central people's government". Over the past 30 years, Chairman Ngapoi Ngawang Jigme has made important contributions to the unity of China, the BEIJING REVIEW article said.

In his interview with the weekly, Ngapoi Ngawang Jigme urged that the party's policies on national minorities be further implemented. He expressed his belief that "with the concern of the party and government and with the help of fraternal provinces and regions, the people of different nationalities in Tibet are sure to build a united, prosperous and culturally developed socialist new Tibet on the 'roof of the world'."

YUNNAN 'FACTIONAL REMNANT ELEMENT' ARRESTED

HK270523 Kunming Yunnan Provincial Service in Mandarin 1100 GMT 24 Nov 82

[Text] (Peng Shaoqing), an incorrigible factional remnant element in Baoshan Prefecture, has clung to his factional stand and broken the criminal law by fabricating the facts, laying false accusations against the prefectural CPC committee and its leading cadres, and so on in a vain attempt to reverse the verdict on factional criminal elements. The prefectural public security office arrested him according to law at the beginning of this month.

During the Great Cultural Revolution the factional remnant element (Peng Shaoqing) rigged up factions in Baoshan Prefecture and engaged in a whole series of conspirtorial activities for usurping party and state power. He was expelled from the party in 1977 and sent for 3 years of education through labor. On completing this term at the beginning of 1981, (Peng Shaoqing) was far from showing repentance; he continued to stubbornly cling to his reactionary stand and resorted to vicious means by falsely claiming to act in the name of 30 party members and a member of the masses and write numerous letters to the central authorities and the provinical CPC committee, fabricating the facts, attacking investigatory work, laying false charges against the prefectural CPC committee and 3 of its leading cadres, and vigorously crying the grievances of people who had undergone investigation. By completely negating the investigatory work in the prefecture, he vainly attempted to reach his aim of reversing the verdict on factional criminal elements.

In order to ascertain the facts, the provinical CPC committee sent a joint group to the prefecture in July last year, which conducted serious and strict investigations and repeatedly verified the facts. This proved that the so-called problems reported by (Peng Shaoqing) were not true; some of them were cases of making something out of nothing in order to create confusion, others were instances of seizing on one fault and ignoring the overall picture, while others were reversals of right and wrong and black and white. He also pinned unwarranted charges on the prefectural CPC committee and three of its leading cadres. These were pure fabrications.

In order to consolidate and develop the political situation of stability and unity in Baoshan Prefecture and ensure the smooth progress of the four modernizations, with the approval of the prefectural branch procuratorate, the prefectural public security office arrested (Peng Shaoqing) according to law on 2 November. His criminal responsibilities will be investigated.

BEIJING ENTERPRISES' PROMOTIONS DISCUSSED

OW300035 Beijing XINHUA Domestic Service in Chinese 0734 GMT 25 Nov 82

["Overcome Ideological Obstructions and Let the 'Sensible People' Join the Enterprises' Leading Bodies, by XINHUA Reporter Yu Huiyin" -- XINHUA headline]

[Text] Beijing, 25 Nov (XINHUA) -- Many enterprises in Beijing Municipality are now paying close attention to consolidate and rebuild the leading bodies in accordance with the 12th CPC National Congress' guideline of promoting cadres who are more revolutionary, younger, better educated and professionally more competent. Some old cadres have volunteered to retreat to the second and third lines of leadership and have actively recommended capable people to fill their vacated posts. As a result, a large number of middle-aged and young cadres, who have both ability and political integrity, have assumed leadership posts and have vigorously led the broad masses of workers and staff members to work hard in creating a new situation. However, in some units there are still capable people who have not been promoted and no progress has yet been made in their work. According to an investigation of the concerned department, among the leading bodies of the 154 enterprises that have undergone initial consolidation, 9 percent do not meet the necessary demands and need to attend crash classes.

Experience tells us that the key to properly consolidating the enterprises' leading bodies lies in whether the leaders recognize the need for consolidation and are resolved to carry it out. Why is it that in the advanced units leaders can be so resolute? Why is it that in some other units there are still 'sensible people' who have not been promoted? What has limited the leaders' vision and bound their hands and feet?

First, it is required that the leading cadres, including the major leading cadres of the enterprises and of the enterprises' upper organs, should show dedication to their work and possess a sense of esponsibility. Consolidation of the leading bodies does not merely mean changing the positions of a few people. It is, in fact, a long-term strategic task of restructuring the ranks of the cadres in order the meet the needs of modernization. Such restructuring is bound to encounter obstruction from force of habit or interference from "leftist" thinking. Without a strong sense of responsibility and without great resolution, the leaders cannot possibly overcome these obstacles.

Some advanced enterprises, such as the Capital Iron and Steel Company, the No 9 Beijing Municipal Radio Component Plant, the Beijing Municipal Paper-Making General Plant and the No 3 Beijing Municipal Chemical Industrial Plant, have successfully readjusted their leading bodies and raised the enterprises' economic returns.

However, in some departments the leading cadres, who lack vitality and have not emancipated their minds, prefer to stick to the old practice and do not strive for progress. Therefore, in judging the leading body of an enterprise, the leading cadres only pay attention to whether the cadres have maintained unity and met the basic work requirements. The leading body of an enterprise is seldom judged on whether it has created a new situation.

Where the leading body of an enterprise has failed to perform its job and is in need of readjustment, the choice of new leaders is often from the existing ranks of cadres and seldom solicited from other sources. As for individual cadres, most of them only care about arranging jobs for their children and other family members before retirement. They pay no attention to using "sensible people." A handful of cadres, jealous of other people's political integrity and capability, only seek to promote incapable and obliging people to succeed to their vacated posts instead of soliciting those who are capable of creating a new situation. Such comrades must first be imbued with the revolutionary spirit and be able to understand their historical mission in the new period. Only then will the leading comrades actively solicit talented people.

Second, to restructure and rebuild a leading body conforming to the demands of the "four modernizations" must require that some cadres be withdrawn from the leading body, either because of age, poor health, a low cultural level or incompetence. Young cadres have difficulty in entering the leading body because old cadres are reluctant to withdraw. There are two different attitudes in tackling this problem. One is that: Proceeding from consideration for public and the party's interests, high criteria and strict requirements are followed in transferring, dismissing and promoting cadres. In conjunction with this, ideological work and organization arrangement are meticulously and properly carried out. Such is the attitude taken by the Capital Iron and Steel Company. In 3 large-scale consolidations, the company has transferred 205 plant and departmental leading cadres from various leading bodies. Among them, 87 have become advisors or have retired for recuperation, 66 have assumed leadership work at sectional level or have taken up technical management work and the remaining 52 have returned to their former posts.

Another attitude in tackling the problem is that of "fear." Some leading cadres fear to offend other people, hurt other's feelings and undermine connections with other people. Consequently, they choose to take a wait-and-see attitude. Thus, they are slow to act and dare not make progress. The party group of the Beijing Municipal Chemical Industrial Bureau recently held a meeting to discuss ideological guidelines. The party group organized the major leading cadres on the chemical industrial front to seriously analyze why some leading cadres have such "fears" and enabled them to understand that such "fears" derive from "selfishness." Some leading cadres have said that they fear to offend people. But, why do they not fear to adversely affect the cause of the party? Why do they not fear to obstruct the progress of the modernization program?

Before the meeting, the bureau party group worried that the old comrades were reluctant to withdraw from the first line of leadership. However, through study at the meeting, the old comrades have emancipated their minds and volunteered to withdraw as soon as possible, so that young people could shoulder more heavy responsibilities. Some old comrades proposed that, after withdrawing to the second line, they should organize an enterprise management research group to give advice to the young comrades. Presently, the Beijing Municipal Chemical Industrial Bureau is paying close attention to consolidating the enterprises' leading bodies.

Third, some leading cadres still have prejudices against those cadres who are intellectuals. This is one of the major ideological obstacles in promoting "sensible people." Such comrades have not completely extricated themselves from the influence of "leftist" thinking. They continue to allege: "The family background of the intellectuals is bad, their social relations are complicated and they are not at one with the party." "They lack the necessary qualifications and experience in leadership and are therefore incapable of shouldering heavy responsibilities."

Such comrades have failed to understand that, since the convocation of the 3d Plenary Session of the 11th CPC Central Committee, the party has long declared, at many meetings and in many resolutions, that intellectuals belong to the working class. Together with workers and peasants, intellectuals are the forces for building socialism. It is entirely wrong to regard intellectuals as belong to the petty bourgeois or even the bourgeois class. The intellectuals have shouldered increasingly important responsibilities in building socialist modernization. Science and technology are also productive forces. The development of science and technology cannot be achieved without intellectuals. Practice shows that, where prejudices against intellectuals are eliminated, the role of capable people can be brought into play and work can be quickly improved. By discarding our erroneous viewpoints, we will be able to discover more talented people.

BEIJING'S DUAN JUNYI ON FAMILY PLANNING

OW230734 Beijing XINHUA Domestic Service in Chinese 0711 GMT 21 Nov 82

[Text] Beijing, 21 Nov (XINHUA) -- Duan Junyi, first secretary of the Beijing Municipal CPC Committee, stressed in his speech at the recent Beijing municipal family planning propaganda work conference: The implementation of family planning is a basic national policy, this issue is very important throughout the country, especially in Beijing.

Duan Junyi analyzed the urgency of pushing family planning a step further. He said: Beijing has a population of 9.23 million in an area of 16,000 square kilometers. The birth rate was at its peak during the past several years. The birth rate of the city last year was 16 per 1,000, a net increase of nearly 100,000 people. It is estimated that the birth rate this year will be 20 per 1,000. Even if the birth rate is reduced to 12 per 1,000 in the next 18 years, the city's population will still register a net increase of approximately 1 million by the end of this century. This will bring forth a series of problems such as food. In our daily greetings, we often asked: Have you eaten yet? This shows that feeding ourselves is a primary concern. Next comes housing. Although Beijing has been building five million square meters of housing annually, it still cannot meet the urgent needs of its residents. If the population is increased by another one million, more houses will have to be built. There are also other problems such as nurseries for children and the children's education. All this shows that while flexible measures have to be taken to reinvigorate our economy, family planning should remain inflexible.

Duan Junyi said: Beijing must march ahead of others in the four modernizations. It must also march in the forefront in family planning in the whole country. To this end, we must strengthen our work, carry out propaganda extensively and education patiently. We must get the whole city mobilized and must not slacken in our efforts come what may. While drawing up production plans, we must also work out family planning and link the production responsibility system with the birth control responsiblity system. Propaganda work must be done patiently especially in the rural areas. As long as we do our work sincerely, the masses will be inspired. We must promote the communist spirit and regard family planning as an important aspect of developing socialist spiritual civilization and overcome the feudal ideas of regarding men as superior to women and of more sons meaning more blessings. Since we have to raise a child, we must also educate him or her well.

This conference, jointly sponsored by the propaganda department of the Beijing Municipal CPC Committee and the municipal family planning committee, also planned "for family planning propaganda month" activities between 1983 new year and the spring festival.

GAO YANG SUPPORTS HEBEI CORRUPTION CASE HANDLING

OW012333 Beijing XINHUA Domestic Service in Chinese 0158 GMT 25 Nov 82

[Text] Shijiazhuang, 25 Nov (XINHUA) -- According to XINHUA reporter Wang Qin, Gao Yang, first secretary of the Hebei provincial party committee, recently urged and supported the leaders of Xingtai Prefecture in sternly handling the long-standing case of Communist Party member Xu Xiuying, who was suppressed and attacked for 5 long years. The leading cadres concerned of the Second Bureau of Light Industry, who doggedly refused to implement the decision of the higher authorities, were penalized according to party and administrative discipline. Xu Xiuying was commended for upholding his principles.

When Communist Party member Xu Xiuying was the responsible person of the Political Work Office of the Management Department of the Second Bureau of Light Industry, she reported to the bureau leaders that warehouse keeper Chen Zhenhua had used his post and power to resell steel products at a profit, that the management department had privately exchanged steel products for timber, flour, sesame oil, peanuts and bicycles, and that vice manager of the Management Department Liu Xintong had falsified his seniority to get a promotion. Having exposed these problems, Xu Xiuying did not get any encouragement and support, but was suppressed and attacked by the leaders of the Second Bureau of Light Industry and the Management Department, was removed from the Political Work Office, and was actually relieved of the post of responsible person of the Political Work Office. Since April 1978, Xu Xiuying had repeatedly appealed to leading organs at a higher level, as well as the departments concerned, but the case remained unsolved. In August this year, Gao Yang, first secretary of the provincial party committee, wrote a letter to the major responsible persons of the Xingtai prefectural party committee, urging them to solve Xu Xiuying's problems as soon as possible. The prefectural party committee sent an investigation group to look into the case and found that Xu Xiuying's problems were basically true. Based on the findings, the major responsible persons of the prefectural party committee made the following instructions: 1) Xu Xiuying should be commended for her courage in struggling against corruption and theft; 2) investigate and affix the responsibility for the embezzlement of more than 60 dun of steel products by Chen Zhenhua; 3) let Xu Xiuying resume her work in the political work office and pay her the wages withheld during the period of petition. However, because the leaders concerned of the Second Bureau of Light Industry doggedly refused to carry out the higher authorities' instructions, Xu Xiuying's problems were still not solved. Chen Zhenhua, who had embezzled steel products, was not punished.

Comrade Gao Yang inquired about his case when he conducted investigation and study in Xingtai Prefecture recently. He sternly told the leaders of the prefectural party committee: How can the Second Bureau of Light Industry refuse to carry ou the prefectural party committee's instructions for handling the case when the problems exposed by Xu Xiuying were found to be true? Can the prefectural party committe not do something about it? Comrade Gao Yang particularly pointed out: It takes great courage for a female comrade to struggle against corruption and theft, oppose the leaders' evil practices, and keep making petitions and exposing problems, despite the leaders' suppression and attack. This is really commendable. You were aware of a problem of obvious right and wrong, yet you tolerated the disobedience of your subordinate cadres!

The leading cadres of the prefectural party committee were greatly shocked by Comrade Gao Yang's sharp cirticism. That night, the standing committee of the prefectural party committee convened a meeting to discuss the lessons they had learned from handling Xu Xiuying's case.

They all agreed that the prefectural party committee was partly to blame for letting Xu Xiuying's case drag on for 5 long years. The leadership's incompetence and its inability in supporting the upright and suppressing the evil had dampened the party's cause. The standing committee of the prefectural party committee made the following decisions: Since warehouse keeper Chen Zhenhua's corruption and profiteering in steel products is a serious problem, it is suggested that the judicial authorities detain and try him; manager Gang Zhinqin of the Management Department will be relieved of all posts inside and outside the party for the serious mistakes he made in suppressing and attacking Xu Xiuying; responsible person of the management department Liu Xintong will be dismissed from his administrative post; Director of the Second Bureau of Light Industry Wu Zhixi had threatened to resign and refused to carry out the correct instructions of the higher authorities even after being criticized. He will be relieved of all posts inside and outside the party. The judicial authorities have already detained Chen Zheuhua according to law.

Recently, Xu Xiuying was appointed by the prefectural administrative office deputy director of the Second Bureau of Light Industry.

SHANXI RIBAO URGES STUDY OF CONGRESS DOCUMENTS

HK020646 Taiyuan Shanxi Provincial Service in Mandarin 2315 GMT 1 Dec 82

["Text" of 2 December SHANXI RIBAO commentator's article: "Deepen Study of the 12th Party Congress Documents in Connection With Reality"]

[Excerpts] In the past 2 months and more, the party organizations at all levels have regarded study for the 12th party congress documents as the cardinal task, and adopted various means such as holding rotational classes and organizing publicity and explanation teams to lead the party members, cadres and masses to seriously study and profoundly appreciate their spiritual essence. As a result of this period of study, many comrades have enhanced ideological understanding, got a clear idea of the targets for endeavor, braced their revolutionary spirit and strengthened confidence in creating a new situation in all fields of socialist construction. This shows that the 12th party congress spirit is going ever deeper into people's minds, and has become a powerful motive force stimulating all work.

However, we must also realize that the province has only made a good start in studying the 12th party congress documents. We certainly cannot be satisfied with the achievements so far scored in study. The progress of study varies from unit to unit. In particular, many units have not done enough in linking study with their reality, summing up experiences and lessons, continuing to emancipate the mind and carrying out the necessary reforms. Viewed either from the Central Committee's demands on us or from the actual situation, the party organizations at all levels must further strengthen leadership and continually deepen study of the 12th party congress documents.

First, we must make great efforts to appreciate in depth the basic spirit of the 12th party congress documents and unify our ideological understanding. It is quite normal that the cadres and masses should show varying ideological responses and put forward all kinds of questions in the course of study, and there is no need to be alarmed at this. As for certain muddled ideas and erroneous viewpoints, we must conduct analysis and give appropriate and correct answers. This requires that we guide everyone to study the basic theories of Marxism-Leninism-Mao Zedong Thought in connection with the contents of the documents. We must also study the important documents and important talks and articles of leading central comrades since the 3d Plenary Session of the 11th CPC Central Committee. We should further deepen our comprehension of the 12th party congress documents by integrating theory with practice.

Secondly, on the basis of enhancing understanding and and unifying thinking, we must, in close connection with the reality of our areas, departments, and units, solve a number of problems that should and can be solved, and implement the spirit of the 12th party congress documents in our own work. A major condition for linking study with reality and solving problems is to continue to clear away the influence of leftist ideology and the two whatevers, so as to further open people's eyes, emancipate their minds more, carry out reforms more boldly, and truly implement the 12th party congress spirit.

Of course, while clearing away the influence of leftist ideology, we must also thwart rightist interference. We must proceed from reality, oppose leftism or rightism as appropriate, and persistently wage the struggle on two fronts.

In the course of studying the spirit of the 12th party congress documents in depth, we must also pay attention to seriously summing up and fully publicizing the achievements and experiences gained since the 3d Plenary Session of the 11th CPC Central Committee. The 12th party congress is a continuation and development of the line of the 3d Plenary Session of the 11th CPC Central Committee.

SHANXI RADIO COMMENTS ON PUBLIC ORDER

HK230205 Taiyuan Shanxi Provincial Service in Mandarin 2300 GMT 22 Nov 82

[Station commentary: "Tackle the Problems in a Comprehensive Way and Strive For a Fundamental Turn For the Better in Shanxi Social Order"]

[Excerpts] The grand opening of the provincial meeting representatives of progressive collectives and individuals on the political and legal front illustrates the excellent situation of victorious development of political and legal work. We fervently greet and extend a lofty salute to the representatives of progressive collectives, heroes and models attending this meeting and also the comrades on the political and legal front throughout the province.

The province's social order has taken a notable turn for the better in the past 2 years. Straightening out social order is a protracted and arduous task. We must correctly apply the weapon of law and concentrate efforts to deal resolute blows at serious economic crime, the sabotage activities of counterrevolutionaries and enemy agents, and the sabotage activities of remnant elements of Lin Biao and the gang of four. As for criminals who seriously endanger social order, we must be prepared for taking measured action to deal blows at them. We must punish them severely and swiftly according to law. As for gambling, feudal superstition, trafficking in women and children and other social evils that endanger spiritual civilization, we must launch the masses to curb them and investigate them according to law in connection with launching the five stresses and four beautifuls drive.

The key to tackling the problems in a comprehensive way is that the party committees at all levels must strengthen leadership and mobilize and organize all departments and units to set up security responsibility systems. Such systems should be linked with the production and work responsibility systems. The focus in tackling the problems in a comprehensive way is to step up education for young people and juveniles. We should apply the principle of educating, transforming and saving youths and juveniles who have committed minor crimes. The basis of tackling the problems in a comprehensive way is to strengthen grassroots organizations and basic-level work, show more initiative in anticriminal precautions, promptly mediate contradictions among the people and thus solve large numbers of public order problems at the budding stage.

HEILONGJIANG'S YANG YICHEN ATTENDS TU CONGRESS

SK200657 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 19 Nov 82

[Text] According to our reporter, the Heilongjiang Provincial Congress of Trade Union Activists ceremoniously opened in Harbin on 19 November. Attending the opening ceremony were excellent trade union activists and cadres and representatives of excellent trade union collectives, totaling 523 persons. Also attending the opening ceremony were leading comrades of the provincial CPC committee, the people's government, the people's congress and the provincial CPPCC committee, including Yang Yichen, Chen Lei, Chen Junsheng, Zhao Dezun, Chen Jianfei, Hou Jie, Chen Yuanzhi, Xie Yungqing, Wang Jun, Sun Ziyuan and Sun Xiqi.

The congress summed up and exchanged the experiences of trade union activists and the work experiences of trade unions at the grassroots level. The congress also commended excellent trade union collectives, activists and cadres and mobilized the broad masses of workers and staff throughout the province to conduct an advanced producer campaign and carry out technical transformations so as to contribute to fulfilling the magnificent program of socialist modernization put forward by the 12th party congress.

Chen Jianfei, secretary of the provincial CPC committee and deputy governor of the province, spoke at the congress. On behalf of the provincial CPC committee and the people's government , he extended sincere solicitude and congratulations to congress participants. Comrade Chen Jianfei said: Along with the penetrating development of our country's socialist construction, great changes have taken place in the contingent of the working class and young workers have become the main part of the working class. In the new historical stage of socialist modernization, party and government departments and trade union organizations at all levels emphatically should strengthen the ideological and political work and the cultural and technical education among young workers and gradually build a workers' contingent imbued with lofty ideals, good morality, knowledge, good discipline, unity and vitality.

At the conclusion of his speech, Comrade Chen Jianfei said: The provincial CPC committee urges all trade union organizations, cadres and activists in the province penetratingly to study and understand the guidelines and documents of the 12th party congress, get a full understanding of the position and role of trade union organizations in the new stage of socialist modernization and improve the building of a workers' contingent centered on communist education. It is necessary to give play to the role of worker congresses, implement and perfect the system of worker congresses and raise the enterprise democratic administration to a new level. It is also necessary to strengthen the activity of making contributions to the four modernizations drive and the activity of learning from and catching up with the advanced, while working for more and better economic results. Trade union organizations should maintain close ties with workers, staff and the masses, make mass organizations serve the masses and create a new situation in our province's workers' movement and trade union work.

Trade Union Congress Concludes

SK240127 Harbin Helongjiang Provincial Service in Mandarin 1100 GMT 23 Nov 82

[Excerpts] The 5-day provincial congress of trade union activists held a closing ceremony this afternoon.

Attending the closing ceremony were leading persons of the provincial CPC committee, people's congress standing committee, government and CPPCC committee, including Chen Lei, Chen Junsheng, Xie Yunqing, Sun Ziyuan, Wang Jun and Sun Xiqi. Comrade (Wang Min), vice chairman of the provincial trade union council, presided over the closing ceremony. A decision of the Heilongjiang provincial trade union council on commending outstanding trade union collectives, activists and workers was read at the ceremony.

HEILONGJIANG'S YANG YICHEN ON WORK CONSOLIDATION

SK231017 Harbin Heilongjiang Provincial Service in Mandarin 2200 GMT 22 Nov 82

[Text] Recently the provincial CPC committee held a work forum on consolidating party organizations. The forum analyzed the province's situation in consolidating party organizations, summed up experiences, discovered some existing problems and discussed ways to check the first group of selected units scheduled for consolidation, ways to consolidate party organizations on a wider scope by 1983 and ways to further strengthen leadership over consolidation work.

Attending the forum were responsible comrades of all prefectural, all municipal and some county offices in charge of consolidation work. All standing committee members of the provincial CPC committee heard the report.

After summing up the basic experiences of the province in consolidating party organizations, the forum held: It is good practice to combine consolidation of party organizations with rectification of party work style. This results in effectively upgrading the quality of party organization consolidation and party work style rectification. Through success in consolidation, all units can attend practically to principal contradictions and have the courage to face difficulties in solving existing problems in leading bodies, labor organizations, the economic responsibility system and technical innovation. Units which have been consolidated know how to readjust and reform in conducting consolidation work.

With regard to the method of leadership, leaders at the provincial, prefectural and municipal levels should take the lead in consolidating the party organizations of selected units and using the experience of selected units to promote work in all units. This will be well received by the masses. At the same time, leaders should help working groups and bring their roles as advisers into full play to consolidate party organizations successfully by relying on the internal strength of the units.

Having heard the report of the forum, the standing committee of the provincial CPC committee stressed that consolidation work was a major event. Consolidation work must be of high standards and high quality in line with the guidelines of the 12th party congress.

Comrade Yang Yichen said: Consolidation of party work style lies in ideological consolidation; hence, we should concentrate our efforts on education so as to upgrade the ideological awareness of party members. The key to consolidation lies in solving problems in leading bodies. We must attend to it. We should, at the same time, be devoted to dealing blows at serious criminals in the economic field and rectifying unhealthy trends within the party. The units scheduled to be checked in their consolidation work at the end of 1982 and at the beginning of 1983 must score new achievements in all fields.

Some specific suggestions were set forth on further upgrading the quality of consolidation work, on checking and accepting the first group of selected units scheduled for consolidation and on conducting the consolidation work in 1983.

GANSU SCHEDULES PEOPLE'S CONGRESS SESSION

HK170154 Lanzhou Gansu Provincial in Mandarin 2305 GMT 16 Nov 82

[Text] The 15th meeting of the 5th Gansu Provincial People's Congress Standing Committee was convened in Lanzhou on 16 November. The meeting decided that the Fifth Session of the Fifth Provincial People's Congress will open in Lanzhou on 20 December. The meeting also decided to relieve Vice Governor Wu Junyang of his post and to appoint (Li Ziqi) vice governor. Provincial People's Congress Standing Committee Chairman Wang Shitai presided at the meeting. Also present were Vice Chairman Li Peifu, Gao Jinchun, Qiang Zixiu, Li Keru, Wu Hongbin, Sun Runhua, Wu Zhiguo, He Jianshan, Yang Fuxin, and (Li Zhengting). Present as observers were provincial Higher People's Court President Wu Sihong, Deputy Provincial Procurator (Jiao Shenghong), and responsible persons of provincial government departments concerned.

GANSU PLA LEADER ON IMPROVING CADRE STANDARDS

HK290624 Lanzhou Gansu Provincial Service in Mandarin 1125 GMT 28 Nov 82

[Text] Gansu Military District Commander Li Bin said at a meeting of cadres of units stationed in Lanzhou, convened by the military district on 27 November: In creating a new situation, we must start on a number of stirring undertakings right away and produce good results.

Comrade Li Bin said: In connection with streamlining and reorganization, the provincial military district must assign to leadership posts at all levels middle-aged and young cadres in the prime of life who have strong party spirit, correct work style and good standards and abilities, and are adept in work and capable of creating a new situation. Focusing on the cadres, we must get a good grasp of cultural and scientific studies, so as to train talented people for modernizing and regularizing the army and also for enabling cadres transferred to local work to take part in economic construction.

By means of continuing cultural studies, we should ensure that cadres at and below regimental level in the military district who have not reached junior secondary school education level all achieve this level by 1985. By 1990, all the cadres should have the education levels of senior secondary school or of graduate of secondary technical school, or higher. The provincial military district organs are preparing to set up a cultural studies center next year, to create conditions for the organ cadres' cultural studies.

Li Bin said: By conducting rotational training, we should ensure that divisional and regimental cadres and political work cadres aged below 45 complete courses in Marxist philosophy, political economy, scientific socialism, and the history of China's revolution by 1990.

Comrade Li Bin stressed: In the next few years we must make great efforts to solve problems in logistics construction for border defense and guard units, to fundamentally improve the living and working conditions of the units.

QINGHAI TRADE UNION ACTIVISTS MEETING OPENS

HK280610 Xining Qinghai Provincial Service in Mandarin 1100 GMT 27 Nov 82

[Summary] The first Qinghai representatives meeting of trade union activists opened in Xining on 25 November. The meeting is being attended by 299 representatives. Song Lin, Ma Wanli and Zhuojia, responsible persons of the provincial CPC committee, People's Congress Standing Committee and government, attended the opening ceremony.

Ma Wanli, deputy secretary of the provincial CPC committee, made a speech. "He hoped that, encouraged by the 12th party congress spirit, the participants would sum up work, exchange experiences, learn from each other's strong points to make up for their own weaknesses, raise their own work to a new level, and create a new situation in trade union work in the province."

SHAANXI GOVERNMENT BEGINS STRUCTURAL REFORM

HK210546 Xian Shaanxi Provincial Service in Mandarin 0500 GMT 21 Nov 82

[Text] Reform of the administrative structure of the Shaanxi Provincial Government officially started on 20 November. According to the restructuring scheme, the current 62 committees, offices, departments and bureaus under the government are to be streamlined and amalgamated into 39. The total number will be 40, including the newly-established provincial auditing office. The present number of provincial government work personnel will be reduced by one-third. The restructuring will be completed by the 1983 Spring Festival.

The namelist of responsible persons of the new committees, offices, departments and bureaus was announced at a provincial government plenary meeting on 20 November. Vice Governor Bai Jinian presided. Vice Governor Jiang Yi made a speech mainly dealing with measures for ensuring the smooth progress of the restructuring work. He also demanded that all the committees, offices, departments and bureaus organize the cadres to serious study the Central Committee and State Council documents on reform of the administrative structure and bring everyone's thinking into line with the central line, principles and policies. The leadership groups must be formed by following the mass line. It is necessary to pay full attention to bringing into play the backbone role of old cadres.

Comrade Jiang Yi particularly emphasized: The new committees, offices, departments and bureaus must have a clear idea of their work responsibilities, and improve their leadership style and work efficiency. When instituting the reform, one group in an organ must carry out the reform while the other gets on with routine work. We must avoid the problem of having too many things to take care of at the same time.

XINJIANG'S WANG ENMAO STRESSES APPLYING SCIENCE

HK200504 Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 19 Nov 82

[Excerpts] The Xinjiang Regional CPC Committee held a mobilization rally in Urumqi on 19 November to implement the 12th party congress spirit and make science and technology serve economic construction. Regional CPC Committee First Secretary Wang Enmao made an important speech. He said: To achieve the target for endeavor in the region's economic construction, we must rely on the progress of science and technology. The science and technology workers of all nationalities must unswervingly and firmly establish the idea of serving economic construction, and make new contributions in promoting the progress of science and technology, developing production and improving economic returns.

Wang Enmao said: In speaking of relying on science and technology, in a certain sense we mean relying on science and technology experts, and bringing their role into full play. Xinjiang has nearly 120,000 natural science and technology personnel, distributed in all areas, departments, trades and sectors. This is a very great force. The key lies in how we make use of this force. The leaders at all levels must attach great importance to this question. We must in our actual work adopt various methods to bring into full play the role of science and technology personnel.

We must employ them boldly and get them to take part in planning economic, social and science and technology development and in economic policymaking. We must change the purely administrative method of guiding economic work and production, and mobilize to the maximum the enthusiasm of science and technology personnel for building socialist modernization.

Wang Enmao said: In order to meet the needs of the new situation and tasks, we must further strengthen party leadership over science and technology work and speed up the development of science and technology in Xinjiang. We must augment and strengthen the science and technology force and build a force suited to the demands of the region's economic construction. We must adopt special measures to speed up the cultivation of talented minority-nationality scientists and technicians. We must work hard to improve the professional standards of the existing science and technology personnel, and form them into a research capability as quickly as possible. The existing scientific research units in the region should be rationally readjusted. We must vigorously develop science and technology work in factories and mines and other enterprises, and strengthen the building of agroscientific experimental bases with superior characteristics. We should gradually improve the conditions for research work and suitably increase expenditures for science and technology and investment in capital construction for science and technology.

Wang Enmao said: Whether we can correctly evaluate and bring into play the role of the intellectuals directly affects the success or failure of socialist modernization. The great majority of intellectuals in Xinjiang are very good. They work hard at their posts, and have made contributions for the people of all nationalities and the socialist cause in Xinjiang. Our Xinjiang is a fine place, with extremely broad prospects for developing socialist modernization. Xinjiang's socialist construction and its people of all nationalities cannot do without intellectuals, and need them to an extremely great degree. There is a great future for intellectuals here. The comrades working in Xinjiang, including science and technology personnel and intellectuals, should further set their minds at ease. As for those who have left, no matter when they left, we sincerely and warmly hope they will come back to work in Xinjiang, and will welcome them. We must further eliminate leftist ideological influence, correct our understanding and attitude regarding intellectuals, make correct arrangements for their work, and bring their role into full play. Rational readjustments must be made for those intellectuals who are misemployed. We should solve problems in intellectuals' working and living conditions, so that they can get on with their work with ease of mind. We should boldly promote talented and genuinely able intellectuals to important posts. Those who have made major contributions can be given exceptional upgrading and salary raises. We should fully mobilize the enthusiasm of the intellectuals.

Regional CPC Committee Secretary Qi Guo and Deputy Secretary Janabil presided at the rally.

CCNAA REPRESENTATIVE VIEWS U.S.-TAIWAN RELATIONS

OW250327 Taipei CNA in English 0309 GMT 25 Nov 82

[Text] Taipei, Nov. 25 (CNA) -- Dr Fredrick F. Chien, the newly appointed representative of the Coordination Council for North American Affairs (CCNAA) Office in the U.S., said Wednesday he will do his best to improve and enhance the Sino-American relations.

Answering question at a press conference at the CCNAA Office here, Chien pointed out that he will try to:
-- work out a consensus upon which the Sino-American relations will be promoted:
-- make more American friends on a vast and general basis;
-- strongthen the development of Sino-American cooperation in such fields as science and technology, culture and tourism.

In addition, Chien said he and the CCNAA staffs in the United States will try to increase contacts with American academic, mass media, congressional and government personnel to promote understanding and seek their support.

He said the CCNAA will also provide better services for more than one million overseas Chinese and Chinese students in the United States.

Notes PRC-USSR Ties

OW011045 Taipei CNA in English 1007 GMT 1 Dec 82

[Text] Taipei, Nov. 30 (CNA) -- Fredrick Chien, who has just been named chief representative in Washington, D.C. of the Coordination Council for North American Affairs (CCNAA), is telling a TV audience that "our main job is to let our American friends understand how peoples in Asia feel about Communist China."

In a pretaped TV program, "News Magazine", slated to go on air at 9:30 P.M. today on CTS [China Television Station], Chien, 47, who was relieved of his job as vice foreign minister late last month, discusses with four other political scientists how not to let the United States play the so-called "China card".

Government leaders and people in Southeast Asia have made it clear in public as well as in private that they fear the expansion of Communist China more than the Soviet Union. "If we can persuade our American friends to see this clearly, it will help improve relations between the Republic of China and the United States," Chien says. He says the United States must be made to realize that it is dangerous to play the so-called "China card". Besides it isn't worth it," he adds.

No American politicians admit that they are playing the so-called "China card". They say they share some common geopolitical interests with the Chinese communists. "It isn't true. They have no common interests to speak of," Chien insists. For instance, the United States considers Poland a serious issue, accusing the Kremlin and Polish martial law leaders. But Peking and Moscow see eye to eye on the Polish issue.

The quarrel between Peking and Moscow has stemmed largely from endogenous issues. When they disappear, they will make up. No amount of outside pressure and persuasion, including those of the United States, can drive a wedge between them, Chien says. The Soviet Union and the Chinese communists have had complicated relations. Ideological dispute has receded to the background. The Chinese communists now are disputing with the Kremlin on hegemony in three areas only -- Afghanistan, Outer Mongolia, and the Indochina Peninsula. If the Soviet Union gives up any of the three places, Peking is ready to talk peace. he says.

"We shouldn't rule out the possibility of Moscow and Peking making it up. It is precisely because of this possibility that we must remind the United States of the danger of playing the China card," he continues.

RADIO COMMENTS ON NEW CCNAA ENVOY's APPOINTMENT

OW240329 Taipei International Service in English 0100 GMT 23 Nov 82

[Unattributed commentary]

[Text] Probably millions of Americans believe that there is still a ROC [Republic of China] Embassy in the United States. There is not. President Carter decided that the Chinese communists should have the embassy and broke formal diplomatic relations with the ROC. That was back in 1978. Subsequently the U.S. Congress passed the Taiwan Relations Act, that set up supposedly unofficial organizations to represent the United States in Taiwan and the ROC in the United States. Ahtough not embassies, these offices do most of the same work.

The ROC has 10 offices in the United States. Aside from the Coordination Council for North American Affairs [CCNAA] in Washington, which is the head office, these establishments operate much the same as the old consulates. They do about the same kind of work. There are lots of problems involved. Protocol is the very heart of diplomacy, but much of this is denied under the new system. Government officials do not talk to government officials. Before they join the CCNAA or the American Institute in Taiwan [AIT] they must resign from their respective foreign services. Suppose Dr Rsai Wei-ping, the representative of the CCNAA in Washington, wanted to confer with President Reagan, he would not be able to unless Mr Reagan broke down the system established by Mr Carter. So Dr Tsai was compelled to maintain a low profile, no matter how friendly the American people may be.

It is a frustrating job. The ROC is obviously a country by every test ever laid down by the political scientists. It is in fact bigger and stronger that most of the countries of the world. Soon Dr Tsai will be moving on to a new assignment. Taking his place in Washington is an old friend of many Americans and a graduate of Yale University -- Frederick F. Chien. His Chinese name is Chien Fu. He has lived in America and has travelled widely there. Two of his books are on relations with the United States. Dr Chien will no doubt be frustrated too on occasions, but he is going to try to travel around the United States and tell American friends what is going on in Taiwan and about the relationship with the Chinese communists. He leaves his post as vice minister of foreign affairs for politics to take up his new assignment. Other diplomatic changes are also in prospect, involving some of the most important of the ROC's posts. The Foreign Ministry is not reshuffling because of failure but to assure that new and capable men will bring a new outlook to the world situation.

These are interesting changes, because the Americans attempt to strengthen [as heard] the diplomatic arm of the ROC at a time when the Chinese communists are trying to get together with the Soviet Union. Some Americans understand the seriousness of this. Others do not. Some think that the United States must buy off Peking with the surrender of the ROC. This is, of course, exactly what the Chinese communists have in mind. They want to frighten the Americans into isolating Taiwan and leaving the ROC without defenses. The assignment of Dr Chien will be to convey the realities to Americans.

Dr Isai was already doing so quietly, and he did a good job. But as a young and energetic diplomat, Dr Chien wants to take the representation of Free China's view on a wider front. These diplomatic changes are evidence that the ROC is not only alive and and well, but possessed of the energy and the imagination to move forward in the world of international affairs. They are further proofs that the ROC is not isolated and that the Chinese communists' conspiracy to bring that about has already failed.

The year of 1983 promises to be an active and interesting diplomatic year for Free China, one that could push the Peking-Moscow plot to the back burner.

CHINA NEWS SCORES TIME MAGAZINE'S 'PREJUDICE'

OW301441 Taipei CNA in English 1358 GMT 30 Nov 82

[Text] Taipei, Nov 30 (CNA) -- The CHINA NEWS, an English-language evening newspaper in Taipei, editorialized Tuesday to comment on TIME magazine's "prejudice" in its reporting on the Republic of China on Taiwan. The editorial reads:

Journalistic prejudice is common -- maybe even usual. The Republic of China has experienced a great deal of it. In possession of an island of fewer than 19 million people and 14,000 square miles, we are fighting for the freedom and prosperity of a huge Chinese subcontinent.

We haven't won the battle yet. But we have created in our own little sphere Asia's third or fourth ranking economy. Only Japan, Mainland China and (on occasion) South Korea are bigger.

As an industrial power we are far ahead of any of the ASEAN countries. Yet such is the bias of TIME magazine that a cover story on "Outlook for the Pacific" (including Australia and the United States) mentions the Republic of China on Taiwan (in passing) only a couple of times. TIME has a board of economists for the Pacific area. They come from Japan, South Korea, Australia, the United States, Hong Kong and Thailand. The outstanding economists, businessmen and industrialists of the Republic of China are ignored.

Maybe this isn't very important. It is a reflection of the rather widely held Western belief that the ROC will one day cease to exist and Taiwan will fall into the hands of the Chinese communists. Yet this flies in the face of the Red Chinese failures and the Taiwan successes. The impression is given that the ROC-Taiwan doesn't matter very much. We don't count for anything regardless of the size of our gross national product or per capita income. We are used to being pushed around and do the best we can to answer.

This time some of the people who know something about our economy can be expected to raise their voices and ask, "Whatever happened to Taiwan?" They can answer that it is still here and doing very well [words indistinct] be prospering as we did, but then who is? Our growth is not negative. Our people are well fed, sheltered and clothed. Above all, we have confidence that recovery is assured and that we are going to continue proving ourselves in competition with the Chinese communists despite all the obstacles against us.

Not long ago, NEWSWEEK had a cover story on the Republic of China. We raised some objections. It could have been more objective. But we at least were given credit for a creditable existence.

Incidentally, maybe it wasn't so bad to be [words indistinct] weak attempt to present the Pacific and its prospects. If anyone wants to figure out where Asia and the Pacific stand from reading this article, they had better peruse it through a crystal ball.

JOURNAL URGES FLEXIBLE FOREIGN POLICY

OW270847 Taipei PA SHIH NIEN TAI in Chinese Nov 82

[Article by Chen Pi-sheng: "The Various Propositions About the Status of Taiwan"]

[Excerpts] China was officially divided into two different systems and two different political powers after the KMT withdraw to Taiwan. During the past 33 years, Taiwan's international status has always been a knotty problem in international law, since there is neither a theoretical nor practical analog in history that can be referred to in explaining and comparing this issue. Under this special circumstance, which is unusual in modern or ancient times, in China or elsewhere, Taiwan can enjoy even less privileges in the international community than many mini-states. Not only is Taiwan treated unequally within the diplomatic circle,s Taiwan's future survival and development are also not protected by international law.

The deterioration of Taiwan's international status has long been the cause of worry for scholars and experts who are concerned with Taiwan's future, and, therefore, they have tried to seek a solution to the issue by presenting a variety of "theories" and "formulas." Among the relatively familiar ones are the German formula, the Singapore formula and the commonwealth formula, and the theories on nongovernmental exchange between Taiwan and mainland China, Taiwan autonomy, democratic unification, economic unification, cultural unification, the multi-system state formula, convocation of a national congress and constitutional conference, unification under the three principles of the people, and so forth.

In a written interpellation to the Executive Yuan in April 1979, legislators Kang Nin-Hsian and Huang Hsin-chieh urged the authorities setting Taiwan's foreign policy to thoroughly review our foreign policy and diplomatic measures. They said: "During the last 30 years, we have persistently confused our fundamental national policy with our foreign policy. Because our fundamental policy is anticommunism, resistance against against Soviet aggression and recovery of the Chinese mainland, we have adhered to the stand of never compromising with the communists. Under such circumstances, there is simply no diplomatic leeway. Even when our survival is threatened by the communists, we still stick to the stand of better to die in glory then to live in dishonor." This is precisely the fundamental reason why Taiwan's international status has fallen so low, as we mentioned earlier.

While reviewing our previous and current situation, we maintain that we must consider our foreign policy as a means to achieving our fundamental national policy under the practical principle of survival, that we must not confuse our foreign policy with fundamental national policy, and that we must have a strategy, and not merely tactics, in our diplomatic work. Only by doing this can we be effective in promoting our relations with other countries, based on eqality and law, can we play a more positive role within the international community.

TAIWAN, FRENCH AGENCIES DISCUSS NUCLEAR ENERGY

OW011335 Taipei CNA in English 0940 GMT 1 Dec 82

[Text] Taipei, Dec. 1 (CNA) -- Taiwan Power Corp. is contacting with French agencies on matters concerning technological cooperation in power generation, G. Monod, president of the Center Francais de Commerce Exterieur (French External Trade Center) said Tuesday. At a news conference before the opening of the seminar on advanced Franch technology, Monod said related agencies of the Republic of China and France have been discussing technological cooperation in nuclear power-generation recently. Construction work will be begun as soon as agreement is reached, he added. Taiwan Power Corp. reportedly intends to dispatch personnel to France to collect information about power generation technology.

Energy is one of the topics of the seminar. The French nuclear fuel company, the French Atomic Energy Commission and the French power company have dispatched delegates to attend. The French nuclear fuel company and its affiliate, the French atomic energy commission, both of which will be dealing with Chinese agencies, do mainly uranium mine exploration, uranium enrichment and waste disposal.

SWISS TRADE OFFICE OFFICIALLY OPENS IN TAIPEI

OW260347 Taipei CNA in English 0257 GMT 26 Nov 82

[Text] taipei, Nov. 26 (CNA) -- Switzerland trade office in Taipei was officially opened here Thursday. Max W. Schaelchlin, chairman of the Swiss-Taiwan trade council, held a cocktail party at Taipei Hilton Hotel Thursday. He said that the trade office here is aimed at expanding and balancing the two-way trade between Switzerland and the Republic of China and further enhance the interflow in other fields. To realize the goal, the office has already worked out concrete programs including making survey and research on Taiwan market and inviting businessmen of the Republic of China to visit Switzerland.

Switzerland is the ninth West European country to set up a trade office in Taipei, and the office is the 11th of its kind here.

Walter Muler, first director of the trade office, was present at the reception to meet more than 100 Chinese and foreign dignitaries including Ambassador Louis Vorster of South Africa and Wang Fei, director of European affairs, Ministry of Foreign Affairs.

LESOTHO, TAIWAN PREMIERS DISCUSS COOPERATION

OW300335 Taipei CNA in English 0313 GMT 30 Nov 82

[Text] Taipei, Nov 30 (CNA) -- The Republic of China and the Kingdom of Lesotho share common ideal and stand, and on this basis the relations between the two countries will be further cemented, Premier Sun Yun-hsuan said Monday. Premier Sun hosted a dinner at the Grand Hotel in honor of Dr Leabua Jonathan, prime minister of Lesotho, and V.M. Molapo, minister of foreign affairs and information.

In his speech, Premier Sun pointed out that at present communism is the root of disasters in the world, and that the Republic of China has always insisted on its anti-communist stand, strengthening its relationship with other free nations in order to maintain democracy and stability of the Free World. In March 1980, Premier Sun visited Lesotho and received warm reception there. He extended his thanks to the enthusiastic greetings he received in Lesotho, and he also expressed his hearty welcome to the visit of Prime Minister Jonathan.

In reply, Prime Minister Jonathan expressed his thanks to the Republic of China's cooperation in helping Lesotho develop its economy and agricultural technology. He stressed that such cooperation should be further strengthened in the future.

Chiang Meets Lesotho Premier

OW021435 Taipei CNA in English 1408 GMT 2 Dec 82

[Text] Taipei, Dec 2 (CNA) -- President Chiang Ching-kuo received Lesotho Prime Minister Leabua Jonathan at the presidential office Thursday afternoon. Prime Minister Jonathan was accompanied by V.M. Molapo, minister of foreign affairs, information and broadcasting, and R.P. Matete, senior secretary to the prime minister of Lesotho, at the audience.

President Chiang extended his warm welcome to them for their visit to this country. It is a special pleasure to see Prime Minister Jonathan again, President Chiang said. President Chiang asked the prime minister to convey his regards to King Moschoeshoe II after he returns. During the meeting, the president also exchanged opinions with the dignitaries on matters of mutual concern and world situation.

President Chiang and Prime Minister Jonathan both stressed that relations between the two countries are becoming closer because government officials and people often exchange visits to promote economic and technical cooperation. They expressed their confidence that under the joint efforts, the friendly relations will surely further grow in the years ahead. Those also present at the meeting were Ma Chi-chuang, presidential secretary general, and Foreign Minister Chu Fu-sung.

Cooperation Agreements Signed

OW011417 Taipei CNA in English 1400 GMT 1 Dec 82

[Text] Taipei, Dec. 1 (CNA) -- Premier Sun Yun-hsuan and Prime Minister Leabua Jonathan of Lesotho signed two agreements and a memorandum Wednesday to strengthen ties of economic cooperation between the two nations. The agreements signed are the Sino-Lesotho trade agreement and the Sino-Lesotho investments promotion and protection agreement as well as a memorandum on loan for Lesotho.

Foreign Minister Chu Fu-sung and the Bank of Taiwan General Manager Wang Chih-ta also respectively inked a supplementary agreement on the Sino-Lesotho technical cooperation and a loan agreement with Lesotho Foreign Minister V.M. Molapo.

Those present at the ceremony at the Executive Yuan included Economic Minister Chao Yao-tung, government information office Director General James Soong and R.P. Mateto, senior secretary of the prime minister of Lesotho.

DOMINICAN REPUBLIC DELEGATION DISCUSSES TRADE

OW030321 Taipei CNA in English 0255 GMT 3 Dec 82

[Text] Taipei, Dec. 3 (CNA) -- Jose del Carmen Marcano, minister of industrial and commercial affairs of the Dominican Republic, called on Vice Economics Minister Chang Hsuin-Shuen at the Economics Ministry Thursday. They exchanged views on matters concerning economic development and cooperation between the two countries. Chang agreed to act upon a request by Marcano that the National Bureau of Standards and the Bureau of Commodity Inspection and Quarantine help the Dominican Republic to set up a system to raise the quality of its products. The Republic of China will also help the Caribbean country in planning the establishment of an export processing zone. Marcano, who led a five-member mission now visiting here, extended an invitation to Chinese manufacturers to invest in his country. He also expressed his hope that the ROC will buy more Dominican products, thus balancing the Sino-Dominican trade. Members of the Dominican mission, including Rafael Subervi Bonilla, minister of tourism, and three other officials, Dr Rafael Cuello Hernandez, Julio A. Peralta, and Simon Alfredo Diaz, arrived here Wednesday for a weeklong visit. While here, they will call on government leaders, and visit cultural and economic centers of activity here. They are scheduled to depart on Dec. 7.

KMT LEADER ADDRESSES OVERSEAS CHINESE MEETING

OW011415 Taipei CNA in English 1352 GMT 1 Dec 82

[Text] Taipei, Dec 1 (CNA) -- Tsiang Yien-si, secretary general of the Kuomintang, said the most important mission of the nation now is to promote China's reunification under the three principles of the people. Speaking at the closing ceremony of member [words indistinct] meeting of the Overseas Chinese Affairs Commission [OCAC], Tsiang called on the attendees to encourage the overseas Chinese, students, and scholars in the countries of their residence to join the historic mission of mainland recovery by overthrowing the Peiping regime. He also asked those mainland compatriots who are now studying or working overseas to openly reject the Peiping regime and seek freedom in the West.

Tsiang stressed that facts have proved the three principles are suitable for solving China's problems and can serve as a guiding force in reunifying China. He then expressed his firm belief that freedom-loving Chinese at home and abroad will join hands to crush the Peiping regime's United Front tricks.

Meanwhile, during the past three days, the meeting had adopted many important resolutions which include:

-- expand local overseas Chinese organizations into regional bodies in all continents of the world so as to strengthen their functions;
-- promote Chinese language education and cultural activities in the overseas Chinese communities;
-- encourage overseas Chinese to make more investments in the future free trade zone;
-- cultivate more young overseas Chinese technicians in order to further develop industries in their countries of residence.

Also speaking at the closing ceremony, Mo Sung-nien, chairman of the OCAC, again urged the members to work hard in their respective posts for the cause of anti-communism and mainland recovery.

MOCKERY, DECEIT CHARGED AT U.S.-USSR ARMS TALKS

HK040820 Beijing RENMIN RIBAO in Chinese 4 Dec 82 p 6

["International Jottings" by Feng Xiong [1409 7160]: "Mockery and Deceit"]

[Text] The U.S.-Soviet strategic arms limitation talks in Geneva adjourned again on 30 November without making any substantial progress. The point at issue was that the United States complained that the purpose of the "overall freeze plan" worked out by the Soviet Union was to reduce U.S. nuclear status to inferiority. The Soviet Union maintained that the "zero plan" formulated by the United States was intended to induce the Soviet Union to carry out "unilateral disarmament." They accused each other of trying to obtain military superiority and refraining from taking any step on the path of disarmament.

The same day the U.S.-Soviet talks in Geneva were adjourned, Defense Ministers of the NATO states held a meeting of the Nuclear Planning Group. The communique of the meeting said that in face of the increasing Soviet threat, NATO should strengthen its military power, and that if no results were achieved in the Geneva talks NATO would deploy 572 U.S.-made modern nuclear missiles in Western Europe according to plan by the end of next year.

The Soviet Union was not willing to be outdone. It also announced that it would "seriously pay attention to the fact that its defense capability will be maintained at the necessary level to defend peace."

Both the United States and the Soviet Union oppose unilateral disarmament. However, under the signboard of "defending peace," they carry out limitless arms expansion unilaterally. The history of the past 40 years, since the League of Nations, has proved that the practice of carrying out disarmament by resorting to arms expansion is ridiculous. However, the superpowers today still take great pleasure in continuing to do such a foolish thing. This is a mockery and deceit to the people of various countries.

UN CALLS FOR STRENGTHENING PEACEKEEPING ROLE

OW040942 Beijing XINHUA in English 0738 GMT 4 Dec 82

[Text] United Nations, December 3 (XINHUA) -- The U.N. General Assembly today adopted a resolution calling for strengthening the role of the United Nations in maintaining international peace and security.

The resolution emphasizes that the imperative need to strengthen the U.N. role and effectiveness is indispensable for the maintenance of international peace and security, for the settlement of international disputes and crises by peaceful means, for the strengthening of international cooperation on the basis of sovereign equality and for the promotion of economic and social development and of human rights.

Deeply disturbed by the continuing deterioration of international relations, the General Assembly reaffirmed that genuine and stable peace and security in the world can be achieved, if the purposes and principles of the U.N. Charter and laws governing international relations are strictly adhered to.

The Assembly requested the Security Council to carry out the primary responsibility for the maintenance of international peace and security and called upon all organs of the United Nations to discharge fully and effectively their responsibilities in accordance with the U.N. Charter.

The Assembly asked the secretary-general to continue his efforts for strengthening the capacity of the United Nations to fulfil the effective and decisive role as envisaged for it in the Charter.

PRC PROPOSES NEW ECONOMIC ORDER AT FAO MEETING

OW040340 Beijing XINHUA in English 0245 GMT 4 Dec 82

[Text] Rome, December 3 (XINHUA) -- China has proposed that "promoting establishment of a new international economic order" be included in the report of the Council meeting of the U.N. Food and Agriculture Organization, which ended here today.

The 82nd session of the FAO Council, which opened on November 22 and attended by 49 member states, focused on the food and agricultural situation in 1982 and agricultural readjustment in the world.

During discussions on the report to the session yesterday, leader of the Chinese delegation Kong Candong made the said proposal. This matter is of primary importance, he said, because establishment of a new international economic order was written down in "declaration" and "action program" of the sixth U.N. General Assembly special session in 1974, and has been accepted by the international community.

In view of the growth of world economies in recent years, he added, it has become an urgent matter. And what is more, he said, global negotiations on the establishment of a new international economic order is under discussion at the current U.N. General Assembly session. This opportunity should be taken to include the problem of food and agriculture in such global negotiations, he noted.

The Chinese proposal was supported by Pakistan, Bangladesh, the Congo, Colombia, Yugoslavia, Philippines, Mexico and Panama.

The FAO Council has decided to include in the guiding principle of the Council's report the Chinese proposal "Taking the Establishment of a New International Economic Order as the Main Target of World-Wide Agricultural Readjustment." Report will be submitted to the 22nd FAO conference for discussion.

Western Media Hail Plan

OW032014 Beijing XINHUA in English 1842 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- The world's media has been commenting on Premier Zhao Ziyang's report on the Sixth Five-Year Plan at the fifth session of the fifth national congress, saying that the plan is so sound that it can be achieved.

Japan's KYODO NEWS SERVICE says that China's Sixth Five-Year Plan will continue the current policy of adjustment. The plan is a good one. Meanwhile, China tries to set a comprehensive economic basis for speedy growth by the end of this century, it says.

It adds that the planned investment in energy and transport, the present situation of which is regarded as a big obstacle to China's economic development, is a sensible 38.5 percent of the total volume of investment in capital construction. The news service also notes that the plan envisages an increase of 68 percent in expenditure on education, science, culture and public health service.

Japanese newspaper ASAHI SHIMBUN says that people think that the target of China's five-year plan can be reached.

MAINICHI SHIMBUN , another Japanese newspaper, held that the Sixth Five-Year Plan does not aim at too high a target but seeks more fruitful results.

The keynote of China's five-year plan is viable and stable, the Japanese newspaper YOMIRUI SHIMBUN" says.

The Sixth Five-Year Plan pays special attention to expansion in energy and transport industries and postpones new major construction projects. Success of the plan will offer bright prospects for the objective of quadrupling the output, says NIHON KEIZAI SHIMBUN, another Japanese newspaper.

The U.S. newspaper CHRISTIAN SCIENCE MONITOR says, the plan "sets ambitious but achievable goals" and "accelerates the pace of urban housing and increases expenditures on education, science and culture." "In this sense it is a people-oriented plan, contrasting with the previous plan, which emphasized consumer needs", the paper says.

GATT MEETING ADOPTS DECLARATION ON PROTECTIONISM

OW291756 Beijing XINHUA in English 1518 GMT 29 Nov 82

[Text] Geneva, November 29 (XINHUA) -- The ministerial meeting of the General Agreement on Tariffs and Trade (GATT) closed here early today after adopting a declaration calling for the removal of protectionism and the promotion of liberalization in international trade. The declaration says free trade remains the basic principle of the GATT.

As the multilateral trading system "is seriously endangered" by various protectionist pressures, it says, the GATT contracting parties commit themselves to reduce trade frictions, overcome protectionist pressures, avoid using export subsidies and quantitative trade restrictions which are inconsistent with GATT rules, and promote the liberalization and expansion of trade.

The declaration says the GATT signatories undertake to implement the GATT provisions concerning the developing countries with a view to "furthering the dynamic role of developing countries in international trade." They will "ensure special treatment for the least-developed countries, in the context of differential and more favorable treatment for developing countries, in order to ameliorate the grave economic situation of these countries," it says.

Analyzing the world economic situation the declaration says, "the deep and prolonged crisis of the world economy has severely depressed levels of production and trade."

"Many countries and particularly developing countries now face critical difficulties created by the combination of uncertain and limited access to external markets, declining external demand, a sharp fall in commodity prices and the high cost of borrowing," it adds.

The declaration also lays down specific regulations on the issues of agricultural trade, safeguards, dispute settlement, and trade in textiles and tropical products.

Speaking at a press conferences held at the end of the five-day ministeral meeting, both Allan MacEachen, chairman of the conference and Canadian deputy prime minister, and A. Dankel, GATT director general admitted that serious differences between various parties on agricultural trade and some other issues remain unsolved.

Apparently, they included the European Economic Community's refusal to make a compromise on the U.S. proposal for a reduction of EEC agricultural export subsidies. The proposal was backed by developing countries, whose agricultural export are threatened by the EEC's export subsidies.

GATT 'Failure' Noted

HK020408 Beijing RENMIN RIBAO in Chinese 1 Dec 82 p 7

["Short Commentary": "Why Did the Geneva Meeting Fail?"]

[Text] After heated bargaining, the GATT ministerial meeting in Geneva was closed hastily with the adoption of a general manifesto opposing protectionism and reiterating the principle of free trade. Since some countries participating in this meeting -- particularly EEC members whose trade volume accounts for 40 percent of the total world trade volume -- had reservations on certain points of this manifesto, the Geneva meeting actually failed to reach any substantial conclusion to facilitate trade liberalization.

The result of the meeting was nothing more than what people had expected. For 3 years the Western world has been suffering from the most serious postwar economic crisis. The struggle between different countries for markets has become a matter of life-and-death importance. No sooner had the United States and West European countries cooled down their trade war to restrict the import of Japanese cars and electronic products than the United States and Japan again erupted into disputes over the issue of exporting agricultural products. At the same time the EEC and the United States were engaged in heated arguments, respectively, on the iron and steel issue and the Soviet natural gas pipeline issue. While the United States and the members of EEC are jointly trying to restrict the import of textile products, shoes and toys from developing countries, seriously harming the latter, their scramble for the world agricultural products market has become white-hot. The main reason for the failure of this Geneva meeting was that the EEC vetoed the United States' request to put the problem of the former's subsidization of exported farm products on the agenda and thus deadlocked the meeting.

The failure of the GATT meeting in Geneva to reach any agreement once again shows the aggravation of the world economic crisis and the sharpening of the struggle between different countries to scramble for markets. However, if a worldwide trade war really breaks out, the consequence will be even more catastrophic. The meeting finally adopted a manifesto appealing for the elimination of protectionist measures and facilitation of free trade. This indicates that the different parties concerned will continue to seek ways to stop aggravating the international trade situation.

EEC EFFORTS TO OVERCOME PROBLEMS DISCUSSED

OW051940 Beijing XINHUA in English 1925 GMT 5 Dec 82

["Commentary: EEC's Joint Effort To Overcome Difficulties -- by Xie Linfeng" -- XINHUA headline]

[Text] Copenhagen, December 4 (XINHUA) -- The two-day semi-annual summit of the ten European Economic Community (EEC) countries ended here today after achieving better-than-expected results and reaching an agreement to make joint efforts to tide over the present mounting difficulties.

A report presented to the summit called attention to the serious and dragging economic crisis besetting the community. It said the gross domestic product of the 10 EEC countries increased only 0.3 percent in 1982. Unemployment reached 11 million, or an average unemployment rate of more than 10 percent. The report forecast an economic stagnation with even higher unemployment next year which, the EEC countries feared, would create explosive social problems.

To deal with this possibility, the summit concentrated its discussions on a strategy to coordinate measures in improving, first of all, the economic structures. It was decided to support all efforts in creating new jobs and in increasing investment. The summit participants agreed to defend and strengthen the community's internal market.

Differences within the community, such as the fishing allocation dispute between Britain and Denmark and France's import limits, were calmed down temporarily as a result of the restraint shown by the parties concerned.

On the international trade scene, the community is confronted with strong pressure and fierce competition from the U.S. and Japan. The U.S., shortly after cooling its attitude over import curbs on European steel and the Soviet-European gas pipeline sanction, now threatens to dump in the international market 3 billion dollars worth of daily products to counter the Community's farm exports. The growing Japanese industrial exports to the EEC countries have resulted in huge payments deficits of the Community.

To face up to the U.S. and Japanese challenges, it was urged at the summit meeting that industrial production be reorganized within Europe and its markets unified in order to beef up its competitive power. Cooperation in the financial field was also called for among the EEC members in order to reduce to the least extent the use of the U.S. dollar as a trading currency in the community.

Some participants called for actions against foreign technological domination and some others appealed for an agreement to be signed with Japan to make it curb its exports automatically.

The summit meeting also discussed the forthcoming visit to the United States by its executive president, Danish Prime Minister Poul Schluter, to examine the strained relations between the United States and the EEC. The meeting endorsed continued dialogue with the United States.

In short, the just-concluded summit meeting has demonstrated the will of the EEC nations to close ranks against outside nations and to join efforts to chart a way out of its current difficulties.

However, the current international economic situation and the protectionist trend within the community will make it hard for the EEC nations to coordinate their actions, and every step forward will be painstaking.

UN CALLS FOR SEA LAW RREATY RATIFICATION

OW041028 Beijing XINHUA in English 0849 GMT 4 Dec 82

[Text] United Nations, December 3 (XINHUA) -- The United Nations General Assembly in a resolution today called upon all states to sign and ratify at the earliest possible date the U.N. Convention on the Law of the Sea due to open for signature in Montego Bay, Jamaica, from December 6 to 10.

The 27-nation sponsored resolution was adopted by a vote of 135 to 2 (the United States and Turkey) with 8 abstentions.

The resolution says that the United Nations Assembly "appeals to the governments of all states to refrain from taking any action directed at undermining the convention or defeating its object and purpose."

The Assembly approved financing from the U.N.'s regular budget of a preparatory commission for the International Sea-bed Authority and for the International Tribunal for the Law of the Sea to be set up under the convention. It also approved the stationing of an adequate number of Secretariat staff in Jamaica for servicing the commission.

The United States and Turkey submitted an amendment asking the signatories to the convention to be responsible for the expense of the commission. Their amendment was defeated.

The Convention on the Law of the Sea was adopted by an overwhelming majority of states last April after eight years of negotiations. The United States, the leading opposer, argued that the rules on sea-bed mining laid down in the convention inhibit free enterprise, put too much financial burden on private companies and give too much privilege to the mining arm of the sea-bed authority. It has been lobbying its allies to reject the treaty. The U.S. attitude has aroused strong resentment among most of the developing countries.

PRESIDENT REAGAN'S LATIN AMERICAN TOUR ASSESSED

Reagan Stops in Colombia

OW041845 Beijing XINHUA in English 1831 GMT 4 Dec 82

[Text] Bogota, December 3 (XINHUA) -- Colombian President Belisario Betancourt told visiting U.S. President Ronald Reagan today that "peace can only be achieved through indiscriminate aid and broad dialogue rather than pressure and isolation."

Betancourt hosted a banquet for Reagan shortly after his arrival here for a five-hour visit on the second leg of his Latin American tour.

"In recent years," the Colombian president continued, "the American territory has been turned into a stage of struggle between the local people and outsiders and the Central American and Caribbean region a scene of duel for outside combatants." "We cannot remain indifferent and devote ourselves to the discussion of abstract questions within hemispheric organizations" as war flames are raging as a result of social injustice and external interference, Betancourt said.

He also made known Colombia's decision to join the Non-aligned Movement and criticized the United States for its protectionist policies against Latin American exports.

In response, President Reagan said that he came to Colombia to gain a better understanding and try to overcome the differences and issues existing between the two countries. Earlier, the U.S. President had described differences of opinion between two sovereign states as normal.

The U.S. President's short visit to Colombia was a center of attention since new President Betancourt has pursued a more independent external policy. The Spanish news agency EFE, in reporting the visit, said, "Widening divergence of views between the United States and Colombia has cast a shadow over today's Bogota meeting between Reagan and Betancourt."

During Reagan's visit, anti-U.S. demonstrations were reported from other cities in the country.

The U.S. President left here today for Costa Rica to continue his Latin American tour.

President Ends Visit

OW051623 Beijing XINHUA in English 1507 GMT 5 Dec 82

[Text] San Jose, December 5 (XINHUA) -- U.S. President Ronald Reagan ended his tour of four Latin American nations Saturday after talks with President Roberto Suazo Cordova of Honduras and President Efrain Rios Montt of Guatemala.

Reagan's five-day visit to Brazil, Colombia, Costa Rica and Honduras had been aimed at patching up differences between the United States and Latin American countries arising in the wake of the British-Argentine conflict over the Malvinas (Falkland) Islands and at easing Latin American complaints over U.S. assistance.

During his tour, President Reagan reaffirmed his country's commitment to the Inter-American Mutual Assistance Treaty and the inter-American collective security system. He also promised to increase economic credits to Brazil, Costa Rica and other Latin American states. Reagan time and again expressed his deep concern over the situation in Central America, saying U.S. assistance to the region would increase.

The U.S. President arrived in Honduras Saturday from Costa Rica where he held talks with President Luis Alberto Monge on the situation in Central America and the Caribbean region.

Commenting on Reagan's visit, observers said it had got things moving in the improvement of U.S.-Latin American ties but sharp political and economic differences could not be eliminated in the foresseable future.

XINHUA 'Roundup' on Visit

OW051921 Beijing XINHUA in English 1850 GMT 5 Dec 82

["Roundup: U.S. President Winds Up Latin American Tour" -- XINHUA headline]

[Text] Beijing, December 5 (XINHUA) -- U.S. President Ronald Reagan yesterday winded up his first Latin American tour after he took office despite of his repeated assertion of the "traditional" U.S. relations with countries in the region, some differences still left unsolved.

In his five-day Latin American tour which carried him to four countries, Reagan met separately with heads of six countries to discuss how to strengthen political and economic cooperation between the United States and these countries. They also exchanged views on other problems.

It is known to all that since the Malvinas (Falklands) crisis, the United States, because of its taking side with Britain, has caused a distrust of Washington by many Latin American countries. The distrust is becoming increasingly serious.

Sensing a growing threat to the political and economic interests of the United States in the region stemmed from this distrust, the U.S. Government urgently hoped that its relations with Latin American countries could be mended as soon as possible by Reagan's visit. Therefore during his tour, Reagan repeatedly declared that his government would strictly observe the Inter-American Mutual Assistance Treaty and maintain the inter-American collective security. He also expressed the hope that the United States would like to join the Latin American countries in seeking to solve disputes in the region. Obviously, his mission is to persuade the Latin American countries out of their distrust in the United States and to arouse once again their concern for the inter-American system so as to keep the inherent U.S. influence in the region.

During his visit, Reagan expressed appreciation of the region's democratization process and time and again demanded Latin American countries pool their efforts in dealing with challenges from outside forces. This is clearly directed against the Soviet and Cuban expansion in the region, and Central America in particular,

When meeting separately with leaders of four Central American countries, he showed extreme concern over the turbulent situation in Central America and the guerrilla activities and border clashes in some countries. He reiterated his government's support for the "democratic political systems" in El Salvador and Honduras and condemned the intention of external forces to impose a "non-democratic political system" upon the region. In order to help deal with the anti-government guerrillas now active in the region, Reagan promised to increase economic and military aid to El Salvador and Guatemala.

During the visit, Reagan adopted a posture of trying to enhance economic cooperation with Latin American nations. Most of Latin American nations are facing grave economic difficulties as a result of a worldwide economic recession. Many of them are bitter over the United States' high interest rates and its protectionist measures in trade.

During his visit in Brazil, Reagan announced the decision of rendering 1,230 million U.S. dollars in credit to that country and promised to give an impetus to the negotiations between the International Monetary Fund and the Brazilian Government to grant credits to that country to overcome its economic crisis. Reagan also announced that the United States will ease restrictions on sugar exports to the United States by Latin American nations. He also promised more aid for Costa Rica.

It is believed that Reagan's Latin American tour has eased to some extent economic and political contradictions between the U.S. and some Latin American nations. But the basic differences and contradictions between them defy an easy solution.

During Reagan's visit to Colombia, the Colombian president, in the presence of Reagan, criticized the U.S. policy toward Central America, disapproved U.S. support for Britain during the Malvinas conflict and the U.S. protectionist measures in bilateral trade. The Colombian president also announced his country's decision to join the Non-aligned Movement.

The Costa Rican president made clear that his country will "remain neutral" and "will never serve as an instrument for superpowers."

Reagan's visit to Brazil and Colombia brought anti-American demonstrations there.

Other Latin American countries, Venezuela and Mexico for example, expressed displeasure too. They thought that Reagan's policy to "isolate" Nicaragua would not contribute to the stability in that region. Nicaragua said the U.S. President's tour was aimed, in fact, at supporting "aggression" against it.

RENMIN RIBAO Commentary

HK060740 Beijing RENMIN RIBAO in Chinese 6 Dec 82 p 6

["Short Commentary": "Reagan's Tour of Four Latin American Countries"]

[Text] From 30 November to 4 December, U.S. President Reagan visited four Latin American countries, where he met six national leaders. Reagan styled this, his first visit to Latin America since becoming President, "a trip to promote democracy and peace."

It is not hard to see that the main aim of Reagan's trip was to demonstrate the U.S. Government's attention to the Latin American region, consolidate its "backyard," and strengthen U.S. influence in Latin America.

The United States openly favored Britain and took sanctions against Argentina in the Malvinas conflict. This caused discontent among the Latin American countries and brought U.S. prestige to a low point among the peoples of these countries. U.S. moves in trade protectionism and in shifting the economic crisis onto others have also caused all kinds of difficulties for Latin American countries, with the result that the political situation in certain countries has become still more turbulent and centrifugal tendencies against the United States have developed further.

What worries the United States even more is that political and economic crises continually occur in the Latin American region, especially in Central America. All kinds of complex contradictions are sharpening in certain countries between the people and military dictatorships and between military dictatorships and forces demanding democratic reform, between the governments and peoples of various countries on the one hand and superpower hegemonism on the other, and also between the countries of Latin America. This unstable situation provides opportunities for external penetration and control and threatens U.S. interests in its "backyard." In these circumstances, the U.S. Government needs to readjust its Latin American policies in order to stabilize the situation in its "backyard" and preserve its important and strategic interests in Latin America.

This presidential tour of Latin America may ease the tension between the United States and the Latin American countries to some extent, but cannot solve the basic contradictions between the United States and Latin America, which is part of the Third World. The tension in the Central American region in particular has profound social and economic roots. So long at the United States fails to change its Latin American policies or to respect the national and democratic aspirations of the peoples of Latin America, it is impossible for the situation in the Central American region to stabilize. Hence, the influence and results of President Reagan's four-nation Latin American tour may be limited.

U.S. DEFENSE SECRETARY VISITING YUGOSLAVIA

OW051602 Beijing XINHUA in English 1919 GMT 4 Dec 82

[Text] Belgrade, December 4 (XINHUA) -- Petar Stambolic, president of the presidency of the Socialist Federal Republic of Yugoslavia, discussed here today with the U.S. Secretary of Defence Caspar W. Weinberger, the urgent problems in international affairs and the ways to promote the relations between the two countries, according to a TANJUG report.

During their meeting, Weinberger handed over a letter from U.S. President Ronald Reagan.

Weinberger arrived here yesterday for a visit at the invitation of the Yugoslav Federal Secretary for National Defence Branko Mamula.

Mamula held talks with Weinberger yesterday evening on the relations between the two countries and other urgent problems of common interest.

U.S. FINANCIAL AID TO ISRAEL DENOUNCED

HK060235 Beijing RENMIN RIBAO in Chinese 5 Dec 82 p 6

["International Jottings" by Guo Zhang [0948 4545]: "Mutual Understanding"]

[Text] Completely disregarding repeated opposition from the U.S. Government, Israeli authorities continuously have constructed Jewish settlements on the West Bank

of the Jordan River which they have occupied in their lust for expansion. What is the reason for this?

In his recent remarks, U.S. Secretary of State George Shultz said that the United States will not relate its economic aid to Israel with the latter's expansion of settlements on the West Bank. He emphasized that "we have made this very clear from the very beginning," and that "we have never acted this way."

What does this mean? As a matter of fact, the amount of U.S. economic aid to Israel equals the money Israel has spent on building the settlements. In other words, Israel, which is now in a financial predicament, is using U.S. aid to set up the settlements. So, by making these remarks, Shultz simply meant to tell Israel: Feel free to do whatever you like. We will not force you to stop building the settlements by suspending our aid. No wonder Israel is becoming more and more aggressive in building the settlements. This is so-called "mutual understanding."

'TRAGIC EXPERIENCE' OF IMMIGRANTS IN U.S. SCORED

HK031251 Beijing GUANGMING RIBAO in Chinese 24 Nov 82 p 4

[Article by Xu Binghe [1776 3521 0735]: "The Tragic Experience of Foreign Immigrants in the United States"]

[Text] The United States is facing another new flood of immigrants. Every year about 1 million people enter the United States, most of them Latin Americans and Asians. They dream of getting good jobs and living comfortably in the United States. However, actual conditions are just the opposite of what they had wished for. With the exception of a small number of doctors, artists and scientists who can earn higher salaries because of their educational background and specialized skills, most of the immigrants are exploited and oppressed and suffer from poverty. They live in disillusionment and agony.

Immigrants First Entering Are Blackmailed and Exploited

Every year about half of the 1 million immigrants who enter the United States are illegal immigrants. To avoid border patrols, they are helped by smugglers to steal across the border into the United States. To do so, they pay a lot of money to the smugglers. According to a report by "U.S. NEWS AND WORLD REPORT" on 13 September this year, an illegal immigrant had to pay $150 to $200 in order to get to Los Angeles from the border, $4,000 to come from Central America to the United States and $400 to $500 to go from El Paso to Chicago. Therefore smuggling illegal immigrants -- just like trafficking in narcotic drugs -- has increasingly become a money-making business. For instance, a big smuggling syndicate was uncovered this year. The syndicate employed at least 40 drivers and some secret agents and rented several safe houses. The syndicate smuggled aliens to the U.S. Midwest and earned $15 million a year.

Slave Labor in Farms

Although the United States has enacted laws to protect immigrants over the past 20 years, many workers who formerly were immigrants are still homeless on the fertile lands of the United States. They are maltreated and live miserable lives on farms.

In vegetable and tobacco farms located in the scorchingly hot eastern part of South and North Carolina, more than 27,000 immigrants are engaged in forced labor. When these laborers work in the field, they have no fresh water to drink or even clean water to wash their insecticide-stained hands.

According to a report by "U.S. NEWS & WORLD REPORT" on 9 August this year (Dick Hardeen) aged 33, has worked on a farm in South Carolina for 7 years. His hands have been burned by insecticides. He said that once he had signed the employment contract, his boss could do anything he liked to with him. He would whip him bitterly or bully him. (Dick Hardeen) did not care to say no.

(Hardeen), severely exploited, decided to run away. All he owned after 7 years' hard work was $1.65 and several knifing scars on his face.

"Sweatshop" Exploitation

In Union City, New Jersey, a 21-year-old girl from El Salvador named Maria lives with her two brothers and her sick father. This girl, who formerly was an illegal immigrant, was compelled to work in a "sweatshop" (an underground workshop which brutally exploits workers) in order to escape arrest and deportation and earn money to pay her father's medical expenses. She earns only 8 cents for sewing a pair of lady's overalls. Every day she works 12 to 14 hours. When the boss of the workshop pays her weekly wages of $65 he extorts $10 from her.

In a number of big cities in the United States, many illegal immigrants work as dressmakers in "sweatshops," odd hands in restaurants, coolies in warehouses and so forth. Such kind of lowpayed jobs do not require special skills. U.S. officials in California estimate that more than 70 percent of nontechnical work in certain areas of the state is done by aliens. They work under extremely bad conditions and lead a miserable life.

"Lenience" of the Exploiters

The fact that several million people in the United States are frequently unemployed shows that the United States' labor force is not lacking. Such being the case, why should the United States be so "lenient" in allowing so many illegal immigrants to to enter the country? According to material provided by some U.S. magazines there are mainly two reasons for this: 1) Illegal immigrants are a far cheaper labor force than those unemployed American workers. A worker without a work permit said: "When the boss's business is good, he wants me to work day and night without giving me any overtime pay." There are about 2 million illegal immigrants in California, who are a cheap labor force exploited by American capitalists; 2) Those illegal immigrants benefit federal and state tax revenues. In order to get a job, illegal immigrants have to buy fake security cards and birth certificates. Although their certificates are fake, they have to pay income tax and social security and medical insurance fees. Due to their social status, those illegal immigrants are not able to derive any benefits from these social amenities. It is not strange at all that the U.S. monopolist bourgeoisie and their government adopt a "lenient" attitude toward most illegal immigrants and wink at their illegal entry.

The miserable sufferings of a great number of illegal immigrants in the United States show that under the capitalist system, although U.S. factories employ advanced techniques, the land is fertile and the country is rich in material resources, all these are mastered by a monopolist bourgeoisie and big plantation owners. Just like other American workers, most foreign immigrants and laborers are not allowed to enjoy the wealth they have produced. They can only be brutally exploited and oppressed.

MEDIA REACT TO NATO MISSILE DEPLOYMENT PLANS

OW040912 Beijing XINHUA in English 0707 GMT 4 Dec 82

[Text] Moscow, December 3 (XINHUA) -- Soviet mass media have for two days accused the North Atlantic Treaty Organization (NATO) of reaffirming plans to deploy new American missiles in Western Europe beginning December 1983.

U.S. President Ronald Reagan announced in August 1981 a plan to produce and later deploy medium-range missiles in Western Europe to counter the 300-plus SS-20 intermediate-range rockets deployed in Eastern Europe.

The Brussels meeting of NATO defense ministers this week decided to deploy 572 American Pershing-II and cruise missiles and to increase conventional arms spending as well.

The Soviet Government newspaper IZVESTIYA said in a commentary that NATO's decision is a "dangerous plan," which will aggravate tension in the world.

The Soviet party paper PRAVDA wrote that Washington intended to upset the current strategic balance between the Warsaw Treaty and NATO, to gain a military superiority and prepare a European war far away from America.

Soviet news agency TASS warned Thursday that NATO's plan can only lead to the increasing danger of a European military confrontation, and can never decrease the danger of this confrontation being turned into a nuclear war.

Last month, the semi-official Societ news agency NOVOSTI said in a televised statement to Western news agencies in Moscow that Kremlin is ready to adopt a "launch on warning" military posture if NATO's plan goes ahead.

The short flight time of the Euro-missiles to reach the Soviet border from their West European launching sites rules out the possibility of preventing a conflict by non-military means, NOVOSTI said. Faced with an infinitesimal warning time, the agency continued, the only possibility is a nuclear retaliatory strike and there is no other alternative.

SOVIET MISSILES REPORTEDLY INSTALLED IN KABUL

HK060357 Beijing RENMIN RIBAO in Chinese 5 Dec 82 p 6

[Report by Xiang Guang [6272 1342]: "Strange Use of the SAM-6"]

[Text] According to reports, the Soviet Union has recently installed SAM-6 missiles in Kabul, for the express purpose of "defending against possible air attacks." This would appear to be looking for trouble. Where would the Afghan guerrillas get planes to fly to Kabul? Clearly, it is not likely that the Soviet invading forces really intend to use the missiles against the guerrillas, which would be like using antiaircraft guns to shoot sparrows. To date, the only foreign planes to enter Afghan airspace have been Soviet, and the SAM-6 missiles are hardly going to be used against them.

So why transport the missiles to Kabul? The only explanation is that they serve to authenticate the threat of "outside invasion," thereby justifying the Soviet invasion of Afghanistan. Perhaps one day the Soviet Union, to prove the existence of "outside invaders," will bring SAM-6 missiles to the negotiating table to find a "political solution."

SOVIET NAVAL ATTACHE EXPELLED FROM BRITAIN

OW060555 Beijing XINHUA in English 1621 GMT 3 Dec 82

[Text] London, December 3 (XINHUA) -- A Soviet naval attache has been ordered to leave Britain because of (?illegal) activities, the British Foreign Office announced here today.

In a brief statement issued this morning, the Foreign Office said that Britain has requested the Soviet Union to recall within a week Captain Anatoliy Zotov, naval attache at the Soviet Embassy in London. "There was clear evidence that he had been engaging in activities incompatible with his official status," the statement said. (?The British) last expelled on the (same charge) Victor Lazin, a second secretary at the Soviet Embassy in August, 1981.

Britain has recently been beset with a number of security scandals in which several people were tried and imprisoned for spying for the Soviet Union.

ANDROPOV MEETS KING HUSAYN, ARAB DELEGATION

OW030830 Beijing XINHUA in English 0712 GMT 3 Dec 82

[Text] Moscow, December 2 (XINHUA) -- Soviet leader Yuriy Andropov met King Husayn of Jordan, who arrived here today at the head of the delegation of the "committee of seven" of the Arab League, to discuss bilateral relations and the Middle East situation.

The delegation comprises the foreign ministers of Syria, Saudi Arabia, Morocco, Jordan, Tunisia and Algeria, and member of the Executive Committee of the Palestine Liberation Organization Mahmud 'Abbas. It was set up by the Arab summit for contacts with the leaders of the permanent member countries of the United Nations Security Council on question of settling the Middle East conflict. The Arab League Secretary-General Chedli Klibi came with the delegation.

Soviet Foreign Minister Andrey Gromyko met today 'Abd al-Halim Khaddam, member of the delegation and foreign minister of Syria, and exchanged views with him on strengthening bilateral relations on the basis of the Soviet-Syrian treaty of friendship and cooperation.

TIKHONOV MEETS FRENCH RESEARCH MINISTER 3 DEC

OW030834 Beijing XINHUA in English 0701 GMT 3 Dec 82

[Text] Moscow, December 2 (XINHUA) -- Soviet Chairman of the Council of Ministers Nikolay Tikhonov met here today with Jean-Pierre Chevenement, French minister of state for research and technology, and exchanged views with him on bilateral relations and certain urgent international questions, according to a TASS report. Both sides re-affirmed their hope to develop Soviet-French political dialogue and cooperation in trade, economy, science, technology and culture.

Another report said that Soviet Minister of Foreign Trade Nikolay Patolichev yesterday discussed with a group of prominent Italian industrialists and commercial figures on the continued development of trade and economic relations between the two countries.

PRAVDA REPORTS ON MOSCOW AGRICULTURE MEETING

OW011435 Beijing XINHUA Domestic Service in Chinese 1701 GMT 27 Nov 82

[Text] Moscow, 27 Nov (XINHUA) -- According to a PRAVDA report today, Gorbachev, member of the Politburo and secretary of the CPSU Central Committee, on 26 November presided over a meeting of various Soviet socialist republics and various oblast party committees. The meeting discussed the question of implementing the "Food Program" adopted last May by the plenary session of the CPSU Central Committee.

As stated in the report, the meeting decided on measures to raise the purchase prices of agricultural products and to give price subsidies to low-profit and deficit-suffering units, beginning January 1983. The meeting also studied how to give full play to the role of various rayons in implementing the program. In addition, it urged the departments concerned to take good care of livestock during the winter, make timely preparations for spring farming and meet by all means the 1983 production and procurement targets of grain, meat, milk and other agricultural products.

Agriculture has always been a weak sector in the Soviet national economy. Especially since 1979, Soviet agriculture has been chracterized by successive poor harvests, which have had a direct, adverse effect on the growth of the national economy and on the food supply for the people. Because of this, the plenary session of the CPSU Central Committee last May adopted a "Food Program" with a determination to take such measures as raising the purchase prices of agricultural products and improving the management of agricultural departments. However, over the past few months, since the "Food Program" was promulgated, it has not worked satisfactorily. This year the Soviet Union has again suffered a poor harvest, and, as a result, the shortage of supplies on the market, in particular food supplies, has become increasingly serious. The people are quite discontented with this.

In view of these circumstances, Soviet leader Andropov stressed at a recent plenary session of the CPSU Central Committee: "Our plan is centered on taking measures in the interest of implementing the "Food Program," and "the work of fulfilling the "Food Program" cannot be delayed." Moreover, he urged the leadership at all levels to hold meetings to discuss how the "Food Program" is being carried out. The above-mentioned meeting, attended by secretaries in charge of agriculture of the party central committees of the Soviet socialist republics and various oblast party committees, was such a meeting held in the wake of Andropov's remarks.

TURKEY'S TURKMEN CITED ON USSR RELATIONS

OW041619 Beijing XINHUA in English 1611 GMT 4 Dec 82

[Text] Ankara, December 4 (XINHUA) -- Turkish Foreign Minister Ilter Turkmen said here yesterday afternoon "the establishment of a climate of understanding between the two countries and exchanges of views on high levels would serve the interests of both countries." He made the statement at the Ankara airport upon his return from a five-day official visit to Soviet Union.

"Though Turkey is a NATO member, she definitely wants to maintain her relations with her northern neighbor in a climate of mutual trust and constructive cooperation." Informed sources here said his visit marked the improvement of Turkish-Soviet relations following several years of stagnation. They said that during the talks in Moscow, the Soviets said they want both countries to cooperate in both the political and economic fields, but the Turks preferred further cooperation in economic and trade areas.

RENMIN RIBAO RAPS VIETNAM'S XISHA ISLANDS CLAIM

HK060807 Beijing RENMIN RIBAO in Chinese 6 Dec 82 p 6

["International Jottings" by You Jun [1635 6511]: "A Reflection of Other Things"]

[Text] The Vietnamese magazine TAP CHI CONG SAN recently carried a slanderous article saying that "the nature of Chinese expansionist hegemonism has not changed," citing as proof the fact that "Chinese troops are still occupying Vietnam's Hoang Sa Islands."

The Le Duan clique calls China's Xisha Islands the Hoang Sa Islands, and also resorts to sophistry in insisting that the Xishas are Vietnamese. However, everyone in the world knows that the Xishas have been Chinese since ancient times. This is even affirmed by a formal, official government document signed by the premier of the Vietnamese Government. If the Le Duan clique feels there is still insufficient proof, then there is no harm in providing them with some supplementary material: "On 9 September 1962, another U-2 aircraft invaded Chinese airspace over the Xisha Islands, Guangxi, and was shot down by the Liberation Army. This caused panic in America." If they do not believe it, they should refer to NHAN DAN of 13 September 1962.

Of course, since the Le Duan clique has not awakened from its hegemonist dreams and keeps breaking into anti-China hysterics, there is no point in providing any amount of proof. This is just an exmple, just a reflection of other things.

DAILY VIEWS HANOI'S DENIAL OF OFFENSIVE PLANS

HK020817 Beijing RENMIN RIBAO in Chinese 2 Dec 82 p 6

["International Jottings" by He Jian [0149 7035]: "Who's Lying?"]

[Text] The Hanoi propaganda machine has launched a vigorous counterattack against international opinion for exposing the preparations of the Vietnamese Army of aggression against Kampuchea to launch a dry-season offensive, describing this as "a monstrous lie." Who, in fact, is lying? The facts are the touchstone for distinguishing truth from falsehood. In the past few months Vietnam has reinforced its army in Kampuchea and sent in large numbers of Soviet-built tanks and guns. Several tens of thousands of Vietnamese troops are concentrated in western Kampuchea, where they are sharpening their knives. A few days ago, the Vietnamese Army dispatched 5,000 troops and used heavy weapons in a strong attack on Democratic Kampuchean forces in the Pailin area. How can the "rumorscotching" statements of the Vietnamese authorities conceal the smoke and flames on the Kampuchea-Thai border?

The Vietnamese authorities are used to playing the trick of reversing right and wrong and acting like a thief crying "stop thief." People can discern a rule from observing Vietnam's words and deeds in these past few years: The thing that they most vigorously deny is the thing that they are most anxious to accomplish. The "rumorscotching" of the Hanoi propaganda machine is the latest example of this.

Thai Sources on Preparations

OW301211 Beijing XINHUA in English 0751 GMT 30 Nov 82

[Text] Bangkok, November 30 (XINHUA) -- A Vietnamese infantry battalion established a base over the weekend at Ban Nimit on Highway Five in western Kampuchea, just 12 kilometres from the Thai-Kampuchean border, today's BANGKOK POST quoted a Thai field military source as saying yesterday.

The sources said that the battalion was made up of North Vietnamese troops from the Ninth Division's base in Sisophon District of Battambang and that they were equipped with two 130mm heavy field guns and a number of T-54 and PT-76 tanks. He added that the Vietnamese-led Heng Samrin troops had sent military engineers to upgrade and fortify Highway 502 in preparation for a dry season offensive against the Democratic Kampuchean bases at Phnom Makhuen.

Meanwhile, Maj-Gen Piboon Panuwat, commander of the Thai Army's Second Division stationed at the eastern border, said yesterday that the army was building bunkers and supplying sandbags to protect villages along the border. He said Thai troops had reinforced the area near Ban Nong Ian, where several Vietnamese shells had landed, in order to guard against any incursions into Thailand by foreign forces.

Another Thai military source predicted that the Heng Samrin troops might shortly try to attack the resistance forces led by Son Sann in northwest Kampuchea, opposite the Thai villages of Ban Sangae, Nong Samed and Ban Nong Chan, he added.

DK ASKS CONTINUED CONDEMNATION OF SRV OCCUPATION

OW301203 Beijing XINHUA in English 0722 GMT 30 Nov 82

[Text] Beijing, November 30 (XINHUA) -- Democratic Kampuchea today appealed to the international community to continue to condemn Vietnam's occupation of Kampuchea. Pointing out the hypocritical nature of the "flexibility" Hanoi has made believe to adopt in solving the Kampuchea problem, Radio Democratic Kampuchea said in a commentary today that Hanoi's aim is to split the Coalition Government of Democratic Kampuchea and to dissolve the efforts of the international community in support of the just struggle of the Kampuchean people.

Actually, since the end of the rainy season, Vietnamese troops have been massed along the Kampuchean-Thai border in preparation for a new dry-season offensive, said the commentary. This showed that Hanoi has no intention of withdrawing its troops from Kampuchea, it added.

Calling on the international community to maintain vigilance against Vietnam's scheme, the commentary said Democratic Kampuchea hoped that the international community would continue the diplomatic, political and economic pressure on Vietnam so as to force it to pull its troops out of Kampuchea.

VODK WELCOMES UN ACTION ON SRV 'CRIME'

OW051646 Beijing XINHUA in English 1602 GMT 5 Dec 82

[Text] Beijing, December 5 (XINHUA) -- Democratic Kampuchea today welcomed the adoption by the 37th U.N. General Assembly of a resolution to investigate into Vietnam's crime of using chemical weapons in Kampuchea.

This was carried in a Radio Democratic Kampuchea commentary today.

The resolution was adopted by the political committee of the 37th U.N. General Assembly to investigate into activities in violation of the 1925 Geneva "Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare."

The Radio Democratic Kampuchea commentary said that the adoption of the resolution showed grave concern of the international community over the use of chemical weapons by the Soviet Union and Vietnam. It also showed the strength of the world's peace-loving and justice-upholding countries in fighting against the Soviet and Vietnamese aggression and expansion, safeguarding international law and defending world peace, it said.

The commentary pointed out that Vietnam began using chemical poisons in the Democratic Kampuchea-controlled area in 1979 and are still wantonly using them to slaughter people in some cities and towns under its occupation. The Soviet Union and Vietnam also used chemical and bacteriological weapons in Afghanistan and Laos respectively, it said. They are now using such weapons in a big way to save themselves from defeats, it said.

The commentary said that the people and government of Democratic Kampuchea support the U.N. resolution and hope that the international community will stop the chemical warfare launched by the Soviet Union and Vietnam in Afghanistan and Kampuchea.

DK DEMANDS RESTORATION OF NONALIGNED SEAT

OW252041 Beijing XINHUA in English 1831 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- Democratic Kampuchea today demanded that the seventh non-aligned summit conference restore its legitimate rights in the non-aligned movement.

The demand was set forth in a commentary broadcast by Radio Democratic Kampuchea.

The commentary pointed out that as a legitimate member of the non-aligned movement, Democratic Kampuchea was illegally deprived of its seat by the Cuban leader who chaired the sixth non-aligned summit conference held in Cuba in 1979, in defiance of opposition from most of the member states.

It said Vietnam and its followers are conspiring by all means to have the Heng Samrin regime represented in the forthcoming seventh non-aligned summit conference in New Delhi with the aim of obstructing the restoration of Democratic Kampuchea's legitimate rights.

However, it said, Democratic Kampuchea which has, in the past four years, won overwhelming support in the United Nations is the sole legitimate representative of Kampuchea. If Heng Samrin is allowed to attend the summit, it would mean recognition of the fait accompli created by Vietnamese invasion of Kampuchea, it said.

The commentary appealed to the non-aligned countries to defeat the schemes of Vietnam and its followers and help restore Democratic Kampuchea's legitimate seat in the movement.

KHIEU SAMPHAN HAILS SUCCESS OF COALITION GOVERNMENT

OW241200 Beijing XINHUA in English 1146 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Vice-President of Democratic Kampuchea Khieu Samphan has said that the success achieved by the coalition government in the United Nations was an inspiration to the Kampuchean people to win still greater victories over the Vietnamese aggressors, Radio Democratic Kampuchea reported today.

Khieu Samphan made the remarks in an interview with the radio last Sunday on the acheivements made by the coalition government since its founding last July.

He said that the success made in the United Nations General Assembly session was due to the good cooperation of the three parties of the coalition, particularly the consultations among the three leaders on various questions.

Khieu Samphan said that his side abides by the Kuala Lumpur declaration in the interest of the united struggle against Vietnamese aggression and will never do anything detrimental to that cause.

He said that they would continue to uphold the sacred tripartite principle, with all three parties taking part in any important activity. In this way, the coalition government is sure to win victory after victory until complete success in the struggle against Vietnamese aggression.

LAO NATIONAL DAY ANNIVERSARY CELEBRATED

OW030908 Beijing XINHUA in English 0812 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- Over one thousand people met in Vientiane yesterday morning to celebrate the 7th anniversary of the founding of the Lao People's Democratic Republic, according to a KPL report.

Among those present at the rostrum were Nouhak Phoumsavan, member of the Political Bureau of the Central Committee of the Lao People's Revolutionary Party and first vice-chairman of the Council of Ministers; Phoumi Vongvichit, Political Bureau member of the party and vice-chairman of the Council of Ministers; Khamsouk Keola, vice-president and secretary general of the People's Supreme Assembly, and Souvanna Phouma, government advisor. In his speech at the meeting, Thongmavy Thip Anmachanh, acting chairman of the Vientiane Administrative Committee, reported on Laos' achievements in the First Five-Year Plan of the state.

PRC Sends Greetings

BK021230 Beijing in Lao to Laos 1230 GMT 1 Dec 82

[Text] Today the National People's Congress Standing Committee and the PRC Government sent a message to the Supreme People's Council [SPC] and the Government of the Lao People's Democratic Republic [LPDR], greeting latter on the occasion of the seventh anniversary of Lao National Day.

The message reads: On the occasion of the seventh founding anniversary of the LPDR, we would like to extend our wholehearted greetings to the SPC, the LPDR Government and the Lao people. We wish the Lao people more success in their cause of national construction.

The message continues: China and Laos are neighboring, Third World countries which have maintained a history of time-honored cooperation and friendly visits to each other. The Chinese Government and people sincerely hope to see the Chinese-Lao relations of friendship restored and developed [hai mitsamphan chong dai hap kan fuenfou le kha-gnai tua ok] on the basis of the five principles of peaceful coexistence, and are pleased to make active efforts [le yindi pha gna gnam yang kha gnan khan kheng] for this.

ZHAO ZIYANG TO VISIT 10 AFRICAN COUNTRIES

OW041639 Beijing XINHUA in English 1559 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- Premier Zhao Ziyang told diplomatic envoys to China from 10 African countries here this afternoon that his coming trip to Africa is an important diplomatic step taken by the Chinese Government following the 12th National Congress of the Communist Party of China. "It shows that China attaches great importance to developing its friendship and cooperation with African and Third World countries," Zhao said.

The 10 African countries that Zhao is going to visit are Egypt, Algeria, Morocco, Guinea, Zaire, the Congo, Zambia, Zimbabwe, Tanzania and Kenya.

Zhao said that the 12th National Congress of the C.P.C. reiterated China's foreign policy with China's unity and cooperation with the Third World countries as its basic point. The objective of his coming visit to Africa is to learn from African countries and their peoples, and to promote understanding, friendship and cooperation, he said.

Zhao said he is expecting to exchange views with leaders of the 10 countries on further development of friendship and cooperation between China and these African countries as well as on issues of common concern. He said he also hopes to exchange views with these countries on how to conduct economic cooperation with African countries so as to put sound political relations on a solid economic basis. Zhao said he is convinced that prospects are great for developing economic cooperation between China and other Third World countries.

On behalf of the diplomatic envoys present, Abderrahim Harkett, Moroccan ambassador to China, said that the premier's coming visit to Africa shows that the Chinese people and the government attach great importance to the development of their friendly relations with Africa. He said he believes that Premier Zhao's visit will be successful, and the friendly cooperation between China and African countries will surely be strengthened.

Zhao said that his proposal to visit these 10 African countries was welcomed by leaders and governments of these countries "who have made very nice arrangements." He said this shows the friendly sentiment of these countries towards China. He asked the diplomatic envoys to convey his thanks and regards to their leaders.

The other nine countries' diplomatic envoys to China present were: Zairian Ambassador Tuma-Waku Dia Bazika; Zambian Ambassador W.R. Mwondela; Kenyan Ambassador J.S. Odanga; Congolese Ambassador Matoko Albert; Guinean Ambassador Thierno Habib Diallo; Zimbabwean Ambassador Gabriel Phineas; Algerian Ambassador Abdelkarim Ghraieb; Egyptian Ambassador 'Umar al-Aziz Sharaf; and Tanzanian Charge d'Affaires Ad Interim S.A. Mbenna.

Present at the meeting were State Councillor Gu Mu; Foreign Minister Wu Xueqian; and Vice-Foreign Ministers Gong Dafei and Wen Yezhan.

Visit To Begin 20 Dec

OW031043 Tokyo KYODO in English 1008 GMT 3 Dec 82

[Text] Beijing Nov 3 KYODO -- Chinese Premier Zhao Ziyang will begin a month-long tour of African countries on December 20 following the current National People's Congress (parliament) as part of China's effort to enhance its relations with the Third World, diplomatic sources here disclosed Friday. Chinese authorities have not yet revealed what nations Zhao will visit but he is expected to tour about 10 nations, including Egypt, Algeria, Morocco, Zaire, Tanzania, Zambia and Guinea.

This will be Zhao's seventh overseas trip since he became premier in September 1980. He will become China's first premier to visit Africa in 17 years. The late Premier Zhou Enlai made an official visit to Algeria in 1965.

Through Zhao's African tour, China apparently hopes to demonstrate its close relations with African countries over which the United States and the Soviet Union have been competing for influence. Another aim will probably be the promotion of Chinese exports of both technology and products to African nations through closer economic cooperation between China and those countries.

HUSAYN, ARAB LEAGUE DELEGATION ARRIVE 5 DEC

OW051527 Beijing XINHUA in English 1511 GMT 5 Dec 82

[Text] Beijing, December 5 (XINHUA) -- A delegation of the seven-member committee of the Arab League led by King Husayn Ibn Talal of Jordan arrived here this evening.

The committee of Arab League was formed under a resolution passed at the 12th summit meeting of Arab states in September. The meeting also decided to send delegations to visit the five countries who are permanent members of the Security Council of the United Nations to explain the stand of Arab states on the solution of the Middle East problem.

Members of the delegation include Abd al-Halim Khaddam, Syrian vice-premier and minister of foreign affairs; Sa'ud Ibn Faysal Al Sa'ud, minister of foreign affairs of Saudi Arabia; M'Hamed Boucetta, Moroccan minister of state in charge of foreign affairs; Marwan al-Qasim, Jordanian minister of foreign affairs; Beji Caid es-Sebsi, Tunisian minister for foreign affairs; Ahmed Taleb Ibrahimi, Algerian minister of foreign affairs; Mahmoud Abbas, member of the Executive Committee of the Palestine Liberation Organization, and Chedli Klibi, secretary general of the Arab League.

Welcoming the delegation at the airport were Wu Xueqian, foreign minister; Wen Yezhan, vice-minister of foreign affairs; He Ying, adviser to the Ministry of Foreign Affairs; Lin Zhong, assistant minister of foreign affairs; and diplomatic envoys from various Arab countries and head of the mission from the Palestine Liberation Organization in Beijing.

BRIEFS

ALGERIAN ENVOY'S RECEPTION -- Beijing, Nov 2 (XINHUA) -- Algerian Ambassador to China Abdelkarim Ghraieb gave a reception here today to celebrate the 28th anniversary of the Algerian revolution. Among those attending were Li Dongye, Chinese minister of metallurgical industry, and Wen Yezhan, vice-minister of foreign affairs. [Text] [Beijing XINHUA in English 0731 GMT 2 Nov 82 OW]

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Constitution Adopted

OW041046 Beijing XINHUA in English 1034 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- A new constitution of the People's Republic of China, the fourth of its kind, was endorsed at the Fifth Session of the Fifth National People's Congress here this afternoon.

Three thousand and thirty-seven deputies voted by secret ballot in favor of the constitution which was hailed at panel discussions as distinctively Chinese and suited to the needs of China's socialist modernization.

Stormy and prolonged applause shook the Great Hall of the People when the result of the vote was announced by the executive chairman.

This constitution is the fundamental law of the state that has the highest authority and legal binding force.

The consensus of views expressed at panel discussions on its draft is that it scientifically sums up China's historical experience in socialist development and reflects the common wish and fundamental interests of the people of all nationalities in China. It is the general statute for running the ship of state in the new historical period of development.

Xi Zhongxun, executive chairman, presided over today's session which started at 3:00 p.m.

The full text of the draft revised constitution submitted to the session for endorsement was read out at the meeting.

The executive chairman then declared the voting begun. Deputies cast their votes in 30 boxes placed in different areas of the auditorium. A special mobile balloting box was prepared for the aged and infirm. Ye Jianying, Tan Zhenlin and some other N.P.C. deputies cast their ballots in this box.

The ballots were printed in Han, Mongolian, Tibetan, Uygur, Kazak and Korean languages.

At 5:45 p.m., the executive chairman announced that a total of 3,040 ballots were distributed, 3,040 ballots were cast and 3,037 votes were for the adoption of the constitution. There were three abstentions. Then he declared that the constitution of the People's Republic of China was officially endorsed.

Later, the National People's Congress issued an announcement on the publication and enforcement of the constitution.

The constitution consists of a preamble and 138 articles in four chapters, namely, chapter one: General Priniciples; chapter two: The Fundamental Rights and Duties of Citizens; chapter three: The Structure of the State; and chapter four: The National Flag, the National Emblem and the Capital.

The new constitution inherits and develops the fundamental principles embodied in the 1954 constitution. It sums up the rich experience in the development of socialism in China while assimilating international experience. It takes into consideration both present-day realities and future development. There are many changes and additions in content as compared with the third constitution passed in 1978.

The new additions include: Reinstatement of the posts of president and vice-president of the People's Republic (formerly translated as chairman and vice-chairman); institution of a Central Military Commission to direct the armed forces; extension of the functions and powers of the Standing Committee of the National People's Congress and institution of the system of the premier's overall responsibility for the State Council; change in the institution of combining rural people's commune management with government administration; and establishment of special administrative regions when necessary.

Today's meeting also adopted a resolution on the functions and powers of the present National People's Congress Standing Committee. The resolution stipulates that prior to the election of the president and vice-president of the People's Republic of China in accordance with the new constitution, the current N.P.C. Standing Committee and its chairman and vice-chairmen countinue exercising their functions and powers as prescribed in the constitution of 1978.

The meeting also passed a resolution on the national anthem of the People's Republic of China, restoring the original words of the "March of the Volunteers" to the national anthem and repealing the March 5, 1978 resolution of the First Session of the Fifth N.P.C. on the new wording of the national anthem.

Present at the meeting as observers were delegates attending the on-going Fifth Session of the Fifth National Committee of the Chinese People's Political Consultative Conference.

Powers of Standing Committee

OW060044 Beijing XINHUA Domestic Service in Chinese 1258 GMT 4 Dec 82

[Text] Beijing, 4 Dec [XINHUA) -- The Resolution of the Fifth Session of the Fifth National People's Congress of the People's Republic of China on the Functions and Powers of the Standing Committee of the National People's Congress (adopted by the Fifth Session of the Fifth National People's Congress on 4 December 1982)

The Fifth Session of the Fifth National People's Congress decides:

Before the president and vice president of the PRC and the Standing Committee of the Sixth NPC are elected by the First Session of the Sixth NPC according to "the constitution of the People's Republic of China" adopted by this session, the Standing Committee of the Fifth NPC and the chairman and vice chairmen of the Fifth NPC Standing Committee shall continue to exercise their respective functions and powers as prescribed by articles 25 and 26 of "the constitution of the People's Republic of China" adopted in 1978 by the First Session of the Fifth NPC.

Appendix: Article 25 and Article 26 of the 1978 Constitution

Article 25

The Standing Committee of the National People's Congress exercises the following functions and powers:

1. To conduct the election of deputies to the National People's Congress;

2. To convene the sessions of the National People's Congress;

3. To interpret the constitution and laws and to enact decrees;

4. To supervise the work of the State Council, the Supreme People's Court and the Supreme People's Procuratorate;

5. To change and annul inappropriate decisions adopted by the organs of state power of provinces, autonomous regions, and municipalities directly under the central government;

6. To decide on the appointment and removal of individual members of the State Council upon the recommendation of the premier of the State Council when the National People's Congress is not in session;

7. To appoint and remove vice presidents of the Supreme People's Court and deputy chief procurators of the Supreme People's Procuratorate;

8. To decide on the appointment and removal of plenipotentiary representatives abroad;

9. To decide on the ratification and abrogation of treaties concluded with foreign states;

10. To institute state titles of honor and decide on their conferment;

11. To decide on the granting of pardons;

12. To decide on the proclamation of a state of war in the event of armed attack on the country when the National People's Congress is not in session; and

13. To exercise such other functions and powers as are vested in it by the National People's Congress.

Article 26

The chairman of the Standing Committee of the National People's Congress presides over the work of the Standing Committee; receives foreign diplomatic envoys; and in accordance with the decisions of the National People's Congress or its Standing Committee promulgates laws and decrees, dispatches and recalls plenipotentiary representatives abroad, ratifies treaties concluded with foreign states and confers state titles of honor.

The vice chairmen of the Standing Committee of the National People's Congress assist the chairman in his work and may exercise part of the chairman's functions and powers on his behalf.

Anthem's Words Restored

OW041018 Beijing XINHUA in English 1001 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- China's National People's Congress (N.P.C.) this afternoon approved a resolution to restore the original words of the national anthem, the "March of the Volunteers".

An enthusiastic outburst of applause greeted the announcement by Xi Zhongxun, executive chairman at today's meeting, that the resolution was adopted. The resolution also repeals a N.P.C. resolution of March 5, 1978, that changed the words of the anthem. The "March of the Volunteers" was composed in 1935 after the Japanese imperialists had occupied three northeast China provinces. It was a critical moment when the fate of the Chinese nation was hanging in the balance. The song, with words written by the noted writer Tian Han and music by the noted composer Nie Er, voiced the strong resolve of the Chinese people to rise and defend the nation against foreign aggression, and thus gained instant popularity.

In 1949, the Chinese People's Political Consultative Conference (C.P.P.C.C.) decided to use the "March of the Volunteers" as the national anthem before an official anthem was adopted, to show the Chinese people's determination to maintain vigilance in peacetime as in the war years and carry forward their revolutionary and patriotic tradition. Over the years, the song has taken roots among the Chinese people.

The 1978 N.P.C. decision to change the words of the song drew complaints from various quarters. Many N.P.C. deputies, members of the Committee for the Revision of the Constitution and people of various circles proposed that the original words be restored.

When a draft resolution to restore the words was submitted by the Presidium of the current N.P.C. session, many deputies voiced warm support for it.

Lu Ji, a N.P.C. deputy and president of the Association of Chinese Musicians, said: "The song 'March of the Volunteers' served as a clarion call to arms during the war of resistance against Japanese aggression and the liberation war. Today, it will inspire and encourage the Chinese people to work in high spirits for the country's modernization."

Eighty-three-year-old Xia Yan, a noted writer and member of the C.P.P.C.C. National Committee, said: "The C.P.P.C.C. decision on the eve of the founding of New China to use the 'March of the Volunteers' as the national anthem expressed the aspirations of the 450 million Chinese people of the time. From the bottom of my heart I support the move to restore the original words of the song."

The Secretariat of the current N.P.C. session received large numbers of letters demanding the restoration of the original words of the national anthem.

6 Dec Meeting

OW060243 Beijing XINHUA in English 0226 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- A plenary meeting of the current Fifth Session of the Fifth National People's Congress was held here this morning.

The meeting heard a report made by Xi Zhongxun, vice-chairman of the N.P.C. Standing Committee and chairman of the Legislative Affairs Committee, on the revision of four draft laws. They are "The Organic Law of the National People's Congress," "The Organic Law of the State Council," "The Organic Law of the Local People's Congresses and Governments" and "The Electoral Law for the National People's Congress and the Local People's Congresses."

Yang Shangkun, vice-chairman and secretary-general of the N.P.C. Standing Committee, made an explanation of the number of the deputies to the Sixth National People's Congress and their election.

Three written reports were distributed to the deputies for deliberation at today's meeting. They are: Yang Shangkun's report on the work of the N.P.C. Standing Committee, Jiang Hua's report on the work of the Supreme People's Court, and Huang Huoqing's report on the work of the Supreme People's Procuratorate.

The meeting was presided over by Executive Chairman Liao Chengzhi.

Yang Shangkun on Sixth NPC

OW060741 Beijing XINHUA in English 0705 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- China's Sixth National People's Congress will have just 3,000 deputies, 500 fewer than the fifth congress, and the election will have been completed by the end of April, 1983.

This was announced by Yang Shangkun, vice-chairman and secretary-general of the Standing Committee of the National People's Congress, at the current N.P.C. session here today.

A total of 3,500 deputies were elected to the Fifth National People's Congress for a term of five years ending February 1983.

Explaining the draft resolution on the number of deputies to the Sixth N.P.C. and their election, Yang Shangkun said that the size of the N.P.C. has to do with the issue of carrying forward the principles od democratic centralism and giving full play to the role of the supreme organ of state power. This is of great concern to the people of all nationalities in China, he said.

In the nation-wide discussion of the draft revised constitution, he said, many people, including N.P.C. deputies, suggested the number of deputies be reduced.

China is a multi-national socialist country with a vast territory and a huge population, he said. If the number of deputies is too small, it would not be able to assume the necessary representation. Therefore, he said, the N.P.C. Standing Committee suggested after discussion that the number be around 3,000.

On the distribution of quotas, Yang said in the rural areas one deputy is to be elected out of every 1.04 million people and in the cities and towns one out of every 130,000. This is in accordance with the stipulation in the electoral law that the number of people represented by each deputy elected in the rural areas should be eight times the number of people represented by each deputy from the urban areas.

However, Yang said, not less than 15 deputies should be elected from any of the sparsely populated provinces and autonomous regions like Qinghai, Tibet and Ningxia.

Thirteen deputies representing Taiwan Province are to be elected for the time being, the same as at the Fifth National People's Congress. The balance of the quota, to be elected in proportion to the population, will be reserved.

The representation of the Chinese People's Liberation Army, which participates in the National People's Congress as a unit, will be smaller than at the fifth congress.

Besides the Han nationality, there are 55 minority nationalities in China which between them account for 6.7 percent of the total population. The number of deputies from these minority nationalities, however, make up about 12 percent of the total number of the deputies to the National People's Congress, according to the draft resolution. Even the smallest nationalities are entitled to have at least one N.P.C. deputy each, Yang said.

Returned overseas Chinese will be represented by 35 deputies, who are included in the number of deputies to be elected from various provinces, autonomous regions and municipalities in proportion to their population.

The draft resolution says that the N.P.C. Standing Committee may apportion, according to specific conditions, a certain quota of deputies to areas with an exceptionally small population or a large concentration of representative persons and to very small nationalities. These deputies are to be elected in provinces, autonomous regions or municipalities to which such cases apply.

Yang Shangkun also explained the method of election.

Yang on Standing Committee

OW060824 Beijing XINHUA in English 0750 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Publication of the draft constitution for nation-wide discussion and adoption of a civil procedural law for trial use were among the jobs done by the National People's Congress Standing Committee over the past year.

Yang Shangkun, vice-chairman of the N.P.C. Standing Committee and its secretary general, made this statement in his written report on the committee's work to the Fifth Session of the Fifth National People's Congress here today.

Other laws and decrees enacted by the Standing Committee this year include the food hygiene law, the law for the protection of cultural relics, and a decision on severely punishing offenders doing serious damage to the country's economy.

The Standing Committee, Yang said, has focused its attention this year on building a sound legal system to consolidate the people's democratic dictatorship and ensure smooth progress of socialist modernization.

Expanding socialist democracy, and having it institutionalized and codified, is the common wish of the entire Chinese people, he said.

The enactment of the above-mentioned laws, he said, serves to ensure by way of legal procedures the enforcement of all civil and enconomic laws and relevant administrative decrees. It will also help protect the people's rights, maintain public order and guarantee the modernization program, he said.

With the growth of China's socialist modernization, it is increasingly necessary to enact economic laws, he noted.

The N.P.C. and its Standing Committee, he said, have since 1979 adopted regulations concerning the requisition of land for capital construction, the law on marine environmental protection and the trade mark law and other such laws and regulations. They have already yielded initial results in serving national economic development, he said.

Additional laws and decrees will be formulated to ensure success in the current economic readjustment and consolidate economic achievements, Yang said. New economic laws, including those governing cooperation with foreign businessmen, will have to be instituted with the progress of the economic readjustment and the reform of the economic systems and the growth of China's external economic relations.

Enactment of local laws in areas where minority nationalities live in compact communities is an important aspect of China's legislative work, Yang Shangkun said. The N.P.C. Nationalities Committee is drafting a law on national regional autonomy, and supplementary regulations for enforcing the marriage law have been enacted in some autonomous regions and provinces.

Between November 1979 and September 1982, 355 local laws and bills were instituted by various provincial, autonomous region and municipal people's congresses or their standing committees, and were reported to the N.P.C. Standing Committee for record.

Enactment of local laws and bills would help various localities bring their initiative and enthusiasm into play in the light of local conditions, Yang said.

He called for strict observance of the laws so they will become an inviolable force which everyone must respect.

He stressed the need to draft bills suited to China's actual conditions and the principles of socialist legality so as to build an independent legal system which is distinctively Chinese. He also emphasized the importance of following the mass line, serving the people's interests, and maintaining the stability and continuity of the law.

Speaking of its supervisory role, Yang said the N.P.C. Standing Committee has examined reports submitted by the State Council on the economic readjustment and the reform of the council's organization.

Many N.P.C. deputies, he said, have put forward constructive proposals concerning the use of state funds, opposition to waste and import of unnecessary items, increase of investment in education, improvement of people's livelihood, enforcement of the retirement system, and training of cadres by rotation.

The N.P.C. Standing Committee has, through appointments and removals, made the staff of the State Council and its subordinate organs younger and more revolutionized, knowledgeable and professional. By bringing young and old cadres together, this makes it easier for the transition from the old to the young, Yang said.

The N.P.C. Standing Committee has in the past year processed all the 2,318 motions presented by deputies at the last session and handled 69,000 letters from the people.

It has sent delegations to the Democratic People's Republic of Korea, Senegal, Algeria, Tunisia, Morocco, Thailand, Malaysia, the Philippines, Australia and New Zealand, and received parliamentary delegations or leaders from the D.P.R.K., Australia, the Sudan, Colombia, Norway, France, Britain and the United States of America.

Friendly exchanges with parliaments of Third World countries, he said, have deepened friendship and understanding between China and developing countries in Asia, Africa and Latin America.

Xi Zhongxun Explains Laws

OW060342 Beijing XINHUA in English 0252 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Four draft laws governing state organs, worked out by revising or rewriting existing ones, were submitted today to the current National People's Congress session for deliberation.

The four draft laws are: "The Organic Law of the National People's Congress," "The Organic Law of the State Council," "The Organic Law of the Local People's Congresses and Governments," and "The Electoral Law for the National People's Congress and the Local People's Congresses."

Explaining the draft laws, Xi Zhongxun, vice-chairman of the Standing Committee of the National People's Congress and chairman of the Legislative Affairs Committee, said it is necessary to revise or rewrite these laws related to the constitution in order to improve the state leadership, the political structure and the socialist legal system and to develop socialist democracy.

He said the present draft organic law of the National People's Congress includes major changes and supplements made to the N.P.C. organic law of 1954 in accordance with the relevant provisions of the new constitution.

The important changes and additions he cited are:

-- The qualifications of N.P.C. deputies will henceforth be examined by a Credentials Committee set up by the N.P.C. Standing Committee which conducts the election and the list of deputies will be published before the convocation of the first session of each congress. In the past, this was done by the Credentials Committee after the opening of the first session of each congress.

-- Candidates for leading personnel in state organs and other officials to be elected by the congress shall be nominated by the Presidium. N.P.C. deputies may object to the nominations of the Presidium or nominate other candidates. The formal list of candidates shall be decided upon by the Presidium according to the majority view of the deputies after discussion and consultation among the delegations.

— Bills for recalling members of the N.P.C. Standing Committee, the president and vice-president of the People's Republic, members of the State Council and the Central Military Commission, the president of the Supreme People's Court and the procurator-general of the Supreme People's Procuratorate, may be presented through prescribed procedures.

-- Inquiries addressed by deputies shall be submitted to the organizations concerned on the decision of the Presidium. The organizations' replies may be provided in written form, or orally by their leaders at meetings of relevant special committees or at meetings of the Presidium. Inquiries may also be addressed by Standing Committee members through prescribed procedures.

These stipulations make it more convenient for the deputies and the Standing Committee members to exercise their right of inquiry and enable inquiries to be handled in an orderly way, Xi Zhongxun said. They help the N.P.C. and its Standing Committee exercise supervision over the state organs, and make it possible for the inquired organizations to prepare responsible replies.

-- In line with the stipulations in the constitution on the establishment of special committees under the Standing Committee, the draft organic law defines the major functions of these committees as: Deliberating motions and inquiries handed down by the N.P.C. or its Standing Committee and drafting relevant bills to be submitted to the congress for deliberation. Members of the special committees are to be elected from among the N.P.C. deputies because the committees are part of the N.P.C. and exercise some of the functions of the N.P.C. and its Standing Committee.

The National People's Congress may appoint a number of specialists who are not deputies to be advisors or adjunct advisors to the special committees.

The draft organic law of the State Council, Xi Zhongxun said, was written on the basis of the 1954 law and in accordance with the relevant stipulations in the new constitution. It also draws on the practical experience in the work of the government over the years, particularly the experience gianed in the organizational reform in the past year.

With a view to perfecting the organization and various work systems of the State Council and improving the efficiency and quality of the work of the state administrative organs, the draft law has made important alterations and additions to the composition, functions, leadership system and meeting system of the State Council, the establishment of ministries, commissions and other organs under the council, the number of their leading personnel, and the functions of the ministries and commissions.

He said the organic law of the local people's congresses and governments adopted in 1979 is on the whole suited to China's conditions as shown in practice over the past three years.

The draft resolution on the revision of this law includes alterations and additions made in accordance with the new constitution and practical experience.

Xi Zhongxun said that the electoral law for the National People's Congress and the local people's congresses adopted in 1979 still holds good in principle. Only minor changes will be made in certain specific articles.

6 Dec Presidium Meeting

OW060356 Beijing XINHUA in English 0328 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- The Presidium of the Fifth Session of the Fifth National People's Congress today approved three draft documents to be submitted to the congress for deliberation.

They are a draft resolution concerning the report on the Sixth Five-Year Plan, a report on the examination of the implementation of the state budget for 1982 and the draft budget for 1983, and a draft resolution concerning the report on the implementation of the budget for 1982 and the draft budget for 1983.

The draft resolution concerning the report on the Sixth Five-Year Plan says that the plan is a fairly comprehensive plan which serves as a guide to action for China's socialist modernization.

The tasks set for economic and social development are both forward-looking and reliable, and can be fulfilled given necessary effort. The principal measures listed in the plan are realistic, effective and feasible, The plan has been satisfactorily implemented in the first two years (1981 and 1982), putting the national economy on the track of sound development.

Hu Ziang, vice-chairman of the Budgeting Committee of the Fifth N.P.C., made a report on the examination of the implementation of the 1982 state budget and the draft state budget for 1983.

The implementation of the 1982 state budget has been satisfactory, he said, adding that China's financial situation has begun to show marked improvement.

The 1983 draft state budget ensures the priorities while giving over-all consideration to other needs. It reflects the need for continued efforts in readjusting, restructuring, consolidating and improving the national economy, the need to maintain a basic balance in state finance and the need to improve the people's material and cultural life on the basis of increased production.

The Budgeting Committee proposes that the National People's Congress approve the 1983 state budget as well as Finance Minister Wang Bingqian's report on the implementation of the 1982 state budget and the draft state budget for 1983.

The meeting adopted a draft resolution approving the State Council's report on the implementation of the 1982 state budget and the 1983 state budget.

Today's meeting was presided over the Executive Chairman Peng Zhen.

Scientists View 5-Year Plan

OW040336 Beijing XINHUA in English 0316 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- China should work out as soon as possible a national program for developing science and technology to help achieve the Sixth Five-Year Plan.

Ye Duzheng, vice-president of the Chinese Academy of Sciences, said this at a panel discussion of the current session of the Fifth National People's Congress.

Various sectors of the national economy should correlate their development plans to this national program, the noted meteorologist added.

He suggested that organisations should be set up at both central and local levels to popularize scientific and technological achievements in production departments.

Compulsory education should be enforced so that workers and peasants will acquire essential technical knowledge that may be required by the year 2000, Ye Duzheng said.

Wang Shouguan, director of the Beijing Observatory and a deputy to the current N.P.C., said that special research institutions should be established to study scientific and technical development policies and enterprise management so as to provide consulting service for various enterprises and organizations.

Lin Lanying, a semi-conductor specialist and N.P.C. deputy, proposed that a national advisory commission be set up to work out plans and polices for developing large integrated circuits in China. Microelectronic development centers should be established in Beijing and Shanghai, she added.

At another panel discussion on the premier's report on the Sixth Five-Year Plan, Zhou Peiyuan, vice-chairman of the National Committee of the Chinese People's Political Consultative Conference and president of the China Association for Science and Technology, said it is correct to stress economic performance in expanding industry and agriculture.

This calls for higher productivity and better product quality and management, he said. "All this requires new advances in science and technology and greater efforts by scientific workers," Zhou Peiyuan said.

Price Policy Supported

OW040308 Beijing XINHUA in English 0230 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- Liu Zhuofu, adviser to the State Administration of Commodity Prices and a deputy to the National People's Congress, said today that he fully agrees to the policy of maintaining a basic stability of prices proposed by Premier Zhao Ziyang.

In an interview with XINHUA, Liu Zhuofu said: "The policy of controlling and stabilizing commodity prices in a planned way has in the past 30 years played a positive role in ensuring the growth of the socialist economy and the security of the people's livelihood."

Meanwhile, he added, an upward or downward readjustment of some most unreasonable prices will be made as is necessary for the development of production. "This does not conflict with the principle of keeping prices stable. In fact, such readjustment will be made on the condition that the general price level is maintained," he said.

Premier Zhao emphatically pointed out that no enterprises will be allowed to use such readjustment as a pretext to raise prices and shift the burden onto consumers, he noted.

Liu Zhuofu said an all-round plan is being prepared for a reform of the country's price structure in line with the requirements of its planned economy supplemented by regulation through the market. The prices of the major commodities will be set by the state; those of the ordinary commodities will be allowed to float within a limit set by the state; and those of small commodities are to be set by the industrial enterprises or through consultation between them and the commercial department.

He said the price reform should proceed in step with a wage reform to ensure higher wages on the basis of increased consumer goods. Thus the people's living standards will rise steadily. Some initial reforms to this end have already been carried out in recent years, Liu Zhuofu said. They include:

-- Increasing the purchasing prices of farm produce by 38.5 per cent and reducing the disparity between the prices of industrial and agricultural products by 26 per cent in 1978-1981;

-- Readjusting the factory prices of coal, pig iron, rolled steel and building materials;

-- Raising the retail prices of cigarettes, wines and liquors while lowering those of chemical fiber, watches, radios and some other consumer goods;

-- Allowing floating prices, negotiated prices and free prices to exist alongside government list prices.

"Facts show that these measures have helped improve market supply, ensure the stability of the people's livelihood and stimulate the growth of our economy," Liu Zhuofu said.

RENMIN RIBAO EDITORIAL ON NEW CONSTITUTION

HK050718 Beijing RENMIN RIBAO in Chinese 5 Dec 82 p 5

[Editorial: "The General Charter for Managing State Affairs and Giving the State Peace and Security in the New Period"]

[Text] The Fifth Session of the Fifth NPC has adopted the "Constitution of the PRC." This is a major affair in our country's political life and joyful news for the people of all nationalities in the country. Coming as it does when China has experienced 10 years of lawlessness and disorder, and completed the historical task of bringing order out of chaos, and when the people of the whole country are working in concert to create a new situation in socialist modernization, the adoption and institution of this constitution is the indispensable legal guarantee for a long period of tranquillity in the whole country, for the peace and contentment of the people of all nationalities, for achieving modernization of China's industry, agriculture, national defense and science and technology, and for building China into a socialist state with a high degree of civilization and democracy. As many deputies said at the NPC session, this constitution accords with the national condition and the popular will; it is a "vitalization law" for keeping the land stable and peaceful, a "happiness law" for enriching the state and benefiting the people, and the fundamental law for guaranteeing socialist construction.

China is a large country of 1 billion people, and we cannot do without laws, and still less without a constitution, in order to govern and build the country well. The constitution possesses the highest authority and legal force in the state'e entire legal system. The formulation of all laws, administrative and local regulations must be based on the constitution. The constitution is the "mother" of ordinary laws, and the ordinary laws are its "sons." The most important thing in ruling the country by law is to draw up a constitution that will be stable for a long time, that reflects the common will and fundamental interests of the people of the whole country, and that considers both present reality and also future development prospects. There have been three constitutions since the founding of New China. The first constitution, that of 1954, suited the needs of the transition period from the new democracy to socialism and ensured the smooth process of this historic change. It was generally acknowledged as a very good constitution. The 1975 constitution was a product of the 10 years of internal disorder, and many of its provisions were loaded with fancy "leftist" slogans. The 1978 constitution was, owing to the limitations posed by the historical conditions at the time, unable to make a clean sweep of "leftist" guiding ideology; it has long been unsuited to the tremendous changes in the state's political and economic life. The constitution now adopted has been formulated by inheriting and carrying forward the basic principles of the 1954 constitution, absorbing the quintessence of historical Chinese legal codes and consulting a large number of foreign constitutional documents, and in particular, by summing up the positive and negative experiences of socialist development in China; it has also been discussed, including discussion by the whole people, for as long as 2 years. In the form of the fundamental law of the land, the constitution lays down clear-cut stipulations regarding the country's fundamental political and economic systems, the future fundamental tasks of the state, the basic rights and obligations of the citizens, the establishment and scope of duties of the state organs, and similar major issues. It can indeed be called the general charter for managing state affairs and giving the state peace and security in the new period.

The moment the new constitution is promulgated, we must seriously and conscientiously endeavor to implement it and act according to the law.

Upholding the dignity of the construction and ensuring its implementation are related to political stability, economic prosperity, the people's happiness and the flourishing of the land. The whole party, the whole army and the people of all nationalities throughout the country must shoulder their solemn responsibility to uphold the dignity of the constitution and ensure its implementation. It must be admitted that the concept of a legal system is rather weak in our country, including among some party members and even certain responsible party cadres. During the long period of feudal society, "imperial decrees" were the law. The law could not represent the will of the feudal ruling class and was fundamentally opposed to the people's interests, and so the people too ignored its existence. In "Water Margin" there is the story of how Lu Zhishen beat Zhen Guanxi to death with three blows of his fist, which illustrates how the people used fists, not the legal system, to punish evil tyrants who cheated and oppressed them. The laws of the Kuomintang were oppressive. The CPC waged not legal but armed struggle in leading the people to overthrow Kuomintang rule. This caused a certain misunderstanding among the people, including a number of party members: After the people set up their own regime, it seems it does not matter much whether a legal system is stressed and laws exist or not. The 10 years of internal disorder gave us what could be described as an unforgettable lesson in the legal system: The moment the proletariat gains political power, it must strengthen the building of a legal system and apply the legal system to guarantee the interests of the proletariat and the people. Only bad persons, not the people, benefit if there is no stress on the legal system, the laws are not observed, or there is complete lawlessness. We must always remember this painful lesson.

To ensure the implementation of the constitution, we must solve the question of the relationship between the state organs, the political parties and the social bodies on the one hand and the constitution on the other, and espeically the question of the relationship between the CPC and the constitution. The new constitution clearly points out that all state organs, the armed forces, the political parties, social bodies, and all enterprises, undertakings and organizations must regard the constitution as the fundamental guideline for their activities, and all of them bear the responsibility of upholding the dignity of the constitution and ensuring its implementation. The "all" mentioned here means that there are no exceptions at all. As the governing party, the CPC holds the leading position in the entire political life of the state; but in the fact of the constitution and the law, our party must, in common with other political parties, bodies and organizations, conduct its activities within the framework of the constitution and the law. The party led the people to formulate the constitution, and it must also lead them to implement it. The party organizations at all levels must adhere to the constitution in a model way. The CPC has no special interests of its own apart from the interests of the people. Our party's correct ideas and policies which come from the people are already reflected in the various provisions of the constitution. Hence, strictly implementing the constitution means strictly implementing the party's policies and ideas. The notion of setting implementation of party policies against adherence to the constitution and the law is intolerable and must be discarded. The new party constitution formulated by the 12th party congress clearly stipulates that "the party must carry out its activities within the framework of the constitution and the law." In his report to the 12th party congress, Comrade Hu Yaobang clearly demanded that the activities of the party organizations at all levels from the Central Committee down to the grassroots must not conflict with the state constitution and the law. So long as the party does this and truly adheres to the constitution and the law in a model way, the democratic parties, the popular bodies and the people of all nationalities in the country will certainly act in the same way. This is the key to ensuring the implementation of the constitution.

In ensuring the implementation of the constitution, it is also necessary to solve the question of the relationship between the individual and the constitution, especially that between the leading party and government cadres at all levels and the constitution. Article 53 of the new constitution states: "The citizens of the PRC must adhere to the constitution and the law." Clause 3 of Article 33 states: "Every citizen enjoys the rights laid down by the constitution and the law, and also has the obligation to observe the constitution and the law." Clause 4 of Article 5 states: "No organization or individual may have special rights transcending the constitution and the law." This means that every citizen and individual, whether a worker, peasant or soldier or a leading cadre of the party or government, has the obligation to adhere to the constitution and the law, and has no special rights transcending the constitution and the law. If certain people take no notice of the constitution, holding that their position is high and their power great, they will be looking down upon the constitution and may then embark on the dangerous path of violating it. The press discussion of the question of which is higher, the constitution or the county party committee, was a criticism of the erroneous viewpoint that, with power in one's hands, one can ride roughshod over the constitution. Now there can be no more such talk or deeds of looking down on the constitution. No person, no matter how high his position or how great his power, has special powers transcending or overriding the consitution; everyone must adhere to it. This is a major condition for ensuring the implementation of the constitution.

In ensuring the implementation of the constitution, it is also necessary to publicize it with great fanfare and organize the cadres and masses to study it, so that everyone will know about the constitution and understand it. An old saying had it that a law will not carry out itself. This means that however good a law, implementation of it will not be automatic. People have to adhere to it and apply it. Our country's new constitution is indeed a good constitution and a powerful weapon for assuring the smooth progress of the four modernizations. However, weapons have to be used by people. No matter how good a weapon is, it is useless if nobody uses it and it is left laying around. After our new constitution is promulgated, people must adhere to it and apply it, and not leave it laying around. To ensure that everyone will adhere to it and apply it, everyone must study and master it. So long as the 1 billion people can all master the constitution, learn how to apply it, and grasp their own fate and that of the country, there will be a firm guarantee for the implementation of the constitution. As NPC Standing Committee Vice Chairman Peng Zhen said in his "Report on the Draft of the Revised Constitution:" "It is a tremendous force if the 1 billion people cultivate the concept and habit of everyone adhering to and upholding the constitution. The new constitution which embodies the people's will and the correct ideas of the CPC, and whose implementation is ensured by the efforts of all the people and the party members, will certainly be able to play a tremendous role in stimulating the victorious development of our country's socialist modernization cause."

FORMER TAIWAN PROFESSOR DISCUSSES REUNIFICATION

HK060234 Beijing RENMIN RIBAO in Chinese 2 Dec 82 p 3

[Report by Luo Zisu [5012 5261 5685]: "Sending a Message to Taiwan About Reunification -- Interview With Fan Shoukang, Newly Elected Member of the CPPCC National Committee"]

[Text] When speaking about his second home, Taiwan, 86-year-old Fan Shoukang could hardly constrain his intense emotion. When the war of resistance against Japan began, our revered Mr Fan was director of the Third Bureau under the Political Department of the Military Commission. Later, he was a professor of philosophy at Taiwan University. From 1945 to the summer of last year, he lived in Taiwan -- nearly 37 years. He returned to the mainland last summer and settled down. His personal experience of the past 37 years has enabled him to fully cherish deep feelings for the soil of the motherland and his kinsmen. Such feelings cannot be separated by the roaring waves of the Taiwan Strait or a manmade fence. Our revered Mr Fan highly and sincerely praised Comrade Peng Zhen's report on the draft of revised constitution that says that the reunification of the motherland "is the trend of the times and the desire of the people." He stressed that such remarks voice the aspirations of the people in Taiwan.

Professor Fan Shoukang talked about his personal understanding and experience. He said that the people in Taiwan are proud to be the successors of the dragon. Those who are natives of Taiwan or are from the mainland, and those who are young or old ardently worship the two great national heroes and patriots -- Zheng Chenggong and Qiu Pengjia. They came to Taiwan from the motherland to shed their sweat and blood for the precious island of the motherland and made great achievements, respected and admired by their descendants. Qiu Pengjia, a native of Chaozhou in Guangdong Province, was a successful candidate in the highest imperial examinations of the Qing dynasty. After the Sino-Japanese war of 1894-95, he led the people of Taiwan to fight against the Japanese occupiers for many years. To commemorate him, the people of Taiwan established Pengjia University. Professor Fan Shoukang stressed that all Chinese look forward to the prosperity of the Chinese mainland and early reunification of the Chinese mainland and Taiwan. This is their common desire!

"The intrinsic culture of a nation is the basis of nationality unity, because it has a powerful polymeric force that cannot be affected by outside interference. During its 50 years' occupation of Taiwan, Japan made great efforts to try to make people in Taiwan 'subjects of the Japanese Empire' and even force them to adopt Japanese names. Japan tried to use education, books and newspapers to change the culture and language of the Chinese." While talking about this subject, our revered Mr Fan smiled contemptuously. He added: The habits, customs and ethics of the elderly and middle-aged people in Taiwan have fully preserved the Chinese traditions. I asked: How about the younger generation? Our revered Mr Fan replied smilingly: "As for youths, I know them perfectly well. From their childhood, students in Taiwan pay attention to their education in Mandarin and training in the national phonetic alphabets. They can speak Mandarin more accurately than many young people on the mainland. They are proud of the civilization of their motherland, which has lasted for several thousand years."

Our revered Mr Fan has been a teacher all his life and has students everywhere in Taiwan. He is familiar with Taiwan youths. Yearning for the Chinese mainland and loving the culture of the motherland is the common desire of youths in Taiwan. "With such a solid basis and close links of the hearts, are there not bright prospects for the unity of the motherland and the reunion of our kinsmen? This is a reality that cannot be resisted by any political parties, forces or individuals."

Our revered Mr Fan continued: The preamble of the draft of the revised constitution points out that "Taiwan is part of the sacred territory of the PRC. To accomplish the great task of reunifying the motherland is the sacred duty of the entire Chinese people, including our compatriots in Taiwan." People in Taiwan should shoulder this duty and do their best to urge the authorities to cooperate with the CPC to discuss together the national affairs and accomplish this historical mission. He mentioned that there is an antithetical couplet in Mr Chiang Ching-kuo's residence presented as gift by Mr Yu Yu-jen. The couplet reads: "With regard to interests, you should first consider the interests of the whole world; with regard to fame, you should seek fame that will last all ages." If Mr Chiang Ching-kuo can keep the whole situation in mind, now is a good opportunity for him to practice this motto. Mr Fan hoped that he would keep abreast with historical trends and the desire of the people.

SUN CALLS FOR STRENGTHENING INTERNATIONAL TIES

OW031125 Taipei CHINA POST in English 28 Nov 82 p 8

[Text] The government envisions establishing Taiwan as an important commercial, finance and shipping center in the Far East through a series of innovative breakthroughs, Premier Sun Yun-hsuan said yesterday.

The premier was addressing the opening ceremony of 47th annual convention of the Chinese Institute of Engineers in Kaohsiung yesterday.

Various Methods

In his speech, Premier Sun took note of all the various methods being employed by the Chinese Communists in attempts to isolate the ROC in international relations and weaken real relationships with friendly countries. For this reason, the people of this country most direct their attention to this plot and devise "breakthroughs" to help strengthen real relations with other nations in the world, making it essential for the best interests and the security of the nations concerned to maintain and improve relations with the ROC, Sun said. He stressed that such breakthroughs "are needed in the very near future."

Present Situation

In speaking of the present economic situation facing this country, Sun conceded that the economy had suffered from a number of short-term setbacks. The government, however, has drawn up a series of measures attacking the problem in both the short and long term, which are to be adopted according to the requirements of the domestic and international situation, making it possible for businessmen here to be able to overcome such difficulties and make a fresh start.

The yearly convention opened yesterday at the Chiang Kai-shek Memorial Center. President of the Chinese Institute of Engineers Chang Ming-che presided over the meeting yesterday morning which was followed by afternoon seminars.

PREMIER SUN VIEWS NEED FOR NATIONAL DEFENSE PLANS

OW051834 Taipei CHINA POST in English 30 Nov 82 p 12

[Text] Plan designs and trial production on the Republic of China's own jet fighter plane and high precision missile system should be completed within the next five to six years, Premier Sun Yun-hsuan said yesterday, stressing the fact that the ROC must develop a national defense based on its own strength.

In speaking of national defense needs, the premier emphasized the fact that the ROC must, within the shortest possible time, develop an independent basic national defense industry, update weaponry, diversify market sources for armaments, while developing new armaments at home, especially sophisticated air craft and various types of missiles which meet the special needs of the Taiwan Strait.

OCAC Meeting

Speaking at a tea reception hosted by Premier Sun to mark the opening of this year's Overseas Chinese Affairs Commission plenary meeting, Premier Sun reported that since the United States broke diplomatic relations with the Republic of China, the national defense industry fund has already proved its worth, taking in NT$3.7 billion in contributions from the public.

In addition to these contributions, the government has donated another NT$7 billion. All of the money donated to the fund goes to research and development, experimentation and production in the national defense industry, Sun said.

An Integral Part

Premier Sun reminded the overseas Chinese in attendence for the meeting that the Chinese Communist regime is dead set on doing anything and everything in its power to isolate the Republic of China from the world community. The response from this side has been to make every effort to make the economy of Taiwan an integral part of the world economy, so that it becomes in the best interest of the advanced industrial countries to forego threats from the Chinese Communist regime and show open support for the ROC.

The Overseas Chinese Affairs Commission plenary meeting meets once a year to discuss matters pertaining to the situation in the overseas Chinese communities throughout the Free World. The meeting will continue today and tomorrow, with participants from all over the world attending to discuss matters of import to these communities.

To Strive for Unity

Yesterday's opening session was presided over by Chairman of the Overseas Chinese Affairs Commission Mo Sungnien, who urged all of the participants to strive for unity and self-reliance to frustrate any united front tactics employed by the Chinese Communists in attempting to factionalize overseas Chinese communities abroad.

At the present, the goal is to unify all overseas Chinese and the democratic forces throughout the Free World to lend unstinting support for the government here so as to ensure the freedom of the enslaved compatriots on the mainland at an early date, he said.

TAIPEI COMMENTS ON U.S. ARMS SALES TO TAIWAN

OW052039 Taipei International Service in English 0100 GMT 4 Dec 82

[Station commentary]

[Text] Red China has been deceived by its own duplicity. When the Chinese Communists signed a communique with the United States on August 17, they thought Washington was promising to stop selling weapons to the Republic of China on Taiwan. That wasn't [illegible]. The United States was saying that arms sales would be terminated if the Chinese Communists made peace with the Republic of China and China was unified.

Washington even made mention of the communists' 9-point peace proposal, but this was merely represented as a [words indistinct] said to the effect that the Republic of China would have to accept a proposition with which it disagreed. The United States was not promising to turn Taiwan over to the Chinese Communists. [Words indistinct] the other day in two statements from the Reagan administration. Lawrence Eagleburger, the under secretary of state for political affairs, said the United States has certain commitments to the Republic of China and will continue to keep them. Another administration official said the arms pledge contents of the communique did not alter the pledge of the United States to fulfill its responsibilities to the Republic of China. When President Reagan said the United States would fulfill the terms of the Taiwan Relations Act, he meant exactly what he said.

The Chinese Communists have deceived themselves. The Taiwan Relations Act obligated the United States to supply defensive weapons to the Republic of China on Taiwan. This is a law of the land in the United States as passed by the Congress and signed by the president. The August 17 communique is a statement of presidential policy and not a law.

The communists may have been deceived by that, maybe not. What surely deceived them was their own lies. In the communique, Peking [as heard] pledged itself to the peaceful unification of China. The United States said in return that if the Chinese Communists continue to work for peaceful unification of China, the sales of weapons would be gradually reduced.

Whether sales would be terminated depends upon interpretation of the communique's language. The Chinese Communists say "Yes," the Americans said simply "No." But the Chinese Communists have never done anything to contribute to peaceful unification. They have made a couple of propaganda statements of which the United States took notice. That is all.

The Republic of China has made proposals. These have been completely ignored by the communists. Actually, the free Chinese have insisted that the communists give up communism and the communists have insisted that the Republic of China give up freedom, terminate its sovereign existence and accept communism. This mean that there are no meaningful peace proposals. The United States is not obligated to reduce or eliminate arms sales to the Republic of China, because there is no peace and no prospect of peace. This is as true under the communique as in the Taiwan Relations Act. Why should the United States [words indistinct] through the (?policy) of the Taiwan Relations Act? Because some members of the Reagan adiministration wanted the United States to play the Red China card against the Soviet Union. Red China said virtually nothing about arms sales to the Republic of China the time it gained recognition from Jimmy Carter. Then Ronald Reagan won the presidency. He was known to be a friend of the Republic of China. He had said that he would like to resume recognition of free China. The Chinese Communists started running scared and made weapons a big issue. They claim that the Taiwan Relations Act was an infringement on their sovereignty. So, the Reagan administration decided to give them the unofficial arms assurance. It couldn't be official without the approval of Congress and the signature of the president. The quid pro quo was pledge of peaceful unification, the [words indistinct] is that communists' promise of peace is worthless and has never been backed up by any concrete action. Peking [as heard] is still reserving the right to unify China forcibly. It wasn't Ronald Reagan who lied but Teng Hsiao-ping.

JOINT COMMUNIQUE WITH LESOTHO SIGNED 3 DEC

OW031431 Taipei CNA in English 1412 GMT 3 Dec 82

[Text] Taipei, Dec. 3 (CNA) -- The Republic of China and the Kingdom of Lesotho Friday pledged to continue nurturing the growth of their close relations by further pushing ahead cooperation in cultural, industrial and agricultural fields between the two countries.

Foreign Minister Chu Fu-sung and his Lesotho counterpart, C.D. Molapo, signed a joint communique Friday at the conclusion of the six-day visit of Lesotho Prime Minister Leabua Jonathan and his party.

In the communique, the two governments also agree they will step up efforts for cooperation in the international field to promote mutual interests.

CHISHIH NIENTAI ON CPC POLICY TOWARD HONG KONG

HK060741 Hong Kong CHISHIH NIENTAI in Chinese No 12, 1 Dec 82 pp 27-30

[Article by Shih Hua: "Communist China's Policy Toward and Perception of Hong Kong"]

[Text] "Long Term Planning and Full Utilization"

Since the Korean war in the early 1950's, Communist China's basic policy toward Hong Kong has always been "planning on a long term basis and full utilization." These two phrases are, in fact, not complete. The real implication of "planning on a long term basis" is that: calculation on a long term basis is necessary when approaching Hong Kong's current political status that should not be changed in a reckless way. The so-called "full utilization" really implies that it is necessary to make full use of Hong Kong's current political status to seek benefits for China. These two phrases were even defined as the basic principle for Hong Kong and Macao work by the CPC central leadership.

In 1959, Mao Zedong instructed: "We had better not recover Hong Kong in the near future. There is no hurry. Hong Kong is of use to us at present."

Zhou Enlai also set great store by making use of Hong Kong. When China's economy was in difficulties, Zhou Enlai gave a directive that supplies to Hong Kong and Macao in particular must be properly handled. He instructed: "This position has become more and more important. Guaranteeing supplies to Hong Kong is in fact a political task."

Because Mao and Zhou took up this matter personally, the CPC's policy of maintaining Hong Kong's status quo has not been principally disturbed for a long time.

In the past, the authorities of Communist China tried, whenever possible, not to mention the problem of sovereignty over Hong Kong. Even when the 1967 rebellion developed to its utmost, the strongly worded RENMIN RIBAO editorials still avoided the issue of recovery of sovereignty but only condemned the British authorities in Hong Kong, blaming them for suppressing patriotic compatriots and calling on Hong Kong's compatriots to deal blows against the British imperialists in the fields of politics, economy and culture.

The sole occasion of openly stating its position was a RENMIN RIBAO editorial in 1963 in which the CPC replied to criticism from the American Communist Party on the Hong Kong and Macao question. The editorial said: "Treaties concluded by former Chinese governments with foreign countries should be treated separately in accordance with their contents. Some should be recognized, but others should be abrogated, still others should be revised or rewritten." "As for some unsolved problems left over by history, our constant position is that they can be solved through peaceful negotiations when conditions are ripe. For example, the problems concerning Hong Kong, Kowloon and Macao will be dealt with in this way." The editorial added: "The Chinese people have no need to show military prowess in dealing with the Hong Kong and Macao questions. They need not prove their courage and resolution of opposing imperialism in this way."

Three Conditions for Maintaining the Status Quo

In the 1950's, Britain followed the United States in taking an anti-China and anti-communist policy. The British authorities once connived with KMT secret agents to conduct harassing and wrecking activities against China in Hong Kong. The most serious events were: 1) a bomb was placed on an airplane that carried a Chinese delegation to the Asian and African conference in 1955. The plane was destroyed and all people on it were killed when the bomb exploded during the flight.

It was said that Zhou Enlai was the target of this assassination and, fortunately, he missed this accident; 2) KMT elements waged a rebellion in Kowloon in 1956 and attacked many leftwing organizations. The British authorities in Hong Kong did not take effective steps to stop the event, but to a certain extent connived with the troublemakers.

Zhou Enlai then lodged protests with the British charge d'affaires against the above two events. Afterwards, when the then Hong Kong governor, Grantham, visited Beijing, Zhou Enlai again made three conditions for the maintainance of Hong Kong's status quo; 1) Hong Kong cannot serve as a military base for international anti-Chinese forces; 2) no subversive activities against China are allowed to be conducted in Hong Kong; 3) the safety of Chinese official personnel must be guaranteed.

As for these three conditions, the first was directed at the United States. That means that Hong Kong cannot be a base for the 7th Fleet of the U.S. Navy. The second condition required the Hong Kong authorities to take responsibility for stopping various activities that were designed to conduct sabotage by infiltrating into the Chinese mainland. The third referred to the personnel in Chinese official organs in Hong Kong.

These three conditions are reasonable and unexceptionable. This, in the main did not involve the internal administration of the Hong Knog authorities. After understanding the three conditions, the British authorities in Hong Kong have kept on good terms with the communist authorities in China for a long time.

Dispute Caused by Immigrants from Mainland China

If the 1956 Kowloon rebellion was the first test for Communist China's policy toward Hong Kong, then the second test was the refugee tide in 1961. At that time, the authorities in Communist China opened the border and allowed people to flee to Hong Kong. The Guangdong CPC Committee even issued an instruction that people should be encouraged to "break through the imperialist blockade and win the freedom of visiting relatives." The public security bureaus issued a kind of so-called "river bank pass." People with this pass could freely go to the bank of Shenzhen River and the Chinese Army would not bar their way. For several months running, the Hong Kong authorities were weighed down with the work of tackling this fugitive tide. At last, the British charge d'affaires could not but request to see Zhou Enlai and told him the difficulties that the Hong Kong authorities were encountering. Only then, the communist authorities in China ordered that this emigrant tide should be stopped.

However, the emigration of people in mainland China to Hong Kong has always been a controversial issue between British and Chinese authorities. As early as in May 1950, the Hong Kong Government issued a decision on restricting people in China from entering Hong Kong. But the Chinese Foreign Ministry lodged a protest and demanded that this decision be abrogated. The British Government did not react to this.

After the 1962 fugitive tide, the Hong Kong authorities set a precise limit to the number of legal immigrants every day. In 1978, with the implementation of reasonable policies in mainland China in the wake of the Cultural Revolution, a large number of returned overseas Chinese were permitted to leave China. In addition, many cadres tried one after another to send their relatives and children to Hong Kong. As a result, this once again invoked the dispute over the quota of legal immigrants. At that time, the "Hong Kong and Macao Office" subordinate to Beijing's Commission of the Affairs of Overseas Chinese even required Hong Kong left-wing papers to criticize the Hong Kong authorities' immigration policy. Some papers said that it did not matter if Hong Kong's population increased to even 10 million. However, the Foreign Ministry, while being confronted with talks with Britain, seemed not to agree with the "Overseas Chinese Office." At last, it was the Chinese side that took the initiative in limiting the number of emigrants.

The greatest test of Communist China's policy toward Hong Kong was the "anti-British and antiviolent repression struggle" in 1967. In July of that year, the Chinese Foreign Ministry was controlled by ultraleftists. Because the Hong Kong authorities arrested five leftwing journalists, the Chinese Foreign Ministry went as far as to issue a 48-hour ultimatum to the British authorities. The Hong Kong authorities, however, did not release the arrested journalists before the deadline, Red Guards in Beijing then burned the office of the British charge d'affaires. Not long after that, Zhou Enlai again took control the situation and he personally apologized to the office of the British charge d'affaires for this event.

During "the struggle of opposing the British authorities and resisting violent repression," mainland China was immersed in revolutionary and nationalist fanaticism. But, except for the event of burning the office of the British charge d'affaires, Mao and Zhou in the main took a sensible attitude toward Hong Kong. The Guangzhou trade fair was only suspended for one session. Moreover, China never suspended Hong Kong's supply of drinking water and food.

"Not Recovering Hong Kong Is in the Interests of the People"

In early 1969, though the Hong Kong leftwing had not declared the end of the "struggle of opposing the British authorities and resisting violent repression," an instruction had already been circulated saying that the policy of the Chinese central authorities is not to recover Hong Kong in the near future. It was also said that "not recovering Hong Kong is in the interests of the Chinese people and the people of the world." This, in effect, was a return to the policy before the Cultural Revolution. A few years before that revolution, or starting from the late 1950's, leftwing organs in Hong Kong began to send their personnel to the mainland to "visit and study." When receiving these people, the responsible personnel of Beijing's Hong Kong and Macao work group always emphasized that maintaining Hong Kong's status quo was in the interests of the Chinese people. On several occasions, when Liao Chengzhi received leftwing workers from Hong Kong, he frankly indicated that maintaining Hong Kong's status quo was "profitable," but recovering Hong Kong would only produce another Qingdao and would not bring substantial benefits to the Chinese people. After the Cultural Revolution was waged in China, due to the world revolution being advocated, another reason was added -- "not recovering Hong Kong is in the interests of the people of the world." The specific explanation of this point could be, for example, that Hong Kong could be used to publicize Mao Zedong Thought toward other places in the world.

In order to reassure the Hong Kong leftwing who were agitated in the "struggle of opposing the British authorities and resisting violent repression," the CPC leadership in Hong Kong put forward a theory on analyzing social contradictions in Hong Kong. In those days, Lin Biao had analyzed the world situation in his political report to the Ninth CPC National Congress and he summarized the four major contradictions in the world. Correspondingly, the Hong Kong leftwing also summarized four major contradictions in Hong Kong society: 1) the contradiction between imperialism (mainly the United States and the Soviet Union) and the Chinese people; 2) the contradiction between the British rulers in Hong Kong and the Chinese compatriots there; 3) the contradiction between the CPC and the KMT, that is, the contradiction between leftwing and rightwing; and 4) the contradiction between Hong Kong capitalists and laboring people.

The CPC's habitual practice in explaining their reasons for changing policies and analyzing problms is to talk about all sorts of contradictions, big and small, or principal and secondary. It seemed to be a convincing summarization by listing the four major contradictions in Hong Kong society. But its purpose was to indicate the principal contradictions.

Obviously, the contradiction between the U.S. and Soviet imperialists and the Chinese people was to take precedence over the others, because flames of battle were raging through Vietnam where the people were fighting against U.S. imperialism and saving their nation, while on China's northern borders, the battle on Zhenbaodao had just finished and Chinese and Soviet armies were in a tense confrontation. It was, of course, in the interests of the Chinese people and the people of the world to put the contradiction between imperialism and the Chinese people in the first place. But the real function of this analysis was to put the struggle of "opposing the British authorities and resisting violent repression" to a secondary or even insignificant position so that it could come to a silent end. However, the formula of the four major contradictions maybe remains so far the foundation for approaching Hong Kong for the CPC cadres in Hong Kong and the leftwing personnel.

The Angle of Class Struggle

In discussing the future of Hong Kong, many Hong Kong people think that from the standpoint of practical interests and for the sake of retaining her economic interest in Hong Kong, Communist China has no intention of changing the political status of Hong Kong. If we take the words consistently expressed by Mao Zedong, Zhou Enlai and Liao Chengzhi in the 1950's and 1960's regarding Hong Kong, this kind of understanding could be taken as correct. However, conditions are complicated in China. Actually, not many of the cadres are genuinely concerned about the practical interests of the Chinese people, and many of them are concerned instead with the stability and prestige of the communist regime.

What should be explained is that the above-mentioned pragmatic policy of the communist higher levels regarding Hong Kong in the 1950's and 1960's is only one aspect of the policy mainstream. There is another aspect that plays quite an important role and that is public security and propanganda work.

For a long time, influenced by the climate of class struggle advocated in mainland China, Hong Kong has been regarded as the antithesis of class struggle. Moreover, the class struggle in this respect is not vague and general but specific. Its manifestations are: 1) in the early period of liberation, large numbers of capitalists, landlords and rich peasants escaped to Hong Kong; 2) for a long time, Hong Kong's economy, goods and culture have been "corroding" mainland China; 3) actual social problems have been created by the "Hong Kong wind" and "escape to Hong Kong wind" in the mainland; 4) secret agents who entered the interior by way of Hong Kong have been uncovered from time to time; 5) China's policies, measures, gloomy features and unhealthy phenomena have for a long time been directly, promptly and even sharply critized by the Hong Kong media. This has not only made the bureacrats used to uniform public opinion uneasy, but they also think that the back flow of such propaganda into the interior might even affect popular feeling, morale and political stability.

Having understood this, we will not be surprised by the RENMIN RIBAO editorial entitled "Correctly Appraise and Handle Class Struggle at the Present Stage" on 6 November regarded the status quo of Hong Kong, Macao and Taiwan as the primary reason for the existence of class struggle in the Chinese society. When explaining the existence of class struggle in Chinese society at present, the editorial wrote:

"In the first place, the exploiting class has only been eliminated under the jurisdiction of the PRC. There is still a part of the territory (Hong Kong and Macao) of the PRC we have not recovered and there is still a part (Taiwan) we have not reunified. Is it conceivable that the presence of bourgeoisie in those places has not the slightest influence on us? We must recover those places and we must accomplish the great undertaking of reunifying the motherland. After the recovery of these places and after reunification, based on the policy of the party, there will be no changes in the social system there. In other words, the bourgeoisie there may still exist.

"Most of the bourgeoisie there are patriotic. They hope for the early reunification of the motherland and are willing to make contributions to the four modernizations of the motherland. However, there are also some people who not only use economic means, but also noneconomic means, political means and other filthy means to influence and corrode some irresolute and unpatriotic elements. Taiwan radio stations have unceasingly broadcast reactionary propaganda and Taiwan secret agents have conducted all kinds of activities to sabotage our system and our socialist construction. They are the enemy of the Chinese people. Therefore, class struggle very obviously exists in this respect.

Judging from this paragraph of the article, regaining sovereignty over Hong Kong is not so much a matter of national principle but a matter of "is it conceivable that the presence of the bourgeoisie in those places has not the slightest influence on us?" because this is followed by the sentence "We must recover those places." As for the analysis of "those places," then apart from the patriotic bourgeoisie "who hope for the early reunification of the motherland and are willing to make contributions to the four modernizations of the motherland" (the editorial holds that such people are the overwhelming majority), there are also "some people" who "use... means to influence and corrode some irresolute and unpatriotic elements." Although the article did not explain who they are, but according to the following sentence "Taiwan radio stations," obviously those influenced and corroded are the people of mainland China. Precisely because there are such "people" in Hong Kong and Macao and moreover "they are the enemy of the Chinese people," "therefore, class struggle very obviously exists in this respect."

Some poeple think that the logic of this passage is confusing. It is said that there are class enemies in Hong Kong and Taiwan and that the class struggle is very obvious, yet it is also said that after the recovery and reunification "there will be no changes in the social system there." Is it conceivable that they will permit the continued existence of the class enemies? No, this is not likely. Actually, the logic of these words is very clear; because there are such filthy things in Hong Kong and Taiwan and the class enemies there are influencing and corroding mainland China, therefore, they must be recovered and reunited. After recovery and reunification, all noneconomic, political and filthy things and all reactionary propaganda and class enemies must, of course, be eliminated. However, as the overwhelming majority of the bourgeoisie are patriotic, therefore the social system may remain unchanged and they may continue to be bourgeoisie and "hope for the early reunification of the motherland and are willing to make contributions to the four modernizations of the motherland."

The reason many people feel that the logic of this passage of the RENMIN RIBAO editorial is confusing is because they are reading these words based on their understanding of reality in Hong Kong and Taiwan (in the actual world of Hong Kong and Taiwan, people understand what the intention of the overwhelming majority of bourgeoisie and common people is.) However if they read these words from another angle, based on the public security and propaganda needs of the communist cadres, the logic is perfectly clear.

This editorial has explained the mentality of many communist cadres. On the question of regaining sovereignty over Hong Kong, their point of departure is neither the angle of economy nor the angle of national principle but purely the angle of public security and the angle of propaganda. These two points together are precisely the angle of class struggle.

To understand the policy of Communist China toward Hong Kong, the angle provided by this editorial probably merits our greatest attention.

RENMIN RIBAO ON REAGAN'S LATIN AMERICA TRIP

HK071128 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 6

[Commentary by RENMIN RIBAO reporter Yuan Xianlu [5913 0341 4389]: "Trends in Latin America"]

[Text] After a brief exchange of formalities with President Reagan, Colombia's President Belisario Betancourt quickly dispensed with diplomatic language and sharply said to the distinguished American visitor, "in the past, every U.S. president who came to Colombia always told the people here what they must be thankful for." According to reports, Reagan at that time forced himself to laugh and replied, "I agree with your view. However, this time I have come to listen."

At the welcome dinner President Betancourt as expected frankly expressed his view toward the United States for Reagan to hear. He pointed out that the United States should revise its Latin America policy in line with the reality of this continent. In dealing with its relations with Latin American countries, the United States should respect the authority and needs of these countries. A U.S. reporter wrote, during President Betancourt's entire speech, President Reagan lowered his head to study the text of the speech without once lifting his head to look at his host. After the event, the WASHINGTON POST commentary said that this speech made by President Betancourt was "the sharpest speech made by a foreign leader to Reagan."

This scene, which took place in Colombia during Reagan's Latin American visit, is full of meaning. It profoundly shows that in the Latin America formerly regarded by the United States as its "backyard," safeguarding national independence and striving for national equality have become an irresistible historical trend.

The battle for the Malvinas has caused many Latin American countries to feel that they can only submit to the will of the United States but cannot protect their own interests in the so-called "pan-Americanism system." People in Latin American political circles have proposed "replacing pan-Americanism with Latin Americanism" to oppose the infiltration and intervention of this region by the superpowers by means of the solidarity of Latin American countries. For the sake of preventing the further development of this trend, the United States is endeavoring to mend its ties with Latin American countries. The recent U.S. support for the UN motion calling for the discussion of the question of the Malvinas despite British opposition is for the sake of changing its image in Latin America. This time the fact that Reagan has ignored the mountains of problems at home and has taken 5 days off for a visit to Latin America is to try and show the importance attached by the United States to Latin America.

Reagan's tour of Latin America also served the purpose of winning the support of the Latin American countries for the U.S. policy on Central America. For quite some time, a view has risen and gained ground among Latin American countries that all disputes should be resolved through peaceful consultations resulting from their disapproval of the U.S. policy on Central America. This time, when Reagan was visiting Costa Rica and Honduras, the leaders of El Salvador and Guatemala also went to those countries, respectively, to hold talks with Reagan. Obviously, this was an effort made by the United States to strengthen the arrangements of its policy on Central America.

During his 5-day tour, Reagan spend 3 days in Brazil. As a principal Latin American country, Brazil plays an important role in the area.

Brazil, Mexico and Venezuela all hold that disputes should be resolved through peaceful consultations on the Central American issue and there exists a great difference between them and the United States. Influenced by the present economic recession in Western countries, Brazil is facing some economic difficulties and urgently needs international credit to settle the problem of the repayment of its foreign debt. Centering Reagan's tour on Brazil, the United States, therefore, decided to grant a short-term loan to Brazil, relaxed some restrictions on Brazil in foreign trade and also established a joint work group with Brazil to strengthen cooperation between the two countries. U.S. officials have given enormous publicity to the matter, saying the United States and Brazil will establish a "special relationship" through Reagan's visit.

However, President Figueiredo of Brazil, in his speech delivered at the national banquet, particularly stressed that Brazil will adhere to its independent foreign policy. On the Central American issue, he pointed out that the source of the turmoil in the region lies in "universal poverty and social instability," reiterating that settlements can only be sought through "a peaceful process." On the African issue, he expressed his support for the independence of Namibia. The U.S. media hold that this speech showed that Brazil will not change its foreign policy to obtain U.S. economic aid. As for the "special relationship" between the United States and Brazil, an official of Brazil's Foreign Ministry says: "Let us forget the phrase: It is impossible."

Reagan's tour of Latin America has shown that the days when the United States could control the policies of Latin American countries are gone forever. Observers here believe that as the political trend is so evident in Latin America, the future crux will be whether the U.S. policy will follow this trend or go against it.

U.S. ADMITS UNDERSTATING ARMS SALES TO TAIWAN

HK070610 Beijing RENMIN RIBAO in Chinese 4 Dec 82 p 6

[Unattributed report: "The United States Understates Arms Sales to Taiwan by 90 Mortar Carriers"]

[Text] It was reported from Washington that the U.S. Department of Defense announced on 2 December that an omission of 90 mortar carriers had been made in its notification to Congress on arms sales to Taiwan made public 2 days earlier.

The Pentagon said the omission was "due to an oversight." Moreover, in the notification made public earlier, it was not stated that 24 of the 164 armored personnel carriers would be refitted into ambulances. However, the two changes would not affect the total amount of $97 million of arms sales to Taiwan.

QIAN QICHEN VIEWS FUTURE OF TALKS WITH USSR

AU071229 Vienna DIE PRESSE in German 7-8 Dec 82 p 1

[Thomas Chorherr dispatch from Beijing: "China Makes Concessions to Soviet Union in the Dialogue"]

[Text] Beijing -- Chinese-Soviet consultations on improving mutual relations will most likely continue swiftly in the coming year. As the Chinese delegation leader, Deputy Foreign Minister Qian Qichen, announced in talks with a group of Austrian journalists in Beijing on Monday, China no longer attaches importance to a simultaneous fulfillment of all items of that package of demands which the People's Republic had originally placed on the negotiating table. This means that China is evidently also interested in an intensification of bilateral relations.

The next round of talks will take place in Moscow. No date has been fixed, but Qian Qichen pointed out that Moscow obviously feels the "need" to establish closer contacts with China again. "We are ready for this, too. After all, we have common border of 7,000 kilometers, the longest land border in the world," the deputy foreign minister stated.

A complete normalization of relations is only possible, however, if: First, "the threat to China's northeastern border," where the Soviet Union has stationed 50 divisions is eliminated; second, the Soviet troops are withdrawn from Afgahnistan; and third, the Soviet Union agrees to a solution of the Cambodia problem along Chinese lines. This implies withdrawal of the Vietnamese troops and an international guarantee for Cambodia which should be a neutral, free country.

"It is hardly possible for the Soviet Union to solve all these problems at once, but even if there were changes with respect to one or another item this would lead to an improvement of relations," the deputy foreign minister stated.

Relations with the United States are not free from problems either. "Do people think we will put up with a violation of our sovereignty out of fear of the Soviet Union? We certainly shall not do this," Qian Qichen stated, referring to U.S. arms deliveries to Taiwan. "So long as there is hegemonism we shall pursue an antihegemonistic policy."

'Little Steps Must Be Taken'

AU071233 Vienna KURIER in German 7 Dec 82 p 3

[Hans Rauscher report from Beijing: "Interview: China: Skepticism About Dialogue With Moscow"]

[Text] How seriously should the talks about a rapprochement between China and the Soviet Union be taken? An Austrian journalists' delegation was able to inform itself about this international puzzler at first hand in Beijing. PRC Deputy Foreign Minister Qian Qichen, who conducted the pertinent negotiations with the Soviet representative Ilichev and will resume them next year in Moscow, appears skeptical but not stiffly intransigent. "The talks will last a long time. They will be marathon talks."

Qian stated that China has acknowledged the fact that the Soviet Union desires better relations but "before that, obstacles must be eliminated." These obstacles comprise the great Soviet troop concentration on the Soviet-Chinese border, the Soviet occupation of Afghanistan and support for the Vietnamese invasion of Cambodia.

Chinese Deputy Foreign Minister Qian also hinted in the talks that it will hardly be possible for the Soviet Union to solve all these problems. "Little steps must be taken concerning these items to improve relations."

The Chinese-Soviet rapprochement is being watched with interest and probably not without concern, particularly in the United States. Qian stated in this respect: "We do not want to play the Soviet card. But we do not wish to play the American card either. Nor will we permit anybody else to play China as a card. The relations between the United States and China on the one hand and those between the USSR and China on the other are not interconnected at all."

Throughout the entire conversation Qian underscored that China continues to look very skeptically at Soviet aspirations to domination. Concerning the peace movement in Western Europe, he said it elicits China's sympathy but added: "The members of the peace movement will find out where the real danger comes from."

Talks To Resume Next Year

OW070858 Hong Kong AFP in English 0640 GMT 7 Dec 82

[By Elisabeth Chang]

[Excerpt] Beijing, Dec. 7 (AFP) -- Sino-Soviet relations could improve if Moscow makes concessions on one of the three fundamental conditions set by Beijing for a normalization between the two countries, a senior Chinese official has indicated.

Vice Foreign Minister Qian Qichen, China's negotiator at the Sino-Soviet discussions begun recently, also stressed that China would continue to regard the Soviet Union as "hegemonist" so long as the three Chinese conditions were not met, Austrian sources said here today.

Mr. Qian made the remarks yesterday while welcoming a delegation of Austrian journalists currently visiting China.

When it resumed its dialogue with Moscow, suspended for nearly three years because of the Soviet intervention in Afghanistan, China publicly stated that it saw the large deployment of Soviet troops along its borders, an end to Soviet intervention in Afghanistan and the Kremlin's support for Vietnamese control of Cambodia as a threat to its security.

Informed circles here generally believe that a reduction of forces along the 7,500-km (4,500 miles) Sino-Soviet borders offers the best chance for mutual concession by the two communist giants.

Chinese sources recently described as important remarks made last month by PRAVDA Editor-in-chief Viktor G. Afanasyev, a member of Moscow's Central Committee, who told Japanese journalists that the Sino-Soviet discussions over bilateral relations could lead to an agreement on troop reduction along both sides of the borders.

Beijing already indicated in recent weeks that the three "obstacles" it sees to improved ties with Moscow should not necessarily be lifted simultaneously.

Meanwhile, Chinese leaders have just made a gesture toward Moscow by dispatching then Foreign Minister Huang Hua to the funeral of the [words indistinct] Leonid Brezhnev in Moscow last month. Mr. Huang returned from Moscow after a 90-minute meeting with Soviet Foreign Minister Andrey Gromyko, declaring that he was "quite optimistic" about the prospects of talks now underway between China and the Soviet Union.

Mr. Qian told the Austrian journalists that the talks would resume in Moscow next year. But the vice minister ruled out any restoration of party-to-party ties between Beijing and Moscow in the next two years.

ZHAO ZIYANG MEETS JAPANESE TRADE DELEGATION

OW031832 Beijing XINHUA in English 1710 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- Zhao Ziyang, premier of the State Council, said here this afternoon that China's economic adjustment has been successful in a meeting with a delegation from the Japan Association for the Promotion of International Trade. The delegation is led by Shigeichi Koga, vice-chairman of the association.

Zhao said the Sixth Five-Year Plan is a preparation as well as a foundation for the Seventh Five-Year Plan and future economic development. According to the past experience, China's economic construction requires a stable progress, he said.

"The present adjustment of the economy has been very successful which has brought about a turn for the better in the country's economic situation. At this moment, we should remain clear-headed and never forget past lessons. We must work steadily," Zhao said.

Zhao said that the steady and smooth development of China's economy will provide favorable conditions for economic cooperation between China and Japan. He said that peace and friendship between the two countries, and mutual benefit and long-term stability will be the basis for the development of such cooperation.

Koga said that during their stay in China, they have met with officials of many Chinese departments and learned about China's Sixth Five-Year Plan. He said these meetings have left a deep impression on delegation members.

Yasue Katori, Japanese Ambassador to China, was present at the meeting.

This evening, Koga gave a return banquet, which was attended by Liao Chengzhi, vice-chairman of the Standing Committee of the National People's Congress, Bo Yibo, state councillor; Du Xingyuan, secretary-general of the State Council; Wang Yaoting, chairman of the China Council for the Promotion of International Trade; and other people from China's economic and trade organizations.

BO YIBO VISITS JAPANESE INDUSTRIAL EXHIBIT

OW031234 Beijing XINHUA in English 1221 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- State Councillor Bo Yibo paid a visit to the Japanese light industrial machinery and technology exhibition at the Beijing exhibition center here this afternoon.

Accompanied by Vice-Minister in Charge of the State Economic Commission Ma Yi, and Vice-Chairmen of the Japan International Trade Promotion Association Teiji Hagiwara and Shigeichi Koga, Bo Yibo inspected the electronic products, teaching aids, photographic apparatuses, and textile, food processing and woodworking machinery on display.

The exhibition, sponsored by the Japan International Trade Promotion Association which was opened on Wednesday will wind up on December 10.

JAPAN'S NAKASONE ON FOREIGN, DOMESTIC POLICY

OW031856 Beijing XINHUA in English 1647 GMT 3 Dec 82

[Text] Tokyo, December 3 (XINHUA) -- The newly elected Japanese Prime Minister Yasuhiro Nakasone today outlined his foreign and domestic policies to the Diet (Japanese parliament), showing that he would continue by and large the policies of former Prime Minister Zenko Suzuki.

On foreign relations, Nakasone said that "Japan's basic foreign policy is to exert independent diplomatic efforts" in cooperation with the U.S. and West European countries. He described the United States as "Japan's most important partner", pledging to "further strengthen the relationship of trust between Japan and the United States."

Nakasone also pledged to "further strengthen mutual understanding and friendly relations with the countries of Asia." He said, "I would like to play a positive role for the peace and prosperity of this region which is geographically so near to us." He also stressed that Japan would make greater efforts to promote cooperation with developing countries in the economic and technical fields.

On relations with the Soviet Union, Nakasone said that he would make "every effort to establish stable relations" with that country on the basis of genuinely mutual understanding after the settlement of the territorial dispute over Japan's northern territories occupied by the Soviet Union since the end of the last world war, and the conclusion of a peace treaty between the two countries.

On Japan's defense policy, Nakasone said his government would keep the Japan-U.S. security treaty and try to achieve "a qualitative defense buildup necessary for self-defense." However, he pledged, "Japan will not become a major military power and will pay attention not to be of any threat to its neighboring countries."

On internal affairs, Nakasone said that the economic situation was in severe circumstances. He said that his government would try to expand domestic demand and implement measures to help slumping industries and combat unemployment. He also pledged to tackle the current financial difficulties as one of the most urgent tasks.

Meets Shanghai Group

OW061740 Beijing XINHUA in English 1655 GMT 6 Dec 82

[Text] Tokyo, December 6 (XINHUA) -- Japanese Prime Minister Yasuhiro Nakasone expressed the hope here today that the friendly relations between Japan and China will be further developed in all fields. Meeting the Shanghai Municipal People's Government delegation headed by Wang Daohan here this afternoon, Nakasone said the Baoshan Iron and Steel Mill, now being built in the suburbs of Shanghai, is "the symbol of Japan-China friendship," and Japan hopes to further cooperate in the future.

The Shanghai Municipal People's Government delegation arrived in Japan on November 25.

JAPAN'S FOREIGN MINISTER MEETS USSR AMBASSADOR

OW061656 Beijing XINHUA in English 1549 GMT 6 Dec 82

[Text] Tokyo, December 6 (XINHUA) -- Japanese Foreign Minister Shintaro Abe told the Soviet Ambassador Vladimir Pavlov today that Japanese-Soviet friendship could not be established unless the dispute over Japan's northern islands is settled. During their 40-minute talks, the foreign minister told Pavlov that the settlement of the problems of the northern islands is the prerequisite for improving relations between the two countries. The friendship treaty and the development of economic relations between the two countries cannot be materialized when these problems are set aside, the minister said.

The Soviet ambassador told Abe that the Soviet position on the northern islands has not changed.

JAPAN, U.S. BEGIN MILITARY JOINT EXERCISE

OW061658 Beijing XINHUA in English 1512 GMT 6 Dec 82

[Text] Tokyo, December 6 (XINHUA) -- The largest ever Japanese-U.S. joint exercise involving 1,500 Japanese and 600 American ground troops began in central Hokkaido Sunday, according to Japanese press reports. The 5-day exercise, codenamed "Yamasakura III," is the third command post exercise to be carried out in Japan this year.

It is reported that the exercise is designed to further Japanese-U.S. military cooperation in fighting a common enemy with Hokkaido as the imaginary battleground. The exercise will center on the effective battlefield resistance and transport of U.S. ground forces into Hokkaido directly from the U.S. mainland and Hawaii.

The exercise is being carried out on the supposition that 50,000 Japanese troops confront a 30,000-strong hypothetical enemy comprising two Soviet motorized infantry divisions on the coastline of Hokkaido and are forced to effect a gradual withdrawal to the inland. Finally the Japanese troops push the invaders back to the sea with close military backup from 40,000 U.S. troops.

Local mass organizations staged a demonstration against the joint exercise.

JAPANESE MEDIA ON ZHAO SIXTH 5-YEAR PLAN REPORT

OW031314 Beijing XINHUA in English 1259 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- The Japanese press generally believes that China's Sixth Five-Year Plan as reported by Chinese Premier Zhao Ziyang to the Fifth National People's Congress is realistic and can be fulfilled.

KYODO, a leading Japanese news agency said that the plan is solid in content. It will lay a comprehensive economic foundation for a high growth rate of the national economy toward the end of the century, it said. For this aim, it said, China will continue with its current economic readjustment program in the Sixth Five-Year Plan period.

It noted that the Sixth Five-Year Plan has called for the allocation of 38.5 percent of its capital investment to energy and transportation, the sectors generally believed to be the biggest obstacles to China's economic development. The percentage is solid. Referring to the 68 percent increase of investment alloted to science and culture over that of the last five-year plan, KYODO said this shows that China attaches importance to building a sound economic foundation.

ASAHI SHIMBUN reported that many people believe that China's Sixth Five-Year Plan can be fulfilled. MAINICHI SHIMBUN said Premier Zhao's report shows that China seeks no excessively high targets but attaches importance to economic effect. YOMIURI SHIMBUN considers the key note of China's Sixth Five-Year Plan is to realise a comprehensive and steady development of the national economy.

Commenting on the great importance attached to developing energy and transportation networks as compared with construction of large industrial projects, NIHON KEIZAI SHIMBUN said if these sectors fare well, the prospects for the planned four-fold increase in output are bright.

SHANGHAI, OSAKA SIGN EXCHANGES AGREEMENT

OW060259 Shanghai City Service in Mandarin 2300 GMT 1 Dec 82

[Text] According to a WEN HUI BAO special dispatch from Osaka, a summary of talks was signed in Osaka on the morning of 30 November by the responsible persons of Shanghai Municipality and Osaka Prefecture. According to the summary, Shanghai and Osaka will promote friendly exchanges in 10 fields, beginning in 1983, on the basis of the three principles: equality and mutual benefit, good will and cooperation, and stability and development. The summary was signed by Shanghai Mayor Wang Daohan and Osaka Governor (Yasuoka).

The exchanges in 10 fields include: industrial technology, economy and trade, agricultural technology, medicine, culture, science, education, physical culture, youth and architectual technology. The summary of the talks was agreed upon at the third session of the meeting to promote friendly exchanges between Shanghai Municipality and Osaka Prefecture, which was held on the morning of 30 November.

NODONG SINMUN ON KOREAN REUNIFICATION PRINCIPLE

OW070959 Beijing XINHUA in English 0737 GMT 7 Dec 82

[Text] Pyongyang, December 7 (XINHUA) -- NODONG SINMUN points out in an article today that Korea's reunification problem must be solved on the basis of the principle of national independence. The article says the stationing of U.S. troops in South Korea has prevented democratization in South Korea for it is aimed at controlling that part of Korea and prolonging the split of the country. The article condemns the Chon Tu-hwan clique for suppressing South Korean students and patriots, who demand social democracy in South Korea and reunification of the fatherland.

PENG CHONG MEETS AUSTRIAN JOURNALISTS 6 DEC

OW061534 Beijing XINHUA in English 1510 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Peng Chong, vice-chairman of the Standing Committee of the National People's Congress, met here this afternoon with a delegation of Austrian journalists led by Professor E. Mayer.

Peng Chong briefed the Austrian journalists on the Fifth Session of the Fifth National People's Congress now in session in Beijing.

Peng said the exchanges of visits between press circles of China and Austria will promote the understanding and friendly relations between the two countries. Wolfgang Wolte, Austrian ambassador to China, was present.

DANISH BILL WOULD SUSPEND NATO APPROPRIATIONS

OW272254 Beijing XINHUA in English 1840 GMT 27 Nov 82

[Text] Stockholm, November 27 (XINHUA) -- The Danish Folketing (parliament) adopted a bill Friday calling for the suspension of Denmark's NATO appropriations that would be used in deploying 572 medium-range missiles in Europe. The bill was tabled by the opposition Socialist People's Party and the left-wing Socialist Party, with the backing of the Social Democrats and Radical Liberals.

The parliament decided to set up a committee to study the issue and further debate was planned pending a final resolution during the parliament session.

Prior to this, the Social Democrats, formerly the ruling party, had identical views with other political parties over the country's security and foreign policies, and the Social Democratic Party signed NATO's "double decision" in 1979 when in office. The shift of stand on the part of the Social Democrats was condemned by the present government on the grounds that it would sap Denmark's position in NATO.

FRENCH PRESIDENT MEETS OUTGOING PRC ENVOY

OW030413 Beijing XINHUA in English 0237 GMT 3 Dec 82

[Text] Paris, December 2 (XINHUA) -- President Francois Mitterrand today met with Chinese Ambassador to France Yao Guang, who is leaving for home at the end of his tenure of office, and discussed further development of France-China relations.

Yao Guang gave a farewell reception tonight. Among the 400 people present on the occasion were Minister of State for Transport Charles Fiterman, Minister of sea area [Maritime Affairs] Louis le Pensec, Minister Delegate in charge of youth and sports at the Entertainment Ministry Edwige Avice, Chief of Staff of the Armed Forces Jeannou Lacaze, General Secretary of the Communist Party of France Georges Marchais, Mayor of Paris Jacques Chirac, and diplomats of other countries.

President of the Senate Alain Poher and Mayor Chirac met with Yao Guang on separate occasions December 2 and December 1.

VISIT BY HUSAYN-LED ARAB LEAGUE COMMITTEE

Peace Plan Discussed With Zhao

OW061210 Beijing XINHUA in English 1125 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Chinese Premier Zhao Ziyang held talks with the delegation of the seven-member committee of the Arab League led by King Husayn ibn Talal of Jordan, at the Great Hall of the People here this morning.

It was learned that the talks proceeded in a sincere, friendly and harmonious atmosphere.

King Husayn outlined the Arab peace plan adopted at the 12th summit meeting of Arab states in September.

He said the Palestinian issue is a key to the Middle East question. If this issue does not have an overall and just solution there will be no peace and security in the Middle East. He condemned Israel for denying the Palestinian people their national rights and for killing Palestinian and Lebanese people in Beirut.

The Jordanian king said the Arab peace plan was based on resolutions of the United Nations. It emphasizes that no armed force should be used to seize territories of other countries, that Israel must withdraw from the Arab territories it occupied in 1967, and that the Palestine people must regain the right to establish their own state.

King Husayn urged permanent member states of the U.N. Security Council to work for an overall and just solution of the Middle East question.

The Chinese premier thanked King Husayn for leading an Arab delegation to China to brief the Chinese Government on Arab countries' position on the Middle East question.

Zhao Ziyang pointed out that the eight-point plan for the solution of the Middle East question adopted at the 12th summit meeting of Arab states provides a good basis for solving the question in a reasonable, practical, overall and just way. "We appreciate and support it," he said.

Premier Zhao Ziyang said the Chinese Government always holds that to bring about a sustained peace in the Middle East Israel must withdraw from the Arab territories it occupied in 1967, including Jerusalem, recognize the legitimate national rights of the Palestinian people, including return to their homeland, national self-determination and the right to build their own state. Only on this basis can all countries in the Middle East enjoy their rights to independence and peaceful existence. The Arab peace plan coincides with China's position.

The Chinese premier said, "We hold that all peace-loving and justice-upholding countries should support the Arab peace plan and so should the U.N. Security Council."

Premier Zhao Ziyang said that in the final analysis, the recovery of the Palestinian people's national rights and the overall and just settlement of the Middle East question depends on Arab unity. He said the 12th summit meeting of Arab states reflected the Arab people's aspiration and determination and contributed to Arab unity.

Discussing the settlement of the Middle East question, Zhao Ziyang said that the most pressing issue today is to check Israeli aggression and force Israel to pull out all its aggressor troops unconditionally from Lebanon. The Chinese Government holds that Israel's ferocity in committing aggression is directly connected with the United States' connivance and support. The U.S. should correct its policy of shielding Israel and ignoring the Palestinian people's national rights.

Speaking of the traditional friendship between China and Arab states, Premier Zhao Ziyang said that China and Arab states have always sympathized with and supported each other in the common struggle against imperialism, hegemonism and Israeli aggression and expansion and for developing their national economy and safeguarding world peace. He said that China hopes to promote friendly relations with all Arab countries. He declared that whatever happens in the world, the Chinese Government and people will continue to firmly support the just cause of the Arab and Palestinian people.

King Husayn thanked China for rendering consistent support to the Arab and Palestinian people in their just struggle. He said that support has added to the Arab people's confidence. The Arab countries' position on settling the Middle East question, he said, embodies the Arab people's feelings and China's position coincides with that of the Arab countries. He expressed the hope that relations between the Arab states and China will develop on the basis of mutual respect and trust.

Taking part in the talks on the Arab side were 'Abd al-Halim Khaddam, Syrian vice-premier and minister of foreign affairs; Sa'ud ibn al-Faysal minister of foreign affairs of Saudi Arabia; M'hamed Boucetta, Moroccan minister of state in charge of foreign affairs; Marwan al-Qasim, Jordanian minister of foreign affairs; Beji Caid es-Sebsi, Tunisian minister for foreign affairs; Ahmed Taleb Ibrahimi, Algerian minister of foreign affairs; Mahmud 'Abbas, member of the Executive Committee of the Palestine Liberation Organization; Chedli Klibi, secretary general of the Arab League; and Ahmad Lozi, chief of royal cabinet of Jordan.

On the Chinese side were Foreign Minister Wu Xueqian, Vice-Foreign Minister Wen Yezhan and advisor to the Foreign Ministry He Ying.

Hu Backs Arab Struggle

OW061306 Beijing XINHUA in English 1252 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Hu Yaobang, general secretary of the Central Committee of the Communist Party, told the seven-member committee of the Arab League in the Great Hall of the People this afternoon China will support the struggle of the Arab people till the final victory.

Hu said the delegation, led by Jordan's King Husayn, is devoted to peace in the Middle East. The Chinese people warmly welcome the delegation.

He said the disastrous effects of Israeli aggression and expansion must be eliminated and the national rights and dignity of the Palestinian people restored, while recognizing the Israeli people's right to peaceful existence.

Hu told the delegation the struggle of the Arab and Palestinian people is a just one. He said he hoped the Arab people will strengthen their unity, win as many countries and people as possible to their side and distinguish the belligerent forces in Israel from the Israeli people.

He said he was convinced that as long as the Arab people continue their efforts and struggle, they are bound to win the final victory.

Husayn said the delegation's discussion this morning with Premier Zhao Ziyang was quite helpful. Both sides share an identical stand, he said. He thanked China for its consistent support to the Arab people and that they are fully confident of victory.

Hu Yaobang asked the foreign ministers of the Arab countries and the representatives of the Palestine Liberation Organization present at the meeting to convey Chinese leaders' regards to their countries' leaders and Chairman 'Arafat.

Foreign Minister Wu Xueqian was present.

Zhao Hosts Banquet for Group

OW061630 Beijing XINHUA in English 1601 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- Chinese Premier Zhao Ziyang gave a banquet for the seven-member committee of the Arab League led by Jordan's King Husayn in the Great Hall of the People this evening.

Zhao Ziyang said: "The delegation briefed us on the situation in the Middle East and exchanged views with us. This manifests the trust and friendship of the Arab people toward the Chinese people.

"The Chinese Government and people are converned about the Middle East situation. Peace and stability in the Middle East not only are closely linked with the interests of the people of countries in the Middle East, but also affect world peace and security," he said.

"Israeli authorities maintain a policy of jingoism and have long wantonly engaged in military aggression against Arab countries. The perverse acts of the Israeli authorities have caused the intense and turbulent situation in the Middle East," he said.

"Only when the aggressive expansion of Israel is contained, and the national rights of Palestinian and other Arab people restored, can a just, all-round and permanent peace be achieved in the Middle East," he said.

Zhao said the United Nations and its Security Council have the responsibility to realize peace in the Middle East, restore the national rights of the Palestinians and uphold the international justice. He said all permament members of the Council have the duty to promote any programs which are conducive to solving the Middle East problem in a just and all-round way instead of hampering or undermining these programs.

He said the Chinese Government and people strongly condemn Israeli aggression and expansion, and firmly support the people of various Arab countries in their efforts for a solution of the Middle East problem.

Zhao said the eight principles on solving the Middle East problem put forward at the recent summit meeting of Arab states in Fes, Morocco, has provided a sound basis for solving the Middle East problem. The Chinese Government appreciates and supports this effort.

On relations between China and Arab countries, Zhao said China and Arab countries all belong to the Third World. There has been a traditional friendship between the Chinese and Arab peoples.

"We have always sympathized with and supported each other, both in the struggles against imperialists, colonialists and the Israeli aggression and expansion, and in the common cause of developing our national economies and safeguarding world peace," Zhao said.

He said it has been the consistent stand of the Chinese Government that united and powerful Arab countries are not only vital to the interests of the Arab people, but are also the common aspiration of the Chinese people and the peoples of the world.

Zhao reiterated the Chinese people's stand on the side of the Arab people. He also emphasized the nation's aspiration to develop friendly relations in political, economic, trade and cultural fields with Arab countries.

King Husayn said the delegation had a long talk with Premier Zhao Ziyang this morning. The premier was brief on the situation confronting Arab countries and on the Arab and Palestinian peoples' sufferings resulting from the Israeli occupation and the escalating Zionist aggression.

"China understands very much our objectives, our views are converging and identical with China's," the kind said.

He said the Arabs reached agreement on the resolution of the Fes summit, which led to the unity among them. Now they are making efforts to talk with various countries and are working continuously and earnestly to restore their rights and liberate their land under occupation since 1967. Primarily, he said, they want to liberate the symbol of justice and peace -- Arab Jerusalem, so that Arab and Palestinian people, like all other peoples who have won their freedom, may exercise their right of self-determination.

Husayn said the Arab people don't want to involve themselves in international disputes. They oppose the greedy hegemonists who covet their natural resources and interfere in their internal affairs.

"They have their own capability to carry out the responsibility for their own security and realization of social prosperity ," he said.

After reviewing the traditional friendship between the Arab and Chinese peoples, Husayn said "Ever since the rewawakening and the struggle for freedom of your great nation, the relations between the Chinese and the Arab nations have become closer each passing day. On the Palestinian and all Arab questions, the Arab people have always found supporters and sympathizers in you.

"As a united Arab delegation living among you, we would like to convey to you once more the friendship of the Arab people. We have been hoping to cooperate with you in all fields beneficial to both of us," he said.

"The great Chinese people advocate the principles of justice, freedom, cooperation and friendship among nations and peoples, as well as independence, through self-reliance and the pursuit of freedom. They give full play to the feelings of the nation's citizens of being masters of the country, thus making them willing to devote their all for their contry. In these aspects, the Chinese people have made great contributions," Husayn said.

"The delegation's visit reflects the fact that the Arab people are willing, and endeavor, to increase the cooperation between the Arab countries and China, and enhance the existing friendhsip between them," he said.

Present were Wei Guoqing, vice-chairman of the Standing Committee of the National People's Congress, Wu Xueqian, foreign minister, Chi Haotian, deputy chief of general staff of the Chinese Poeple's Liberation Army.

Also on hand were diplomatic envoys of Arab countries and an official of the mission of the Palestine Liberation Organization in Beijing.

Prior to the banquet, Wu Xueqian gave a party for the foreign ministers of the committee and the P.L.O. representative.

Significance Noted

OW051659 Beijing XINHUA in English 1639 GMT 5 Dec 82

["Mission for Fair, Comprehensive Solution to Mid-East Issue" -- XINHUA headline]

[Text] Beijing, December 5 (XINHUA Correspondent) -- China is receiving with open arms the Arab League's committee of seven delegation led by Jordanian King Husayn ibn Talal, which arrived here this evening on another leg of its tour of the permanent members of the U.N. Security Council.

There is every reason to welcome these envoys who are bringing with them an Arab peace plan, which constitutes the basis for a fair and comprehensive solution to the Middle East problem that has agonized the Arabs and disturbed other peoples too much and for too long a period to allow any delay in resolution.

Adopted at the 12th Arab League summit held last September in Morocco's Fes, the plan consists in eight principles which struck home in solving the matter at issue by calling for Israel's withdrawal from all the occupied territories, the creation of an independent Palestinian state and a U.N. Security Council guarantee of peace for all the states in the region.

It goes without saying that these are the indispensable criteria if there is going to be any fair and comprehensive solution to the problem at all, and they are in full accord with the U.N. resolutions related to the matter.

What is more, the Fes plan is the product of an Arab consensus and solidarity. The whole question is now left to the behavior of Israel and its patron on whom the eyes of the public are fixed.

The root cause of the protracted Middle East trouble and unrest has been the unbridled external expansion and aggression of Israel under U.S. aegis. The United States, which regards Israel as its closest ally and a beach-head in its pursuit of hegemonic interests in the Middle East, has been giving it seven million dollars a day in aid, in addition to large quantities of sophisticated arms. Although there seemed to be some change in the U.S. stance in recent months, the Reagan administration still refuses to admit that Israel has committed flagrant acts of aggression abroad and to recognise the Palestinian people's right to self-determination, including their right to establish an independent state, and the Palestine Liberation Organization, the sole legitimate representative of the Palestinians.

An Israel steeped in evil plus continued U.S. support for it constitutes the major block in the way of the Arab peace plan, and makes it all the more necessary for the peace and justice loving people all over the world to countenance it.

The European Economic Community, which also has vital interests in the Middle East, looks at the Middle East issue in a different way. At the Venice summit in June, 1980, it recognized the right of the Palestinian people to full self-determination and acknowledged the need for PLO connection with any peace talks on the matter. Furthermore, France recognized the Palestinians' right to establish a state of their own, to the welcome of the Arab world.

What is regrettable, however, is that the seven-member committee delegation has failed to realize its planned trip to Britain because of the presence of a PLO representative in the mission. The refusal of Britain to receive him has added to the complexities which the Arab world is facing in advancing its peace objective in the area.

It is the hope of the Chinese people that the Arab peoples will further increase their unity in combating their common enemy and surmounting the difficulties in the way so that the Middle East problem can be solved comprehensively and fairly.

Commentator on Arab Issues

HK070943 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 6

[Commentator's Article: "The Problems of the Middle East Must Be Solved Fairly and in Their Entirety"]

[Text] On behalf of the Arab League, a delegation of the seven-member committee of the Arab League has come from afar to visit China -- which is a permanent member of the UN Security Council -- and to brief the Chinese leaders on the Arab states' plan and principled stand on a solution of the Middle East problem. This important step taken jointly by the Arab states to solve the Middle East problem in a just and comprehensive way fully manifests the Arab states' sincerity and realism in solving the Middle East problem. The Chinese people warmly welcome and highly appraise them.

The Middle East is one of the hot spots of the world today and developments in that situation greatly affect the peace and stability of the world. All countries of the world today are concerned about ways to solve the Middle East problem. Some countries have proposed several different plans. Among them, U.S. President Ronald Reagan's new proposal has been much talked about. This new proposal has some positive factors but indicates that the United States basically has not changed its wrong stand of disregarding the Palestinian people's legal rights and being partial to Israel. Therefore, it cannot truly solve the Middle East problem.

Summing up their experiences of struggle in the past several decades and proceeding from reality, the Arab states put forth their plan for solving the Middle East problem at the 12th summit of the Arab League held in September this year. This plan stressed that Israel must withdraw from its occupied Arab land. It reiterated that the PLO was the only legitimate representative of the Palestinian people and that the Palestinian people had the national right to build a Palestinian state. It also asked the United Nations Security Council to guarantee peace in the countries (including the independent Palestinian state) in the region.

This was the first workable and constructive plan for solving the Middle East problem jointly put forth by the Arab states since the outbreak of the Arab-Israeli conflict. It fully expressed the common wishes and voices of vast numbers of Palestinians and Arabs. Adhering to their consistent stand of firmly supporting the Palestinian people in their just struggle, the Chinese Government and people appreciated and supported this plan as soon as it was put forth.

At present, the plan put forth by the Arab States and the vigorous efforts they have made to implement this plan have won extensive approval from all countries and people of the world that uphold justice. The Chinese people are deeply convinced that whatever Begin and his like may do to hamper and undermine this plan, the Middle East problem may and surely will be solved in a just, reasonable and comprehensive way provided the Arab people become more unified and the heroic Palestinian people fight bravely and unremittingly under the leadership of the PLO, their sole legitimate representative.

ISRAELI WEST BANK SETTLEMENT ACTS RAPPED

RENMIN RIBAO Commentary

HK040836 Beijing RENMIN RIBAO in Chinese 4 Dec 82 p 6

["Short Commentary": "New Provocation of the Begin Authorities"]

[Text] According to reports, the Begin authorities have decided to establish Jewish towns on the West Bank of the Jordan and to increase the Jewish population there by 300 percent to 75,000 within 3 years. This is yet another provocation by the Begin authorities against the world's people.

The Israeli authorities have been clamoring for a long time that the West Bank, inhabited by Palestinians, is ancient Jewish land and a component part of Israeli territory. The unceasingly have built Jewish settlements in that area -- so far over 100. The Israeli authorities thus are vainly attempting to claim the West Bank for themselves and to obstruct and sabotage a just and fair solution of the Palestinian problem. The behavior of the Israeli authorities consistently has been strongly opposed by the international community. Even the U.S. Government, which supports Israel, holds that Israel should freeze its expansion of settlements.

Far from retracting amid international condemnation, the Israeli authorities now actually have intensified their efforts and speeded up their annexation of the West Bank, openly taking this to the point of wanting to build Jewish towns, increase the proportion of the Jewish population, change the West Bank's affiliation, and completely obliterate the Palestinian cause. The international community cannot tolerate these arrogant moves of the Begin authorities.

The new tricks of the Begin authorities are also a challenge to the Reagan Middle East plan. The Begin authorities came out with this trick just after the United States had announced it was providing Israel with a huge sum in economic aid. People are closely watching to see if this time the United States again will resign itself to the situation.

West Bank Ex-Mayors' Views

OW061754 Beijing XINHUA in English 1540 GMT 6 Dec 82

[Text] Damascus, December 6 (XINHUA) -- Israel is pursuing a policy of colonial occupation on the West Bank and Gaza, former mayor of Halhoul Mohammed Milihim told XINHUA recently.

Milihim is one of the former mayors in the West Bank who have been forced to leave West Bank because of their opposition to the Israeli annexation. In an interview in Amman, the capital of Jordan, a few days ago, he talked about the intensifying Israeli control and annexation of West Bank and Gaza.

Milihim said Israel has set up 138 settlements on West Bank and 12 others on Gaza since 1967. 40 of them were set up by Israeli troops. Israeli Defense Minister Ariel Sharon has said those troops' settlements are part of the Israeli armed forces.

He said these settlements have cut up and encircled the Palestinian land, indicating the Israeli annexation attempt. He said one of the reasons for his expulsion in 1980 was his opposition to the Jewish settlements when he was a mayor. Since then, the Israeli authorities have tried to appoint their own man to be the mayor, but their attempt failed because of the Palestinian people's opposition. "This in itself shows our people's strength and determination," he stressed.

The former mayor of Khalil, Fahd Gawasmi, said that the Israelis used to set up their settlements around the city, but they are moving their homes to the city center now. The new settlers, armed with automatic rifles, beat residents in the street, terrorizing the atmosphere in order to compel the Palestinian people to leave. "About 5,000 people have left their homes since Israel's occupation of the city in 1967," he noted.

In Amman, former dean of the Nablus University Munzer Salah told XINHUA that since last September, the Israeli authorities have been forcing the teachers of the university to sign a "letter of pledge." The letter warned that they will be expelled from the West Bank if they still promise to support the Palestinian Liberation Organization (PLO). The teachers rejected the authorities' unreasonable demand, he confirmed.

Salah himself was relieved of the post of dean of Nablus University because of his rejection of Israel's "letter of pledge."

Salah claimed that the Israeli authorities have failed in their attempt to show the world that the intellectuals in the West Bank do not support the PLO. Instead they have declared to the world with their deeds that they are participants in, and defenders of, the Palestinian cause, he stated.

The former mayor of Bireh, Abdul Jawad Salah, told XINHUA that Israel is attempting to wipe out the Palestinian armed force through its invasion of Lebanon and then to press the Palestinian people in the occupied areas to give in. But the Palestinians are still fighting for the restoration of their national right and an independent Palestinian state, he added.

TEXT OF NEW PRC CONSTITUTION PUBLISHED

OW041134 Beijing XINHUA in English 1114 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- Following is the full text of the new constitution of the People's Republic of China adopted by the Fifth National People's Congress at its fifth session here this afternoon.

Constitution of the People's Republic of China

(Adopted on December 4, 1982, by the Fifth National People's Congress of the People's Republic of China at its fifth session)

Section VII: The People's Courts and the People's Procuratorates

Chapter Four: The National Flag, the National Emblem and the Capital

Constitution of the People's Republic of China

Preamble

China is one of the countries with the longest histories in the world. The people of all nationalities in China have jointly created a splendid culture and have a glorious revolutionary tradition.

Feudal China was gradually reduced after 1840 to a semi-colonial and semi-feudal country. The Chinese people waged wave upon wave of heroic struggles for national independence and liberation and for democracy and freedom.

Great and earth-shaking historical changes have taken place in China in the 20th century.

The Revolution of 1911, led by Dr Sun Yat-sen, abolished the feudal monarchy and gave birth to the Republic of China. But the Chinese people had yet to fulfill their historical task of overthrowing imperialism and feudalism.

After waging hard, protracted and tortuous struggles, armed and otherwise, the Chinese people of all nationalities led by the Communist Party of China with Chairman Mao Zedong as its leader ultimately, in 1949, overthrew the rule of imperialism, feudalism and boureaucrat-capitalism, won the great victory of the new-democratic revolution and founded the People's Republic of China. Thereupon the Chinese people took state power into their own hands and became masters of the country.

After the founding of the People's Republic, the transition of Chinese society from a new-democratic to a socialist society was effected step by step. The socialist transformation of the private ownership of the means of production was completed, the system of exploitation of man by man eliminated and the socialist system established. The people's democratic dictatorship led by the working class and based on the alliance of workers and peasants, which is in essence the dictatorship of the proletariat, has been consolidated and developed. The Chinese people and the Chinese People's Liberation Army have thwarted aggression, sabotage and armed provocations by imperialists and hegemonists, safeguarded China's national independence and security and strengthened its national defence. Major successes have been achieved in economic development. An independent and fairly comprehensive socialist system of industry has in the main been established. There has been a marked increase in agricultural production. Significant progress has been made in educational, scientific, cultural and other undertakings, and socialist ideological education has yielded noteworthy results. The living standards of the people have improved considerably.

Both the victory of China's new-democratic revolution and the successes of its socialist cause have been achieved by the Chinese people of all nationalities under the leadership of the Communist Party of China and the guidance of Marxism-Leninism and Mao Zedong Thought, and by upholding truth, correcting errors and overcoming numerous difficulties and hardships. The basic task of the nation in the years to come is to concentrate its effort on socialist modernization. Under the leadership of the Communist Party of China and the guidance of Marxism-Leninism and Mao Zedong Thought, the Chinese people of all nationalities will continue to adhere to the people's democratic dictatorship and follow the socialist road, steadily improve socialist institutions, develop socialist democracy, improve the socialist legal system and work hard and self-reliantly to modernize industry, agriculture, national defence and science and technology step by step to turn China into a socialist country with a high level of culture and democracy.

The exploiting classes as such have been eliminated in our country. However, class struggle will continue to exist within certain limits for a long time to come. The Chinese people must fight against those forces and elements, both at home and abroad, that are hostile to China's socialist system and try to undermine it.

Taiwan is part of the sacred territory of the People's Republic of China. It is the lofty duty of the entire Chinese people, including our compatriots in Taiwan, to accomplish the great task of reunifying the motherland.

In building socialism it is imperative to rely on the workers, peasants and intellectuals and unite with all the forces that can be united. In the long years of revolution and construction, there has been formed under the leadership of the Communist Party of China a broad patriotic united front that is composed of democratic parties and people's organizations and embraces all socialist working people, all patriots who support socialism and all patriots who stand for reunification of the motherland. This united front will continue to be consolidated and developed. The Chinese People's Political Consultative Conference is a broadly representative organization of the united front, which has played a significant historical role and will continue to do so in the political and social life of the country, in promoting friendship with the people of other countries and in the struggle for socialist modernization and for the reunification and unity of the country.

The People's Republic of China is a unitary multi-national state built up jointly by the people of all its nationalities. Socialist relations of equality, unity and mutual assistance have been established among them and will continue to be strengthened. In the struggle to safeguard the unity of the nationalities, it is necessary to combat big-nation chauvinism, mainly Han chauvinism, and also necessary to combat local-national chauvinism. The state does its utmost to promote the common prosperity of all nationalities in the country.

China's achievements in revolution and construction are inseparable from support by the people of the world. The future of China is closely linked with that of the whole world. China adheres to an independent foreign policy as well as to the five principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit, and peaceful coexistence in developing diplomatic relations and economic and cultural exchanges with other countries, China consistently opposes imperialism, hegemonism and colonialism, works to strengthen unity with the people of other countries, supports the oppressed nations and the developing countries in their just struggle to win and preserve national independence and develop their national economies, and strives to safeguard world peace and promote the cause of human progress.

This constitution affirms the achievements of the struggles of the Chinese people of all nationalities and defines the basic system and basic tasks of the state in legal form; it is the fundamental law of the state and has supreme legal authority. The people of all nationalities, all state organs, the armed forces, all political parties and public organizations and all enterprises and undertakings in the country must take the constitution as the basic norm of conduct, and they have the duty to uphold the dignity of the constitution and ensure its implementation.

Chapter One

General Principles

Article 1

The People's Republic of China is a socialist state under the people's democratic dictatorship led by the working class and based on the alliance of workers and peasants.

The socialist system is the basic system of the People's Republic of China. Sabotage of the socialist system by any organization or individual is prohibited.

Article 2

All power in the People's Republic of China belongs to the people.

The organs through which the people exercise state power are the National People's Congress and the local people's congresses at different levels.

The people administer state affairs and manage economic, cultural and social affairs through various channels and in various ways in accordance with the law.

Article 3

The state organs of the People's Republic of China apply the principle of democratic centralism.

The National People's Congress and the local people's congresses at different levels are instituted through democratic election. They are responsible to the people and subject to their supervision.

All administrative, judicial and procuratorial organs of the state are created by the people's congresses to which they are responsible and under whose supervision they operate.

The division of functions and powers between the central and local state organs is guided by the principle of giving full play to the initiative and enthusiasm of the local authorities under the unified leadership of the central authorities.

Article 4

All nationalities in the People's Republic of China are equal. The state protects the lawful rights and interests of the minority nationalities and upholds and develops the relationship of equality, unity and mutual assistance among all of China's nationalities. Discrimination against and oppression of any nationality are prohibited; any acts that undermine the unity of the nationalities or instigate their secession are prohibited.

The state helps the areas inhabited by minority nationalities speed up their economic and cultural development in accordance with the peculiarities and needs of the different minority nationalities.

Regional autonomy is practised in areas where people of minority nationalities live in compact communities; in these areas organs of self-government are established for the exercise of the right of autonomy. All the national autonomous areas are inalienable parts of the People's Republic of China.

The people of all nationalities have the freedom to use and develop their own spoken and written languages, and to preserve or reform their own ways and customs.

Article 5

The state upholds the uniformity and dignity of the socialist legal system.

No law or administrative or local rules and regulations shall contravene the constitution.

All state organs, the armed forces, all political parties and public organizations and all enterprises and undertakings must abide by the constitution and the law. All acts in violation of the constitution and the law must be looked into.

No organization or individual may enjoy the privilege of being above the constitution and the law.

Article 6

The basis of the socialist economic system of the People's Republic of China is socialist public ownership of the means of production, namely, ownership by the whole people and collective ownership by the working people.

The system of socialist public ownership supersedes the system of exploitation of man by man; it applies the principle of "from each according to his ability, to each according to his work."

Article 7

The state economy is the sector of socialist economy under ownership by the whole people; it is the leading force in the national economy. The state ensures the consolidation and growth of the state economy.

Article 8

Rural people's communes, agricultural producers' co-operatives, and other forms of co-operative economy, such as producers, supply and marketing, credit and consumers' co-operatives, belong to the sector of socialist economy under collective ownership by the working people. Working people who are members of rural economic collectives have the right, within the limits prescribed by law, to farm private plots of cropland and hilly land, engage in household sideline production and raise privately owned livestock.

The various forms of co-operative economy in the cities and towns, such as those in the handicraft, industrial, building, transport, commercial and service trades, all belong to the sector of socialist economy under collective ownership by the working people.

The state protects the lawful rights and interests of the urban and rural economic collectives and encourages, guides and helps the growth of the collective economy.

Article 9

Mineral resources, waters, forests, mountains, grassland, unreclaimed land, beaches and other natural resources are owned by the state, that is, by the whole people, with the exception of the forests, moutains, grasslands, unreclaimed land and reaches that are owned by collectives in accordance with the law.

The state ensures the rational use of natural resources and protects rare animals and plants. The appropriation or damage of natural resources by any organization or individual by whatever means is prohibited.

Article 10

Land in the cities is owned by the state.

Land in the rural and suburban areas is owned by collectives except for those portions which belong to the state in accordance with the law; house sites and private plots of cropland and hilly land are also owned by collectives.

The state may in the public interest take over land for its use in accordance with the law.

No organization or individual may appropriate, buy, sell or lease land, or unlawfully transfer land in other ways.

All organizations and individuals who use land must make rational use of the land.

Article 11

The individual economy of urban and rural working people, operated within the limits prescribed by law, is a complement to the socialist public economy. The state protects the lawful rights and interests of the individual economy.

The state guides, helps and supervises the individual economy by exercising administrative control.

Article 12

Socialist public property is sacred and inviolable.

The state protects socialist public property. Appropriation or damage of state or collective property by any organization or individual by whatever means is prohibited.

Article 13

The state protects the right of citizens to own lawfully earned income, savings, houses and other lawful property.

The state protects by law the right of citizens to inherit private property.

Article 14

The state continuously raises labour productivity, improves economic results and develops the productive forces by enhancing the enthusiasm of the working people, raising the level of their technical skill, disseminating advanced science and technology, improving the systems of economic administration and enterprise operation and management, instituting the socialist system of responsibility in various forms and improving organization of work.

The state practises strict economy and combats waste.

The state properly apportions accumulation and consumption, pays attention to the interests of the collective and the individual as well as of the state and, on the basis of expanded production, gradually improves the material and cultural life of the people.

Article 15

The state practises economic planning on the basis of socialist public ownership. It ensures the proportionate and co-ordinated growth of the national economy through overall balancing by economic planning and the supplementary role of regulation by the market.

Disturbance of the orderly functioning of the social economy or disruption of the state economic plan by any organization or individual is prohibited.

Article 16

State enterprises have decision-making power in operation and management within the limits prescribed by law, on condition that they submit to unified leadership by the state and fulfill all their obligations under the state plan.

State enterprises practise democratic management through congresses of workers and staff and in other ways in accordance with the law.

Article 17

Collective economic organizations have decision-making power in conducting independent economic activities, on condition that they accept the guidance of the state plan and abide by the relevant laws.

Collective economic organizations practise democratic management in accordance with the law, with the entire body of their workers electing or removing their managerial personnel and deciding on major issues concerning operation and management.

Article 18

The People's Republic of China permits foreign enterprises, other foreign economic organizations and individual foreigners to invest in China and to enter into various forms of economic co-operation with Chinese enterprises and other economic organizations in accordance with the law of the People's Republic of China.

All foreign enterprises and other foreign economic organizations in China, as well as joint ventures with Chinese and foreign investment located in China, shall abide by the law of the People's Republic of China. Their lawful rights and interests are protected by the law of the People's Republic of China.

Article 19

The state develops socialist educational undertakings and works to raise the scientific and cultural level of the whole nation.

The state runs schools of various types, makes primary education compulsory and universal, develops secondary, vocational and higher education and promotes pre-school education.

The state develops educational facilities of various types in order to wipe out illiteracy and provide political, cultural, scientific, technical and professional education for workers, peasants, state functionaries and other working people. It encourages people to become educated through self-study.

The state encourages the collective economic organizations, state enterprises and undertakings and other social forces to set up educational institutions of various types in accordance with the law.

The state promotes the nationwide use of putonghua (common speech based on Beijing pronunciation).

Article 20

The state promotes the development of the natural and social sciences, disseminates scientific and technical knowledge, and commends and rewards achievements in scientific research as well as technological discoveries and inventions.

Article 21

The state develops medical and health services, promotes modern medicine and traditional Chinese medicine, encourages and supports the setting up of various medical and health facilities by the rural economic collectives, state enterprises and undertakings and neighbourhood organizations, and promotes sanitation activities of a mass character, all to protect the people's health.

The state develops physical culture and promotes mass sports activities to build up the people's physique.

Article 22

The state promotes the development of literature and art, the press, broadcasting and television undertakings, publishing and distribution services, libraries, museums, cultural centres and other cultural undertakings, that serve the people and socialism, and sponsors mass cultural activities.

The state protects places of scenic and historical interest, valuable cultural monuments and relics and other important items of China's historical and cultural heritage.

Article 23

The state trains specialized personnel in all fields who serve socialism, increases the number of intellectuals and creates conditions to give full scope to their role in socialist modernization.

Article 24

The state strengthens the building of socialist spiritual civilization through spreading education in high ideals and morality, general education and education in discipline and the legal system, and through promoting the formulation and observance of rules of conduct and common pledges by different sections of the people in urban and rural areas.

The state advocates the civic virtues of love for the motherland, for the people, for labour, for science and for socialism, it educates the people in patriotism, collectivism, internationalism and communism and in dialectical and historical materialism; it combats capitalist, feudalist and other decadent ideas.

Article 25

The state promotes family planning so that population growth may fit the plans for economic and social development.

Article 26

The state protects and improves the living environment and the ecological environment, and prevents and remedies pollution and other public hazards.

The state organizes and encourages afforestation and the protection of forests.

Article 27

All state organs carry out the principle of simple and efficient administration, the system of responsibility for work and the system of training functionaries and appraising their work in order constantly to improve quality of work and efficiency and combat bureaucratism.

All state organs and functionaries must rely on the support of the people, keep in close touch with them, heed their opinions and suggestions, accept their supervision and work hard to serve them.

Article 28

The state maintains public order and suppresses treasonable and other counter-revolutionary activities; it penalizes actions that endanger public security and disrupt the socialist economy and other criminal activities, and punishes and reforms criminals.

Article 29

The armed forces of the People's Republic of China belong to the people. Their tasks are to strengthen national defence, resist aggression, defend the motherland, safeguard the people's peaceful labour, participate in national reconstruction, and work hard to serve the people.

The state strengthens the revolutionization, modernization and regularization of the armed forces in order to increase the national defence capability.

Article 30

The administrative division of the People's Republic of China is as follows:

(1) The country is divided into provinces, autonomous regions and municipalities directly under the central government;

(2) Provinces and autonomous regions are divided into autonomous prefectures, counties, autonomous counties and cities;

(3) Counties and autonomous counties are divided into townships, nationality townships and towns.

Municipalities directly under the central government and other large cities are divided into districts and counties. Autonomous prefectures are divided into counties, autonomous counties, and cities.

All autonomous regions, autonomous prefectures and autonomous counties are national autonomous areas.

Article 31

The state may establish special administrative regions when necessary. The systems to be instituted in special administrative regions shall be prescribed by law enacted by the National People's Congress in the light of the specific conditions.

Article 32

The People's Republic of China protects the lawful rights and interests of foreigners within Chinese territory, and while on Chinese territory foreigners must abide by the law of the People's Republic of China.

The People's Republic of China may grant asylum to foreigners who request it for political reasons.

Chapter Two

The Fundamental Rights and Duties of Citizens

Article 33

All persons holding the nationality of the People's Republic of China are citizens of the People's Republic of China.

All citizens of the People's Republic of China are equal before the law.

Every citizen enjoys the rights and at the same time must perform the duties prescribed by the constitution and the law.

Article 34

All citizens of the People's Republic of China who have reached the age of 18 have the right to vote and stand for election, regardless of nationality, race, sex, occupation, family background, religious belief, education, property status, or length of residence, except persons deprived of political rights according to law.

Article 35

Citizens of the People's Republic of China enjoy freedom of speech, of the press, of assembly, of association, of procession and of demonstration.

Article 36

Citizens of the People's Republic of China enjoy freedom of religious belief.

No state organ, public organization or individual may compel citizens to believe in, or not to believe in, any religion; nor may they discriminate against citizens who believe in, or do not believe in, any religion.

The state protects normal religious activities. No one may make use of religion to engage in activities that disrupt public order, impair the health of citizens or interfere with the educational system of the state.

Religious bodies and religious affairs are not subject to any foreign domination.

Article 37

The freedom of person of citizens of the People's Republic of China is inviolable.

No citizen may be arrested except with the approval or by decision of a people's procuratorate or by decision of a people's court, and arrests must be made by a public security organ.

Unlawful deprivation or restriction of citizens' freedom of person by detention or other means is prohibited; and unlawful search of the person of citizens is prohibited.

Article 38

The personal dignity of citizens of the People's Republic of China is inviolable. Insult, libel, false charge or frame-up directed against citizens by any means is prohibited.

Article 39

The home of citizens of the People's Republic of China is inviolable. Unlawful search of, or intrusion into, a citizen's home is prohibited.

Article 40

The freedom and privacy of correspondence of citizens of the People's Republic of China are protected by law. No organization or individual may, on any ground, infringe upon the freedom and privacy of citizens' correspondence except in cases where, to meet the needs of state security or of investigation into criminal offences, public security or procuratorial organs are permitted to censor correspondence in accordance with procedures prescribed by law.

Article 41

Citizens of the People's Republic of China have the right to criticize and make suggestions to any state organ or functionary. Citizens have the right to make to relevant state organs complaints and charges against, or exposures of, violation of the law or dereliction of duty by any state organ or functionary; but fabrication or distortion of facts with the intention of libel or frame-up is prohibited.

In case of complaints, charges or exposures made by citizens, the state organ concerned must deal with them in a responsible manner after ascertaining the facts. No one may suppress such complaints, charges and exposures, or retaliate against the citizens making them.

Citizens who have suffered losses through infringement of their civic rights by any state organ or functionary have the right to compensation in accordance with the law.

Article 42

Citizens of the People's Republic of China have the right as well as the duty to work.

Using various channels, the state creates conditions for employment, strengthens labour protection, improves working conditions and, on the basis of expanded production, increases remuneration for work and social benefits.

Work is the glorious duty of every able-bodied citizen. All working people in state enterprises and in urban and rural economic collectives should perform their tasks with an attitude consonant with their status as masters of the country. The state promotes socialist labour emulation, and commends and rewards model and advanced workers. The state encourages citizens to take part in voluntary labour.

The state provides necessary vocational training to citizens before they are employed.

Article 43

Working people in the People's Republic of China have the right to rest.

The state expands facilities for rest and recuperation of working people, and prescribes working hours and vacations for workers and staff.

Article 44

The state prescribes by law the system of retirement for workers and staff in enterprises and undertakings and for functionaries of organs of state. The livelihood of retired personnel is ensured by the state and society.

Article 45

Citizens of the People's Republic of China have the right to material assistance from the state and society when they are old, ill or disabled. The state develops the social insurance, social relief and medical and health services that are required to enable citizens to enjoy this right.

The state and society ensure the livelihood of disabled members of the armed forces, provide pensions to the families of martyrs and give preferential treatment to the families of military personnel.

The state and society help make arrangements for the work, livelihood and education of the blind, deaf-mute and other handicapped citizens.

Article 46

Citizens of the People's Republic of China have the duty as well as the right to receive education.

The state promotes the all-round moral, intellectual and physical development of children and young people.

Article 47

Citizens of the People's Republic of China have the freedom to engage in scientific research, literary and artistic creation and other cultural pursuits. The state encourages and assists creative endeavours conducive to the interests of the people that are made by citizens engaged in education, science, technology, literature, art and other cultural work.

Article 48

Women in the People's Republic of China enjoy equal rights with men in all spheres of life, political, economic, cultural and social, including family life.

The state protects the rights and interests of women, applies the principle of equal pay for equal work for men and women alike and trains and selects cadres from among women.

Article 49

Marriage, the family and mother and child are protected by the state.

Both husband and wife have the duty to practise family planning.

Parents have the duty to rear and educate their minor children, and children who have come of age have the duty to support and assist their parents.

Violation of the freedom of marriage is prohibited. Maltreatment of old people, women and children is prohibited.

Article 50

The People's Republic of China protects the legitimate rights and interests of Chinese nationals residing abroad and protects the lawful rights and interests of returned overseas Chinese and of the family members of Chinese nationals residing abroad.

Article 51

The exercise by citizens of the People's Republic of China of their freedoms and rights may not infringe upon the interests of the state, of society and of the collective, or upon the lawful freedoms and rights of other citizens.

Article 52

It is the duty of citizens of the People's Republic of China to safeguard the unity of the country and the unity of all its nationalities.

Article 53

Citizens of the People's Republic of China must abide by the constitution and the law, keep state secrets, protect public property and observe labour discipline and public order and respect social ethics.

Article 54

It is the duty of citizens of the People's Republic of China to safeguard the security, honour and interests of the motherland, they must not commit acts detrimental to the security, honour and interests of the motherland.

Article 55

It is the sacred obligation of every citizen of the People's Republic of China to defend the motherland and resist aggression.

It is the honourable duty of citizens of the People's Republic of China to perform military service and join the militia in accordance with the law.

Article 56

It is the duty of citizens of the People's Republic of China to pay taxes in accordance with the law.

Chapter Three

The Structure of the State

Section I

The National People's Congress

Article 57

The National People's Congress of the People's Republic of China is the highest organ of state power. Its permanent body is the Standing Committee of the National People's Congress.

Article 58

The National People's Congress and its Standing Committee exercise the legislative power of the state.

Article 59

The National People's Congress is composed of deputies elected by the provinces, autonomous regions and municipalities directly under the central government, and by the armed forces. All the minority nationalities are entitled to appropriate representation.

Election of deputies to the National People's Congress is conducted by the Standing Committee of the National People's Congress.

The number of deputies to the National People's Congress and the manner of their election are prescribed by law.

Article 60

The National People's Congress is elected for a term of five years.

Two months before the expiration of the term of office of a National People's Congress, its Standing Committee must ensure that the election of deputies to the succeeding National People's Congress is completed. Should exceptional circumstances prevent such an election, it may be postponed by decision of a majority vote of more than two-thirds of all those on the Standing Committee of the incumbent National People's Congress, and the term of office of the incumbent National People's Congress may be extended. The election of deputies to the succeeding National People's Congress must be completed within one year after the termination of such exceptional circumstances.

Article 61

The National People's Congress meets in session once a year and is convened by its Standing Committee. A session of the National People's Congress may be convened at any time the Standing Committee deems this necessary, or when more than one-fifth of the deputies to the National People's Congress so propose.

When the National People's Congress meets, it elects a presidium to conduct its session.

Article 62

The National People's Congress exercises the following functions and powers:

(1) to amend the constitution;

(2) to supervise the enforcement of the constitution;

(3) to enact and amend basic statutes concerning criminal offences, civil affairs, the state organs and other matters;

(4) to elect the president and the vice-president of the People's Republic of China; (previously translated as chairman and vice-chairman of the People's Republic of China -- translator's note)

(5) to decide on the choice of the premier of the State Council upon nomination by the president of the People's Republic of China, and to decide on the choice of the vice-premiers, state councillors, ministers in charge of ministries or commissions and the auditor-general and the secretary-general of the State Council upon nomination by the premier;

(6) to elect the chairman of the Central Military Commission and, upon his nomination, to decide on the choice of all the others on the Central Military Commission;

(7) to elect the president of the Supreme People's Court;

(8) to elect the procurator-general of the Supreme People's Procuratorate;

(9) to examine the approve the plan for national economic and social development and the reports on its implementation;

(10) to examine and approve the state budget and the report on its implementation;

(11) to alter or annul inappropriate decisions of the Standing Committee of the National People's Congress;

(12) to approve the establishment of provinces, autonomous regions, and municipalities directly under the central government;

(13) to decide on the establishment of special administrative regions and the systems to be instituted there;

(14) to decide on questions of war and peace; and

(15) to exercise such other functions and powers as the highest organ of state power should exercise.

Article 63

The National People's Congress has the power to recall or remove from office the following persons:

(1) the president and the vice-president of the People's Republic of China;

(2) the premier, vice-premiers, state councillors, ministers in charge of ministries or commissions and the auditor-general and the secretary-general of the State Council;

(3) the chairman of the Central Military Commission and others on the commission;

(4) the president of the Supreme People's Court; and

(5) the procurator-general of the Supreme People's Procuratorate.

Article 64

Amendments to the constitution are to be proposed by the Standing Committee of the National People's Congress or by more than one-fifth of the deputies to the National People's Congress and adopted by a majority vote of more than two-thirds of all the deputies to the congress.

Statutes and resolutions are adopted by a majority vote of more than one half of all the deputies to the National People's Congress.

Article 65

The Standing Committee of the National People's Congress is composed of the following: the chairman, the vice-chairmen; the secretary-general; and members.

Minority nationalities are entitled to appropriate representation on the Standing Committee of the National People's Congress.

The National People's Congress elects, and has the power to recall, all those on its Standing Committee.

No one on the Standing Committee of the National People's Congress shall hold any post in any of the administrative, judicial or procuratorial organs of the state.

Article 66

The Standing Committee of the National People's Congress is elected for the same term as the National People's Congress; it exercises its functions and powers until a new Standing Committee is elected by the succeeding National People's Congress.

The chairman and vice-chairmen of the Standing Committee shall serve no more than two consecutive terms.

Article 67

The Standing Committee of the National People's Congress exercises the following functions and powers;

(1) to interpret the constitution and supervise its enforcement;

(2) to enact and amend statutes with the exception of those which should be enacted by the National People's Congress;

(3) to enact, when the National People's Congress is not in session, partial supplements and amendments to statutes enacted by the National People's Congress provided that they do not contravene the basic principles of these statutes;

(4) to interpret statutes;

(5) to examine and approve, when the National People's Congress is not in session, partial adjustments to the plan for national economic and social development and to the state budget that prove necessary in the course of their implementation;

(6) to supervise the work of the State Council, the Central Military Commission, the Supreme People's Court and the Supreme People's Procuratorate;

(7) to annul those administrative rules and regulations, decisions or orders of the State Council that contravene the constitution or the statutes;

(8) to annul those local regulations or decisions of the organs of state power of provinces, autonomous regions and municipalities directly under the central government that contravene the constitution, the statutes or the administrative rules and regulations;

(9) to decide, when the National People's Congress is not in session, on the choice of ministers in charge of ministries or commissions or the auditor-general and the secretary-general of the State Council upon nomination by the premier of the State Council;

(10) to decide, upon nomination by the chairman of the Central Military Commission, on the choice of others on the commission, when the National People's Congress is not in session;

(11) to appoint and remove the vice-presidents and judges of the Supreme People's Court, members of its Judicial Committee and the president of the Military Court at the suggestion of the president of the Supreme People's Court;

(12) to appoint and remove the deputy procurators-general and procurators of the Supreme People's Procuratorate, members of its Procuratorial Committee and the chief procurator of the Military Procuratorate at the request of the procurator-general of the Supreme People's Procuratorate, and to approve the appointment and removal of the chief procurators of the people's procuratorates of provinces, autonomous regions and municipalities directly under the central government;

(13) to decide on the appointment and recall of plenipotentiary representatives abroad;

(14) to decide on the ratification and abrogation of treaties and important agreements concluded with foreign states;

(15) to institute systems of titles and ranks for military and diplomatic personnel and of other specific titles and ranks;

(16) to institute state medals and titles of honour and decide on their conferment;

(17) to decide on the granting of special pardons;

(18) to decide, when the National People's Congress is not in session, on the proclamation of a state of war in the event of an armed attack on the country or in fulfillment of international treaty obligations concerning common defence against aggression;

(19) to decide on general mobilization or partial mobilization;

(20) to decide on the enforcement of martial law throughout the country or in particular provinces, autonomous regions or municipalities directly under the central government; and

(21) to exercise such other functions and powers as the National People's Congress may assign to it.

Article 68

The chairman of the Standing Committee of the National People's Congress presides over the work of the Standing Committee and convenes its meetings. The vice-chairmen and the secretary-general assist the chairman in his work.

Chairmanship meetings with the participation of the chairman, vice-chairmen and secretary-general handle the important day-to-day work of the Standing Committee of the National People's Congress.

Article 69

The Standing Committee of the National People's Congress is responsible to the National People's Congress and reports on its work to the congress.

Article 70

The National People's Congress establishes a nationalities committee, a law committee, a finance and economic committee, an education, science, culture and public health committee, a foreign affairs committee, an overseas Chinese committee and such other special committees as are necessary. These special committees work under the direction of the Standing Committee of the National People's Congress when the congress is not in session.

The special committees examine, discuss and draw up relevant bills and draft resolutions under the direction of the National People's Congress and its Standing Committee.

Article 71

The National People's Congress and its Standing Committee may, when they deem it necessary, appoint committees of inquiry into specific questions and adopt relevant resolutions in the light of their reports.

All organs of state, public organizations and citizens concerned are obliged to supply the necessary information to those committees of inquiry when they conduct investigations.

Article 72

Deputies to the National People's Congress and all those on its Standing Committee have the right, in accordance with procedures prescribed by law, to submit bills and proposals within the scope of the respective functions and powers of the National People's Congress and its Standing Committee.

Article 73

Deputies to the National People's Congress during its sessions, and all those on its Standing Committee during its meetings, have the right to address questions, in accordance with procedures prescribed by law, to the State Council or the ministries and commissions under the State Council, which must answer the questions in a responsible manner.

Article 74

No deputy to the National People's Congress may be arrested or placed on criminal trial without the consent of the presidium of the current session of the National People's Congress or, when the National People's Congress is not in session, without the consent of its Standing Committee.

Article 75

Deputies to the National People's Congress may not be called to legal account for their speeches or votes at its meetings.

Article 76

Deputies to the National People's Congress must play an exemplary role in abiding by the constitution and the law and keeping state secrets and, in production and other work and their public activities, assist in the enforcement of the constitution and the law.

Deputies to the National People's Congress should maintain close conact with the units which elected them and with the people, listen to and convey the opinions and demands of the people and work hard to serve them.

Article 77

Deputies to the National People's Congress are subject to the supervision of the units which elected them. The electoral units have the power, through procedures prescribed by law, to recall the deputies whom they elected.

Article 78

The organization and working procedures of the National People's Congress and its Standing Committee are prescribed by law.

Section II

The President of the People's Republic of China

Article 79

The president and vice-president [zhu xi, fu zhu xi 0031 1598, 0479 0031 1598] of the People's Republic of China are elected by the National People's Congress.

Citizens of the People's Republic of China who have the right to vote and to stand for election and who have reached the age of 45 are eligible for election as president or vice-president of the People's Republic of China.

The term of office of the president and vice-president of the People's Republic of China is the same as that of the National People's Congress, and they shall serve no more than two consecutive terms.

Article 80

The president of the People's Republic of China, in pursuance of decisions of the National People's Congress and its Standing Committee, promulgates statutes, appoints and removes the premier, vice-premiers, state councillors, ministers in charge of ministries or commissions, and the auditor-general and the secretary-general of the State Council; confers state medals and titles of honour; issues orders of special pardons; proclaims martial law; proclaims a state of war; and issues mobilization orders.

Article 81

The president of the People's Republic of China receives foreign diplomatic representatives on behalf of the People's Republic of China and, in pursuance of decisions of the Standing Committee of the National People's Congress, appoints and recalls plenipotentiary representatives abroad, and ratifies and abrogates treaties and important agreements concluded with foreign states.

Article 82

The vice-president of the People's Republic of China assists the president in his work.

The vice-president of the People's Republic of China may exercise such parts of the functions and powers of the president as the president may entrust to him.

Article 83

The president and vice-president of the People's Republic of China exercise their functions and powers until the new president and vice-president elected by the succeeding National People's Congress assume office.

Article 84

In case the office of the president of the People's Republic of China falls vacant, the vice-president succeeds to the office of president.

In case the office of the vice-president of the People's Republic of China falls vacant, the National People's Congress shall elect a new vice-president to fill the vacancy.

In the event that the offices of both the president and the vice-president of the People's Republic of China fall vacant, the National People's Congress shall elect a new president and a new vice-president. Prior to such election, the chairman of the Standing Committee of the National People's Congress shall temporarily act as the president of the People's Republic of China.

Section III

The State Council

Article 85

The State Council, that is, the central people's government, of the People's Republic of China is the executive body of the highest organ of state power; it is the highest organ of state administration.

Article 86

The State Council is composed of the following:

The premier; the vice-premiers; the state councillors; the ministers in charge of ministries; the ministers in charge of commissions; the auditor-general; and the secretary-general.

The premier has overall responsibility for the State Council. The ministers have overall responsibility for the respective ministries or commissions under their charge.

The organization of the State Council is prescribed by law.

Article 87

The term of office of the State Council is the same as that of the National People's Congress.

The premier, vice-premiers and state councillors shall serve no more than two consecutive terms.

Article 88

The premier directs the work of the State Council. The vice-premiers and state councillors assist the premier in his work.

Executive meetings of the State Council are composed of the premier, the vice-premiers, the state councillors and the secretary-general of the State Council.

The premier convenes and presides over the executive meetings and plenary meetings of the State Council.

Article 89

The State Council exercises the following functions and powers:

(1) to adopt administrative measures, enact administrative rules and regulations and issue decisions and orders in accordance with the constitution and the statutes;

(2) to submit proposals to the National People's Congress or its Standing Committee;

(3) to lay down the tasks and responsibilities of the ministries and commissions of the State Council, to exercise unified leadership over the work of the ministries and commissions and to direct all other administrative work of a national character that does not fall within the jurisdiction of the ministries and commissions;

(4) to exercise unified leadership over the work of local organs of state administration at different levels throughout the country, and to lay down the detailed division of functions and powers between the central government and the organs of state administration of provinces, autonomous regions and municipalities directly under the central government;

(5) to draw up and implement the plan for national economic and social development and the state budget;

(6) to direct and administer economic work and urban and rural development;

(7) to direct and administer the work concerning education, science, culture, public health, physical culture and family planning;

(8) to direct and administer the work concerning civil affairs, public security, judicial administration, supervision and other related matters;

(9) to conduct foreign affairs and conclude treaties and agreements with foreign states;

(10) to direct and administer the building of national defence;

(11) to direct and administer affairs concerning the nationalities, and to safeguard the equal rights of minority nationalities and the right of autonomy of the national autonomous areas;

(12) to protect the legitimate rights and interests of Chinese nationals residing abroad and protect the lawful rights and interests of returned overseas Chinese and of the family members of Chinese nationals residing abroad;

(13) to alter or annul inappropriate orders, directives and regulations issued by the ministries or commissions;

(14) to alter or annul inappropriate decisions and orders issued by local organs of state administration at different levels;

(15) to approve the geographic division of provinces, autonomous regions and municipalities directly under the central government, and to approve the establishment and geographic division of autonomous prefectures, counties, autonomous counties and cities;

(16) to decide on the enforcement of martial law in parts of provinces, autonomous regions and municipalities directly under the central government;

(17) to examine and decide on the size of administrative organs and, in accordance with the law, to appoint, remove and train administrative officers, appraise their work and reward or punish them; and

(18) to exercise such other functions and powers as the National People's Congress or its Standing Committee may assign it.

Article 90

The ministers in charge of ministries or commissions of the State Council are responsible for the work of their respective departments and convene and preside over their ministerial meetings or commission meetings that discuss and decide on major issues in the work of their respective departments.

The ministries and commissions issue orders, directives and regulations within the jurisdiction of their respective departments and in accordance with the statutes and the administrative rules and regulations, decisions and orders issued by the State Council.

Article 91

The State Council establishes an auditing body to supervise through auditing the revenue and expenditure of all departments under the state council and of the local governments at different levels, and those of the state financial and monetary organizations and of enterprises and undertakings.

Under the direction of the premier of the State Council, the auditing body independently exercises its power to supervise through auditing in accordance with the law, subject to no interference by any other administrative organ or any public organization or individual.

Article 92

The State Council is responsible, and reports on its work, to the National People's Congress or when the National People's Congress is not in session, to its Standing Committee.

Section IV

The Central Military Commission

Article 93

The Central Military Commission of the People's Republic of China directs the armed forces of the country.

The Central Military Commission is composed of the following:

The chairman; the vice-chairmen; and members.

The chairman of the Central Military Commission has overall responsibility for the commission.

The term of office of the Central Military Commission is the same as that of the National People's Congress.

Article 94

The chairman of the Central Military Commission is responsible to the National People's Congress and its Standing Committee.

Section V

The Local People's Congresses and the Local People's Governments at Different Levels

Article 95

People's congresses and people's governments are established in provinces, municipalities directly under the central government, counties, cities, municipal districts, townships, nationality townships and towns.

The organization of local people's congresses and local people's governments at different levels is prescribed by law.

Organs of self-government are established in autonomous regions, autonomous prefectures and autonomous counties. The organization and working procedures of organs of self-government are prescribed by law in accordance with the basic principles laid down in sections V and VI of Chapter Three of the constitution.

Article 96

Local people's congresses at different levels are local organs of state power.

Local people's congresses at and above the county level establish standing committees.

Article 97

Deputies to the people's congresses of provinces, municipalities directly under the central government, and cities divided into districts are elected by the people's congresses at the next lower level; deputies to the people's congresses of counties, cities not divided into districts, municipal districts, townships, nationality townships and towns are elected directly by their constituencies.

The number of deputies to local people's congresses at different levels and the manner of their election are prescribed by law.

Article 98

The term of office of the people's congresses of provinces, municipalities directly under the central government and cities divided into districts is five years. The term of office of the people's congresses of counties, cities not divided into districts, municipal districts, townships, nationality townships and towns is three years.

Article 99

Local people's congresses at different levels ensure the observance and implementation of the constitution, the statutes and the administrative rules and regulations in their respective administrative areas. Within the limits of their authority as prescribed by law, they adopt and issue resolutions and examine and decide on plans for local economic and cultural development and for the development of public services.

Local people's congresses at and above the county level examine and approve the plans for economic and social development and the budgets of their respective administrative areas and examine and approve reports on their implementation. They have the power to alter or annul inappropriate decisions of their own standing committees.

The people's congresses of nationality townships may, within the limits of their authority as prescribed by law, take specific measures suited to the peculiarities of the nationalities concerned.

Article 100

The people's congresses of provinces and municipalities directly under the central government, and their standing committees, may adopt local regulations, which must not contravene the constitution, the statutes and the administrative rules and regulations, and they shall report such local regulations to the Standing Committee of the National People's Congress for the record.

Article 101

At their respective levels, local people's congresses elect, and have the power to recall, governors and deputy governors, or mayors and deputy mayors, or heads and deputy heads of counties, districts, townships and towns.

Local people's congresses at and above the county level elect, and have the power to recall, presidents of people's courts and chief procurators of people's procuratorates at the corresponding level. The election or recall of chief procurators of people's procuratorates shall be reported to the chief procurators of the people's procuratorates at the next higher level for submission to the standing committees of the people's congresses at the corresponding level for approval.

Article 102

Deputies to the people's congresses of provinces, municipalities directly under the central government and cities divided into districts are subject to supervision by the units which elected them, deputies to the people's congresses of counties, cities not divided into districts, municipal districts, townships, nationality townships and towns are subject to supervision by their constituencies.

The electoral units and constituencies which elect deputies to local people's congresses at different levels have the power, according to procedures prescribed by law, to recall deputies whom they elected.

Article 103

The standing committee of a local people's congress at and above the county level is composed of a chairman, vice-chairmen and members, and is responsible, and reports on its work, to the people's congress at the corresponding level.

The local people's congress at and above the county level elects, and has the power to recall, anyone on the standing committee of the people's congress at the corresponding level.

No one on the standing committee of a local people's congress at and above the county level shall hold any post in state administrative, judicial and procuratorial organs.

Article 104

The standing committee of a local people's congress at and above the county level discusses and decides on major issues in all fields of work in its administrative area; supervises the work of the people's government, people's court and people's procuratorate at the corresponding level; annuls inappropriate decisions and orders of the peoples government at the corresponding level, annuls inappropriate resolutions of the people's congress at the next lower level, decides on the appointment and removal of functionaries of state organs within its jurisdiction as prescribed by law; and, when the people's congress at the corresponding level is not in session, recalls individual deputies to the people's congress at the next higher level and elects individual deputies to fill vacancies in that people's congress.

Article 105

Local people's governments at different levels are the executive bodies of local organs of state power as well as the local organs of state administration at the corresponding level.

Local people's governments at different levels practise the system of overall responsibility by governors, mayors, county heads, district heads, township heads and town heads.

Article 106

The term of office of local people's governments at different levels is the same as that of the people's congresses at the corresponding level.

Article 107

Local people's governments at and above the county level, within the limits of their authority as prescribed by law, conduct the administrative work concerning the economy, education, science, culture, public health, physical culture, urban and rural development, finance, civil affairs, public security, nationalities affiars, judicial administration, supervision and family planning in their respective administrative areas; issue decisions and orders; appoint, remove and train administrative functionaries, appraise their work and reward or punish them.

People's governments of townships, nationality townships and towns carry out the resolutions of the people's congress at the corresponding level as well as the decisions and orders of the state administrative organs at the next higher level and conduct administrative work in their respective administrative areas.

Article 108

Local people's governments at and above the county level direct the work of their subordinate departments and of people's governments at lower levels, and have the power to alter or annul inappropriate decisions of their subordinate departments and people's governments at lower levels.

Article 109

Auditing bodies are established by local people's governments at and above the county level. Local auditing bodies at different levels independently exercise their power to supervise through auditing in accordance with the law and are responsible to the people's government at the corresponding level and to the auditing body at the next higher level.

Article 110

Local people's governments at different levels are responsible, and report on their work, to people's congresses at the corresponding level. Local people's governments at and above the county level are responsible, and report on their work, to the standing committee of the people's congress at the corresponding level when the congress is not in session.

Local people's governments at different levels are responsible, and report on their work, to the state administrative organs at the next higher level. Local people's governments at different levels throughout the country are state administrative organs under the unified leadership of the state council and are subordinate to it.

Article 111

The residents' committees and villagers' committees established among urban and rural residents on the basis of their place of residence are mass organizations of self-management at the grass-roots level. The chairman, vice-chairmen and members of each residents' or villagers' committee are elected by the residents. The relationship between the residents' and villagers' committees and the grass-roots organs of state power is prescribed by law.

The residents' and villagers' committees establish committees for people's mediation, public security, public health and other matters in order to manage public affairs and social services in their areas, mediate civil disputes, help maintain public order and convey residents' opinions and demands and make suggestions to the people's government.

Section VI

The Organs of Self-Government of National Autonomous Areas

Article 112

The organs of self-government of national autonomous areas are the people's congresses and people's governments of autonomous regions, autonomous prefectures and autonomous counties.

Article 113

In the people's congress of an autonomous region, prefecture or county, in addition to the deputies of the nationality or nationalities exercising regional autonomy in the administrative area, the other nationalities inhabiting the area are also entitled to appropriate representation.

The chairmanship and vice-chairmanships of the standing committee of the people's congress of an autonomous region, prefecture or county shall include a citizen or citizens of the nationality or nationalities exercising regional autonomy in the area concerned.

Article 114

The administrative head of an autonomous region, prefecture or county shall be a citizen of the nationality, or of one of the nationalities, exercising regional autonomy in the area concerned.

Article 115

The organs of self-government of autonomous regions, prefectures and counties exercise the functions and powers of local organs of state as specified in Section V of Chapter Three of the constitution. At the same time, they exercise the right of autonomy within the limits of their authority as prescribed by the constitution, the law of regional national autonomy and other laws, and implement the laws and policies of the state in the light of the existing local situation.

Article 116

People's congresses of national autonomous areas have the power to enact autonomy regulations and specific regulations in the light of the political, economic and cultural characteristics of the nationality or nationalities in the areas concerned. The autonomy regulations and specific regulations of autonomous regions shall be submitted to the Standing Committee of the National People's Congress for approval before they go into effect. Those of autonomous prefectures and counties shall be

submitted to the standing committees of the people's congresses of provinces or autonomous regions for approval before they go into effect, and they shall be reported to the Standing Committee of the National People's Congress for the record.

Article 117

The organs of self-government of the national autonomous areas have the power of autonomy in administering the finances of their areas. All revenues accruing to the national autonomous areas under the financial system of the state shall be managed and used by the organs of self-government of those areas on their own.

Article 118

The organs of self-government of the national autonomous areas independently arrange for and administer local economic development under the guidance of state plans.

In exploiting natural resources and building enterprises in the national autonomous areas, the state shall give due consideration to the interests of those areas.

Article 119

The organs of self-government of the national autonomous areas independently administer educational, scientific, cultural, public health and physical culture affairs in their respective areas, protect and cull through the cultural heritage of the nationalities and work for the development and prosperity of their cultures.

Article 120

The organs of self-government of the national autonomous areas may, in accordance with the military system of the state and concrete local needs and with the approval of the State Council, organize local public security forces for the maintenance of public order.

Article 121

In performing their functions, the organs of self-government of the national autonomous areas, in accordance with the autonomy regulations of the respective areas, employ the spoken and written language or languages in common use in the locality.

Article 122

The state gives financial, material and technical assistance to the minority nationalities to accelerate their economic and cultural development.

The state helps the national autonomous areas train large numbers of cadres at different levels and specialized personnel and skilled workers of different professions and trades from among the nationality or nationalities in those areas.

Section VII

The People's Courts and the People's Procuratorates

Article 123

The people's courts in the People's Republic of China are the judicial organs of the state.

Article 124

The People's Republic of China established the Supreme People's Court and the local people's courts at different levels, military courts and other special people's courts.

The term of office of the president of the Supreme People's Court is the same as that of the National People's Congress, he shall serve no more than two consecutive terms.

The organization of people's courts is prescribed by law.

Article 125

All cases handled by the people's courts, except for those involving special circumstances as specified by law, shall be heard in public. The accused has the right of defence.

Article 126

The people's courts shall, in accordance with the law, exercise judicial power independently and are not subject to interference by administrative organs, public organizations or individuals.

Article 127

The Supreme People's Court is the highest judicial organ.

The Supreme People's Court supervises the administration of justice by the local people's courts at different levels and by the special people's courts; people's courts at higher levels supervise the administration of justice by those at lower levels.

Article 128

The Supreme People's Court is responsible to the National People's Congress and its Standing Committee. Local people's courts at different levels are responsible to the organs of state power which created them.

Article 129

The people's procuratorates of the People's Republic of China are state organs for legal supervision.

Article 130

The People's Republic of China establishes the Supreme People's Procuratorate and the local people's procuratorates at different levels, military procuratorates and other special people's procuratorates.

The term of office of the procurator-general of the Supreme People's Procuratorate is the same as that of the National People's Congress; he shall serve no more than two consecutive terms.

The organization of people's procuratorates is prescribed by law.

Article 131

People's procuratorates shall, in accordance with the law, exercise procuratorial power independently and are not subject to interference by administrative organs, public organizations or individuals.

Article 132

The Supreme People's Procuratorate is the highest procuratorial organ.

The Supreme People's Procuratorate directs the work of the local people's procuratorates at different levels and of the special people's procuratorates; people's procuratorates at higher levels direct the work of those at lower levels.

Article 133

The Supreme People's Procuratorate is responsible to the National People's Congress and its Standing Committee. Local people's procuratorates at different levels are responsible to the organs of state power at the corresponding levels which created them and to the people's procuratorates at the higher level.

Article 134

Citizens of all nationalities have the right to use the spoken and written languages of their own nationalities in court proceedings. The people's courts and people's procuratorates should provide translation for any party to the court proceedings who is not familiar with the spoken or written languages in common use in the locality.

In an area where people of a minority nationality live in a compact community or where a number of nationalities live together, hearings should be conducted in the language or languages in common use in the locality; indictments, judgments, notices and other documents should be written, according to actual needs, in the language or languages in common use in the locality.

Article 135

The people's courts, people's procuratorates and public security organs shall, in handling criminal cases, divide their functions, each taking responsibility for its own work, and they shall co-ordinate their efforts and check each other to ensure correct and effective enforcement of law.

Chapter Four

The National Flag, the National Emblem and the Capital

Article 136

The national flag of the People's Republic of China is a red flag with five stars.

Article 137

The national emblem of the People's Republic of China is Tiananmen in the centre illuminated by five stars and encircled by ears of grain and a cogwheel.

Article 138

The capital of the People's Republic of China is Beijing.

Constitution Promulgated

OW060001 Beijing XINHUA in English 1309 GMT 4 Dec 82

["Announcement by the National People's Congress of the People's Republic of China" -- XINHUA headline]

[Text] Beijing, 4 Dec (XINHUA) -- The Constitution of the People's Republic was adopted by the Fifth Session of the Fifth National People's Congress of the People's Republic of China on 4 December 1982. It is hereby promulgated and put in force.

[Signed] The Presidium of the Fifth Session of the Fifth National People's Congress of the People's Republic of China, 4 December 1982, Beijing.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

Television Coverage

HK070206 [Editorial Report] Beijing Domestic Television Service in Mandarin at 1100 GMT on 4 December carries at the beginning of the evening's newscast a 6-minute filmed report of poor reception on a 4 December plenary meeting of the Fifth Session of the Fifth NPC which is being held in the main auditorium of the Great Hall of the People in Beijing.

The film opens with a close-up shot of a huge PRC emblem hanging on the heavy curtain at the back of the rostrum of the main auditorium of the hall. This is followed by a long shot of many people on the rostrum and in the auditorium attending the plenary meeting. It then gives a medium shot of Peng Zhen, Deng Yingchao, Xi Zhongxun and Yang Shangkun sitting in the first row of the rostrum. During this shot, Zhao Ziyang and Wan Li are seen sitting in the second row of the rostrum; and Hu Yaobang and Deng Xiaoping are seen sitting in the third row of the rostrum. At this point, the announcer begins to read the following namelist: "Executive chairmen of today's meeting are: Peng Zhen, Deng Yingchao, Xi Zhongxun, Ulanhu, Yang Shangkun, Li Jingquan, Wei Guoqing, Seypidin, Peng Chong, Ngapoi Ngawang Jigme, Liao Chengzhi, Hu Juewen, Xu Deheng, Shi Liang, Xiao Jingguang, Banqen Erdini Qoigyi Gyancan, Ting Mao, Hu Lijiao, Xiang Nan, Han Ningfu, Du Xingyuan, Ma Wenrui and Tomur Dawamat." While the namelist is being read, the camera pans to show the other executive chairmen of the meeting sitting in the first row of the rostrum in several medium shots. During these shorts, Yu Qiuli, Fang Yi, Gu Mu and Chen Muhua are shown sitting in the second row of the rostrum.

Next, Xi Zhongxun, identified by the announcer as executive chairman of the meeting and vice chairman of the NPC Standing Committee, is shown in a close-up shot and is heard addressing the meeting. The camera then pans to show many deputies to the NPC applauding and then raising their hands. At this point, the announcer says the meeting has ensorsed the namelist of 62 scrutineers with Chen Zhibin and Du Dihua as chief scrutineers.

Next, a series of medium shots are given of the following PRC leaders casting their ballots into a ballot box on the rostrum: Hu Juewen, Ngapoi Ngawang Jigme, Seypidin, Ulanhu, Deng Yingchao, Li Jingquan (being assisted by a male attendant), Peng Zhen, Xi Zhongxun and Yang Shangkun. After this, Wei Guoqing and Peng Chong are shown following Yang Shangkun and waiting their turns to cast their ballots. Next, many deputies to the NPC are shown walking toward ballot boxes in the auditorium to cast their ballots. This is followed by another series of medium shots of the following PRC leaders casting their ballots into a ballot box on the rostrum: Chen Muhua, Gu Mu, Fang Yi, Yi Qiuli, Wan Li, Zhao Ziyang, Zhang Tingfa, Song Renqiong, Yang Dezhi, Li Desheng, Deng Xiaoping, Hu Yaobang and Wang Zhen. It then shows many deputies to the NPC casting their ballots into ballot boxes in the auditorium.

Next, a close-up shot is shown of Ye Jianying casting his ballot into a ballot box in an unidentified room. This is followed by a medium shot of Tan Zhenlin casting his ballot into a ballot box in an unidentified room. While Ye Jianying is shown casting his ballot, the announcer says: "The meeting has prepared a mobile ballot box for the aged and infirm. Ye Jianying, Tan Zhenlin and some other NPC deputies cast their ballots into this mobile ballot box."

A medium shot is shown of several people standing with their backs to the camera and casting their ballots into a ballot box on the rostrum of the auditorium. This is followed by a close-up shot of Xi Zhongxun, who is seen and heard saying: "According to a report made by the chief scrutineers, a total of 3,040 ballots were cast with 3,037 votes for the adoption of the constitution and no opposing votes. There are three abstentions. It is now declared that the PRC Constitution has been endorsed by this meeting." The camera then pans to show people on the rostrum and in the auditorium applauding.

The following segment shows Xi Zhongxun asking the NPC deputies to raise their hands to adopt a resolution on the functions and powers of the present NPC Standing Committee. The film then gives a medium shot of Zhao Ziyang and Wan Li raising their hands. During the shot, the announcer says the meeting has adopted the resolution. This is followed by a medium shot of many people applauding on the rostrum and several long and medium shots of many NPC deputies sitting in the auditorium. Next, the film gives a long shot of many NPC deputies in the auditorium raising their hands to adopt a resolution on the PRC national anthem. The filmed report ends with a long shot of many deputies in the auditorium applauding the adoption of the resolution.

Leaders at 30 Nov Meeting

OW030353 Beijing Domestic Service in Mandarin 1200 GMT 30 Nov 82

[Excerpts] The Fifth Session of the Fifth NPC opened its second plenary meeting in the Great Hall of the People here this afternoon.

Peng Zhen, executive chairman of the session and vice chairman of the NPC Standing Committee, declared the plenary meeting open at 1500.

Other executive chairmen for the meeting were Ngapoi Ngawang Jigme, Yang Shangkun, Yan Dakai, Li Huang, Xu Jiatun, Yang Shangkui, Wan Da, Li Tinggui, Wang Shitai and Basang. Members participating in the Fifth Session of the Fifth CPPCC National Committee attended the meeting as observers. Also present at the meeting as observers were personnel of the State Council, responsible persons of commissions of the NPC, the Supreme People's Court, the Supreme People's Procuratorate and departments directly under the CPC Central Committee and the State Council, responsible persons of the various general departments, arms, services and military academies of the PLA, and Chinese envoys to foreign countries currently in Beijing. Foreign diplomats to China and foreign correspondents in Beijing attended the meeting as visitors.

Leaders at 1 Dec Meeting

OW011452 Beijing XINHUA Domestic Service in Chinese 0410 GMT 1 Dec 82

[Excerpts] Beijing, 1 Dec (XINHUA) — A meeting of the Fifth Session of the Fifth NPC was held at the Great Hall of the People this morning. Entrusted by the State Council, Finance Minister Wang Bingqian delivered a report on the implementation of the state budget for 1982 and the draft state budget for 1983 to the NPC session. Deng Yingchao, executive chairman and vice chairman of the NPC Standing Committee, presided over today's meeting. Also attending today's meeting were Executive Chairmen Wei Guoqing, Hu Juewen, Shi Liang, Pan Chengxiao, Li Youwen, Tie Ying, Zhao Lin, Li Jianzhen, An Pingsheng, Zhaxi Wangqug and Ma Qingnian.

Also attending this morning's meeting as observers were CPPCC members attending the Fifth Session of the Fifth National CPPCC Committee; staff of the State Council; responsible persons of the various NPC committees; the Supreme People's Court; the Supreme People's Procuratorate; the organs under the direct administration of the CPC Central Committee; the organs directly under the State Council; responsible persons of the various PLA general headquarters, the various services and arms of the PLA and the military academies; and the Chinese envoys to foreign countries who are in Beijing.

Also present at today's meeting as observers were the envoys of various countries to China and foreign news reporters who are in Beijing.

Leaders at 6 Dec Presidium

OW061015 Beijing XINHUA Domestic Service in Chinese 0702 GMT 6 Dec 82

[Excerpts] Beijing, 6 Dec (XINHUA) -- The Presidium of the Fifth Session of the Fifth NPC held the third meeting at the Great Hall of the People this morning. It discussed and approved the draft resolutions and the report on the examination of the 1982 state budget and the draft state budget for 1983 to be submitted to the congress for deliberation.

Today's meeting was presided over by Peng Zhen, executive chairman of the presidium.

Also attending today's meeting were Executive Chairmen of the Presidium Ulanhu, Wei Guoqing, Peng Chong, Seypidin, Liao Chengzhi, Ngawang-Jigme, Xu Deheng, Hu Juewen, Shi Liang, Xi Zhongxun, Yang Shangkun and Bainqen Erdini Qoigyi Gyaincain.

Leaders at 6 Dec Meeting

[Excerpts] Beijing, 6 Dec (XINHUA) -- A plenary meeting of the Fifth Session of the Fifth National People's Congress was held at the Great Hall of the People on the morning of 6 December to hear explanations given on four draft laws and on matters concerning the number and election of deputies to the Sixth National People's Congress.

Liao Chengzhi, executive chairman of the plenary meeting and vice chairman of the NPC Standing Committee, presided over the 6 December meeting.

Attending today's meeting were Executive Chairmen Peng Chong, Bainqen Erdini Qoigyi Gyaincain, Yang Dezhi, Yuan Bosheng, Zhao Dezun, Ku Zhuoxin, Liu Jie, Huang Rong and Lin Liyun.

PLA Deputies on Zhao Report

OW040553 Beijing XINHUA Domestic Service in Chinese 1436 GMT 3 Dec 82

[Text] Beijing, 3 Dec (XINHUA) -- At the panel discussions on Premier Zhao Ziyang's report on the Sixth 5-Year Plan, PLA deputies pledged to carry forward the glorious tradition of the people's army and, while fulfilling the tasks in military training and war preparedness, actively take part in the construction of the country in order to contribute their share to the fulfillment of the Sixth 5-Year Plan. [passage indistinct]

Fu Chongbi, NPC deputy and political commissar of the Beijing PLA units, said: (?In order) to meet the needs in the development of the national economy, PLA units should make great efforts to train talented people needed for army and local construction. We may use our spare time to organize cadres and fighters to study physics, electricity and other specialized knowledge needed by the army and the local people, to contribute our share to the construction of the country.

Hong Xuezhi, NPC deputy and director of the PLA General Logistics Department, said: PLA units must take the initiative in increasing income and reducing expenditures, tapping the potential for increasing income, and making the best use of the current military budget in order to lighten the government's burden and increase strength for economic construction. The army expects to harvest a total of 1.25 billion jin of grain this year, and income from sideline production has also increased by a fairly big margin. In this way the PLA supports the construction of the country. From now on, PLA units should engage in agricultural, forestry, animal husbandry, fishery and sideline production whenever conditions permit.

Xu Guangyi, NPC deputy and deputy director of the PLA General Logistics Department, and Li Chunming, NPC deputy and deputy director of the finance department under the PLA General Logistics Department, pointed out: Despite the reduction in the military budget in recent years, the financial situation in the army is still good, mainly because the whole army, from top to bottom, has unified their thinking and understanding and done work in order of importance and urgency, by making the part subordinate to the whole, immediate interests subordinate to long-range interests and filling needs in accordance with the availability of material resources. Therefore, we were able to achieve a little surplus in the military budget last year and spent a portion of the budget on solving problems needing to be solved right away. The whole army, cadres and fighters alike, volunteered to share the difficulties of the government. The task of purchasing state treasury bonds was overfulfilled by 42.2 percent. The army also did its share helping various localities combat natural calamities last year. According to incomplete statistics, PLA units delivered a total of 4.5 million jin of food and 1.48 million articles of clothing, dispatched some 90,000 vehicles and 6,000 airplanes and vessels, transported 800,000 dun of supplies and sent out 2,700 medical teams. The deputies said: The PLA will continue to contribute to the construction of the country.

Xiao Hua, NPC deputy and first political commissar of the Lanzhou PLA units, said: We should constantly remind ourselves that ours is a big country with a vast population and weak foundations. We should not [words indistinct] in our socialist construction. It is necessary to bring into full play the Yanan spirit and rely on ourselves in achieving the goal of "ensuring a 4 percent, and striving for a 5 percent, growth in the economic output value" at an early date. He said: Imbued with the glorious tradition of supporting local people's construction, the Lanzhou PLA units have, in recent years, done an enormous job in helping local people build water conservation facilities, highways and railways, plant trees and control deserts. We will take a more active part in the construction of the country and speed up the pace of economic development in the Sixth 5-Year Plan.

Yang Chengwu and Fu Kuiqing, NPC deputies and respectively commander and political commissar of the Fuzhou PLA units, said: The army shoulders an unshirkable duty in the Sixth 5-Year Plan. Recently, during his visit to Fujian to conduct investigation and study, Comrade Hu Yaobang urged the province to take the lead in national economic development, by relying on the five forces and mobilizing the five positive factors, of which the army is one. He called on armymen to actively take part in mobilizing people's thinking, giving technical guidance and building difficult engineering projects. Yang Chengwu and Fu Kuiqing said: In supporting local construction in the future, the Fuzhou PLA units will concentrate their efforts on major social undertakings and difficult engineering projects in order to contribute their share to the fulfillment of the Sixth 5-Year Plan.

Text of Peng Zhen Report

OW050149 Beijing XINHUA in English 0103 GMT 5 Dec 82

[Text] Beijing, December 5 (XINHUA) -- Following is the full text of the report on the draft of the revised constitution of the People's Republic of China delivered by Peng Zhen, vice-chairman of the Committee for Revision of the Constitution, on November 26, 1982, at the Fifth Session of the Fifth National People's Congress:

Members of the Presidium and fellow deputies,

I am entrusted by Chairman Ye Jianying of the Committee for Revision of the Constitution with the task of reporting on the draft of the revised constitution on behalf of the committee.

The constitution currently in force was adopted by the Fifth National People's Congress at its First Session held in March 1978. Since then, our country has passed through a period of important historical change. After the Third Plenary Session of the Eleventh Central Committee of the Chinese Communist Party convened in December 1978, the party and the state led the whole people in rectifying the mistakes of the "Cultural Revolution" in all fields, summed up in a deep-going way the historical experience gained since the founding of the People's Republic and restored, or in the light of the new situation formulated, a series of correct principles and policies which have enormously changed the country's political, economic and cultural life.

The constitution as it stands in many ways no longer conforms to present realities or meets the needs of the life of the state; thus, all-round revision is necessary. The Resolution on Certain Questions in the History of Our Party Since the Founding of the People's Republic of China adopted last year by the Eleventh Central Committee of the Chinese Communist Party at its Sixth Plenary Session and the documents adopted by the twelfth national party congress this year received support from the people of the whole country and provide a sound basis for revising the constitution.

We have for two years discussed and revised the present constitution conscientiously, carefully and meticulously. At the suggestion of the party Central Committee, the Fifth National People's Congress at its Third Plenary Session on September 10, 1980 decided to set up a Committee for Revision of the Constitution to be responsible for the work. After being set up, the committee and its secretariat solicited opinions widely from all localities, departments and quarters and closely studied them and, in February this year, submitted the draft of the revised constitution of the People's Republic of China for discussion. The committee at its second session spent nine days in discussing and revising the draft. Revisions were also proposed by members of the Standing Committee of the National People's Congress, by some members of the Standing Committee of the National Committee of the Chinese People's Political Consultative Conference, by leaders of democratic parties and people's organizations, and by leading members of departments under the Chinese Communist Party's Central Committee, of departments under the State Council, of leading bodies of the People's Liberation Army and of provinces, autonomous regions and municipalities directly under the central government. The committee at its third session in April carried on a nine-day discussion on the draft and adopted it, which was made public by the Standing Committee of the National People's Congress and submitted to the people of all nationalities in the country for discussion.

The extensive scale of the nationwide discussion, the vast number of participants and the wide impact demonstrate the surging political enthusiasm of the workers, peasants, intellectuals and other sections of the people in managing state affairs. Through the discussion and the exercise of democracy, the wisdom of the people has been pooled more effectively for revising the constitution. Such discussion was in fact an experience in national mass education in the legal system, and it has raised the consciousness of the cadres and the masses in abiding by the constitution and upholding

its dignity. The consensus is that the draft scientifically sums up the historical experience of development of socialism in China, that it reflects the common will and fundamental interests of the people of all nationalities, conforms to the situation in China and meets the needs of socialist modernization. During the nationwide discussion, many opinions and proposals of all kinds were put forward. The secretariat of the Committee for Revision of the Constitution made further revision of the draft in accordance with them. Many important and rational proposals were adopted. While the substance of the original draft remains unchanged, nearly 100 additions and amendments were made in regard to specific provisions, not including changes in wording. Other proposals, though good, were not incorporated because the conditions for giving them effect do not yet exist or the necessary experience is still lacking, or because it is more appropriate to include them in other laws and documents rather than in the fundamental law of the state. After article-by-article discussion for five days by the committee at its 4th session, the draft was approved after further revisions by the committee at its 5th session on November 23. It is now submitted to the National People's Congress for consideration.

What are the guidelines for the revision of the constitution?

The drafting was done under the overall guidance of the four cardinal principles, namely, adherence to the socialist road, to the people's democratic dictatorship, to leadership by the Communist Party of China, and to Marxism-Leninism and Mao Zedong Thought. These cardinal principles form the common political basis for the advance of the people of all our nationalities in unity and are the fundamental guarantee for the smooth progress of our socialist modernization.

The preamble of the draft reviews the history of the Chinese revolution in the past century and more. It points out that great and earth-shaking historical changes have taken place in China in the 20th century. Of these, four historical events are of the utmost importance. Apart from the revolution of 1911 which was led by Dr. Sun Yat-sen, the three others all resulted from the efforts of the entire Chinese people led by the Communist Party of China with Chairman Mao Zedong as its leader. These three major events are: the overthrow of the rule of imperialism, feudalism and bureaucrat-capitalism and the founding of the People's Republic of China; the elimination of the system of exploitation lasting for several thousand years and the establishment of the socialist system; and the forming, in the main, of an independent and fairly comprehensive system of industry and the development of socialist economy, politics and culture. The revolution of 1911 was of great historical importance, but it fell short of fulfilling the task of China's national-democratic revolution. The three later events have brought about a fundamental change in the destiny of the Chinese people and in our society and state. These great historical changes led the Chinese people to the fundamental conclusion: But for the Chinese Communist Party there would be no New China, and socialism and socialism alone can save China. The four cardinal principles are both a reflection of the law of historical development that is independent of human will and the decisive choice of the hundreds of millions of Chinese people in the course of long years of struggle.

With the establishment of the socialist system, China entered a new period of historical development. The basic characteristic of this new period is that exploiting classes have been eliminated as such and that class struggle is no longer the principal contradiction in Chinese society. This basic characteristic requires a substantial change in the focus of work of the state and in its guiding principles. To adhere to the four cardinal principles under the new historical conditions, it is imperative to integrate the universal truth of Marxism with the concrete practice of China's socialist construction and to blaze a path for socialist construction with distinctive Chinese features. We have scored great successes and also made many mistakes since we began exploring this correct path in the mid-1950s. Initiation and continuation of the "Cultural Revolution" constituted a grievous mistake. Of course it was not because we adhered to the four cardinal principles that we made mistakes but because we failed to implement them correctly. As for the sabotage by the

Lin Biao and Jiang Qing counter-revolutionary cliques during the "Cultural Revolution", it was carried out under the banner of these principles, but constituted a complete betrayal of them. Overthrow of the two counter-revolutionary cliques and correction of the mistakes of the "Cultural Revolution" represent a triumph for these principles. Now we have set our guiding ideology to rights and formulated a correct programme for creating a new situation in all fields of socialist modernization. All this has enormous and far-reaching significance for the prosperity of our country. Bringing about this historic change has been a process of restoring the true features of the four cardinal principles and of adhering to them and developing them. These principles have been substantiated to a large degree in the new historical period and have acquired new and richer content.

A major strategic policy in setting things right has been the resolute shifting of the focus of the work of the state to socialist modernization of China's economy. This must be the focal point for all other work which should serve it. The consolidation of the state and the prosperity of our country, the stability and growth of Chinese society and the improvement of the people's material and cultural life will, in the final analysis, be determined by the expansion of production and the success of our modernization programme. We must from now on implement this strategic policy unswervingly unless there should be a massive invasion by the enemy. Even in that event, we must still carry on whatever economic development is required by the war and permitted by the actual situation. The recording of this policy in the constitution is entirely necessary. While stressing economic development as the focus of our work, we must pay full attention to building a socialist spiritual civilization and to developing socialist democracy. The draft of the revised constitution clearly stipulates in its preamble: "The basic task of the nation in the years to come is to concentrate its effort on socialist modernization" and "to modernize industry, agriculture, national defence and science and technology step by step to turn China into a socialist country with a high level of culture and democracy". The people of all our nationalities must work in concert to fulfil this great task.

The first constitution of the People's Republic of China, namely, the constitution of 1954, was a very good one. But at that time China had just begun socialist transformation and construction. Enormous changes have taken place in our country and society, so it is quite natural that the 1954 constitution no longer fully suits the current situation. The present draft maintains and develops the fundamental principles of the 1954 constitution, while incorporating a careful summary of the rich experience of China's socialist development and draws on international experience; it takes into account both the current situation and the prospects for development. Therefore, this session of the National People's Congress assuredly can enact a new constitution that is distinctively Chinese and meets the needs of our socialist modernization in the new historical period and that will remain valid for a long period of time.

Now I would like to give some explanations about the basic content of the draft of the revised constitution in conjunction with opinions and questions raised during the nationwide discussion.

1. Our State System, the People's Democratic Dictatorship

The first article of the draft revised constitution stipulates: "The People's Republic of China is a socialist state under the people's democratic dictatorship led by the working class and based on the alliance of workers and peasants." This defines the nature of our state and sets forth our state system.

Our people's democratic dictatorship is in essence a dictatorship of the proletariat. This is made explicit in the preamble of the draft. The dictatorship of the proletariat takes different forms in different countries, and the people's democratic dictatorship is a form created by the Chinese people under the leadership of the Chinese Communist Party that suits the conditions and revolutionary traditions of our

country. The term the people's democratic dictatorship is used to define our state power in the common programme of 1949, in the constitution of 1954 and in the documents of the Eighth National Congress of the Chinese Communist Party held in 1956, and we continue this usage in the present draft. The working class is the leading class in our country. Although it comprises a minority of the entire population, it has the vast numbers of peasants as its steadfast ally, and an extremely broad united front led by the Communist Party has taken shape in the long years of revolution and construction. Our country is in a position to practise democracy among the greatest number of people while the targets of dictatorship are only a small number of persons. The people's democratic dictatorship is a formulation which accurately states the present condition of the classes in China and the broad basis of our political power, and it clearly shows the democratic nature of our state power.

The term the people's democratic dictatorship in the current draft is not to be taken as mere restoration of the formulation and its content in the 1954 constitution. The people's democratic dictatorship of the early years of the People's Republic corresponded to the circumstances and tasks of that transitional period when the chief task of the state power was to carry the new-democratic revolution to completion, proceed to the socialist transformation of the private ownership of the means of production, and bring about the transition from new democracy to socialism. With the establishment of the socialist system, however, the task of our state power under the people's democratic dictatorship became primarily to safeguard the socialist system and to guide and organize socialist construction. There has already been a significant change in the class composition of this political power. The working class is much bigger, having grown several fold in size, and carries greater weight in the political life of the state. With the socialist transformation, the vast numbers of peasants have changed from peasants engaged in individual farming to those engaged in collective farming. The number of intellectuals has also grown several fold. Taken as a whole, they have become part of the working class. The exploiting classes no longer exist as such; the overwhelming majority of their members have remoulded themselves and become working people earning their own living.

The workers, peasants and intellectuals constitute the three basic social forces in our socialist construction. Summarizing the views put forward in the nationwide discussion of the draft, we have added the following sentence to the preamble: "In building socialism it is imperative to rely on the workers, peasants and intellectuals and to unite with all the forces that can be united." Here, the intellectuals are placed on a par with the workers and peasants in terms of their mode of work. Then why does the first article of the draft not say "the alliance of workers, peasants and intellectuals"? That is because, under the socialist system, the difference between the intellectuals and the workers and peasants is not one between classes; as regards their relationship to ownership of the means of production, or class character, the intellectuals do not constitute a class distinct from the workers and peasants. The first article defines the nature of our state, that is, our state system, from the viewpoint of class relations. The formulation "based on the alliance of workers and peasants" includes the intellectuals.

The nature of our state as a people's democratic dictatorship determines that in China it is the people and the people alone who are the masters of the state and society. The draft explicitly stipulates: "All power in the People's Republic of China belongs to the people." This is the kernel of our state system and a fundamental principle governing it. The draft specifically stipulates: "The organs through which the people exercise state power are the National People's Congress and the local people's congresses at different levels. The people administer state affairs and manage the economic, cultural and social affairs through various channels and in various ways in accordance with the law." One billion people wielding the state power provides a reliable guarantee for safeguarding the fundamental interests of the people and ensuring that our state will be able to weather any storm.

The provisions on the fundamental rights and duties of citizens are an extension of the stipulated principles concerning the state system of the people's democratic dictatorship and the socialist social system in the chapter on general principles. Our state system and social system provide both legal and practical guarantees that our citizens enjoy extensive and genuine freedoms and rights. The draft has reinstated the provision in the 1954 constitution that all citizens are equal before the law. China's laws are drawn up by the whole nation under the leadership of the working class and are the concentrated expression of the will and interests of the people. All citizens are equal before such laws, which apply to all citizens equally; no citizen is allowed to enjoy the privilege of being above the constitution and the law. It is imperative to reinstate this provision, for it represents a basic principle that ensures the application of socialist democracy and legality. The right to vote and the right to stand for election are important indicators that the people exercise state power. Since the elimination of the exploiting classes, the number of people enjoying the right to vote and the right to stand for election in proportion to the total population has steadily grown. According to statistics from the 1981 direct elections at the county level throughout the country, 99.97 per cent of the citizens attaining the age of 18 enjoyed these rights. This fully demonstrates the broad scope of our socialist democracy. In the light of historical experience and the lessons of the "Cultural Revolution", the draft has, in its provisions on the fundamental rights of citizens, not only restored what was relevant in the 1954 constitution, but made it more specific and explicit and added new content. For example, there is the additional provision on the inviolability of the personal dignity of citizens, and there are more specific provisions than before on citizens' freedom of person and of religious belief, the inviolability of home, the protection of their freedom and privacy of correspondence by law and their right to criticize and make suggestions to any state organ or functionary and to make complaints and charges against, or exposures of, violation of the law or dereliction of duty by any state organ or functionary, and so on. The draft also stipulates relevant basic policies and measures to be adopted by the state to materialize and gradually extend citizens' rights.

Freedoms and rights with absolutely no restrictions have never existed in the world. As ours is a socialist country, the interests of the state and society are in basic accord with the citizens' personal interests. Only when the democratic rights and fundamental interests of the people as a whole are ensured and extended, will it be possible for the freedoms and rights of individual citizens to be effectively ensured and fully realized. Hence the draft stipulates: "The exercise by citizens of the People's Republic of China of their freedoms and rights may not infringe upon the interests of the state, of society and of the collective, or upon the lawful freedoms and rights of other citizens."

The draft stipulates: "Every citizen enjoys the rights and at the same time must perform the duties prescribed by the constitution and the law." In accordance with this fundamental principle, the draft specifies the duties of citizens to the state and society. Only when all observe and perform their fundamental duties as citizens, can they be sure of enjoying their civic rights as prescribed by the constitution.

Democracy among the people is one aspect of the people's democratic dictatorship; the other is dictatorship by the entire people over their enemies. After the elimination of the system of exploitation and the exploiting classes, the targets of this dictatorship are no longer complete reactionary classes, and the number of targets has dwindled. However, owing to certain domestic factors and foreign influences, class struggle will continue to exist within certain limits for a long time, and may even sharpen under certain conditions. Our people must still fight against those forces and elements at home and abroad that are hostile to China's socialist system and try to undermine it. Therefore, the function of the state as an instrument of dictatorship cannot be abolished at this time. Suppression of treasonable and other counter-revolutionary activities and striking at dangerous criminals who deliberately attempt to undermine and overthrow the socialist system in

the economic and other fields are both functions of the state in exercising dictatorship in accordance with the constitution and the law. It is imperative to uphold these functions in order to ensure successful implementation of the socialist modernization programme and safeguard and promote socialist democracy.

2. Our Socialist Economic System

The draft of the revised constitution truly reflects the fact that a socialist economic system has been established in our country and that it is growing ever stronger. It affirms socialist public ownership of the means of production as the basis of our socialist economic system.

Ownership by the whole people and collective ownership by the working people are the two forms of socialist public ownership in our country. The draft stipulates: "The state economy is the sector of socialist economy under ownership by the whole people; it is the leading force in the national economy." This is the decisive factor ensuring that the collective economy of the working people advances along the socialist road, that individual economy serves socialism and that the growth of the entire national economy conforms to the overall and long-term interests of the working people. The draft stipulates that, among the natural resources, all mineral resources and waters are owned by the state; and that all forests, mountains, grassland, unreclaimed land and beaches are owned by the state, except for those owned by collectives in accordance with the law. With the permission of the state, some natural resources owned by the state may within certain limits be allocated to collective economic organizations or even individuals for their use.

Collective ownership by the working people is the principal economic form in our countryside. It is suited to the present stage of development of our agricultural productive forces. Apart from the people's communes, agricultural producers' co-operatives and other forms of co-operative economy such as producers', supply and marketing, credit, and consumers' co-operatives exist and are growing in our rural areas. Even in the cities and towns, the state economy cannot run everything. The development of co-operative economy under collective ownership is suitable for a fairly big portion of handicrafts' industries, the building trade and transport, as well as commerce and service trades. The draft stipulates: "The state protects the lawful rights and interests of the urban and rural economic collectives and encourages, guides and helps the growth of the collective economy."

On the question of land ownership, the draft makes clear-cut stipulations proceeding from the realities in our country. Land in the cities is owned by the state. Land in the rural and suburban areas is owned by collectives except for those portions which belong to the state in accordance with the law. House sites and private plots of cropland and hilly land are for the long-term use of rural households but are not their private property. The state may in the public interest take over for its use in accordance with the law land owned by collectives. "No organization or individual may appropriate, buy, sell or lease land, or unlawfully transfer land in other ways." These provisions of principle are of great significance in ensuring our socialist economic development, and particularly in ensuring the socialist orientation in the growth of our agricultural economy. It should be explained here that in article 10 of the draft, land in the towns was originally put on a par with land in the rural and suburban areas. During the nationwide discussion, it was pointed out that conditions differ in various parts of the country and some towns of a fairly large scale will continue to grow and actually become small cities. That is why the provision about land in towns has been deleted. The question of land-ownership in towns can be dealt with in each case in the light of the actual situation.

It will be necessary for the individual economy of the working people to exist for a considerable period in urban and rural areas and to grow to a certain extent. The draft affirms that this individual economy, within the limits prescribed by law, is

a complement to the socialist public economy; the state protects the lawful rights and interests of the individual economy, and guides, helps and supervises it by means of administrative control. The draft also stipulates: "Working people who are members of rural economic collectives have the right, within the limits prescribed by law, to farm private plots of cropland and hilly land, engage in household sideline production and raise privately owned livestock."

In short, state economy, collective economy and individual economy all have advantages in different respects and are all indispensable, although they have different status and functions. The presence of individual economy, which occupies only a small part of the national economy, does not prevent socialist public ownership from being the foundation of our economic system or hamper the successful growth of public economy. Given the premise of upholding the leading position of the state economy, we must develop diverse economic forms so as to promote the prosperity of the whole national economy.

The establishment of socialist public ownership makes it objectively possible to eliminate anarchy in social production and to practise economic planning. The planned economy is the basic system of the socialist economy and an important hallmark of socialism's superiority over capitalism. Our national economy must be developed in a planned way, while our system of administration through planning must be adapted to the actual situation, that is, to the existence of diverse economic forms in our country and to the real level of our economic development. While specifying that "the state practises economic planning on the basis of the socialist public ownership", the draft stipulates that the state "ensures the proportionate and co-ordinated growth of the national economy through overall balancing by economic planning and the supplementary role of regulation by the market". That is to say, the state should put the production and circulation of essential goods under unified planning, consisting of mandatory and guidance planning. As for the enterprises producing goods which fall outside the unified plans, the state allows them the freedom to adjust production according to variations in market demand and supply. To ensure the proper functioning of the social economy and the authority of the state plan, the draft stipulates: "Disturbance of the orderly functioning of the social economy or disruption of the state economic plan by any organization or individual is prohibited."

The state in the past tended to exercise excessive and rigid control in planning. In view of this drawback, apart from the adoption of diverse forms of planning to suit different conditions, enterprises should be given varying degrees of decision-making power so as to combine unified leadership through state planning with initiative by the production units. The draft stipulates that "state enterprises have decision-making power in operation and management within the limits prescribed by law, on condition that they submit to unified leadership by the state and fulfil all their obligations under the state plan" and that "collective economic organizations have decision-making power in conducting independent economic activities, on condition that they accept the guidance of the state plan and abide by the relevant laws". Furthermore, the draft stipulates that the state must institute "the socialist system of responsibility in various forms". All this will be of great importance in enhancing the enthusiasm and initiative of production units and workers, invigorating the economy and pooling the knowledge and efforts of the people for socialist modernization.

With the establishment of socialist public ownership, the system of exploitation of man by man was abolished, and "from each according to his ability, to each according to his work" became a basic principle in our socialist economy. This is reaffirmed in the draft. The principle of "to each according to his work" is linked to that of "from each according to his ability". In applying the principle "to each according to his work", we must do ideological work among the workers while providing material benefits so that they will work for society to the best of their ability. Though conditions are still lacking to enable everyone to develop his talent in an all-round

way, the nature of work in our socialist society has fundamentally changed compared with that in a society under an exploitative system. The draft stipulates: "All working people in state enterprises and in urban and rural economic collectives should perform their tasks with an attitude consonant with their status as masters of the country." On its part, society, in which work is planned and organized, should see to it that the workers are paid according to the quantity and quality of their work and that all possible conditions are created for them to develop their talent.

Our economy is rather backward. To change this situation and build China into a modern socialist country as quickly as possible, it is imperative to give full play to the superiority of the socialist system, fully mobilize the broad masses of the people, rely on our own efforts and work hard. Furthermore, as China has a vast territory, its economic, technological and cultural development is very uneven between different regions, departments and enterprises. Our socialist economy must be guided by principles and have flexibility, must be both unified and diversified. This will help bring into full play the enthusiasm of the localities, departments, enterprises and workers under the centralized and unified leadership of the central authorities and suit our measures to differing conditions in terms of locality, time, issue and persons involved, so that both human and material resources, including land, are turned to best account and a free flow of goods is achieved. It is in this spirit that the articles on the economy are formulated. The present restructuring of our economic systems has already brought significant results, and it will be continued in a comprehensive and deep-going way. The relevant provisions of the draft lay down the principles for this work. Proceeding along these lines, we can assuredly build and develop a socialist economy with distinctive Chinese features so as to turn China into a rich and powerful country step by step.

3. Socialist Spiritual Civilization

The Chinese people have the fundamental task of striving to build a high level of socialist spiritual civilization while working for a high level of material civilization in building socialism. The addition of articles on socialist spiritual civilization marks an important step forward in the revision of the constitution.

With regard to the cultural aspect of building a socialist spiritual civilization, the chapter on general principles in the draft, in accordance with opinions expressed in the nationwide discussion, devotes an article each to education, to science, to public health and physical culture and to culture. This carries more weight than the composite article contained in the original draft and also enriches the content.

The expansion of education includes both making it universal and improving its standards so as to raise the educational level of the workers, peasants and cadres, to increase the number of intellectuals and to train specialized personnel in all fields. This is the foundation for the growth of science and culture as a whole and a condition for raising the people's political consciousness; it is also an indispensable prerequisite for developing material civilization. Citizens have the duty as well as the right to receive education, which includes compulsory primary education for school-age children, proper types of political, cultural, scientific, technical and professional education for working adults and pre-employment vocational training. The general cultural level in China is rather low. A more rapid growth of education calls for both regular schooling and spare-time education in various forms. The state will allocate adequate resources for educational purposes and at the same time encourage all social forces, including economic collectives, state enterprises and undertakings, public organizations and individuals who have the approval of the state to run educational facilities in various forms and with mass support. Modernization of science and technology is a key link in our four modernizations. The development of the natural and social sciences, research in basic and applied sciences, and the dissemination of scientific and technological knowledge are of paramount importance for socialist construction. Obviously public health and physical culture undertakings are important in protecting the people's health,

building up their physique and raising their efficiency in work and study. Literature and art, the press, publishing and other cultural undertakings are also essential for enriching and improving the people's cultural life. The development of all these undertakings, however, cannot rely solely on the resources of the state; efforts by all social forces and wide-ranging activities of a mass character will be needed. These principles and requirements are incorporated in the relevant articles of the draft.

The policy of "letting a hundred flowers blossom and a hundred schools of thought contend" is not included in the articles on cultural work. This was based on the following considerations: First, the draft already includes among the fundamental rights of citizens freedom of speech and of the press, and freedom to engage in scientific research, literary and artistic creation and other cultural pursuits, that is, the substance of the policy is embodied in legal terms and, moreover, is given a broader interpretation. Second, apart from this policy, there are other basic policies governing work in science and culture, and it is unnecessary and impossible to write them all into the constitution. Of course, there is no doubt that "letting a hundred flowers blossom and a hundred schools of thought contend" remains one of the basic principles guiding our scientific and cultural work and that it must be firmly implemented to make socialist science and culture flourish.

With regard to the ideological aspect of building socialist spiritual civilization, it must be noted, first of all, that Marxism-Leninism and Mao Zedong Thought is our fundamental guiding ideology. This is expressed in the preamble as one of the four cardinal principles.

Article 24 of the draft stipulates: "The state strengthens the building of socialist spiritual civilization through spreading education in high ideals and morality, general education and education in discipline and the legal system, and through promoting the formulation and observance of rules of conduct and common pledges by different sections of the people in urban and rural areas." This means that efforts must be made to imbue more and more citizens with high ideals, moral integrity, general education, and a sense of discipline so that a new standard of social morality is fostered and our nation acquires a revolutionary and vigorous mental outlook.

The same article also stipulates: "The state advocates the civic virtues of love for the motherland, for the people, for labour, for science and for socialism." This has been developed on the basis of the five requirements (love of the motherland, the people, labour and science, and care of public property) defining civic virtues in the common programme adopted in the early years of the People's Republic. These five requirements were explicit and plain. They proved to be useful in educating the masses of people and left a deep impression on them. In the conditions prevailing then, it was not yet opportune to put forward "love for socialism" as a requirement in the common programme. Today, it has become a matter of course to include it, and so it replaces "care of public property" in the original five requirements. Love for socialism is not an abstract idea. The care of public property is an important part of it.

Article 24 also calls for ideological education in communism among the people. Communist ideology is the heart of socialist spiritual civilization. In the period of the new-democratic revolution, Comrade Mao Zedong already pointed out clearly: "So far as the orientation of our national culture is concerned, communist ideology plays the guiding role." Now that we have established the socialist system, we should and can strengthen nationwide education in communism among cadres and the people, with everyone taking part. Only in this way will it be possible to keep the socialist orientation in our modernization drive and to ensure that our social development keeps heading for the correct goal and retains its ethical motivation. Education in communist ideology should take the form of helping a growing number of citizens acquire a dialectical and historical materialist world outlook and the work

ethic of serving the people wholeheartedly, and integrate personal with collective and national interests, integrate immediate with long-term interests, and subordinate immediate personal interests to long-term common interests. Such education, of course, does not mean skipping a stage of historical development and pushing an economic and social system that can be realized only at a higher stage, the stage of communism with its highly developed productive forces. On the contrary, it must be in line with socialist principles such as "to each according to his work" and clear-cut economic responsibility to which we firmly adhere in our economic and social life at the present stage. Only under the guidance of such ideological education can socialist principles and policies be implemented fully and correctly.

Another provision in the same article is that the state "combats capitalist, feudalist and other decadent ideas", which sets the fighting task on the ideological front. Historical and practical reasons as well as domestic factors and the international environment make this fighting task protracted, and we should in no way relax our efforts.

Here I would like to make one further point: The requirements for building socialist spiritual civilization are in fact implied in many of the articles in the draft on the fundamental rights and duties of citizens. In our socialist country, ideological education, public opinion, standards of social conduct and the law are interrelated. Our constitution provides for the rights of citizens and at the same time requires that they raise their consciousness as masters of the country and society and safeguard and exercise their rights in a correct manner. Safeguarding one's own rights and respecting those of others are inseparable. This requires that every citizen should safeguard the interests of the state, society and the collective and respect the freedoms and rights of others while safeguarding his own rights. The duties of citizens stipulated in the constitution are legally obligatory. But it is more important that, as the country's masters, citizens should enhance their sense of responsibility to the state, to society and to other citizens and conscientiously perform their duties, including those of safeguarding the socialist system and the unity of the country and of all our nationalities, safeguarding the security, honour and interests of the motherland, observing the constitution, the law, discipline and public order, and taking care of public property. In order to build socialist spiritual civilization in the whole society, it is important that all citizens raise such consciousness and sense of responsibility, handle their relations with the state and society and with other citizens on the princples of socialism and collectivism, cultivate a recognition of their rights and duties and a sense of organization and discipline consonant with the socialist political system, and acquire awareness as socialist citizens.

4. The Structure of the State

The draft of the revised constitution stipulates that "the state organs of the People's Republic of China apply the principle of democratic centralism". In the light of this principle and the experience we have gained over the last thirty and more years in the building of state power, a number of new and important provisions about the state structure have been incorporated into the draft. They mainly deal with the following aspects:

(1) Strengthening the system of people's congresses. Some of the functions and powers which originally belonged to the National People's Congress are now delegated to its Standing Committee. The functions and powers of the Standing Committee have been expanded, and the committee has been strengthened organizationally. Both the National People's Congress and its Standing Committee exercise the legislative power of the state; while the basic statutes are enacted by the former, other statutes are enacted by the latter. Members of the N.P.C. Standing Committee may not hold posts in any of the administrative, judicial and procuratorial organs of the state, which means that a considerable number of them devote their full time to this work. The work of the National People's Congress is strengthened by the establishment of

special committees to examine, discuss and draw up relevant bills or draft resolutions under the direction of the National People's Congress and its Standing Committee.

(2) Restoring the posts of president and vice-president of the People's Republic. (Previously translated as chairman and vice-chairman of the People's Republic -- translator's note.) Practice since the founding of the People's Republic proves that these posts are necessary for a sound state system and are better suited to the custom and desire of our people of all nationalities.

(3) Establishing the state Central Military Commission to direct the armed forces of the country. The chairman of the Central Military Commission exercises overall responsibility for the commission. He is elected by the National People's Congress and is responsible to it and its Standing Committee. The People's Liberation Army, created and led by the Chinese Communist Party, has been the national army since the founding of the People's Republic. On the basis of summing up the historical experience since the founding of the People's Republic and in accordance with the actual conditions and needs of our country, the draft properly defines the position of the armed forces in the state system. The leadership by the Chinese Communist Party over the armed forces will not change with the establishment of the state Central Military Commission. The party's leading role in the life of the state, which is explicitly affirmed in the preamble, naturally includes its leadership over the armed forces.

(4) The premier exercises overall responsibility for the State Council; executive meetings of the State Council are composed of the premier, vice-premiers, state councillors and secretary-general of the State Council; the premier convenes and presides over executive and plenary meetings of the State Council. The ministers exercise overall responsibility for the respective ministries or commissions under their charge; the ministers convene and preside over executive meetings or commission meetings of the ministries or commissions under their charge.

In order to strengthen supervision over finances and financial and accounting activities, the State Council newly establishes an auditing body which will independently exercise its power to supervise through auditing in accordance with the law. Local governments at different levels also establish auditing bodies correspondingly.

(5) Strengthening the building of the local organs of state power under the unified leadership of the central authorities. The local people's congresses at and above the county level establish their standing committees. The people's congresses of the provinces and municipalities directly under the central government and their standing committees have the power to adopt and issue local regulations. Local people's governments at different levels practise the system of overall responsibility by governors, mayors, county heads, district heads, township heads and town heads. These provisions apply to the organs of self-government of national autonomous areas as well.

(6) Changing the system of the rural people's commune which combines government administration and economic management and establishing organs of state power at the township level. The people's commune will be solely an organizational form of the rural collective economy. This change will serve to strengthen the organs of state power at the grassroots level in the rural areas and also to expand the collective economy. As for the concrete step to separate government administration from economic management, this calls for meticulous efforts, and the authorities in different localities should, in the light of the actual local conditions, conduct the work under leadership, step by step and in a planned way, refraining from rashness.

The status and role of self-governing mass organizations such as residents' committees and villagers' committees, which have long proved to be effective, are written into the constitution.

(7) It is stipulated that state leaders, including the president and vice-president of the People's Republic, the chairman and vice-chairmen of the Standing Committee of the National People's Congress and the premier and vice-premiers of the State Council, shall serve no more than two consecutive terms. Thus, the de facto system of life-long tenure of leading posts is abolished.

Now, I would like to explain in particular the intentions of the above provisions and the requirements embodied in them.

First, to enable the whole people to exercise state power better.

Any reform of our political institutions and establishment of state organs should be aimed at ensuring politically and organizationally that the whole people wield state power and are real masters of the country. According to this principle, the main thing to do at the level of the central authorities is to strengthen the National People's Congress. As China is a big and populous country, the number of deputies to the National People's Congress should not be too small; but too large a number will make its regular work cumbersome. The Standing Committee is the permanent body of the National People's Congress, and all those on the committee can be dsecribed as executive deputies to the congress. Being few in number, they can meet frequently and carry a heavy load of legislation and day-to-day work. Therefore, appropriate extension of the functions and powers of the Standing Committee is an effective way to strengthen the system of the people's congress. At the local levels, the main thing to do is to broaden the democratic basis of organs of state power at different levels (including those at the grass-roots level) and, at the same time, extend their functions and powers appropriately so that, under unified central leadership, the localities may carry out their own development plans in the light of their own conditions. The mass organizations of self-management in grass-roots community life ought to be strengthened so that the people are mobilized to manage their own public affairs and social services. Putting these provisions into practice will develop socialist democracy in China more fully.

During the nationwide discussion, it was suggested that, while extending the functions and powers of the Standing Committee of the National People's Congress, we should fully ensure the status of the National People's Congress as the highest organ of state power. This opinion is correct. Therefore, the qualifying clause "provided that they do not contravene the basic principles of these statutes" is added to the third item of the functions and powers of the Standing Committee contained in article 67 of the draft, which originally says that it may introduce, when the National People's Congress is not in session, partial supplements and amendments to the statutes enacted by the National People's Congress. Besides, an item -- the 11th -- which reads, "to alter or annul inappropriate decisions of the Standing Committee of the National People's Congress", is added to article 62 which stipulates the functions and powers of the National People's Congress.

Second, to enable the state organs to guide and organize the work of socialist construction more effectively.

State organs should be established and their functions and powers defined in the following spirit: Organs of state power, namely, the National People's Congress and the local people's congresses, should fully discuss the formulation of laws and policies on major issues and decide on them through democratic procedures so that they truly concentrate the will and represent the interests of the people; and there must be a strict system of responsibility in implementing laws and major policy decisions so as to raise efficiency. The system of responsibility is indispensable in developing socialist democracy and ensuring that the people exercise state power. The will of the people can be carried out only when the decisions they have made through the organs of state power are implemented promptly and effectively by the administrative organs.

Third, to enable the different state organs to co-operate with one another better on the basis of a proper division of labour.

Under the socialist system, there is a community of fundamental interests of the whole people. Therefore, the people's congresses can and must exercise state power in a unified way. Given this premise, there should at the same time be a clear division of power among the administrative, judicial and procuratorial authorities and leadership over the armed forces so that the organs of state power and the other state organs, administrative, judicial and procuratorial, may work in concert and harmony. The president of the People's Republic, the State Council, the Central Military Commission, the Supreme People's Court and the Supreme People's Procuratorate are all elected or created by the National People's Congress, and they are all responsible to it and subject to its supervision. The National People's Congress, the president of the People's Republic and other state organs all work within the scope of their respective functions and powers. The rational division of labour among state organs can avoid over-concentration of power and at the same time serve to enhance the efficiency of work by the state in all fields.

At present, the work of restructuring the state organs is going on in our country. The provisions of the draft on the state structure give expression to the principles and results in this respect and will serve to push the work further ahead.

5. Unity of the Country and Unity of All the Nationalities

The history of the thirty and more years since the founding of the People's Republic shows that the unity of the country and the unity of all our nationalities achieved so far are of tremendous importance for the advance of our socialist cause and the well-being of the whole Chinese nation. Just as Comrade Mao Zedong put it: "The unification of our country, the unity of our people and the unity of our various nationalities -- these are the basic guarantees of the sure triumph of our cause."

At present, reunification of our great motherland is not yet complete, and we must strive to accomplish it. The preamble of the draft states: "Taiwan is part of the sacred territory of the People's Republic of China. It is the lofty duty of the entire Chinese people, including our compatriots in Taiwan, to accomplish the great task of reunifying the motherland." The separation of Taiwan from the motherland in the last three decades and more is absolutely contrary to the interests of our nation and the wishes of our people. An early end to this separation will be highly conducive to the prosperity of the Taiwan region and our motherland as a whole, and to the maintenance of peace in the Far East and in the whole world. It is an inevitable trend in accord with the desires of the people, a trend which no party, political force or individual can resist. It is an internal affair of China, which brooks no interference by any foreign country. On the eve of the National Day last year, Comrade Ye Jianying, chairman of the Standing Committee of the National People's Congress, pointed out in a statement that, after peaceful reunification, Taiwan can enjoy a high degree of autonomy as a special administrative region. This autonomy means, among other things, that the current social and economic systems in Taiwan, its way of life and its economic and cultural relations with foreign countries will remain unchanged. Considering the needs of this particular situation, article 31 of the draft stipulates: "The state may establish special administrative regions when necessary. The systems to be instituted in special administrative regions shall be prescribed by law enacted by the National People's Congress in the light of the specific conditions." We are absolutely unequivocal on the principle of safeguarding China's sovereignty, unity and territorial integrity. At the same time, we are highly flexible as regards specific policies and measures and will give full consideration to the concrete situation in the Taiwan region and the wishes of the people in Taiwan and those of all personages concerned. This is our basic position in handling problems of a similar kind.

It is a basic principle followed by the Communist Party of China and the state to work for the equality, unity and common prosperity of all our nationalities. We have scored tremendous success in this respect in the thirty and more years since the founding of the People's Republic. But we also committed "left" mistakes during this period, especially during the "Cultural Revolution", when the policies of the party and the state on nationality affairs were distorted and undermined, and many cadres and ordinary folk of minority nationalities were made to suffer. This is a serious lesson. In revising the constitution this time, we have paid full attention to summing up the historical experience in this respect and drawn on the important results of setting things to rights in our work among the minority nationalities in recent years.

The preamble of the draft points out: "In the struggle to safeguard the unity of the nationalities, it is necessary to combat big-nation chauvinism, mainly Han chauvinism, and also necessary to combat local-national chauvinism." This is because both are harmful to the unity of our nationalities. Combating big-nation chauvinism chiefly means combating it among the people of Han nationality. This is determined by the fact that the Han nationality makes up for the overwhelming majority of China's population and exerts the greatest influence on the political, economic and cultural life of the country. Comrades of Han nationality should be highly conscientious and mindful in guarding against and overcoming big-Han chauvinism. Like combating big-nation chauvinism, combating local-national chauvinism is also necessary to guarantee unity among all our nationalities. However, the mistake of grieviously broadening the scope of struggle in this regard was committed in the past: First, many comrades not guilty of local-national chauvinism were wrongly accused; secondly, ideological mistakes were wrongly dealt with as contradictions between ourselves and the enemy. Like big-nation chauvinism, local-national chauvinism is a matter of wrong thinking and understanding which belongs to the category of contradictions among the people, except in cases of those who engage in rebellious and secessionist activities in collaboration with foreign quarters. Big-nation chauvinism and local-national chauvinism should be combated in a correct way, mainly through ideological education and adoption of necessary political, economic and cultural measures.

The system of autonomy in regions inhabited by minority nationalities is a correct system which proves suited to our country's conditions through the test of practice. China is a unitary multi-national country jointly created by all our nationalities. Suffering in common from imperialist aggression before liberation, the Han people and the people of minority nationalities forged close ties of mutual help in times of dire need. After the founding of the People's Republic, all our nationalities established a close political, economic and cultural relationship of interdependence and mutual assistance while advancing along the common road of socialism. Regional national autonomy within a unified country not only can ensure the lawful rights and interests of the minority nationalities and speed up the economic and cultural development of the areas they inhabit, but also serve to resist aggression and subversion from outside and guarantee the independence and prosperity of the country as a whole. That is why the draft stipulates that "all the national autonomous areas are inalienable parts of the People's Republic of China", and that "it is the duty of citizens of the People's Republic of China to safeguard the unity of the country and the unity of all its nationalities". This fully accords with the fundamental interests and common will of all our nationalities.

The provisions on regional national autonomy have restored some important principles contained in the 1954 constitution and, moreover, acquired new content in keeping with the changes which have taken place in our country. It is stipulated in section VI, "The Organs of Self-Government of National Autonomous Areas", in the chapter on the structure of the state that the chairmanship and vice-chairmanships of the standing committee of the people's congress of any national autonomous area shall include a citizen or citizens of the nationality or nationalities exercising regional autonomy in the area concerned; that the administrative head of an autonomous region, prefecture or county shall be a citizen of the nationality, or of one of the

nationalities, exercising regional autonomy in the area concerned; and that organs of self-government independently arrange for and administer local economic development under the guidance of state plans and independently administer educational, scientific, cultural, public health and physical culture affairs in their areas. It is also stipulated that, in exploiting natural resources and building enterprises in the national autonomous areas, the state shall give due consideration to the interests of those areas; that the state shall give financial, material and technical assistance to the minority nationalities to accelerate their economic and cultural development and help the national autonomous areas train large numbers of cadres at different levels and specialized personnel and skilled workers of different professions and trades from among the nationality or nationalities in those areas. The provisions in the draft on the right of autonomy of the national autonomous areas show that the state fully respects and ensures the democratic right of the minority nationalities to manage their internal affairs.

6. Independent Foreign Policy

The preamble of the draft lays down the basic principles of China's foreign policy. They are: independence; development of diplomatic relations and economic and cultural exchanges with other countries on the basis of the five principles of mutual respect for sovereignty and territorial integrity, mutual non-aggression, non-interference in each other's internal affairs, equality and mutual benefit and peaceful coexistence; opposing imperialism, hegemonism and colonialism, strengthening unity with the people of other countries, supporting the oppressed nations and developing countries in their just struggle to win and preserve national independence and develop their national economies, and striving to safeguard world peace and promote the cause of human progress.

Our adherence to these principles of foreign policy is dictated by the nature of our state and our social system. Having suffered for a century before the founding of the People's Republic, the Chinese people know full well that without national independence, the people of a country have no possibility to enjoy democratic rights and build a prosperous and powerful country. From their experience in the long years of revolution and construction, the Chinese people are deeply aware that their own future is closely bound up with that of the people of the world. The establishment of the socialist system has rooted out the social causes both of China's submission to any foreign oppression and of any possibility of China committing aggression abroad in any form. The world today is in the throes of intense turbulence, and this turbulent situation will not end so long as imperialism and hegemonism exist in the world. No matter what happens outside China, we will adhere to the policy of independence. As Comrade Deng Xiaoping said at the Twelfth National Congress of the Chinese Communist Party: "No foreign country can expect China to be its vassal, nor can it expect China to swallow any bitter fruit harmful to China's interests." We will also persist in treating all countries, big or small, as equals and consistently stand on the side of all oppressed nations and developing countries as well as all other countries and people working for world peace. China will never seek hegemony and will never allow any hegemonists to ride on its back.

Our country follows the policy of opening to the outside world on the premise of independence and will continue to do so in the days to come. China will continue to expand its economic, technical and cultural exchanges with other countries on the principle of equality and mutual benefit. The draft stipulates that foreign economic organizations and individual foreigners may invest in China and enter into economic co-operation with Chinese economic organizations. Of course, all foreign economic organizations in China must abide by the law of the People's Republic of China, and their lawful rights and interests will be protected by the law of the People's Republic of China.

In accordance with international practice, China protects the legitimate rights and interests of Chinese nationals residing abroad, and at the same time, calls on them to

abide by the law of the country in which they reside and to live in harmony with the people of that country. China protects the lawful rights and interests of foreigners residing in China and, at the same time, requires that they abide by the law of the People's Republic of China. These are all set forth in the draft.

The Chinese people have waged protracted and arduous struggles to win and safeguard their national independence. Our foreign policy represents the fundamental interests of the Chinese people and accords with those of the people of the world. The draft stipulates that the state shall educate the people both in patriotism and in internationalism. The Chinese people's tradition of patriotism and internationalism must be handed down from generation to generation. This is the basic guarantee for adhering to our independent foreign policy.

Fellow deputies, after its discussion and formal adoption by the current session of the National People's Congress, the draft revised constitution will go into operation as the fundamental law of the state with supreme authority and legal force. It will be the general statute for China's good administration and stability in the new historical period. We are convinced that the new constitution will be strictly observed and implemented. Summing up both the positive and negative historical experience in formulating and implementing the constitutions since the founding of the People's Republic, the preamble of the draft clearly states that: "The people of all nationalities, all state organs, the armed forces, all political parties and public organizations and all enterprises and undertakings in the country must take the constitution as the basic norm of conduct, and they have the duty to uphold the dignity of the constitution and ensure its implementation."

Both the National People's Congress and its Standing Committee have the function and power of supervising the enforcement of the constitution; the local people's congresses at different levels should ensure the observance and implementation of the constitution in their respective administrative areas. In his report to the Twelfth National Congress of the Communist Party of China, Comrade Hu Yaobang solemnly declared: "In particular, party members should be educated and urged to take the lead in observing the constitution and laws. The stipulation in the new party constitution that 'the party must conduct its activities within the limits permitted by the constitution and laws of the state' embodies a most important principle. It is impermissible for any party organization or member, from the Central Committee down to the grass roots, to act in contravention of the constitution and laws." The Chinese people and the Communist Party of China fully recognize that the authority of the constitution concerns the political stability and the future of our country, and that it is absolutely impermissible to undermine the constitution in any way. All power in our country belongs to the people. The destiny of our country is in the hands of the awakened people. The Communist Party of China is the political party of the working class that represents the interests of the Chinese people and acts on their will. It has no interests of its own apart from the interests of the people. The Chinese Communist Party has attached great importance to the revision of the constitution, on which the Political Bureau and the Secretariat of its Central Committee conducted special discussions. Most of the members of the Political Bureau and the Secretariat are concurrently members of the Committee for Revision of the Constitution, and the opinions of the party Central Committee have found full expression in the draft. Having led the people in formulating the new constitution, the Chinese Communist Party will uphold the dignity of the constitution and ensure its implementation together with the people of all our nationalities and the democratic parties and people's organizations. After the constitution is adopted, it is necessary to give the constitution wide publicity by various means so that it will be made known to every household. When our one billion people all cultivate the consciousness and habit of observing and upholding the constitution and fight against all acts violating and undermining the constitution, this will become a mighty force. With efforts by all the people and the Chinese Communist Party to ensure its implementation, the new constitution that embodies the will of the people and the correct propositions of the Chinese Communist Party is bound to play a great role in promoting the success of China's socialist modernization.

Hebei Deputies on Constitution

OW051802 Beijing XINHUA Domestic Service in Chinese 1801 GMT 1 Dec 82

[Excerpts] Beijing, 1 Dec (XINHUA) -- The Hebei provincial delegation to the Fifth Session of the Fifth NPC held group meetings in the past few days to discuss the draft revised constitution. The deputies held earnest and in-depth discussion on the role and meaning of the constitution and how to implement it.

Huang Hua, NPC deputy and state councillor, said: The draft revised constitution scientifically sums up China's historical experience and, after its adoption by the current NPC session, will become the country's fundamental law with the supreme authority and legal force and will be the general statute for running the country and keeping its stability in the new historical period. The new constitution will play a great role in promoting both the construction and an independent foreign policy of our country.

Liu Bingyan, NPC deputy, secretary of the provincial CPC committee and acting governor, said: The new constitution is to be adopted at an important time when the 12th CPC National Congress has just put forward the gigantic goal of quadrupling China's economic output value by the end of this century. The new constitution prescribes, in the form of fundamental law, a series of regulations concerning economic construction, culture, education, science, technology and other activities, thereby providing reliable guarantees for the realization of this gigantic goal.

Pan Chengxiao, NPC deputy and vice chairman of the provincial people's congress standing committee, suggested that various means be used in propagating the constitution and incorporating the education on the constitution into middle and primary school textbooks. Party and government cadres at various levels should take the lead in studying and safeguarding the constitution. People's congresses and their standing committees at various levels should consciously supervise the implementation of the constitution by the government.

Zhejiang's Tie Ying Comments

OW060031 Beijing XINHUA Domestic Service in Chinese 1748 GMT 1 Dec 82

[Excerpts] Beijing, 30 Nov (XINHUA) -- The deputies from Zhejiang attending the Fifth Session of the Fifth National People's Congress examined and discussed the draft of the revised constitution from 27 to 30 November. After discussion, deputies unanimously believed: The draft revised constitution reflects the common aspirations and basic interests of all the people in the country. It is the best constitution since the founding of the nation.

Tie Ying, NPC deputy and first secretary of the provincial CPC committee, emphatically pointed out the significance of the provisions in the draft revised constitution on population, land, environmental protection and so on. He said: Land protection, family planning, the protection of the environment and ecological balance are major issues affecting economic construction and the people's livelihood. They are included in our state policy. So far as Zhejiang is concerned, the current economic situation is fine. However, there remain potential dangers. They are population growth, the reduction of arable land and environmental pollution.

He said: All these problems are major ones which would affect our own destiny. We must not ignore them. We must carry out education extensively among the masses of cadres and people on our state policy regarding population and land, strictly enforce family planning, and do a good job in protecting land and the environment.

Deputies also expressed their determination to play their exemplary role well in earnestly studying, popularizing and implementing the new constitution and to safeguard the dignity of the constitution after it is adopted by the NPC session.

Yunnan's An Pingsheng

HK040241 Kumming Yunnan Provincial Service in Mandarin 1100 GMT 3 Dec 82

[Text] According to XINHUA, the Fifth Session of the Fifth NPC started panel discussions on 2 December on Premier Zhao Ziyang's report on the Sixth 5-Year Plan. The meetings were imbued with liveliness and enthusiasm, with the deputies in high spirits. Deputies from all fronts and areas were greatly encouraged when studying the Sixth 5-Year Plan and full of confidence in accomplishing the strategic goal put forward by the 12th party congress.

They stressed: The Sixth 5-Year Plan comes from the great practice of the masses. It has a fully scientific basis and its measures accord with reality. It has a solid mass foundation. Under the guarantee of the new construction, with the people of all nationalities throughout the country uniting as one and working hard, the blueprint of the Sixth 5-Year Plan will be translated into brillant reality.

Yunnan deputy An Pingsheng said: I have been greatly encouraged by listening to Premier Zhao Ziyang's report on the Sixth 5-Year Plan. In particular, when the current world economy is in a poor way, China's economy is actually prospering daily. Not only we have seen this point; farsighted people throughout the world have perceived it too. The 12th party congress has formulated a vast goal of endeavor for us, while the current NPC session will adopt the new constitution and the report on the Sixth 5-Year Plan. This is bound to greatly encourage the people of all nationalities throughout the country.

Comrade An Pingsheng said: The Sixth 5-Year Plan covers the first 5 years in accomplishing the great goal forward by the 12th party congress. Viewing the results in the previous 2 years, the growth of industrial and agricultural production has exceeded the annual growth rate stipulated by the Sixth 5-Year Plan. In common with the whole country, Yunnan's situation has been very good during these 2 years. The province's total industrial and agricultural output value in 1980 set a record, and an increase of 8.1 percent was recorded in 1981. The figure for this year is estimated to show a rise of more than 9 percent over 1981. Economic returns are also improving all the time.

Comrade An Pingsheng said: We recently convened an enlarged meeting of the provincial CPC committee to implement the 12th party congress spirit. The cadres and masses of all nationalities in Yunnan are in very high spirits. We will organize a mass discussion in the province to thoroughly implement the Sixth 5-Year Plan and the goal of endeavor set by the 12th party congress, we must be earnest and down-to-earth, work steadily and make solid progress, and do a good job in all our work.

Guangxi's Qiao Xiaoguang

HK040352 Beijing ZHONGGUO XINWEN SHE in Chinese 1129 GMT 3 Dec 82

[Text] Beijing, 3 Dec (ZHONGGUO XINWEN SHE) -- Guangxi Zhuang Autonomous Regional CPC Committee First Secretary Qiao Xiaoguang said at a panel discussion at the NPC session on 2 December: By the year 2000, Guangxi's total industrial output value will be quintupled while its total agricultural output value will be tripled; put together, total value of industrial and agricultural output will thus grow by 340 percent to reach over 68 billion yuan, at an annual growth rate of 8 percent.

He said: This growth rate leaves a margin, because according to the calculations of departments concerned, total value of industrial and agricultural output might reach more than 80 billion yuan; and as far as agriculture is concerned, tripling is calculated purely from agriculture, and if processing industries and commune and brigade industry and commerce are counted also, then quadrupling could be achieved.

Qiao Xiaoguang said: Guangxi should advance in 2 stages in achieving the 20-year goal of endeavor. In the first 10 years, that is by 1990, total industrial and agriculture output value should reach some 27 billion yuan, including an increase of slightly more than 200 percent in industry, to reach some 16 billion yuan, by rising at an annual average of 7 percent; and total agricultural output value should reach some 11 billion yuan, rising at an annual average of 5 percent.

As for the plans for the current 5 years, by 1985 total industrial and agricultural output value should rise to 19 billion yuan, an increase of 30 percent over 1980, growing at an annual average of 5.5 percent. This includes an increase in total industrial output value to 10.5 billion yuan, rising at an annual average of 6 percent, and an increase in total agricultural output value to 8.6 billion yuan, rising at an annual average of 4.5 percent.

Qiao Xiaoguang pointed out: There is a scientific basis for the above-mentioned 20-year scheme and the plan for the current 5 years, which can certainly be accomplished. The basis consists of three main factors: 1) The region achieved a similar growth rate in the past 15 years. This was despite the unfavorable fact that we pursued a closed-door policy, were influenced by "leftism" in guiding ideology and organized single-product economy in agriculture. Since agriculture and industry were able to develop to this extent then, they will certainly be able to develop at a still faster rate over the next 20 years, with conditions in all aspects very favorable. 2) The region could more than double its total industrial output value merely by carrying out technical improvements in the existing enterprises. 3) The future increase in investment in fixed assets will stimulate relatively fast growth rate in industrial and agricultural production. The key projects arranged by the state in Guangxi in the next 20 years include the Hongshui River stepped powerplants, the exploitation of non-ferrous metals, and construction of the Nanning-Fangcheng and Nanning-Kunming railroads. Investment in these projects, plus locally-raised funds and loans and the use of foreign investment, will total several tens of billions of yuan.

Speaking on current work, Qiao Xiaoguang said, we should concentrate on tackling the following issues:

1. Solve the investment problem by making use of a variety of channels. First, we should strive to get more state investment in view of the facts that the region possesses abundant water conservation, non-ferrous metal and building materials resources, and the stepped powerplants at Tianshengqiao, Yantan, Longtan and Datengxia on the Hongshui River, the Dachang tin mine, the Pingguo lead mine, and the Nanning-Fangcheng and Nanning-Kunming railroads are key state projects. Secondly, we should increase our financial revenue by working hard to develop production and improve economic returns. Thirdly, we should mobilize and raise various funds in society, including investment from various departments, enterprises, municipalities, counties, communes, and brigades, right down to individuals, and use it in an appropriate way through various channels. Fourthly, we should make use of foreign investment. In accordance with the central principles and policies, under the premise of preserving national sovereignty and having the capacity to repay, we should strive to use more foreign investment to organize joint ventures, compensation trade and so on, or to import advanced technology and equipment for improving existing enterprises and raising their economic returns. Fifthly, we should actively promote various kinds of economic and technical cooperation with fraternal provinces, municipalities and autonomous regions.

2. Vigorously develop the processing and comprehensive utilization of agricultural and sideline products.

3. Further enliven the economy, under guidance by state plans.

4. Vigorously promote the production of meat and vegetables and strive for a fundamental turn for the better in meat and vegetable supply for urban and industrial areas within 3 years.

5. Strictly control population growth.

Shaanxi's Ma Wenrui Comments

OW051754 Beijing XINHUA Domestic Service in Chinese 1435 GMT 29 Nov 82

[Excerpts] Beijing, 29 Nov (XINHUA) -- Speaking at the NPC panel discussion on the draft revised constitution, Ma Wenrui, NPC deputy and first secretary of the Shaanxi Provinical CPC Committee, said that the draft revised constitution has pooled the wisdom of the people and received the oroadest support of the masses.

Ma Wenrui said: The draft revised constitution has inherited and carried forward the fundamental principles of the 1954 constitution, while making overall revision of the 1978 constitution, in light of the enormous changes in China's political, economic and cultural life in the new historical period. A prominent feature of the draft revised constitution is that it has overcome the "leftist" influence, eliminated "leftist" content, words, phrases and reflected the guidelines of the 3d Plenary Session of the 11th CPC Central Committee and 12th CPC Congress. Using the four cardinal principles as the overall guidance, the draft revised constitution represents the fundamental interests and common will of the people of the whole country.

Ma Wenrui also stressed the importance of studying, propagating and implementing the new constitution. He said: After the draft revised constitution is adopted, it must be enforced as the fundamental law of the country with the supreme legal force and authority. Due to the "leftist" influence over a long period of time, especially due to the trampling on the constituion by the Lin Biao and Jiang Qing counter-revolutionary cliques, the prestige of the constitution was severly damaged. Some people thought that it was not necessary to have and abide by the constitution. This is very erroneous and harmful. After the new constitution is promulgated, we must extensively publicize, consciously safeguard the dignity of, and set a good example in observing the constitution. The revision and formulation of the constitution were made under the party's leadership. All stipulations in the constitution embody the party's line and policies and reflect the common will of the people of the whole country. Enforcement of the constitution means the realization of the party leadership. Therefore, party organizations at all levels and all party members in Shaanxi must, in accordance with the requirement put forward by Comrade Hu Yaobang in his report at the 12th CPC National Congress, take the lead in observing the constitution and conducting their activities within the limits permitted by the constitution. So long as we conscientiously implement the new constitution, we will be able to promote the victorious advances in China's socialist modernization and ensure the smooth realization of the gigantic program set forth by the 12th CPC National Congress.

NPC DELEGATION RETURNS FROM ASIAN TOUR 3 DEC

OW031904 Beijing XINHUA in English 1624 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- A delegation from China's National People's Congress led by Peng Chong, vice-chairman of the N.P.C. Standing Committee, returned here this evening after visiting Thailand, Malaysia and the Philippines.

Meeting them at the airport were Ulanhu, vice-chairman of the N.P.C. Standing Committee; Zeng Tao, deputy secretary-general of the N.P.C. Standing Committee; Fu Hao, adviser to the Ministry of Foreign Affaris; and diplomatic envoys and officials from the three Asian countries in Beijing.

NIE RONGZHEN ON CPC'S POLICY TOWARD INTELLECTUALS

OW041011 Beijing XINHUA Domestic Service in Chinese 0915 GMT 2 Dec 82

[Text] Beijing, 2 Dec (XINHUA) -- Comrade Nie Rongzhen, member of the Political Bureau of the CPC Central Committee and vice chairman of the Central Military Commission, received Xiong Fu, chief editor of HONGQI journal, at the former's residence on the afternoon of 25 November and issued an important talk saying that without intellectuals it would be impossible to realize the four modernizations nor fulfill the grand task of quadrupling China's industrial and agricultural output.

Comrade Nie Rongzhen said: The party's current policy toward intellectuals is unequivocal. In the foreword of the constitution (revised draft) which is being examined at the current NPC session, it is clearly stated that in China's socialist construction we must rely on the workers, peasants and intellectuals. This shows that workers, peasants and intellectuals constitute the three basic social forces in China and the main body of the Chinese people. We must educate the vast number of cadres and the masses to fully appreciate the intellectuals' position and role in China's socialist modernization program.

Comrade Nie Rongzhen said: Following the 3d Plenary Session of the 11th CPC Central Committee, our party reexamined and reaffirmed its policy toward intellectuals and has regarded the intellectuals as a component part of China's working class. Comrade Deng Xiaoping has repeatedly talked about this question. Happy and with an ease of mind, intellectuals have worked hard and made tremendous contributions on various fronts.

Comrade Nie Rongzhen said: At present, the party's policy toward intellectuals has not been thoroughly implemented in some departments and areas, and resistance against the policy is still strong both inside and outside the party. The major cause of this resistance is that some "left" ideological influence has not been completely eliminated. Many people, particularly cadres, still harbor various prejudices against intellectuals, look down on them or discriminate against them. On the question of implementing the policy toward intellectuals, our press and public opinion agencies must loudly appeal to the public and make the vast number of cadres and masses realize this fact: Without scientific and technological progress, we can neither realize the four modernizations, nor vigorously develop our economy, build up the two civilizations or quadruple our industrial and agricultural output by the end of this centruy. Of course, we can introduce advanced technology from foreign countries, but the four modernizations cannot be bought with money. Therefore, we say, without intellectuals it would be impossible to realize the four modernizations or fulfill the grand task of quadrupling China's industrial and agricultural output.

Recalling the Guangzhou conference of 1962, Comrade Nie Rongzhen said: At that conference long ago, we "threw away the old hats worn by intellectuals and gave them crowns to wear instead." At that time, a heated debate was going on which focused on the party's policy toward intellectuals. At that conference Premier Zhou Enlai, Comrade Chen Yi, Comrade Guo Muruo and I held several discussion sessions. Even at that time we maintained that since we had trained the majority of intellectuals since the founding of the new republic, how could one still label them as bourgeois intellectuals? We proposed to "throw away the intellectuals' old hats and give them crowns," which meant ridding them of the label of bourgeois intellectuals and announcing that they were the working class' intellectuals. Premier Zhou, Comrade Chen Yi and I all spoke at the conference and a conclusion was reached. However, this conclusion was later overthrown by the "Great Cultural Revolution." Under the destruction of Lin Biao and the "gang of four," the intellectuals were labelled "bourgeois reactionary authorities" and the "stinking ninth category" and mercilessly persecuted almost beyond recovery.

After the downfall of the "gang of four," particularly since the 3d Plenary Session of the 11th CPC Central Committee, in its effort to bring order amidst chaos, the party reestablished the policy toward intellectuals giving them a chance to stand up and bring their intelligence and wisdom into play in the four modernizations.

Comrade Nie Rongzhen said: Not long ago I talked with a GUANGMING RIBAO reporter on the question of intellectuals. The majority of the people agreed with me on this question. However, I offended a number of people. What could I do about this? For the sake of national interests and in order to implement the party's policy toward intellectuals in an all-round way, we have to launch a struggle.

Despising and discriminating against intellectuals are reflections of foolishness and backwardness. However, they have had a long history both in Chinese society and inside our party. During the 10 years of disorder of the "gang of four," these prejudices were pushed to their extreme and their pernicious influence has still not been thoroughly uprooted. Therefore, against these influences we must launch open criticism against these prejudices or, if necessary, even a struggle.

Comrade Nie Rongzhen talked with a great deal of concern about the problem concerning middle-aged intellectuals. He said: The middle-aged intellectuals in their 40's and 50's form the backbone nucleus on various fronts. The heavy burden of building up the two civilizations, developing modern science and technology and raising the entire nation's scientific and cultural levels has fallen squarely on their shoulders. Their work load and family responsibilities are heavy. However, as far as these intellectuals are concerned, the party has failed to thoroughly implement its policy toward intellectuals. Many departments and localities have failed to solve the problem of improving their working and living conditions. This problem merits the attention of leading cadres at all levels, particularly leading cadres of plants and institutes. Touching on the early death of Jiang Zhuying and Luo Jiangfu, two middle-aged scientific and technological cadres, Comrade Nie Rongzhen expressed his deep regret. He said: They were both outstanding representatives of China's intellectuals. Not only did they make tremendous contributions, but they also had very promising futures. Wang Dahang, a noted opticist of China, trained Jiang Zhuying to be his successor. However, while they were still alive, responsible persons of some of our party organizations failed to do what they should do to improve their working and living conditions and failed to take better care of and protect them. This is a lesson from which we should learn.

RADIO BA YI COMMENTS ON NEW PRC DEFENSE MINISTER

OW032307 (Clandestine) Ba Yi Radio in Mandarin to China 1325 GMT 28 Nov 82

[Text] It is very natural that the appointment of Comrade Zhang Aiping as defense minister has aroused wide reaction in the whole army. This is the sixth defense minister since the founding of New China. Army building had run into mounting difficulties in the period starting from Comrade Peng Dehuai and ending with the release of Comrade Geng Biao. The above-mentioned comrades had been under heavy pressure from dictatorial politics as some people, from ulterior motives, schemed to replace defense ministers and undermine their prestige. As a result, those comrades were forced to resign and others were persecuted to death. Some people now ask: Can Comrade Zhang Aiping, the sixth defense minister, shoulder his responsibilities without much trouble?

From the standpoint of principle, the great majority of commanders and fighters thought that with his rich work experience and enormous military ability, Comrade Zhang Aiping would be capable of carrying the heavy responsibilities as defense minister.

Comrade Zhang Aiping is a senior member of our army and was Comrade Peng Dehuai's old comrade in arms. Especially significant was that, together with Comrades Zhang Wentian, Huang Kecheng and Zhou Xiaozhou, Comrade Zhang Aiping resolutely supported Comrade Peng Dehuai in opposing the leftist adventurous line at the Lushan conference in 1959. Even though they were repeatedly attacked and persecuted after the Lushan conference, Comrade Zhang Aiping and other comrades did not capitulate or abandon their principled stand. In the light of these past truths, we have to say that Comrade Zhang Aiping is taking over as defense minister at a most difficult and crucial time for our army. When we say crucial time, we mean that some people, under the signboard of reforming the leftist influence, are attempting to carry out a new purge among leading cadres in the upper echelon of the army, in order to get rid of the so-called highranking cadres they dislike. Losing those experienced and prestigious cadres will naturally weaken our army's fighting capabilities and bring about greater hardships. The rank and file throughout the army must therefore make efforts to turn this adverse situation around.

Some comrades remarked: Only by playing his leading role unswervingly as defense minister can Comrade Zhang Aiping contribute towards realizing the goal of turning the PLA into a regular, modern and powerful army, a goal put forward at the 12th CPC National Congress. It is hoped that Comrade Zhang Aiping will, using our army's respected Old Commander Peng as a shining example, boldly stick to the correct stand, uphold the correct line and always bear in mind what Old Commander Peng once said: A communist should have no fear. Our heads may roll, but we must uphold the correct stand for the sake of the party, the army and the interests of the people!

YOUTH PAPER CONDEMNS KILLING OF BABY GIRLS

HK070416 Beijing ZHONGGUO QINGNIAN BAO in Chinese 9 Nov 82 p 3

[Article by Yang Fan [2254 1581]: "Save the Baby Girl"]

[Text] Recently, many readers have written letters to the editorial department, reporting on cases of abandoned baby girls that occurred in some localities. The innocent babies were left at crossroads or street corners and, in some isolated cases, were drowned. These inhuman and brutal acts should not be tolerated. We deem it necessary to issue a call to the whole society: Save the baby girls!

It has been explicitly stipulated in the marraige law: "Drowning babies and other acts of murdering babies are prohibited." Parents should never resort to this unlawful practice. The departments concerned should also step up publicity on the legal system. With respect to those people who have committed crimes by murdering their babies, it is necessary to punish them according to law.

Many readers pointed out: The fact that these baby girls were abandoned or murdered was primarily due to the feudal idea of regarding men as superior to women, which is still seriously fettering the minds of some people. Quite a few people hold that without a son there will be no descendants. Consequently, in an effort to have a son, they cast away or murder baby girls in secret. The persons who have done this have failed to take this into consideration: Is there a more vicious act in the world than taking the lives of their own children for the sake of their remaining years? It is true that people have to be provided for when they reach old age. However, this does not mean that only sons can shoulder this task. According to the regulations of the marriage law, a daughter has the same duty to support her parents as a son does. At present, in the families of cadres, staff and workers in cities and towns, not only have a great many females assumed this duty as daughters, but more often than not they care for their parents more attentively and satisfactorily than sons do.

In the rural areas, although in a majority of cases a female settles in the husband's house after she gets married, however, following the improvement of a woman's status in society and the family, the duty of a daughter to support her parents will also receive more and more reliable guarantee. Moreover, with the development in building the material and spiritual civilizations, society will also give more cadre and support to old people. Many commune and production brigades have started implementing the system of issuing pensions to old commune members. They make great efforts to run the homes for the aged so that "people have something to live on in their old age." Therefore, young couples at the present time should be farsighted. They should not be so shortsighted as to commit an ugly act that is utterly devoid of conscience.

In human development, the law of multiplication makes it inevitable that the ratio between men and women in society will be approximately in balance. If these acts of murdering and killing baby girls remain unchecked, this will artifically disrupt the balance. According to statistics, serious imbalance characterized by a ratio of 312 between male and female babies that have been born and have survived in the past 2 years has occurred in some communes. If this phenomenon is not checked immediately, there will be a very serious social problem in 20 years' time, in which a large number of young men will be without spouses. May we offer a piece of advice to young parents: You should never do foolish things liable to be criticized by the next generation.

HU YAOBANG'S 24 OCT-1 NOV ANHUI TOUR DETAILED

OW060853 Hefei Anhui Provincial Service in Mandarin 1100 GMT 4 Dec 82

[Text] According to an ANHUI RIBAO report, Hu Yaobang, general secretary of the CPC Central Committee, had pointed out during his recent inspection tour in Anhui: With the development of the situation of our country, we leading cadres at various levels have been charged with heavier responsibilities. Our comrades should be concerned about the four modernizations, pay attention to working methods, take a broad and long-term view and work hard in a down-to-earth way to make new contributions to realizing the grand objective put forward by the 12th CPC National Congress.

From 24 October to 1 November, Comrade Hu Yaobang inspected Dangshan and Xiaoxian Counties of Suxian Prefecture and Huaibei and Hefei Municipalities in the company of Zhou Zijian, acting first secretary of Anhui Provincial CPC Committee and governor of Anhui, and Cheng Guanghua, standing committee member of the provincial party committee and vice governor of Anhui. He then inspected Chuxian and Chaohu Prefectures, Wuhu Municipality, Xuancheng and Huizhou Prefectures and Tongxi Municipality in the company of Comrade Cheng Guanghua.

Comrade Hu Yaobang said it had been many years since his last visit to Anhui and that he came at this time to see the new situation and to discuss new plans. Throughout the inspection tour he paid attention to familiarizing himself with the rural situation and seriously listening to briefings by the provincial party committee and the party committees of various prefectures, municipalities and counties concerned. He had cordial conversations with leading cadres at various levels and with the peasants.

Those who successively accompanied Comrade Hu Yaobang on the tour were Hu Qili, a member of the CPC Central Committee Secretariat; Qiao Shi and Hao Jiaxiu, alternate members of the CPC Central Committee Secretariat; Yang Dezhong, first deputy director of the General Office and a member of the CPC Central Committee; Li Peng, a member of the CPC Central Committee and vice minister of the Ministry of Water Conservancy and Power; Lu Liangshu, an alternate member of the CPC Central Committee and president of the Chinese Academy of Agricultural Sciences; Jiang Xi, vice minister of the Ministry of Commerce; and Chen Haosu, secretary of the CYL Central Committee.

Comrade Hu Yaobang spoke highly of the work done by the people of the party oranizations at various levels in Anhui and of the excellent situation in the countryside since the implementation of the system of responsibility for agricultural production.

He said: After the party Central Committee solved the problem concerning the leadership of the Anhui provincial party committee in the second half of 1977, the new provincial party committee headed by Comrade Wan Li implemented the principle of solving problems and stabilizing the situation at the same time, proposed taking production as the central task, actively advocated and implemented the system of responsibility for agricultural production and rapidly improved the bad political and economic situation that was caused by the gang of four. In particular, it improved the rural economic situation, resolutely corrected longstanding leftist mistakes and used correct policies to fire the broad masses of peasants with enthusiasm. We should say that the 2 years of hovering did not exist in Anhui Province. Since the 3d Plenary Session of the 11th CPC Central Committee, the party organizations at all levels and the broad masses of cadres in Anhui Province, guided by the line, principles and policies adopted by the party Central Committee, have continued to work hard for the prosperity of the province. The general situation has been constantly improving. Taking the lead in making improvements, some comrades in Anhui have made contributions and great achievements in opening new prospects for agriculture.

With these good achievements as a foundation, Anhui Province has constantly increased its production since 1977, in spite of 3 years of serious natural disasters.

Comrade Hu Yaobang visited Xiaoxian and Danshan to learn about the situation there. The two countries were struck by bad floods after successive, extraordinarily heavy rains this summer. Fortunately, these counties have enhanced their ability to combat natural disasters since they generally implemented the system of responsibility for agricultural production -- the system of fixing output quotas on the household basis and the system of bao gan dao hu [under unified management of the production team, each household retains everything produced on the land assigned to it after paying taxes and contributing its share to the accumulation and public welfare funds as a member of the collective] -- after the 3d Plenary Session of the 11th CPC Central Committee. Working under the unified arrangements made by the provincial party committee, they actively relied on their own force to restore production and finally overcome the disaster. Comrade Hu Yaobang praised the cadres and people there for what they did to combat the floods and what they did afterwards.

At present, all localities in the province are working hard to achieve the strategic objective of quadrupling the gross annual value of industrial and agricultural production before the end of the century. During the briefings given him by various localities on their plans for achieving the objective, Comrade Hu Yaobang often cited advanced typical cases and advanced experiences of other provinces to guide the leading cadres to emancipate their minds and widen their views. He urged them to study problems in light of new circumstances and the trends of economic development in China and Anhui and urged them to free themselves of old practices.

Hu Yaobang said: When we study how to deal with a problem, we should broaden our minds and study how to deal with it step by step. The leading cadres should visit the grassroot units more often to study the situation themselves and should not merely rely on the written information relayed to them from one level to another.

He stressed: To make a correct policy decision one must first have a great deal of reliable information. This is not merely a matter of a method of work, it also concerns how we understand a problem and concerns our ideological line. Only by intensifying investigation and study can we really understand how to give play to the local strength and potentials and resolve the new problems before us. Hu Yaobang continued: It is still 18 years until the year 2000. Let us compete and do our work with boldness and resolution.

Chuxian is one of the prefectures in Anhui where the system of responsibility in agricultural production was carried out quite early. During the past 4 years, the prefecture's total grain output was increasing at an average of 16.9 percent annually. Instead of buying "resold grain" from the state to feed its people, as had been the case for years in the past, the prefecture's contributions to the state have become bigger and bigger. During the last 4 years, the prefecture sold 4.1 billion jin of grain to the state. When the Chuxian prefectural party committee reported that it planned to develop the prefecture into a base of commercial grain, Comrade Hu Yaobang pointed out: We should have a new concept of the meaning of a base of commercial grain because of the new situation. If we merely build a base to produce nothing but commercial grain, its value is insignificant because the income will be low and the freight for grain export will be high. But we can turn a base of raw grain into a base for processing food and feed. In that case, while we can continue to work hard to produce more raw grain, we can also process food, produce mixed feed, extract edible oil from rapeseeds and produce other products.

At the same time, when we have more food grain, we can go on to raise dairy cattle and dairy goats by utilizing the abundant supply of hay and forage, and then we can go on to produce dairy products and meat. Not only will this enable us to accomplish better economic results but it will also spur local industrial production with the agricultural and sideline products.

Comrade Hu Yaobang also visited two families in (Shangzhuang) production team of (Huayuan) brigade in (Langya) Commune whose living standard is above average in Chuxian County. Gao Jinlan, a female peasant, jubilantly replied to the general secretary's cordial questions. Under a contract, Gao's family of three is taking care of 11 mu of cropland. Her husband works at a commune-run enterprise. In addition to working in the field, she has to take care of one child. This year her family reaped 9,650 jin of grain, and there were also rapeseeds and peanuts.

Comrade Hu Yaobang asked her: Do you have pigs and chickens?

She replied: We used to have 4 pigs, but we recently sold a big one; and we have 45 chickens and 20 geese. Our income, which includes the income from sideline occupations and my husband's salary from the commune-run enterprise, averages 1,013 yuan per person.

She then guided the leading comrades of the central authorities on a tour of her spacious three-room brick house, which also has a separate kitchen and a storage room. In addition to the modern style of furniture, there are a television set and an electric fan.

The situation of her next-door neighbor Zhou Jiaping, another female peasant, is very similar. The Zhou family and another family also shared the expenses for the purchase of a walking tractor.

Comrade Hu Yaobang was pleased to note the upswing of Anhui's agriculture and the improvement of the peasants' livelihood. He said: Quadruplication of agricultural production is a matter of primary importance. When agricultural production has been enhanced and when the peasants have become well-off, the solutions to other problems will be easier. The current situation in the rural areas is indeed improving. This improvement will give a great impetus to the improvement of the entire economic and political situation.

Comrade Hu Yaobang told the leading cadres from various localities that they should go all-out to mobilize and lead the peasants to explore various new ways to become affluent through working hard. He said: To promote agricultural production, we must reaffirm the concept of bringing about an all-round development in agriculture, forestry, animal husbandry, sideline occupations, fishery and processing industry. While we must never slacken the efforts in producing food grain, we must energetically promote economic diversification, promote breeding of aquatic products and planting cash crops in an effort to broaden production. When we do this, the surplus manpower in the rural areas will have a way out and we can accelerate the process of helping the peasants to become more affluent.

During his inspection in Anhui, Comrade Hu Yaobang urged the leaders at different levels to heed and support those households engaged in specialized trades and production as well as the new economic complexes that are formed according to the principle of voluntary participation and mutual benefit. He pointed out: All this indicates the development of division of agricultural work. The further agricultural work divides, the higher the commodity rate of agricultural products will become; division of labor in society can boost commodity exchange in society. This is an economic law independent of man's will. Our country's rural economy certainly will head in this direction.

At present, certain localities fail to accurately foresee the future of agriculture and the trend toward a highly socialized agriculture. Consequently, they have fallen short of the demands of the times in many ways.

When Comrade Hu Yaobang was travelling in southern Anhui and saw the vast tracts of bamboo groves in the mountainous areas there, he said excitedly: What beautiful bamboo groves! He told the leading members of the Xuancheng prefectural party committee: Your special district's agricultural group should assign several people to make a special study of bamboo. They should study this issue thoroughly, not casually or half-heartedly. Bamboo grows quickly; it has many uses; and its transport is easy. In areas where there is plenty of bamboo, every household should have 2 or 3 fen [1 fen equals 0.1 mu] of bamboo and engage in producing bamboo wares.

With regard to many areas' difficulty in selling their grain and agricultural and sidelines products and buying handicraft, problems derived from selling more grain to the state, Comrade Hu Yaobang urged the leading cadres to be aware of the new problems that have appeared under the new situation and to be ideologically prepared for the motivating force a thriving agriculture has brought to all professions and trades. He said: When agriculture has developed, when the supply of raw material for industrial production has increased and when the demand for industrial goods has increased, there will be the question of how to broaden the avenue of commercial exchange between urban and rural areas and how to develop the domestic market.

Comrade Hu Yaobang said: We have a vast market in our own country. This is a highly favorable factor. We cannot rely on the efforts of the state-owned commercial units alone to develop the domestic market, particularly the vast market in the countryside. New channels have to be opened. All localities must combat the idea of eating out of the same big pot and focus their attention on relying on the efforts of all quarters and the masses.

When Dangshan County reported that because of excess of inventory and poor sales several years ago large quantities of pears -- a famous local product -- were destroyed, but that as a result of broadening the market and additional market channels in the past 2 years the losses have dropped and the masses are happy because they have additional income from selling pears, Comrade Hu Yaobang said approvingly: The fundamental issue is blocking and broadening the circulation channels. We must be determined to reform the commercial structure in the rural areas so as to enliven the supply and marketing cooperatives in counties and smaller areas. We should promote a new cooperative economy by encouraging the peasants to pool their money to start their own undertakings, be shareholders of their own businesses, manage their businesses democratically and determine the amounts of their own bonuses.

On procurement of grain, Comrade Hu Yaobang said: There should be a policy for taking care of grain. Since the state does not have enough warehouses, the grain must be taken care of by various other means. Large-, medium- and small-sized warehouses must all be utilized. Peasants and households engaged in specialized production can also be entrusted to keep the grain, and they will be paid by the state for their service.

Upon learning that certain localities, despite the overstocking of agricultural and sideline products, do not permit the peasants to travel long distance to market their products, Comrade Hu Yaobang said: When the masses demand to unblock the buying and marketing channels, the leading cadres at all levels should not block their efforts. Why are there people known as "two-way peddlers"?

As there is a large variety of agricultural products and the villages in the countryside are often far apart, the peasants, after selling to the state the products the state wants, often find themselves with small quantities of all types of products which they themselves and the state do not need. So they have to seek the assistance of somebody who can help them collect these products, sell them in other places and bring back something the peasants need. It is perfectly normal for these people to get reasonable pay for thier service. They have provided a good service in enlivening the urban and rural economy. So long as such a service is properly guided and administered bysome regulations and limits, the negative effects from such a service can be avoided. The title of "two-way peddlers" should be eliminated, and the policies toward these people should be changed.

While inspecting the coalfields north of the Huai He River, Comrade Hu Yaobang acquainted himself -- through investigation -- with the coal industry in Huaibei Municipality and its plans and measures to step up the development of energy resources and save energy. He encouraged the broad masses of workers and staff members to work hard in high spirits in order to increase production according to economic priorities. Comrade Hu Yaobang pointed out: Efforts should be made to properly solve problems in coal processing and in making multipurpose use of it, which will help improve labor productivity.

Comrade Hu Yaobang said: It is necessary to continue to carry out reforms in economic work. Leading bodies in charge of economic work should make efforts to solve problems in management first.

Comrade Hu Yaobang also gave important instructions on the development of small hydropower stations. The data he brought along included information about the water resources in southern Anhui. After analyzing water resources in the country's more than 2,000 counties, he put forward his idea of achieving electrification in some of these counties in 10 to 15 years.

While talking with leading cadres of the (Xuancheng) prefectural party committee, he raised a new question for the prefecture by saying: First, vigorous efforts should be made to build small hydropower stations in the two counties of Jingxian and Ningguo where conditions permit. Later, efforts should be made to achieve electrification in the two counties -- to achieve all-round electrification from lighting to electric power for processing, television sets, televised cultural courses and for heating and cooking purposes. This will help peasants improve working conditions, prevent environmental pollution, engage in the processing of agricultural products, protect forests and receive an education. The measures to be taken in this regard are that peasants should build, manage and use such small hydropower stations themselves. Power rates should be reduced so that peasants can afford to use electric power.

Comrade Hu Yaobang said: An analysis of various aspects of conditions shows that it is not difficult to realize this idea through hard work. The key question in this regard is whether leading cadres at various levels have an eager desire to do so. Why have foreigners been able to achieve all-round electrification while we Chinese dare not think of doing so? The development of the power industry will bring along the development of electrical appliances for daily use as well as nonferrous metalwares.

Leading cadres at all levels bear the historic responsibility for achieving the grand strategic objective. While receiving leading cadres of the party, government and army organizations in the province, Comrade Hu Yaobang discussed with them the most important and glorious historical task at present for the old comrades. The 1st Session of the 12th CPC Central Committee decided to carry out organizational reform at the provincial, municipal or autonomous regional level and at the prefectural or municipal level this winter and in the coming spring. In carrying out this reform it is necessary to achieve the four purposes of streamlining the administrative structure, raising work efficiency, making arrangements for old comrades and taking in fresh blood. Where people begin this reform early and carry it out quickly, they can achieve the initiative in this regard; otherwise, if they put off this work, they will put themselves in a passive position. When we use the correct method, follow the mass line to the letter and are bold and resolute in carrying out this reform, we can accomplish it early. This calls for the long-tested old comrades who are trusted by the party and the people to step forward, proceed from the party's cause as a whole and the program for development in the next several decades, take the lead in publicizing this reform and solve problems in this regard. To maintain the long-term stability and continuity of our party organizations, maintain and carry forward our party's fine traditions and continuously implement its lines, principles and policies, it is necessary for the old comrades to observe and support comrades in their prime, recommend them for more important positions, pass on their experiences and give help to and set an example for the latter. A good job must be done in succession from old comrades to new ones. This problem must be solved according to the line and the organizational system. A number of retiring old comrades should not worry that there will be no work for them to do. They will have a lot of work to do -- at least in the next 5 years. It is necessary to do the following work: First, to carry out organizational reform; second, to carry out party consolidation; and third, to carry out economic reform in an all-round way. All this should be done by relying on old comrades retiring to the second line to make investigation and study, participate in planning, provide their experiences and persuade the masses. To do our work well, it is necessary for our organizations at all levels to: First, be good at dividing and organizing the work; and second, pay close attention to work methods, reduce the authority to command, give people a greater say in matters and make more investigations and studies.

Comrade Hu Yaobang stressed: The requirements I set for you comrades are to concern yourselves with the four modernizations and pay close attention to work methods. I hope that you will continue to march ahead of others in performing the first formidable task for this winter and the coming spring and make fresh contributions to satisfying the needs of the people.

DOMINICAN REPUBLIC MINISTERS CONTINUE VISIT

Meet Premier Sun

OW070329 Taipei CNA in English 0233 GMT 7 Dec 82

[Text] Taipei, Dec 6 (CNA) -- Premier Sun Yun-hsuan Monday received Jose del Carmen Marcano, the Dominican Republic's minister of industrial and commercial affairs, and Rafael Subervi Bonilla, that nation's minister of tourism. He exchanged views with them on matters of business, agriculture and tourism between the two countries. During their stay here, they have called on government leaders, and visited centers of cultural and economic interest. The two dignitaries who came here Dec. 1 will depart Tuesday.

Communique Signed

OW070335 Taipei CNA in English 0243 GMT 7 Dec 82

[Text] Taipei, Dec. 7 (CNA) -- The Republic of China will assist the Dominican Republic in developing science and technology, according to a communique signed Monday between Foreign Minister Chu Fu-sung and Jose del Carmen Marcano, minister of industrial and commercial affairs.

The communique reaffirms the traditional friendship between the ROC and the Dominican Republic, saying that the two nations share common ideals of freedom and democracy.

It pledges that the two countries will continue to strengthen ties of cooperation in various fields including:

-- ROC will help Dominican Republic build port facilities for the purpose of exporting industrial as well as agricultural products.
-- ROC will encourage its private companies to transfer their agricultural techniques to produce vegetables in the Dominican Republic and help that nation develop vegetable exports.
-- ROC will encourage its investors to set up factories in the Dominican Republic for manufacturing and assembling of products for exports.
-- ROC and Dominican Republic will cooperate in developing fishery techniques and resources.

TRADE AGREEMENTS WITH KINGDOM OF LESOTHO SIGNED 1 DEC

OW061207 Taipei CHINA POST in English 2 Dec 82 p 12

[Text] Premier Sun Yun-hsuan and Prime Minister Dr Leabua Jonathan of the Kingdom of Lesotho set their hands to two agreements and a joint memorandum yesterday in a document signing ceremony held at the Executive Yuan in Taipei. Both men acted on behalf of their respective countries in inking a trade agreements between the Government of the Republic of China and the Government of the Kingdom of Lesotho and an agreement between the two governments for the promotion and protection of investments.

Memo of Understanding

A memorandum of understanding by and between the Republic of China and the Kingdom of Lesotho was also signed by Premier Sun and Lesothon prime minister, the subject of which was loans. The matter of loans between the two countries was also taken up in a separate agreement signed by representatives of the governments of the two countries.

A loan agreement between the Bank of Taiwan of the Republic of China and the Government of the Kingdom of Lesotho was signed by the president of the Bank of Taiwan, Wang Chih-tao, representing the ROC and Lesotho's Minister of Foreign Affairs, Information and Broadcasting Charles D. Molapo.

Molapo also signed a supplementary agreement on technical cooperation between the two countries, with Minister of Foreign Affairs Chu Fu-sung signing on behalf of the Republic of China.

Agri. Cooperation

The Republic of China and the Kingdom of Lesotho first entered into formal agreements with the signing of a joint agricultural cooperation agreement between the two governments in 1968 which provided for the sending of Chinese agricultural teams to the south African nation to help in the upgrading of agriculture there. Another initial agreement on technical cooperation was signed in 1976 which must be renewed every three years.

The agreement on technical cooperation signed here yesterday was not a new agreement, but a supplement to the existing technical cooperation agreement.

The government here has always encouraged investments by local businessmen in Lesotho and yesterday's agreements are seen as a measure to strengthen this encouragement with official backing in the form of signed agreements.

ADVANCED WAR INFORMATION DISPLAY DEVICE NOTED

OW041441 Taipei CNA in English 1415 GMT 4 Dec 82

[Text] Taipei, Dec. 4 (CNA) -- The national defense research unit Saturday displayed a set of advanced war information display device, capable of plotting the position of invading forces and tracking them.

To their capabilities, the Chinese Armed Forces are gradually replacing obsolete advanced warning systems with this system.

The system developed by the Chung Shan Science Research Institute is being exhibited at the information week exhibition grounds at the Shung Shan airport now.

According to the Chung Shan Science Research Institute, the system is capable of automatic plotting and tracking of objects appearing on the screen and accurately predicting the invaders' potential courses.

By tying in sonar with radar, the device can detect the location, height, depth and speed of aircraft and submarines. At present, the Chinese Air Force and Navy have begun to replace their old equipment with the system and it is expected to greatly increase the battle capacity of the Chinese Armed Forces.

Some of its hardware was imported from abroad, but the system's software was designed wholly by local experts.

CHINA POST EDITORIAL ON RECENT PRC RESHUFFLE

OW020449 Taipei CHINA POST in English 25 Nov 82 p 4

[Editorial: "Peking Regime's Reshuffle"]

[Text] The recent reshuffle ordered by the Peking regime presages greater power struggle and instability on the Chinese mainland.

The replacement of Huang Hua, 69, foreign minister for the past six years, by his deputy, senior foreign minister Wu Hsueh-chien, 60, the day after Huang's return from Moscow was a suprise move. Huang went to Moscow as a "special envoy" to attend Leonid Brezhnev's funeral. He had a conversation with new communist party chief Yuriy V. Andropov, who showed him more than routine courtesy and treated him on near equal terms as a head of state. He also had a 90-minute talk with Soviet Foreign Minister Andrey Gromyko and discussed further normalization moves. Huang also issued some optimistic statements after the talks and upon his return to Peking.

The announcement of his replacement one day after Huang's return was surprising even though Huang had wished to retire for some time due to his urinary tract ailment. If he really has a serious health problem, he should not have been sent to Moscow in the first place. It would be more logical to have him replaced by Wu before the Moscow visit rather than sending him to Moscow and have him replaced right after his return. It would indeed be interesting to ascertain the real background of this sudden shift. Could it be a move to discourage the Soviets from playing the China card against the United States? Or could it be a move to intimidate the United States to make further concessions by removing the person who is already well known to the United States?

The removal of Keng Piao as "defense minister" and replacing him with Chang Aiping, 72, is less mysterious. Keng's replacement had generally been expected since last September when he lost his Central Committee and Politburo seat at the 12th CPC Congress between September 1 and 11th of this year. As Keng was the appointee of Hua Kuo-feng, his downfall was a matter of time. Keng's replacement, Chang Aiping, has been a close associate of Teng Hsiao-ping and is credited with directing Red China's recent development of the submarine-launched ballistic missile. He was appointed to carry out further modernization programs of the military as well as to pacify existing grievances in the military against Teng. But Chang is a naval officer. Whether he can exercise a great influence in other branches of the military, the army and the air force, remains to be seen.

All the recent changes affecting the military and foreign affairs represent a thorough grabbing of power by Teng to offset Hua Kuo-feng's residual influence in the government and the party. Whether Teng can succeed is quite uncertain. Teng's campaign to weed out nearly 20 million party members from all branches of the government is truly a gigantic if not an impossible task.

CHENG MING REVIEWS PLA PERSONNEL CHANGES

HK061130 Hong Kong CHENG MING in Chinese No 62, Dec 82 pp 47-50

[Article by Hsu Hsing [6079 5887]: "The PLA's 'Earthquake'"]

[Text] One of the most glaring incidents in the wake of the 12th CPC National Congress is the great personnel changes in the army. So far, the changes that are already known are: changes in the General Political Department, Navy Headquarters, the Donghai Fleet and the Guangzhou, Chengdu, Nanjing, Wuhan and Lanzhou Military Regions. Besides this, there must be some other personnel changes in some important military departments that have not been announced or that it is inadvisable to announce.

Origin and Development of the "Zhao Yiya Incident"

Within the CPC, there has always been a force that resists reform. By some people, it is called the "leftist pernicious influence." This "leftist" influence exists more seriously within the army than in other departments and units because the army is a well disciplined organization that lays much stress on obedience and on the education in Mao Zedong Thought. The leading officers in the army, though they made meritorious contributions in the past and during the wartime, have generally a low cultural level and lack world knowledge. They are not actually engaged in economic affairs. This is why they have always blindly worshiped the old conventions of Mao Zedong Thought and whenever they find any social practice disagreeable to them, they easily complain and bear resentment against the present reforms being carried out by the Deng-Hu faction. This is the force that opposes the spirit of the 3d Plenary Session of the 11th CPC Central Committee and that is officially criticized.

So far as we -- the outsiders -- can see, this force was concretely expressed in the incident of criticizing Bai Hua that occurred last year in SHIDAI DE BAOGAO and the Zhao Yiya incident that occurred on the eve of the 12th CPC National Congress in JIEFANGJUN BAO. Zhao Yiya was originally deputy chief editor of JIEFANGJUN BAO. On 28 August, he wrote an article for JIEFANGJUN BAO entitled "Communist Ideology Is the Core of Socialist Spiritual Civilization." There were three points in this article that differed with what Deng and Hu had said: 1) on the class character of spiritual civilization, Zhao Yiya laid stress on this while the Deng faction held that not all spheres of general cultural knowledge bear class character; 2) on the content of spiritual civilization, Deng Xiaoping talked about it twice. He talked about three criteria on one occasion, that is, "ideals, morality and sense of discipline" and on the other, he talked about four criteria: "ideals, morality, culture and sense of discipline." Zhao Yiya only emphasized the former three and was thus criticized as disregarding culture; 3) Zhao Yiya criticized several responsible cadres in the theoretical, literary and art and press circles for supporting "bourgeois liberalization." This resulted in the resentment of others against him.

Undoubtedly, Zhao Yiya's opinions have the smell of the "pernicious leftist influence." However, if the Communist Party allows academic freedom and really implements the policy of "letting a hundred schools contend," open polemics should be held on these different opinions. But the Deng faction also prefers to bully people on the strength of its power and position. As a result, the editorial board of JIEFANGJUN BAO was forced to carry a self-criticism article on 28 September and to criticize Zhao Yiya's opinions.

Behind this incident, there were serious power and line struggles within the CPC.

As with the immediate response by Shanghai's JIEFANG RIBAO when SHIDAI DE BAOGAO launched criticism against Bai Hua, Zhao Yiya's article was reprinted in JIEFANG RIBAO immediately after it was carried in JIEFANGJUN BAO.

Formation of the Conservative Faction in the Army

There are usually interrelations in the struggle between the inner-CPC factions. Obviously, Zhao Yiya, who was deputy chief editor of JIEFANGJUN BAO, was backed by Hua Nan, director of the paper, in writing the article. Hua Nan was deputy director of the PLA General Political Department. He was probably backed by Wei Guoqing, director of the department.

Likewise, SHIDAI DE BAOGAO was originally edited by some army writers with the purpose of preserving a publication front for themselves. From 1980 to 1981, its executive chief editor was Huang Gang, who was called "Yao Wenyuan the second." In 1982, he was replaced by Wei Wei, who was deputy director of the Literature and Art Office of the Cultural Department of the PLA General Political Department and now is director of the Cultural Department of the Beijing Military Region. Wei Chuantong, director of this publication house, was a poet during the Long March. He has long been engaged in the literary and art activities in the army and is now an adviser to the Propaganda Department of the PLA General Political Department and concurrently head of the PLA Art Academy. They all have connections with Liu Baiyu, who is in charge of literary and art work in the General Political Department and, in the final analysis, have connections with Wei Guoqing.

These intellectuals in the army have had a close relationship with Chen Yi, who is in the Propaganda Department of the Shanghai Municipal CPC Committee. This is why, when they attacked Bai Hua and carried Zhao Yiya's article, they were supported by Shanghai's JIEFANG RIBAO.

These are visible connections that we can see. The invisible connections may cover a wider range. From this we can see that Wei Guoqing has become an important figure in the army. Various forces that are discontent with Deng Xiaoping, Hu Yaobang and Zhao Ziyang have gathered around him. If he is allowed to go on developing his forces, two cores will inevitably be shaped among the second generation leaders of the CPC: one of Hu Yaobang and the other of Wei Guoqing, and they will grow into two powerful forces in the political circles after Deng Xiaoping's death. Conflict between them will be quite possible.

Lightning Dismissal of Wei Guoqing

Now we still cannot discover the direct influence of the personnel arrangement of the 12th CPC National Congress (such as the removal of Hua Guofeng, Xu Shiyou, Geng Biao and Peng Chong from the Politburo, and the removal of Wang Renzhong from the central Secrearist) or the removal of Wei Guoqing. However, we can draw inference from this that Wei Guoqing was removed from his post only after the conclusion of the 12th party congress, and the removal was a lightning one. The 12th party congress concluded on 12 September, and the 1st Plenary Session of the 12th CPC Central Committee was convened on the same day, and Wei Guoqing was still elected a member of the Politburo. When the PLA Headquarters of the General Staff, the General Political Department and the General Logistics Department held meetings on 18 September to convey the spirit of the 12th CPC Congress, Yang Dezhi, Wei Guoqing and Hong Xuezhi also spoke at the meetings. But on the evening of 24 September when Kim Il-song, the DPRK president, gave a banquet in Beijing's Great Hall of the People to entertain Chinese party, government and army leaders, the leaders of various PLA departments who attended were: Zhang Zhen (deputy chief of the General Staff), Liang Biye (deputy director of the General Political Department) and Hong Xuezhi (director of the General Logistics Department). Wei Guoqing was not present. It was quite possible that he had already met with trouble on his position by this date. On 1 October, National Day, things became more clear. It was not Wei Guoqing but Yu Qiuli, director of the General Political Department, who was in the open car to direct the National Day military review held in Beijing by this department and its subordinate units. Thus, people all knew that Wei Guoqing had been dismissed from office.

According to the above-mentioned facts, the actual date Wei Guoqing was dismissed from office should be between 18-24 September.

Wei Guoqing's failure in the army was inevitable, for he was the mainstay of the forces able to contend with Hu Yaobang. In the past, Wei Guoqing was rather active in the movement to support Deng Xiaoping to resume his post. If he was really cleared out, it would naturally be regarded as "casting aside like an old shoe" in the army. Its aftermath merits our attention.

SHIDAI DE BAOGAO Reorganized

Being involved in the Wei Guoqing incident, SHIDAI DE BAOGAO was reorganized and JIEFANGJUN BAO made a self-criticism. The self-criticism article by the editorial board of JIEFANGJUN BAO on the Zhao Yiya issue was published on 28 September, but when Hong Kong learned that SHIDAI DE BAOGAO was reorganized, it was already near the end of October. As a matter of fact, beginning with its October issue, the front cover of this journal has been changed: the original unrestrained cover design of the earth was encircled by three big circles and the namelist of director, editors, executive chief editor and deputy chief editors was deleted from the title page and was replaced by five Chinese characters, "Edited by the Editorial Board."

It is said that the reorganization of the journal was decided by the Standing Committee of the CPC Central Committee. It instructed Deng Liqun, director of the Propaganda Department of the CPC Central Committee, to deal with this matter. Before the editorial board of this journal was reorganized, it launched public polemics with Wenyi Bao and many other newspapers and magazines on the assessment of the 6 years after the Cultural Revolution. Huang Gang and others held that Mao Zedong Thought on literature and art was distorted by the "leftists" during the Cultural Revolution and was distorted by the "rightists" during the 6 years after it. The spearhead was obviously pointed to those of the Deng-Hu faction who were in power in the literary and art circles.

Now all literary and art workers in the editorial board of SHIDAI DE BAOGAO, who belong to the army, have withdrawn from this office. The essence of this journal has been changed, although its title still exists.

From these events, we can imagine that there must be some other departments that were involved, such as the Propaganda Department of the General Political Department, the Editorial Board of JIEFANGJUN BAO, the Propaganda Department of the Shanghai Municipal CPC Committee and the Editorial Board of Shanghai's JIEFANG RIBAO. No concrete information has come in on the changes in these departments.

Major Personnel Changes in the Navy

The two powerful slogans used by the Deng-Hu faction in clearing away dissident forces within the CPC are: streamlining organizations and the four requirements for cadres (revolutionization, rejuvenation, intellectualization and specialization). The organizational reform of the State Council had been completed before the convening of the 12th CPC National Congress. The organizational reform of the party organs was also reflected during the congress. But the changes of leading cadres in the army began mainly after the conclusion of the congress.

The change in personnel in the army's General Political Department has been mentioned above. That was the prelude to major personnel changes in the army after the congress.

The following change was made in navy personnel. Ye Fei, former commander of the PLA Navy, was suddenly replaced by Liu Qinghua. At the concluding meeting of the 12th congress on 12 September, Ye Fei, 68, was still elected a member of the CPC Central Committee. He was not assigned to the Central Advisory Commission for reasons of health or age. But his position in the army was given to Liu Qinghua in late September.

Liu Qinghua had been part of the Fourth Front Red Army in his early days. In the liberation war, he was political commissar of the Eighth Division and head of the Political Department of the Third Column of the Zhongyuan PLA Field Army led by Liu Bocheng and Deng Xiaoping. After that, he was appointed deputy political commissar of the 11th Army of the 2d Field Army. In 1950, the 32nd Division of the 11th Army was turned into a naval force, and Liu Qinghua was shifted to work in the navy and held the rank of rear admiral. He worked successively as political commissar of the Luda Naval Base, deputy political commissar of the South Sea Fleet and deputy political commissar of the navy (when Xiao Jingguang was commander and Su Zhenghua was political commissar). After that, he was appointed deputy director of the Commission for National Defense Science (when Nie Rongzhen was director), deputy chief of staff of the navy and deputy general chief of staff of the PLA. He was neither a member nor an alternate member of the 11th CPC Central Committee, but at the 12th congress, he was elected a member of the Central Committee. It can be seen that things were arranged in advance.

After the change in naval commander, Zheng Guozhong, commander of the East Sea Fleet, also was removed. He was replaced by Xie Zhenghao. This was revealed in the JIEFANG RIBAO report on a large-scale military game conducted by the East Sea Fleet.

An Earthquake in the Guangzhou Military Region

Furthermore, news of personnel changes at the military region level have continued to pour in since early November. The most influential change was that that occurred in the Guangzhou Military Region. Former Commander Wu Kehua, 69, who was born in Yiyang County, Jiangxi Province in 1913, was assigned to the Central Advisory Commission at the 12th party congress. Wu is a general who had once studied in the Soviet Union. He has a close relationship with Huang Yongsheng. In 1950, when Huang Yongsheng was commander of the 15th Army Corps, Wu was a deputy commander of this army corps. Afterwards, he took part in the Korean war with Huang Yongsheng and was appointed deputy commander of the 13th Army Corps of volunteers. After the Korean war, he returned to China with Huang Yongsheng and was appointed chief of staff of the Central South Military Region. After that, he was promoted to the position of commander of the PLA artillery and commanded missile forces. He was disgraced during the Cultural Revolution and was relieved of his post for self-examination. After being rehabilitated in 1975, he was appointed commander of the Railway Engineering Army Corps. After that, he successively held the positions of commander of the Chengdu Military Region in 1977, commander of the Xinjiang Military Region in 1979 and commander of the Guangzhou Military Region in 1980. Now he has retreated to the second front earlier than expected, perhaps because he has had a close relationship with Huang Yongsheng.

You Taizhong, born in Sichuan Province, had been part of the Fourth Front of the Red Army in his early years and had worked in the 129th Division of the 8th Route Army. During the liberation war, he was a brigade commander of the Sixth Column of the Hebei-Shanxi-Henan Field Army led by Liu Bocheng and Deng Xiaoping. Before he was recently transferred to the position of commander of the Guangzhou Military Region, he was commander of the Chengdu Military Region.

What was puzzling was that Wang Zhen, a venerable general in the army and a member of the CPC Politburo, had to be requested to personally come to Guangzhou for the sake of this personnel change. He summoned officers at and above the division level and delivered a speech to them. A group of former leaders who had been removed from their posts, such as Deputy Commanders Huang Ronghai and Ye Jianmin, Deputy Political Commissar Jiang Lindong, Yang Shugen and other responsible people, Deng Yifan, Yan Deming, Chen Haihan, Xiao Yuanli, Zhuang Tian, Lai Chunfeng, Zhu Ying and so forth, also participated in the meeting. Wang Zhen on the one hand affirmed the achievements of the Guangzhou PLA units, and on the other hand, encouraged the units to continue to eliminate the influence of "leftism," and do a good job in maintaining unity between new and old cadres and in succession of the old by the new in leading bodies.

Obviously, Wang Zhen's speech was of dual significance and was a speech of both pacification and appeasement.

Those received by Wang Zhen included all the new and old leaders of the Guangzhou Military Region: Commander You Taizhong, Political Commissar Wang Meng, Deputy Commanders Xu Chunfang, Zhu Yuehua and Zhang Xudeng, Deputy Political Commissar Shan Yinzhang and Lu Weiru. In facing this group of current leaders, Wang Zhen encouraged them to forge firm internal unity, required them to be sincere and frank between comrades, learn from each other's strong points and carry out criticism and self-criticism. The implication of his speech precisely indicated that this great change of personnel in the Guangzhou Military Region had been a shock to the Guangzhou units.

What new personnel arrangements have been made in the Chengdu Military Region since You Taizhong was transferred to Guangzhou? There has been no revelation so far.

Nie Fengzhi of the Nanjing Military Region Has Been Replaced by Xiang Shouzhi

Among the military region commanders and political commissars assigned to the Central Advisory Commission at the 12th party congress, there were Nie Fengzhi, commander of the Nanjing Military Region; Du Ping, political commissar of the Nanjing Military Region; Zhang Caiqian, commander of the Wuhan Military Region; Du Yide, commander of the Lanzhou Military Region; Xiao Wangdong, first political commissar of the Jinan Military Region; and Bai Rubing, political commissar of the same region. This indicated that all these commanders and political commissars had to retreat to the second front and be relieved by others.

It has been learned that Nie Fengzhi's position of commander of the Nanjing Military Region was given to Xiang Shouzhi. People thought that those withdrawing to the second front would all be senile, but that is not the case. Nie Fengzhi, 65, born in 1917, was a hero during the wars. He captured well-known KMT General Wang Yaowu and defeated both the Huang Baitao and Qiu Qingquan Army Corps. He has also commanded troops that stormed and captured Shanghai. In the army, he had a close relationship with Xu Shiyou. In early 1947, when Xu Shiyou was commander of the Ninth Column of the East China Field Army, Nie Fengzhi was commander of the 25th Division of this column. By the end of that year, when Xu Shiyou was promoted as commander of the East Front Army Corps of the East China Field Army, Nie Fengzhi succeeded Xu as commander of the Ninth Column. In the early days after the liberation war victory, Nie Fengzhi was appointed dean of training in the East China Military and Political University. Then he was transferred to the air force and was appointed air force commander of the East China Military Region. He took part in the battles on Yijiangshan Island and the Dachen Islands. Afterwards, he was appointed air force commander of the Nanjing Military Region and deputy commander of this region and took part in the battle on Jinmen Island. The reason for his recent removal perhaps was of the same character as that for Xu Shiyou.

Xiang Shouzhi, who replaced Nie Fengzhi, was former deputy commander of the Nanjing Military Region. He had been part of the 25th Army of the Red Army. He previously had a close relationshp with Qin Jiwei. When the 224th Regiment of the 75th Division of the Red Army's 25th Army was redesignated as troops subordinate to Taihang Military Regional Command and Qin Jiwei was commander of the 1st Military District of the Taihang Military Region, Xiang Shouzhi was the commander of the 10th Regiment of this military district. In August 1947, when Qin Jiwei was appointed commander of the 9th Column of the Shanxi-Hebei-Shandong-Henan Field Army (Huang Zhen was political commissar of the column then), Xiang Shouzhi was commander of the 26th Brigade of this column. In February 1949, the 9th Column was redesignated as the 15th Army of the 4th Army Corps of the 2d Field Army. Qin Jiwei was appointed army commander and Xiang Shouzhi was commander of the 44th Division of this army. Now Qin Jiwei is commander of the Beijing Military Region and was elected the second alternate member of the CPC Politburo at the 12th party congress. He is now a favorite in the army. At the same time, Xiang Shouzhi takes charge of the Nanjing military region, replacing

Nie Fengzhi. This is closely related to the vicissitudes at the top of the PLA. It is by no means an accidental arrangement.

As for the questions of what changes will occur in the positions of political commissar, deputy commanders and deputy political commissars of the Nanjing Military Region and what changes will happen in the Wuhan, Lanzhou and Jinan Military Regions after Zhang Caiqian, Du Yide, Xiao Wangdong and Bai Rubin have retreated to the second front, no official news has been available so far and we have to wait and see.

In short, the series of great changes of personnel in the army can at least be counted a new movement of purifying the ranks, if it cannot be regarded as a movement of purging dissidents. This is concurrent with the stable control of power by the troika of Deng-Hu-Zhao. Deng Xiaoping apparently wants in his remaining years to eliminate all forces that will possibly oppose the new leadership headed by Hu Yaobang. The event involving Wei Guoqing was the most important step. This step has not only eliminated the core of leftism inside the army, but also prevented the situation in which the army stands against the party from appearing in the future. The personnel changes in major military regions should not be merely regarded as a step for modernizing the army and enabling army leaders to be younger and more knowledgeable. These changes are in fact closely related to the expansion of influence of the new leadership.

PRC-UK TALKS ON HONG KONG'S FUTURE ASSESSED

HK061011 Hong Kong CHENG MING in Chinese No 62, Dec 82 pp 12-14

[Report from Beijing by Lo Ping [5012 0393]: "Sino-British Contention -- Scene One"]

[Text] A Telefilm Placed on Ice

A girl from the mainland arrives in Hong Kong, taking with her a multicolor dream, in a place where scene after scene of human tragedy is enacted, she sinks into an abyss of misery....

This threadbare story has been made into a 30-minute telefilm by the Central Television Station and Qingyi Film Studio in Beijing. It was originally scheduled to be broadcast in Beijing. However, it was slow in arriving. Up to 16 November, we still "heard the sounds of footsteps at the stairs but did not see any person coming down."

Why was this so?

It was said that some VIP's held that the broadcast of the telefilm in Beijing would touch the sensitive issue of Hong Kong and consequently the telefilm could only be placed on ice for the time being.

Is This "Anti-British Propaganda"?

However, since Mrs Thatcher left Beijing, newspapers and periodicals in Beijing have published a succession of articles on how Britain occupied Hong Kong 140 years ago. For example, GONGREN RIBAO, in an article on 26 October, called the treaty of Nanjing "a treaty signed under the muzzle of a gun." On 9 October, ZHONGGUO QINGNIAN BAO published an article entitled "Origins of the Hong Kong Issue -- The Outcome of the Unequal Treaties," pointing out that the three treaties involving Hong Kong and Kowloon "were the outcome of British imperialist 'gunboat policy' and aggression toward China in the 19th century." In conclusion the article said: "Recovering China's sovereignty over Hong Kong is a sacred duty of the Chinese Government and people." It might be a coincidence or a concerted action, but JIEFANGJUN HUABAO devoted four pages in its October issue to pictures and captions, illustrating the whole process of the opium war and the cession of Hong Kong.

Can we say that China is engaging in anti-British propaganda?

Probably not. The articles in the Chinese press may be considered as a response to Mrs Thatcher's "theory of the validity of the three treaties" advanced in Hong Kong on 27 September. Naturally, there are some national sentiments. The groups of pictures published in JIEFANGJUN HUABAI have evoked the idea of "never forgetting national humiliation."

A Maneuver -- "The Theory of the End of Hong Kong"

"On the Hong Kong issue, China has been forced to react under pressure from Britain." This remark was made by a top ranking Chinese official. A document transmitted to various institutions in Beijing has stressed this point. It says that China was most annoyed at two acts by the British side. One was the British prime minister's "theory of the validity of the three treaties"; the other was a maneuver by the British side.

It is believed that Britain presented the "theory of the validity of the three treaties" at the negotiation table. Up to now, negotiations between China and Britain on the Hong Kong issue were conducted in the highest secrecy. It is perhaps impossible for reporters to penetrate this mysterious fortress. After a series of sorties on news gathering missions, I succeeded in hearing two sentences. The first was: "We will regain not only our sovereign rights but also our administrative rights. On this question of principle, we shall not retreat even a single inch." This was an important instruction given by Chinese policymakers to the personnel taking part in the negotiations. It was uttered with curt finality more definite than that of the "iron lady." It can be imagined that disputes on the three treaties must have made the atmosphere in the negotiations rather tense. It is believed that the Chinese side must have expressed its unwillingness to talk about the issue again.

A friend in Beijing, who has certain contacts with the relevant authorities, told me: "Outside the negotiation table, the British Government has also attempted to exert pressure on Beijing from two sides in order to strengthen Britain's favorable position in the Sino-British talks. This is maneuvering by the British side."

"Can you give me specific details of this 'maneuvering' by the British side?" I asked.

"First, in both London and Hong Kong, the British side continuously spreads the 'theory of the end of Hong Kong,' such as 'as soon as China regains its sovereignty over Hong Kong, the economy of Hong Kong will immediately collapse.' For example, THE TIMES published an article, indicating that the confidence upon which the prosperity of Hong Kong relies depends more and more on Beijing's actions. The reason for the British side spreading such remarks is to aggravate the instability of Hong Kong's finances."

"In Hong Kong, however, there are also quite a few residents who hold the same view," I said.

"This is another question. Some Hong Kong residents indeed hold a similar view. However, it is believed that, unlike the British side, they do not want to create confusion. On the contrary, they hope the situation will be stabilized."

"What is the other maneuver by the British side?"

A Maneuver -- Stirring Up Trouble in the Stock Market

"We hold that the recent financial storm in Hong Kong was purely manmade. Before Chinese and British leaders held talks, an unusual situation had emerged in Hong Kong's financial markets. Shares were down and the Hong Kong dollar was weak. On one day, the Hang Seng index dropped by 100.31 points. The emergence of this

situation has made people suspicious that this was prompted by some "big shots" in order to bring about a certain atmosphere in the talks, that is, to exert pressure on the talks."

"Later, when both Chinese and British leaders laid their cards on the table, the stock market continued to fluctuate to a greater or lesser extent. Can we rule out the psychological factor of the Hong Kong residents?"

"The pyschological changes of some residents might exert some influence, but this influence was very little. A major reason for the steady fall of the stock market is perhaps the fact that some super investors were selling shares in big quantities. We have also noted that, in Hong Kong, a foundation has been mentioned publicly by name. Some people have also mentioned a multimillionaire who has hurriedly transferred his funds to the United States."

The "super investors" my friend refers to have another name, that is, the "political and financial power." I believe that his remarks reflect the view of senior circles in Beijing: The fluctuations in the Hong Kong stock and financial markets before and after Mrs Thatcher's visit to Beijing were instigated by these political and financial powers. Their purpose was to suit the needs of some people (including the political and financial powers themselves) to prevent any changes in the status of Hong Kong, to enable the British side to win the initiative in the Sino-British talks and to "maintain" the "status quo" of British rule over Hong Kong. Top ranking officials in Beijing hold that it is unwise for the British side to engage in maneuvers and create confusion, for this does not contribute to the talks. "The British Government must shoulder the responsibility of stabilizing the situation in Hong Kong, recognize the principle that the sovereignty of Hong Kong belongs to China and to find together through negotiations the ways and means to maintain the prosperity and stability of Hong Kong." The last sentence within the quotation marks was the second sentence I heard when I was gathering "news relating to the talks." Naturally it was not a remark by the delegate of the Chinese side but a demand on Britain from Beijing.

"I think both China and Britain should calmly find the best solution for the Hong Kong issue," I said when expressing my views. "Recently, the Hong Kong and Shanghai Banking Corporation [HSBC] announced that the time limit for the repayment of housing loans was to be extended to 20 years. Does not this measure contribute to the stability of the situation?"

"Maybe it does and maybe it does not. According to the information I have acquired, the HSBC had not notified the Bank of China before announcing the implementation of this new method. Originally, the banks of Chinese capital had intended long ago to take this measure, that is, to announce the extension of the time limit for repayment of loans over 1997. However, the HSBC stole a march on the Bank of China and then notified it as a formality. This has landed us in a passive and awkward position. The plan of the Bank of China has crumbled. For a time, it did not want to follow the HSBC and consequently reaction in the stock market was poor. By doing so the HSBC intended to indicate that it was more concerned about the prosperity and stability of Hong Kong than other people. However, in view of the overall situation, the Bank of China still supports the plan of the HSBC."

Twenty Plans and the Lease System

Not only do top ranking officials in Beijing detest the British "theory of the validity of the three treaties," they are also dissatisfied with the various propositions made by some people in Hong Kong, such as the independence of Hong Kong, the separation of sovereign and administrative rights and the proposition that China regains its sovereign rights over Hong Kong while Birtain retains its administrative rights. A report submitted to Beijing from a certain relevant quarter in Hong Kong has listed more than 20 plans put forward by the people of Hong Kong for solving the

Hong Kong issue. Those people in Beijing who have read the report hold that many plans are "quixotic and weird." They have a common tendency, that is, they advocate British rule over Hong Kong for a considerably long period of time. "This is a mentality characteristic of Li Hongzhang." According to some cadres in Beijing, "these remarks have, objectively speaking, supplied Mrs Thatcher with firepower so that she can 'speak more plausibly and at greater length' about 'representing the public opinion of Hong Kong' and speak in favor of the 'theory of the validity of the three treaties" and the 'maintenance of the status quo.'" Under these circumstances, an instruction has been issued to the leftist newspapers in Hong Kong to the effect that it is necessary to appropriately organize the writing of articles and contributions to justly and forcefully publicize the righteousness of China's recovery of its sovereignty (including its administrative rights) over Hong Kong and refute the absurd arguments. They will also ask the British who have talked glibly about the outstanding achievements of British rule over Hong Kong to make a self-examination and see the miserable and shabby state the economy of their mother country is in. At the same time, they will also analyze, in accordance with facts, the various reasons contributing to the prosperity of Hong Kong and point out the important role played by the Chinese mainland in bolstering and supporting Hong Kong.

"It is believed that many of the British methods, such as its administration of Hong Kong, urban construction and economic development, have something to recommend them. With respect to the role the British have played, some aspects should be negated and some others should be affirmed. Is that so?"

My friend nodded slightly without making any reply.

"With respect to the plans for Hong Kong," I said, again expressing my view, "I think it is necessary to study and not negate them immediately no matter what views or plans the Hong Kong residents have put forward. Did not Hu Yaobang raise the question of the lease system too? It now seems that this question is no longer mentioned, is it not?"

"Yes. It is very difficult to realize it."

The Latest Tentative Plan of the Policymakers

"Does not this show that someone, whoever he may be, may put forward some views or plans that are not entirely geared to actual circumstances?"

"Quite right. Things always develop."

"However, I still admire the lease system. Do the policymakers now have the latest tentative ideas?"

My friend told me the following five points:

1. "Four unchanges:" China's stand to simultaneously regain its sovereign and administrative rights over Hong Kong does not change; "one state, two systems," that is, the policy and principle of maintaining the capitalist system and ways of life over a long period of time, does not change; the principle of eliminating colonialist influence and tinges does not change; and the method of making Hong Kong a special administrative zone does not change.

2. The setting up of Hong Kong municipality, which is a special municipality of the PRC. The five-star flag is to be hoisted (but Hong Kong can have its own municipal flag). A Hong Kong resident may or will replace the British governor. The mayor can be elected indirectly.

3. With the exception of national defense and foreign affairs, all other local affairs, such as law and administration, will be handled by Hong Kong residents. Consequently, it will have a much greater decisionmaking power than such autonomous regions as Xinjiang, Nei Monggol and Xizang.

4. Various laws, regulations remain basically unchanged. But, in their operation, links with Britain will be severed.

5. Hong Kong's status as a free port and financial center will be preserved.

These five points basically coincide with the conception of China's policymakers, on which CHENG MING has reported in the past. In July this year, CHENG MING was the first to report on China's policy decision on Hong Kong, which includes two most important points: regaining China's sovereignty over Hong Kong; and practicing "one state, two systems," with Hong Kong preserving its capitalist system. It is said that some people (perhaps an extremely small number of people) still refused, until very recently, to believe the tentative idea of "one state, two systems." With an attitude of being responsible to the readers, I now repeat: Chinese conception of "one state, two systems" (a remark by Hu Qiaomu) has been explicitly confirmed. However, I reckon that its implementation, whether five or six points, will meet with a lot of problems. In practicing socialism, the communists still find it difficult to move a single step, let alone in practicing capitalism.

A Remark by RENMIN RIBAO Was Wrong

Since it is permissible to preserve the capitalist system in Hong Kong (for at least a considerably long period of time), we should permit the existence of certain things derived from capitalism. If these things violate the capitalist law, it goes without saying that we should punish them according to the capitalist legal system. Since Hong Kong will be a special administrative zone within a socialist state, therefore, if some people undermine the security and interests of the state by their actions, it also goes without saying that we should punish them according to the special codes that should be formulated in the future. However, in its editorial entitled "Correctly Appraise and Handle Class Struggle at the Present Stage" published on 6 November, RENMIN RIBAO discussed in very general terms the class struggle against "some people" of the bourgeoisie after Hong Kong has been regained. This gives the impression that the method of class struggle waged in the socialist state can be applied in Hong Kong, which practices capitalism. Is it appropriate to say so? It is believed that some enlightened and wise leaders had not gone over this editorial. This article, which contained the pernicious influence of leftist ideas, is detrimental to the Chinese people and also to the stability of Hong Kong.

In Beijing, some intellectuals hold that the paragraph dealing with the Hong Kong and Macao issue in the RENMIN RIBAO editorial is not only confusing in logic but also self-contradictory. I agree with their views. This erroneous paragraph was written at a wrong time and with erroneous logic. Viewed from this editorial, the problem China will face after the recovery of Hong Kong will not be so simple as was originally reckoned.

China now demands that the situation in Hong Kong be stabilized and that its prosperous situation be preserved. This is entirely correct. In order to achieve this, however, it is insufficient to rely on the mouth or pen to criticize Britain's faults and to constantly publicize to Hong Kong residents the "16 characters" (regaining sovereignty, preserving the original system, practicing self-rule by Hong Kong people and maintaining prosperity and stability). What is important is to take actions that can evoke the confidence of the people. With respect to the paragraph in RENMIN RIBAO, it would have been better not to have published it.

UN SAYS USSR, SRV MAY HAVE USED TOXIC CHEMICALS

OW071309 Beijing XINHUA in English 0752 GMT 7 Dec 82

[Text] United Nations, December 6 (XINHUA) -- The use of toxic chemicals by the Soviet Union and Vietnam in Afghanistan, Kampuchea and Laos could not be excluded, a U.N. report said today.

The report, submitted by the U.N. investigation group to the secretary-general, says although the group was unable to prove the use of chemical weapons in these areas, "it could not disregard the circumstantial evidence suggestive of the possible use of some sort of toxic chemical substance in some instances."

The report, containing evidence collected by a four-member scientific and medical team headed by Egyptian Maj Gen 'Ismat 'Izz, was ordered by the Assembly two years ago, when the Soviet Union and Vietnam were accused of conducting chemical warfare in the three Asian countries.

In some cases, the report says, the group has found toxic chemicals contained in samples handed over by victims during its on-site visits to Pakistan and Thailand. But the presence of these toxic chemicals could be explained by natural pollutions or conventional weapons other than chemical weapons, it says.

The difficulties for the group to obtain hard evidence lie in the fact that the Soviet Union and Vietnam barred it from entering the areas where chemical warfare was reportedly conducted, it added.

In one case, the report says, the group regarded the samples of yellow powder from Laos as being significant, but felt it difficult to ascertain whether or not these samples were obtained from areas that had been exposed to chemical attacks.

The report says another reason for the group's failure to detect signs and symptoms pathognomonic of exposure to chemical attacks is the prolonged lapse of time between the exposure to toxic chemicals and the time when it conducted the interviews and medical examinations of the victims.

Before the release of the report, the First Committee of the General Assembly adopted another resolution asking the secretary-general to investigate chemical warfare accusations and to prepare lists of experts and laboratories to make inquiries.

ZHAO ZIYANG MEETS SCHLESINGER, HOLBROOKE

OW071646 Beijing XINHUA in English 1627 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- Chinese Premier Zhao Ziyang met with James Schlesinger and Richard Holbrooke, senior advisers to the Lehman Brothers Inc., this afternoon in the Great Hall of the People.

Premier Zhao reiterated China's independent foreign policy. "This policy is based on the principles of opposition to hegemonism, the safety of world peace and conduct the interests of the Chinese people and the people of the world," he said. [Sentence as received]

[Beijing XINHUA Domestic Service in Chinese at 1600 GMT on 7 December in its report on Zhao meeting with Schlesinger and Holbrooke, renders this sentence as follows: "This policy is based on the principles of opposing hegemonism, safeguarding world peace and proceeding from the interests of the Chinese people and the people of the world," he said.]

Premier Zhao said China's policy of attaching importance to developing its relations with the United States remains unchanged.

Briefing the premier on his views about world economic issues, Scheslinger said China's economic situation is good, with balanced international payments and small foreign debts. China should exploit the favorable conditions in the international money market to raise funds for development of its offshore oil.

The premier said he agreed with Scheslinger's suggestion, and said China will solicit some loans for its modernization program if conditions are suitable. He hoped Lehman Brothers Inc. would cooperate with the Bank of China in this regard.

Referring to China's energy resources, Zhao Ziyang said, "China lacks advanced technology in this regard, in addition to problems of poor management and comparatively great waste.

"We should make improvements in two respects: Exploration of energy resources such as coal, hydropower and oil and construction of nuclear power stations, and adoption of energy conservation measures including technical revamping and equipment renewal, especially the use of energy-saving equipment. There is great potential," he said.

Present were Jin Deqin, president of the Bank of China, Zhang Wenjin, vice-minister of foreign affairs, and Charles W. Freeman, Jr., charge d'affaires ad interim of the U.S. Embassy in Beijing.

The other two guests, Henry Breck and Henry Miller, senior managing directors of Lehman Brothers Inc., were also present.

The guests arrived December 5 at the invitation of the Bank of China. In the past few days, they have discussed with leading officials of economic departments the steady development of business cooperation between the two sides.

U.S. SPOKESMAN ON USSR'S BALLISTIC MISSILE TEST

OW071616 Beijing XINHUA in English 1609 GMT 7 Dec 82

[Text] Washington, December 6 (XINHUA) -- The Soviet Union has flight-tested a new type of intercontinental ballistic missile, the U.S. State Department said here today.

Deputy Spokesman Alan Romberg told reporters that the Soviet Union had informed the United States of the recent test. The Soviet Union told the United States that it tested a new type of missile "permitted by the unratified SALT II agreement," Romberg said in a statement.

Under the SALT II treaty, the Soviet Union and the United States "may flight test and deploy one new type of light ICBM."

The spokesman said that the Soviets began their testing prior to Reagan's November 22 announcement of his decision to deploy the MX missiles. It was reported that one such test, taking place on October 26, ended quickly over the failure of the missile's first stage rocket motor.

Dmitriy Fedorovich Ustinov, defence minister of the Soviet Union, told TASS today that if the United States begins to deploy MX missiles, the Soviet Union will deploy new intercontinental ballistic missiles of the same grade.

MX FUNDS DENIED BY HOUSE OF REPRESENTATIVES

OW080919 Beijing XINHUA in English 0851 GMT 8 Dec 82

[Text] Washington, December 7 (XINHUA) -- The U.S. House of Representatives voted this evening by 245 to 176 to deny a 988 million dollars fund for the production of the first five of the disputed MX missile.

When the House began considering a 231.6 billion dollar defense appropriation bill this afternoon, an amendment was tabled asking for eliminating the 988 million dollars for the initial production while leaving intact 2.5 billion dollars for further research and development. After several hours' debate, the amendment was carried.

This was considered by the news media here as a "serious set-back" for President Reagan in view of the fact that he had repeatedly urged for speeding up the deployment of the new missile system and had personally led an intense lobby effort prior to the vote and that as many as 50 of his fellow Republicans had deserted him to join the Democrats in voting for the amendment.

Hours later, Reagan issued a written statement calling the vote a "tragic mistake" and accusing the majority who voted for the amendment of "choosing to go sleepwalking into the future". "Unless reversed in coming days, it will seriously set back our effort to protect the nation's security and handcuff our negotiators at the arms table," he warned.

The Senate will take up this issue later this week. While the Republican is in the majority there [as received] it is far from certain whether the fund for production will not be deleted as well. However, even if the Reagan administration suffers another defeat in the Senate, it could still demand the Congress finance the program next year.

A vehement debate on the MX program has been underway since Reagan announced on Nov. 22 his decision on a basing plan for the missile. While some of the opponents based their opposition on the ground that the government's basing plan could not assure the invulnerability of the costly weapon system, others voiced their concerns over the program's potential impacts on the superpowers' nuclear arms race as well as on the U.S. economy, which is undergoing a serious recession.

U.S. RAPPED FOR RESTRICTING CHINESE TEXTILES

HK080852 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 6

[Unattributed report: "A Group of U.S. Businessmen Accuses U.S. Administration of Restricting Chinese Textile Imports Unilaterally"]

[Text] According to a report in the U.S. WOMEN'S WEAR DAILY the U.S. Importers and Exporters Association, composed of some of the largest retailers and importers, recently brought a suit in the International Trade Court against the U.S. administration's unilateral imposition of restrictions on Chinese textile imports, demanding an immediate end to these restrictions.

According to the report this association, in a complaint lodged with the International Trade Court on 29 November, said: in the past 2 years the U.S. administration has taken no less than 73 measures restricting imports, which are "illegal in several key aspects." Association members "feel especially disturbed" over the administration's restrictions on China's export commodities because this has "caused irreparable losses" to their commercial activities, forcing them "to arrange for some relatively expensive and not so reliable supplies as substitutes for these products." The U.S. Importers and Exporters Association requested the International Trade Court to "pronounce an open verdict." This would force the administration to make a thorough revision of procedures followed in restricting imports and to abolish its unilateral restrictions on 12 categories of Chinese textiles and clothing.

In September 1980, China and the United States signed their first textile trade agreement, but four times since the agreement was signed the U.S. administration has augmented restrictions on Chinese textile exports to the United States. The number of restricted categories has increased from 8, as originally stipulated in the agreement, to 15. Another four categories are being negotiated. Before reaching agreement through negotiation, the U.S. side on many occasions has announced unilateral restrictions, not only causing losses to China in its production and export of textiles but also harming the interests of U.S. importers. The first textile trade agreement will expire at the end of this year. In order to sign a new textile trade agreement, Chinese and U.S. trade representatives have held talks three times since last August. Because the United States at the talks has made extremely unfair suggestions, imposing severely discriminatory restrictions on China's exports to the United States, both sides have failed to reach an agreement.

UNEMPLOYMENT RATE CONTINUES TO SOAR IN U.S.

OW032017 Beijing XINHUA in English 1912 GMT 3 Dec 82

[Text] Washington, December 3 (XINHUA) -- The U.S. unemployment rate soared to a new high of 10.8 percent in November with 444,000 more people joining the jobless ranks and a total of 12 million Americans out of work last month, the U.S. Labour Department reported today.

It is the seventh successive monthly increase of unemployment in the country since the rate reached a 42-year record level of 9.4 percent in April with 10.3 million Americans out of work. In a seven-month period, the jobless increased by 1.7 million.

The report said that the unemployment rate among blacks was 20.2 percent, the same as in October. Jobless rate among black teenagers rose to 50.1 percent last month from 46.7 percent in October.

As the economic recession has lasted 16 months, the number of people who have been out of work for a long time also increased. In November, 38 percent of the unemployed had been jobless for 15 weeks or longer, and more than half of those had been out of work for more than six months. The average duration of unemployment was 17.2 weeks, but the number of long-term unemployed continued to rise.

Meanwhile, the Labour Department reported yesterday that the number of people drawing state unemployment checks in November increased by 196,000 to 4.84 million, the highest since the unemployment compensation program began in 1935.

Unemployment has been the major problem in the current recession. Economists predicted that it will be getting even worse in the months ahead.

New High Rate 'Shakes' U.S.

OW061746 Beijing XINHUA in English 1645 GMT 6 Dec 82

["New Unemployment Figure Shakes U.S. -- by XINHUA Correspondent Yu Enguang" -- XINHUA headline]

[Text] Washington, December 5 (XINHUA) -- The newly-released U.S. unemployment rate, 10.8 percent for November, has shaken the U.S. Government and public.

When the Commerce Department reported today that 12 million people were out of jobs last month, President Ronald Reagan, who was visiting Colombia, immediately admitted that the figure presented "a continuing tragedy."

The Democrats said that the jobless situation was caused by the government and that it was "a national disgrace," or "a harbinger of an economic depression."

Lane Kirkland, President of the AFL-CIO, warned that "If all else fails and people come to the conclusion that the only way they can get people's attention is to create a turmoil in the streets, well then I guess perhaps we have to go out and organize some turmoil."

The soaring unemployment rate was the outcome of a long recession. Both joblessness and bankruptcies set records for the last 40 or 50 years.

The current recession, which began in July, 1981, has lasted 16 months, longer than the average duration of the previous seven recessions.

The present recession has not only hit the old industries in the northeastern part of the country, but the rising industries in the southwest, 19 of the 22 production industries reduced the number of workers earlier this month, and three of the five big service enterprises followed suit.

The worsening unemployment showed the failure of the Reagan Administration's economic policy. In his "economic recovery program" put forward in the spring of 1981, Reagan put income tax cuts in the first place. He intended to cut the income tax by 30 percent in three years to push the unemployment.

With increasing joblessness and the deepening economic crisis, the Government has found its financial resources limited. In addition to the increase of the defense budget, public spending has been higher than before.

In these circumstances, the government can in no way bring down the financial deficits as planned. The deficit in fiscal 1982 has climbed to 10.7 billion dollars. It is expected to reach 18 to 20 billion dollars in 1983.

The government has to borrow from the money market, while encouraging high interest rates and counteracting the effect of future tax-cuts.

Martin Feldstein, President Reagan's economic advisor, acknowledged that it will take five or six years to bring the present unemployment level down to six or seven percent.

Earlier last month, Reagan said that he would take measures to reduce unemployement. He would have his third tax-cut program carried out six months in advance, beginning in January 1983, and cut unemployment benefits to encourage people to look for jobs and lower young people's wage standards. But all these measures were opposed at Capitol Hill.

The Democrats demand that in addition to the 5.5 billion dollar gas-tax, the government take 5 billion dollars from the budget to create jobs. They also proposed cuts in defense spending so as to reduce financial deficits. Reagan has rejected these proposals, but he cannot find a way out of the unemployment problem.

Unemployment Tax Idea Scored

HK080915 Beijing RENMIN RIBAO in Chinese 8 Dec 82 p 7

["International Jottings" by Xiao Xi [5135 6007]: "The Brain Trust at Its Wit's End"]

[Text] Faced with the largest postwar unemployment rate of 10.8 percent, the brain trust of the U.S. Administration and the "economic committee" of the cabinet -- after racking their brains -- have hit upon a wonderful idea: Taxing all those people who receive unemployment relief funds. Such a step allegedly could add to the national income. It could also "encourage" the unemployed to create conditions for finding work again.

This would mean cutting flesh off the unemployed to repair their sores. This really is a most farfetched idea. At present the United States has more than 10 million unemployed people. With the imposition of unemployment taxes quite a tidy sum of course could be extracted. But this policy was too harsh; there was a public outcry against it. President Reagan was forced to announce hastily that this was not his decision. He also said the suggestion was being dropped.

All along the White House brain trust has advocated tax reduction as an important part of the "economic recovery plan." Given the increased economic difficulties, the Reagan administration was forced to increase taxes not long ago. Now it has even turned its attention to those who receive unemployment relief funds. This shows that, faced with mounting economic problems, these economic experts really have reached the end of their resources.

PAKISTAN'S ZIAUL HAQ ARRIVES IN U.S. 6 DEC

OW071906 Beijing XINHUA in English 1830 GMT 7 Dec 82

[Text] Washington, December 6 (XINHUA) -- Pakistani President Mohammad Ziaul Haq started an eight-day visit to the United States today, hoping that the U.S. Congress would approve a 3.2 billion dollar aid program committed by the Reagan administration following the Soviet invasion of Afghanistan.

Making his first state visit to the United States, President Zia is expected to meet U.S. President Ronald Reagan tomorrow for talks centering on American military aid to Pakistan, the Soviet invasion of Afghanistan and the refugee problem caused by the invasion.

U.S. Secretary of State George Shultz, before his departure for Europe, met President Zia immediately after his arrival. They signed a document for the setting up of a joint commission to strengthen economic, scientific and cultural cooperation between the two countries.

A spokesman for the U.S. State Department announced today at the time of Zia's arrival that the two sides had reached an agreement on U.S. supply of F-16 fighter planes to Pakistan. The first batch of such planes are expected to go to Pakistan soon, the spokesman said.

INDIAN MARXIST P.D. GUPTA DIES IN BEIJING

OW051557 Beijing XINHUA in English 1509 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- P.D. Gupta, member of the Political Bureau of the Central Committee of the Communist Party of India (Marxist) [CPI (M)] and secretary pf the Secretariat of the C.P.I. (M) West Bengal state committee, died of illness in Beijing November 29 at the age of 73.

Taking part in the struggle against British imperialism in his teens, Gupta later became a well-known leader in the communist movement in India. He was also a friend of the Chinese people.

A ceremony to pay last respects to his remains was held this afternoon in Beijing hospital where he had been hospitalized. Wreaths were sent respectively by Qiao Shi, alternate member of the Secretariat of the Central Committee of the Communist Party of China (C.P.C.) and head of the International Liaison Department of the C.P.C. Central Committee, the Liaison Department; Beijing hospital; the C.P.I. (M) Central Committee, the committee's Political Bureau, M. Basavapunnaiah, member of the Political Bureau of the C.P.I. (M) Central Committee; the C.P.I. group in parliament; the Secretariat of the C.P.I. (M) West Bengal State Committee; Indian ambassador to China; and embassy officials and Indian experts in Beijing.

Present at today's ceremony were Qiao, and other leading members of the International Liaison Department of the C.P.C. Central Committee; Basavapunnaiah; B. Bhattacharya, member of the Secretariat of the C.P.I. (M) West Bengal State Committee; A.B. Pathwardhan, minister of the Indian Embassy in Beijing; some members of the delegation from the all-India memorial committee for Dr Dwarkanath Kotnis; Indian experts and students in Beijing.

At the ceremony, Qiao Shi expressed deep sympathy to Basavapunnaiah on Gupta's death.

The coffin containing Gupta's body is to be escorted to Calcutta tomorrow by Basavapunnaiah and others.

During Gupta's hospitalization, he was visited by Qiao and other leading officials of the International Liaison Department of the C.P.C. Central Committee.

FANG YI MEETS INDIAN SCIENCE DELEGATION

OW011616 Beijing XINHUA in English 1543 GMT 1 Dec 82

[Text] Beijing, December 1 (XINHUA) -- State Councillor Fang Yi met here this afternoon with a delegation of the Indian national academy of sciences headed by its president, M.G.K. Menon. They had a friendly conversation.

The delegation arrived here November 20 for a friendly visit and scientific exchanges. Among those present was Li Xun, vice-president of the Chinese Academy of Sciences.

WANG BINGNAN FETES INDIAN MEMORIAL DELEGATION

OW262024 Beijing XINHUA in English 1630 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Wang Bingnan, president of the Chinese People's Association for Friendship With Foreign Countries, this evening gave a banquet for a delegation from the all-India memorial committee for Dr Kotnis led by its president Dr Bijoy Kumar Basu, and Kotnis' relatives. Kotnis was a member of an Indian medical team in China helping Chinese armed forces in their fight against Japanese aggressors during World War II. The guests came to China on the 40th anniversary of Kotnis'death. Wang Bingnan recalled Kotnis and other Indian doctors who supported the Chinese resistance to the Japanese. He said the Indians came to China at a very difficult moment for the Chinese people. "We will never forget their contributions," he said. He said the forthcoming commemorative activities for Kotnis, and another Indian doctor, Menhanlal Atal, who died 25 years ago, would enhance Sino-Indian friendship.

Basu, also a member of the Kotnis' and Atal's medical team, said "we also received a lot of help from the Chinese when we were here." He presented Wang Bingnan his diary, written in China between 1938 and 1943, hoping people would learn how Indian and Chinese anti-fascists worked together. Vithal Shantaram Kotnis, Kotnis' younger brother, hoped to follow his brother's efforts in development of Sino-Indian friendship.

During the banquet, the delegation presented a shawl and a work of art handicrafts from Indian Prime Minister Indira Gandhi to Guo Qinglan, Kotnis' widow.

Prior to the delegation's departure to China from India, Basu said, Gandhi told him she wished the delegation a successful visit. She also said she hoped relations between India and China would further improve.

Present at today's banquet were Lin Lin, vice-president of the Chinese People's Association for Friendship With Foreign Countries; Huang Shuze, adviser to the Ministry of Public Health; friends of Kotnis; Rewi Alley; Dr Ma Haide (George Hatem); Jiang Yizhen; and A.B. Patwardhan, minister of the Indian Embassy in Beijing.

NEW DELHI RECEPTION MARKS SINO-INDIAN FRIENDSHIP

OW300059 Beijing XINHUA in English 1912 GMT 29 Nov 82

[Text] New Delhi, November 29 (XINHUA) -- Delhi branch president of the India-China Friendship Association Lajpat Rai said today "We consider India-China friendship to be in the interests of India, of China, of Asia and of the whole world and therefore make all efforts to promote it." Lajpat Rai said this at a reception held by the India-China Friendship Association here today in honor of the Chinese sports delegation: artists and journalists who are here for the 9th Asian games. The reception hall was decorated with the national flags of India and China and slogans written in Chinese reading "Long live the friendship between the Indian and Chinese peoples!" The guests were presented with garlands. Lajpat Rai, professor with Delhi university, also spoke highly of the Chinese sportsmen and education system in China.

Chinese sports delegation head Chen Xian likened China-India friendship to the Yangtze River and the River Ganges.

Singers of the China Central Song and Dange Troupe attending the festival of the Asiad performing arts presented songs at the reception to warm applause.

MEETING ON NEPAL'S INDUSTRIAL DEVELOPMENT HELD

OW291856 Beijing XINHUA in English 1839 GMT 29 Nov 82

[Text] Kathmandu, November 29 (XINHUA) -- The solidarity ministerial meeting for cooperation in the industrial development of Nepal was inaugurated by King Birendra of Nepal here today. The five-day meeting, co-sponsored by the United Nations Industrial Development Organization (UNIDO) and the Government of Nepal, is being attended by delegations from 18 developing countries and one region -- Algeria, Bangladesh, Chile, China, Egypt, India, Kuwait, Malaysia, Pakistan, the Philippines, Romania, Singapore, Sri Lanka, Thailand, Turkey, Venezuela, Yugoslavia and Nepal as well as South Korea.

The Chinese delegation is led by Chen Jie, representative of the minister of foreign economic relations and trade. Also present as observers at the meeting are representatives from a number of international organizations.

In his inaugural address King Birendra expressed the hope that this solidarity meeting will definitely contribute to exploring ways and means of increasing mutual co-operation.

The meeting is aimed at identifying specific projects to promote Nepal's industrial development and ways and means to facilitate the flow of technical and financial assistance required for implementing these projects through concrete agreements. Nepal has already submitted to each of the participating countries a list of 57 project proposals for consideration and expects cooperation from these countries in forms of loans, grants, joint ventures, technical collaboration or assistance, training of manpower or industrial research.

The Kathmandu solidarity ministerial meeting is the eighth of its kind held in the world and the third in Asia under the patronage of UNIDO since the adoption of the Lima declaration and plan of action on industrial development and cooperation at the second general conference of UNIDO.

Chen Jie Addresses Meeting

OW301618 Beijing XINHUA in English 1522 GMT 30 Nov 82

[Text] Kathmandu, November 30 (XINHUA) -- China supports solidarity and cooperation among the developing countries and desires to take positive steps to advance diversified forms of economic and technical cooperation with other developing countries. This was stated today by Chen Jie, head of the Chinese delegation, in his address to the solidarity ministerial meeting for cooperation in the industrial development of Nepal, which began here yesterday.

Chen Jie said, economic and technical cooperation between the Third World countries help "enhance their self-reliance" and constitutes "an important element in the establishment of a new international economic order."

"China has already established economic and technical cooperation relations with more than 70 countries and regions in the past 30 years and more," he recalled.

After reviewing the growing cooperation between China and Nepal in the past decades, he declared that as a modest contribution to this meeting the Chinese Government has decided to render Nepal a grant for constructing an industrial glove and apron manufacturing plant as proposed by the Nepalese Government. He said China is also ready to discuss ways of cooperation in some other light industry development projects in Nepal.

At the end of his speech, Chen Jie expressed the hope that this meeting will contribute greatly to promoting solidarity and cooperation among developing countries, and be conducive to the industrial development of the Kingdom of Nepal.

King Birendra Meets PRC Group

OW301702 Beijing XINHUA in English 1539 GMT 30 Nov 82

[Text] Kathmandu, November 30 (XINHUA) -- Nepal attaches great value to her friendly relations with China -- an intimate and reliable neighbor of Nepal, King of Nepal Birendra said last night. King Birendra made the remarks to Chen Jie, leader of the Chinese delegation and representative of the minister of foreign economic relations and trade, at a reception given by the king and queen at the royal palace in honor of the delegates attending the solidarity ministerial meeting for cooperation in the industrial development of Nepal beginning yesterday. The king told Chen Jie that his recent visit to China was successful. China is a close and trustworthy friend of Nepal, and Nepal cherishes her friendship with China, he added.

Premier Thapa Meets PRC Group

OW021737 Beijing XINHUA in English 1701 GMT 2 Dec 82

[Text] Kathmandu, December 2 (XINHUA) -- Nepalese Prime Minister Surya Bahadur Thapa said here today he hopes the Chinese people will achieve their modernization goals. He added a modernized China will surely exercise immense influence over the world's politics. The prime minister made these remarks when he received the Chinese delegation to the Kathmandu solidarity ministerial meeting with Chen Jie as the leader and Ma Muming as deputy leader.

In his conversation with the Chinese delegation, Thapa expressed his satisfaction with the good relations between China and Nepal. He said in recent years there has been excellent cooperation between Nepal and China especially in economic matters. He noted the exchange of visits by the leaders of the two countries has further consolidated and promoted the friendship between them. Thapa praised the Chinese technicians working in Nepal for their devotion to the China-Nepal cooperative projects.

Meeting Ends; PRC Group Leaves

OW060613 Beijing XINHUA in English 1653 GMT 3 Dec 82

[Text] Kathmandu, December 3 (XINHUA) -- The five-day solidarity ministerial meeting for cooperation in the industrial development of Nepal ended here today stressing the need for strengthening economic and technical cooperation among the developing countries. A report unanimously adopted at the meeting stated that the promotion of solidarity among developing countries and the bu8lding up of their collective self-reliance "are essential towards the establishment of the new international order."

It was reaffirmed that solidarity meetings provided a pragmatic approach in promoting cooperation among developing countries and hoped that the Kathmandu meeting would result in commencement of numerous programs of nutual cooperation which would assist in the industrial development of Nepal.

The ministerial meeting is co-sponsored by Nepal and the United Nations Industrial Development Organization, which has since - [word indistinct] initiated - [words indistinct] ministerial meetings of the kind aimed at providing necessary assistance to the least [words indistinct] ministerial meeting of [word indistinct] development countries proves to be an arena facilitating them [words indistinct] more creative, practical [words indistinct]. (?This) is regarded as a step forward [words indistinct] the South-South cooperation which is in the interests not only of a particular country but also of the Third World in general. In the past two days consultations between Nepal and the participating countries were held on specific economic cooperation and reached agreements in diverse forms of technical assistance, setting up of joint-ventures, providing complete sets of equipment either on the basis of deferred payment or compensation trade as well as (?grants-in-aid). During the [words indistinct] of the projects proposed (?by) the host country were agreed upon and would be further discussed afterwards.

China has agreed to give Nepal a grant for constructing an industrial glove and apron manufacturing plant and also agreed to supply a complete set of cotton spinning equipment on the basis of deferred payment.

The Chinese delegation (?led) by Chen Jie, representative of minister of foreign economic relations and trade, left here for home this afternoon.

CONSTRUCTION CONTRACT WITH NEPAL SIGNED 6 DEC

OW061530 Beijing XINHUA in English 1501 GMT 6 Dec 82

[Text] Kathmandu, December 6 (XINHUA) -- Nepal signed a contract with China here today in the mode of tender for the first-stage construction of the Sunsari Morang irrigation project.

Wang Bingkuan, representative of China's hydraulic engineering corporation, and R.B. Shah, acting manager of the Sunsari Morang irrigation project of Nepal, signed the contract.

Located in the border district of Morang, southeast Nepal, the project is a comparatively large one to be undertaken by China in the form of tender. The initial-stage construction, with a designed irrigated area of 11,200 hectares of land, will cost some 14.50 million U.S. dollars.

China has participated in the international tenders for Nepal's various projects since early this year. Before this, China entered into two other bonds with Nepal in the same mode of tender for providing Nepal with equipment for five small hydropower stations and for undertaking the power transmission project for the construction of the Marsyandi hydropower station.

ZHAO ZIYANG MEETS NEW YUGOSLAV AMBASSADOR 3 DEC

OW031230 Beijing XINHUA in English 1220 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- Zhao Ziyang, premier of the State Council, met here this afternoon with Sava Obradovic, Yugoslavian newly-appointed ambassador to China.

CHEN MUHUA MEETS POLISH SCIENTIFIC DELEGATION

OW021031 Beijing XINHUA in English 0800 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Chen Muhua, Chinese state councillor and minister of foreign economic relations and trade, met this morining with a Polish scientific and technological cooperation delegation led by A. Zor, assistant minister in the Ministry of Higher Education, Science and Technology. The delegation is attending the 15th meeting of the Sino-Polish scientific and technological cooperation committee which is being held in Beijing between November 25 and December 3.

After meeting with the delegation, Chen Muhua attended the signing ceremony of a protocol on the 15th meeting. A. Zor, chairman of the Polish side, and Liu Hui, chairman of the Chinese side of the joint scientific and technological cooperation committee and vice-minister of coal industry, signed the protocol. Polish Ambassador to China Wladyslaw Wojtasik, was present on both occasions.

POLAND'S JARUZELSKI REBUTS U.S. CRITICISM

OW41106 Beijing XINHUA in English 0750 GMT 4 Dec 82

[Text] Warsaw, December 3 (XINHUA) -- Polish leader Wojciech Jaruzelski today strongly condemned the U.S. authorities for attacking Poland and interfering in her internal affairs. Speaking at a meeting in celebration of the miners' festival at the southern mining city of Jastrzebie, the first secretary of the Polish United Workers' Party and prime minister said, "if this hostile campaign continues, if the American administration does not observe the norms of international law, the Polish Government will find itself under the obligation of limiting its spheres of cooperation with that country."

He spoke of the worsening of Polish-U.S. relations after the imposition of the state of seige, and accused the U.S. administration of exerting pressure time and again on Poland. He said that it is not only "unreasonable" but also "ridiculous" for a foreign government to put pressure on Poland because of her decisions made within the framework of her domestic policies. He said: "Hardly a day goes by without some administration official making new demands, epithets and threats." What is more, he said, the U.S. ambassador in Warsaw went so far as to slander the Polish authorities, which maintain normal diplomatic relations with the United States. This is not acceptable by the civilized world, he added.

Jaruzelski said, "The United States has applied unprecedented limits on granting visas to the official representatives of Poland. We will therefore be obliged to take appropriate measures."

"All Polish institutions and representatives would break off their relations with the United States Information Agency."

"In the interest of state security," he declared, "it will also be necessary to...adopt rules concerning contacts between Polish citizens and U.S. delegations and agencies." However, Jaruzelski expressed his country's wish to establish a relationship of equal partners with the United States.

On the same day, Polish Government spokesman Jerzy Urban said in a statement that U.S. Defense Minister Weinberger's recent remarks about Poland are "unparalleled and personal attacks, based on invention, (which) are a sign of primitive manners in present U.S. politics."

Weinberger, in a current affairs program shown last Sunday by the U.S. television network ABC, said, "Poland at the moment is not free. Poland is a country that is run by a Russian general wearing a Polish uniform and the policies are virtually identical."

Poland Releases 327 Internees

OW301217 Beijing XINHUA in English 0729 GMT 30 Nov 82

[Text] Warsaw, November 29 (XINHUA) -- The Polish authorities today announced the release of 327 people interned under the state of siege, said the POLISH PRESS AGENCY PAP.

PAP said that the decision was based on "further progress in the stabilization of social life and the improvement in security and public order in the country."

The Polish Ministry of Internal Affairs made the decision in accordance with a proclamation by Prime Minister Wojciech Jaruzelski who said at a National Assembly session on October 9 that large numbers of internees would be released as a result of the improvement of the country's security and order.

The first group of 308 internees was freed on October 11.

Polish Government spokesman Jerzy Urban said at a Warsaw press conference on October 16 that there were still about 1,000 internees at that time.

ROMANIA SEEKS BROADER TRADE TIES WITH EEC

OW041020 Beijing XINHUA in English 0812 GMT 4 Dec 82

[Text] Burcharest, December 3 (XINHUA) -- Romania and the European Economic Community (EEC) will further strengthen their economic cooperation in face of the current worldwide economic and financial crisis, according to AGERPRES today. This was stressed during the talks between Romanian President Nicolae Ceausescu and Vice-Chairman of the EEC Commission Wilhelm Haferkamp here today.

Wilhelm Haferkamp, who is in charge of EEC's foreign affairs, is here to attend the second meeting of the EEC-Romania mixed commission.

AGERPRES said that both sides outlined the new areas of cooperation and charted their course of action.

Both sides considered it a pressing need to increase trade and adopt new forms of economic cooperation between states. This is called for by the current worldwide economic and financial crisis.

The two sides stressed that it is necessary to carry out a new world financial policy to promote international cooperation and abolish a high interest policy which hinders the economic development of various countries and developing countries in particular.

The EEC-Romania mixed commission held a two-day meeting during which both sides exchanged notes concerning the execution of the agreements reached at the meeting.

JORDAN'S KING HUSAYN ON OFFICIAL VISIT

Welcomed by Zhao Ziyang

OW071007 Beijing XINHUA in English 0745 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) — King Husayn of Jordan started his official visit to China today at the invitation of the National People's Congress and the Chinese Government.

This morning, the Chinese Government held a welcoming ceremony in his honor at a plaza east of the Great Hall of the People.

Premier Zhao Ziyang shook hands and exchanged greetings with King Husayn upon his arrival at 9:30. A girl presented the king with a bouquet.

The military band played the national anthems of Jordan and China. Accompanied by Premier Zhao, King Husayn reviewed an honor guard made up of the three services of the Chinese People's Liberation Army. Some 200 children waved flowers and beat tambourines to greet the king, who nodded to them in return.

Present at the ceremony were Wei Guoqing, vice-chairman of the Standing Committee of the National People's Congress; Chen Muhua, state councillor and minister of foreign economic relations and trade; Wu Xueqian, minister of foreign affairs; Zhu Muzhi, minister of culture; and Chi Haotian, deputy chief of General Staff of the People's Liberation Army.

Also present were Prince Abdullah Bin al-Husayn and the king's entourage.

Holds Talks With Zhao Ziyang

OW071257 Beijing XINHUA in English 0731 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- Chinese Premier Zhao Ziyang and King Husayn Ibn Talal of Jordan held talks at the Great Hall of the People here this morning.

It was learned that the two sides exchanged views on the situation in the Middle East and discussed other international issues of common concern and bilateral relations.

The two leaders shared converging views on a wide range of international issues. They agreed that there are broad prospects for the development of friendly cooperation between China and Jordan.

King Husayn invited Premier Zhao Ziyang to visit Jordan at a time convenient to him. Zhao Ziyang accepted the invitation with pleasure.

Present on the Jordanian side were Ahmad Lozi, chief of royal cabinet, and Kamal al-Hamud, Jordanian ambassador to China.

On the Chinese side were Wu Xueqian, minister of foreign affairs; Wen Yezhan, vice-minister of foreign affairs; He Ying, adviser to the foreign ministry, and Huang Shixie, Chinese ambassador to Jordan.

Attends Zhao-Hosted Banquet

OW071638 Beijing XINHUA in English 1613 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- Premier Zhao Ziyang hosted a banquet here this evening to welcome Jordan's King Husayn.

Zhao Ziyang said "In the last few days, we have fully exchanged our views on the Middle East situation with King Husayn. We have furthered our mutual understanding and reached a convergence of views. We both oppose Israeli aggression and expansion, and condemn Israel's brutal slaughtering of Lebanese and Palestinian people. We both recognize the Middle East problem must be solved in a just and all-round way. That is to say, Israel must withdraw from the Arab land it took in 1967, including Jerusalem, and the national rights of the Palestinian people must be restored."

He said the Chinese Government and people will stand forever for the just cause of the Arab and Palestinian people.

"We are fully confident that as long as the great Arab nation strengthens its unity and continues its struggle, it will reach its lofty goal with the support of the world's people," Zhao said.

"Over the past two decades, the people of Jordan have scored marked progress in developing their national economy and culture," he said.

"In international affairs the Jordanian Government pursues a foreign policy of non-alignment, opposes Israel's aggressive expansion, and makes efforts to promote unity among Arab countries, safeguard the national rights of the Arab and Palestinian people and realize an overall and just solution of the Middle East issue," Zhao Ziyang said.

"Sino-Jordanian relations have achieved gratifying results on the five principles of peaceful coexistence since the establishment of diplomatic relations between the two countries," he said. "This not only accords with the common aspirations and fundamental interests of the two peoples, but also is conducive to the struggle waged by Third World against hegemonism and for the defense of world peace."

Premier Zhao said he was convinced King Husayn's visit will contribute to the development of friendship and cooperation between the two countries.

Husayn said he had long hoped to visit China, convey the friendship of the Jordanian people to the Chinese leaders and people, and express the sincere desire to strengthen Jordanian-Chinese cooperation.

He condemned Israel for its aggression against Palestine and other Arab countries.

"The Palestinian issue is the cause of the Middle East question and should be taken seriously as an important matter. We sincerely hope Israel be forced to curb its aggression and withdraw its troops from Lebanon," he said.

"Achievement of this is a criterion of the concerted efforts of all countries in the world, and a test of the sincerity of the defense of world justice and respect for the human will. Such an action will help concentrate all efforts on solution of the Palestinian issue and Israel will withdraw from the territories it occupied in 1967. The Arabs could regain their legitimate rights to Jerusalem," he said.

On relations between Jordan and China, Husayn said the close friendship between the two countries is growing continuously, demonstrating the successful cooperation between the two, based on friendship, equality, mutual respect and mutual trust.

"In the last two days, we held talks with Chinese leaders and came into contact with Chinese people. All this has deepened our friendship and respect. What needs special mention here is the frankness, modesty and sincerity of China's leaders, who, in the interests of the people, have made an objective re-evaluation of past work during a long period. They have maintained what is right and corrected what is wrong, in a scientific and realistic way," he said.

He said China has adopted a new constitution recently and is carrying out a plan for overall reform in a step-by-step way. All this is designed to boost the country's prosperity, and conforms to people's aspirations. He extended his congratulations on the adoption of the new constitution.

Among the guests at the banquet were King Husayn's son Prince Abdullah bin al-Husayn. The king's entourage and Kamal al-Hamud, Jordanian ambassador to China.

Also present were Wei Guoqing, vice-chairman of the Standing Committee of the National People's Congress, Chen Muhua, state councillor and minister of foreign economic relations and trade, Wu Xueqian, foreign minister, Zhu Muzhi, minister of culture, Cui Yueli, minister of public health, Chi Haotian, deputy chief of general staff of the Chinese People's Liberation Army, members of the N.P.C. Standing Committee, members of the Standing Committee of the National Committee of the Chinese People's Political Consultative Conference, other Government officials, leaders of the Chinese People's Association for Friendship With Foreign COuntries, the People's Government of Beijing Municipality, and the Islamic Association of China; and Huang Shixie, Chinese ambassador to Jordan. This afternoon, Husayn, accompanied by He Ying, adviser to the Ministry of Foreign Affairs, visited the Great Wall.

Talks With Deng Xiaoping

OW080915 Beijing XINHUA in English 0846 GMT 8 Dec 82

[Text] Beijing, November 8 (XINHUA) -- Chairman Deng Xiaoping of the Central Advisory Commission of the Chinese Communist Party said to visiting King Husayn that China firmly supports the Arab people's just cause.

In talks with the Jordanian monarch in the Great Hall of the People today, Deng Xiaoping expressed the hope that the Arab countries will act in unity in face of the challenge of hegemonism and work for the early settlement of the Middle East problem.

He continued that China and Arab states, with similar experience, are all developing countries. The Chinese nation and the Arab nation have made great contributions to world culture. He expressed the conviction that the Arab nation will make greater contributions to future generations of the humanity.

King Husayn once again thanked the Chinese Government and people for consistently supporting the Arab people's just struggle. He described his visit, though very short, as highly fruitful. The visit has helped him know more about China's past and present and see the Chinese people's confidence in their future. He pledged continued efforts to work for strengthening the friendship and cooperation between Jordan and China. Present at the meeting were Ahmad al-Luzi, chief of royal cabinet; and Kamal al-Hamud, Jordanian ambassador to China.

Also present were Wu Xueqian, Chinese foreign minister; Wen Yezhan, vice-foreign minister; He Ying, adviser to the Ministry of Foreign Affairs; and Huang Shixie, Chinese ambassador to Jordan.

The meeting was followed by a luncheon given by Deng Xiaoping.

King Husayn and his party had a tour of the palace museum this morning.

Lays Wreath at Heroes Monument

OW080255 Beijing XINHUA in English 0250 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- King Husayn of Jordan placed a wreath at the monument to the people's heroes in Tiananmen Square this morning, accompanied by Vice-Foreign Minister Wen Yezhan.

ARAB LEAGUE COMMITTEE DEPARTS CHINA

OW071534 Beijing XINHUA in English 1514 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- The foreign ministers of the Arab countries and the representative of the Palestine Liberation Organization on the Arab League Committee of Seven concluded their visit to China and left here yesterday and today respectively.

RENMIN RIBAO ON ISRAELI OCCUPATION OF LEBANON

HK080635 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 6

["International Jottings" by Huang Qing [7806 2532]: "Bullies Breathe Through the Same Nostrils"]

[Text] When Germany invaded Czechoslovakia 43 years ago, Hitler declared that that territory was "part of the living space of the German people" and that "Germany now decides to take drastic intervention in accordance with the law of self-defense." By a strange coincidence, when Israel invaded and occupied Lebanon this year, the chief of staff of the Israeli Army, Refa'el Eytan, declared on 2 December, that for the sake of the security of the northern part of his country the Israeli troops in Lebanon "will stay as long as necessary." In comparison, these two declarations are in the same vein.

It appears that throughout the ages, all aggressors who try to justify their actions also experience difficulties in finding a new guise and can only wave this tattered banner. Their rude and ugly features of utter defiance also seem to come from the same mold.

The Israeli authorities are imitating Hitler's Germany. They are like bullies who breathe through the same nostrils and their highhanded methods are similar. If they do not repent their evil ways, we fear that the outcome for them will also be similar.

ISRAEL ATTACKED AT UN DEBATE ON MIDDLE EAST

OW071225 Beijing XINHUA in English 1110 GMT 7 Dec 82

[Text] United Nations, December 6 (XINHUA) -- Israel, a major source of tension in the Middle East, was under a scathing attack today at the United Nations General Assembly when it began debate on the situation in the region.

Jordanian representative Hazim Nusaybah said that instead of terminating its 15-year occupation of Palestinian and Arab territories, Israel invaded last summer a fourth independent sovereign Arab country -- Lebanon. He denounced Israel for its attempt to colonize southern Lebanon as it had done in Jerusalem, the rest of the West Bank, the Gaza Strip and the Golan Heights.

Algerian Representative Abdelouahab Abada said that repeated Israeli aggression against its Arab neighbors, the bombing of the Iraqi nuclear reactor, the invasion of Lebanon, the annexations of the occupied Arab territories were all part of the same problem centered on the Palestinian question. He noted that as long as the Palestinians remained deprived of their sovereign state and the occupied Arab territories were not returned, no solution would be found to the Middle East problem.

Egyptian representative Amre M. Moussa said that no viable peace in the Middle East could be achieved without the restoration of the inalienable national rights of the Palestinian people. The acceptance of the existence of the State of Israel should lead to the acceptance of the right of the Palestinians to enjoy equal rights. He urged the Reagan administration to contact all parties concerned without exception. "A constructive dialogue between the United States and the Palestine Liberation Organization (PLO) should start as soon as possible," he added.

Zain Noorani of Pakistan said that Israel's invasion of Lebanon and the savage massacre of hundreds of innocent Palestinian men, women and children in the Sabra and Shatila refugee camps had aroused the strongest condemnation by the internatinnal community. Israel may have made some temporary military gains, but its outrageous actions had exposed the nature of its aggressive policies to the world, he said.

Israeli Pullout Demanded

OW080417 Beijing XINHUA in English 0251 GMT 8 Dec 82

[Text] United Nations, December 7 (XINHUA) -- More nations renewed their demands for Israel's withdrawal from all the occupied Arab territories during the General Assembly debate on the Middle East situation today.

Syrian Representative Diy 'a Allah al-Fattah accused Israel of annexing the Golan Heights and Jerusalem. He said Israel today constituted the greatest danger to the world's security. He also charged the United States for its military and financial support to Israel.

Kuwaiti Representative Muhammad Abu al-Hasan said that the Israeli invasion of Lebanon last June was a severe violation of the sovereignty, independence and territorial integrity of a peaceful state and member of the United Nations. The crimes which Israel had committed against the Palestinian and Lebanese people shocked the conscience of mankind in an unprecedented way.

'Abd al-Aziz Baaysa of Democratic Yemen said that it was high time to put an end to the Israeli policy of aggression and expansion. Without the self-determination of the Palestinian people and the withdrawal of Israel from all the occupied territories, destabilization would continue in the Middle East.

Malaysian Representative Mark Koding called for the immediate, unconditional and total Israeli withdrawal from all occupied Arab territories, the fulfilment of Palestinian aspirations, including their right to return to their homeland and their right to self-determination and independence, and the restoration of Jerusalem to the Arabs.

Ignac Golob of Yugoslavia said that Israel's policy of aggression and expansion had turned the whole Middle East region into one of the most dangerous hot-beds of crisis and that Israel had continued with its occupation of Arab territories contrary to United Nations decisions and was making plans for the annexation of new territories.

Karl Fischer of Austria said that an essential element for resolving the Middle East question was the withdrawal of Israel from the territories occupied in 1967, including Jerusalem. He announced that Austria had welcomed the Middle East peace plan submitted by the Fes Arab summit in September, 1982.

Palestine Issue Reviewed

HK040850 Beijing RENMIN RIBAO in Chinese 4 Dec 82 p 6

["Review" by correspondent Chen Yichun [7115 2011 2625]: "UN General Assembly Concludes Debate on Palestinian Issue; People Doubt Whether the United States Will Fall In With the Just Demand of the International Community"]

[Text] United Nations, 2 Dec -- The plenary session of the UN General Assembly concluded its 2-day debate on the Palestinian issue this afternoon. The session will vote on four resolutions related to this issue at the appropriate time.

The drafts of these resolutions, which have already been distributed in the assembly, include the following contents: The assembly proclaims that all Israeli policies and actions aimed at annexing Palestinian and other Arab land (including Jerusalem) are violations of international law and relevant UN resolutions; the assembly demands that Israel totally and unconditionally withdraw from all Palestinian and other Arab land (including Jerusalem) it has occupied since June 1967; it also urges the Security Council to provide a provisional peace force to facilitate this withdrawal; the assembly will decide that after Israeli withdrawal from occupied Palestinian territory, the United Nations will -- for a short time -- take control of the areas from which Israel has withdrawn, and during this period, the Palestinian people will exercise their right of self-determination.

The draft resolutions also decide to actively prepare for the convening of an international conference on the Palestinian issue in Paris next August, and propose that the Security Council take action at an early date to promote a just and all-round solution of this issue.

These resolutions reflect the international community's grave concern over Middle East tension, and its sympathy and support for the just cause of the Palestinian people. They are also political and moral blows against Israel, which make it even more isolated internationally.

However, in light of past experience, people doubt whether Israel and its supporter, the United States, will carry out these resolutions. For more than 30 years, the UN General Assembly and the Security Council have debated and dealt with the Middle East problem practically every year and have passed a whole series of resolutions on it. However, the more they have examined and discussed the matter, the more numerous the problems have become, and the national rights of the Palestinian people -- the core of the Middle East problem -- have not yet been restored. In addition, the two superpowers take advantage of the Arab-Israeli conflict to wage fierce rivalry, causing still greater turmoil in the Middle East.

The UN General Assembly has demanded many times that the Security Council take action to levy sanctions against Israel's aggressive expansion and to restore the national rights of the Palestinian people, but the United States has vetoed this every time. As a result, it has been impossible for the Security Council to adopt any resolution that would help bring about a peaceful solution to the Middle East problem.

Talking to reporters, representatives of a number of countries bluntly point out that the United Nations has indeed done some work in dispatching peace units and aiding Palestinian refugees. However, the United States and Israel in collusion have vigorously worked to block these moves, with the result that the Middle East problem has remained insoluble for so long. Certain people also have told reporters that the guideline of the United States is to bypass the United Nations as much as possible and to manipulate a political solution to the Middle East problem by itself, so as to expand its forces and eliminate intervention by the other superpower. The intensive shuttle activities in the Middle East by the U.S. special envoy, undertaken when the UN General Assembly was examining and discussing the Middle East problem, is proof of this.

PLO observer Terce pointed out with emotion when talking to correspondents on the UN General Assembly debate: "Palestine is struggling for its life. We demand a return to our homeland and restoration of our national rights. We demand that the Security Council take practical steps to implement the resolutions adopted by the full session of the General Assembly." He stressed that no plan that rejected the restoration of the Palestinian people's national rights and the return to them of Palestinian territory could lead to a peaceful solution of the Middle East problem.

LEBANON URGES U.S. PRESSURE ON ISRAELI WITHDRAWAL

OW030918 Beijing XINHUA in English 0707 GMT 3 Dec 82

[Text] Beirut, December 2 (XINHUA) -- President Amin al-Jumayyil has called on the United States to exert pressure on Israel to withdraw its troops from outside Beirut.

The appeal was made as Christian and Druze Moslem militiamen today fought gunbattles in the mountains southeast of Beirut a day after top Druze leader Walid Junblatt narrowly escaped death in an assassination attempt in West Beirut.

In a meeting with U.S. Middle East Envoy Morris Draper and the French and Italian ambassadors, President al-Jumayyil called for "prompt and effective measures to free the mountains from Israeli occupation." Al-Jumayyil also asked the three countries to increase the size of the 4,100-man peace-keeping force to help restore order.

Lebanon's state-run national news agency said that "the president appealed to the United States through U.S. Envoy Morris Draper for increased efforts to arrange an Israeli withdrawal from the mountains," which, he said, would help deploy the Lebanese Army and units from the Multi-National Peacekeeping Force in the embattled regions to end the sectarian hostilities.

President Amin al-Jumayyil conferred here tonight with Druze leader Walid Junblatt on the situation in the central mountains. Former President Camille Chamoun who is now head of the coalition of Christian conservative parties and a number of top Lebanese Army officers were also present on the occasion.

QIAO SHI-LED CPC GROUP DEPARTS FOR ALGERIA

OW041642 Beijing XINHUA in English 1617 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- A delegation of the Communist Party of China (C.P.C.) headed by Qiao Shi flew to Algeria for a visit this evening. Qiao Shi is a member of the C.P.C. Central Committee, alternate member of the secretariat and head of the International Liaison Department of the C.P.C. Central Committee.

The delegation was invited by the Algerian party of the National Liberation Front. Li Shuzheng, deputy head of the International Liaison Department, and Xuming, Chinese ambassador to Algeria, are delegation members.

Seeing them off at the airport were Hu Qili, member of the Secretariat of the C.P.C. Central Committee; Qian Liren and Jiang Guanghua, deputy heads of the International Liaison Department; and Abdelkarim Ghraieb, Algerian ambassador to China.

HUANG HUA MEETS OUTGOING GABONESE ENVOY

OW251210 Beijing XINHUA in English 1121 GMT 25 Nov 82

[Text] Beijing, November 25 (XINHUA) -- State Councillor Huang Hua met here today with Gabonese Ambassador to China Alain Maurice Mayombo, who is leaving at the end of his term of office.

CHEN MUHUA MEETS OUTGOING TOGO AMBASSADOR

OW020909 Beijing XINHUA in English 0805 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Chinese State Councillor Chen Muhua met with the outgoing Togolese ambassador to China, Bloua Yao Agbo, here this morning.

XIAO JIANGUANG LEADS CPC DELEGATION TO TOGO

OW240112 Beijing XINHUA in English 1657 GMT 23 Nov 82

[Text] Beijing, November 23 (XINHUA) -- At the invitation of the Central Committee of the People's Assembly of Togo, a goodwill delegation from the Chinese Communist Party led by Xiao Jianguang, deputy secretary of the Gansu provincial party committee, left here today for Togo to attend the inauguration of the home of the assembly and pay a visit.

Received By Togo President

OW021812 Beijing XINHUA in English 1754 GMT 2 Dec 82

[Text] Lome, December 2 (XINHUA) -- Togolese President Gnassingbe Eyadema met here today a good-will delegation of the Communist Party of China (CPC). The president praised China's support for the Third World and expressed his hope that cooperation will be strengthened between Togo and China. He expressed satisfaction at the quality of the building of the Rally of the Togolese People (RTC) which was constructed with China's aid.

The Chinese delegation head Xiao Jianguang, in the name of the CPC, invited a delegation of the RTP to visit China next year, which was accepted by President Eyadema.

The CPC delegation arrived here November 25 at the invitation of the RTP.

Good-Will Visit Concludes

OW041002 Beijing XINHUA in English 0742 GMT 4 Dec 82

[Text] Lome, December 3 (XINHUA) -- The good-will delegation of the Chinese Communist Party concluded its 8-day visit to this country and flew home today. The delegation is led by Xiao Jianguang, deputy secretary of China's Gansu Provincial Party Committee.

A working meeting was held yesterday between the delegation of the Rally of the Togolese People and the Chinese party delegation on issues of party work and the political and economic situations of the two countries. Last night, Administrative Secretary of the Rally of the Togolese People Yao Kunale Erlo gave a dinner for the Chinese guests.

During their stay, the Chinese party workers toured five prefectures of this West African nation. The delegation arrivedhere on Nov 25 at the invitation of the Central Committee of the Rally of the Togolese People.

WU XUEQIAN ATTENDS ZAIRE ANNIVERSARY RECEPTION

OW250111 Beijing XINHUA in English 1552 GMT 24 Nov 82

[Text] Beijing, November 24 (XINHUA) -- Tuma-Waku Dia Bazika, Zairese ambassador to China, gives a reception here this evening at the embassy to mark the tenth anniversary of the normalization of Zaire-China relations. Present were Wu Xueqian, and Gong Dafei, minister and vice-minister of foreign affairs. Tuma-Waku Dia Bazika and Wu Xueqian toasted the growth of the friendship between the two countries and peoples.

IRAN'S PRESIDENT RECEIVES DEPARTING PRC ENVOY

OW051634 Beijing XINHUA in English 1529 GMT 5 Dec 82

[Text] Tehran, December 5 (XINHUA) -- Iranian President Hojjat ol-Eslam 'Ali Khamene'i received out-going Chinese Ambassador Zhuang Yan at the presidential palace today. The president told the ambassador that the Islamic Republic had definitely decided to develop a friendly relationship of cooperation with China. The ambassador expressed good feelings and friendly wishes towards Iran on behalf of the Chinese Government.

The ambassador met on December 2 Iranian Foreign Minister 'Ali Akbar Velayati who assured that Iran attaches great importance to developing friendship with China.

CHEN MUHUA RECEIVES OUTGOING MAURITANIAN ENVOY

OW260804 Beijing XINHUA in English 0727 GMT 26 Nov 82

[Text] Beijing, November 26 (XINHUA) -- Chen Muhua, state councillor and minister of foreign economic relations and trade, met here today with Ba Mohamed Abdellahi, outgoing Mauritanian ambassador to China.

CHEN MUHUA MEETS TUNISIAN FOREIGN MINISTER

OW070901 Beijing XINHUA in English 0758 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- Chen Muhua, state councillor and minister of foreign economic relations and trade, met with Beji Caid es-Sebsi, Tunisian minister for foreign affairs, here this morning in the Great Hall of the People. They were satisfied with the development of Sino-Tunisian relations and agreed to expand economic and technical cooperation between the two countries.

ULANHU RECEIVES NIGERIAN ENVOY'S CREDENTIALS

OW011021 Beijing XINHUA in English 0713 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- Aussiel Pierre, new ambassador of the Republic of Niger to China, this morning presented his credentials to Ulanhu, vice-chairman of the National People's Congress Standing Committee. Gong Dafei, Chinese vice-minister of foreign affairs, was present on the occasion.

MAURITANIAN LEADER SEES VICE MINISTER GUO ZIHENG

OW070925 Beijing XINHUA in English 0735 GMT 7 Dec 82

[Text] Nouakchott, December 6 (XINHUA) -- Mauritanian head of state Mohamed Khouna O. Haidala said today, "Sino-Mauritanian cooperation is the best because it is the most effective, the most important and the most appropriate." He made these remarks while receiving Guo Ziheng, Chinese vice-minister of public health.

He said the doctors of the Chinese medical team sent here to serve the Mauritanian people have done excellent work under most difficult conditions. The Mauritanian people deeply appreciate the Chinese doctors, he said.

Guo Ziheng, leader of the Chinese delegation of public health, arrived here Nov 27 for a two-week visit.

XINHUA INTERVIEWS OMANI FOREIGN MINISTER

OW071029 Beijing XINHUA in English 0807 GMT 7 Dec 82

[Text] Muscat, December 6 (XINHUA) -- Omani Foreign Minister Yusuf al-Alawi 'Abdallah said today that Oman opposes big power interference in Gulf affairs. He reiterated that it is the responsibility of the Gulf states to safeguard the region's security.

He told XINHUA in an interview that the best way to safeguard Gulf security is to ensure the security and stability of the surrounding areas. Factors such as the Soviet invasion of Afghanistan, the Middle East war, the Israeli occupation of Arab land, the deprivation of the Palestinian people's national rights and the Iran-Iraq war threaten the security of the Gulf region, he said.

'Abdallah said the Gulf states are opposed to the Soviet-U.S. rivalry for spheres of influence, which, he said, threatens peace and security in the world. He said Oman opposes any interference in the internal affairs of other countries, in particular military interference, for Oman adheres to the principles of national independence, non-interference in others' internal affairs non-alignment and neutrality. It supports the people of the world in their struggle for independence and sovereignty.

Abdallah praised the Gulf Cooperation Council for its economic and social achievements as well as those in security and defense since it was established in May last year. The council comprises Oman, Saudi Arabia, Kuwait, Bahrain, Qatar and the United Arab Emirates. He is optimistic about the return of Egypt to the Arab community, saying that many factors are bringing this about. He also spoke highly of the normalization of relations between Oman and Democratic Yemen, an agreement on which was signed last October. He believed that both countries have sincerity to implement the agreement and that their relations will be improved steadily.

'Abdallah said Sino-Omani friendship benefits not only the peoples of Oman and China but is also conducive to cooperation in the Third World. Sino-Omani relations set an example for relations among Third World countries, he said. "We look forward to seeing such fruitful relations of cooperation between China and other Gulf states, which will benefit peace and security in the region," he said.

'JADE TIGER' MILITARY EXERCISE ENDS IN OMAN

OW081133 Beijing XINHUA in English 0722 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- The U.S. Rapid Deployment Force ended its five-day land, air and sea maneuvers involving 2,500 troops in Oman yesterday, according to reports from Manama. The exercise, called "Jade Tiger," was aimed at protecting U.S. interests in the Gulf region. It also involved two American B-52 strategic bombers and six F-15 fighters.

The U.S. Rapid Deployment Force was formed to protect American interests in the Gulf region, the reports said. It is also reported that Oman and the rest of the Gulf Cooperation Council (GCC) countries have been exploring broader measures of defense in order to eventually end the reliance on foreign powers and build adequate military power to protect the oil-rich region.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

2 Dec Group Meetings

OW071341 Beijing Domestic Service in Mandarin 1200 GMT 2 Dec 82

[Text] Deputies attending the Fifth Session of the Fifth NPC held group meetings today to earnestly examine and discuss Premier Zhao Ziyang's report on the Sixth 5-Year Plan.

Noted economist Xu Dixin said: The Sixth 5-Year Plan has several distinctive features. First, it stresses economic results and the integration of progress in production with economic efficiency. Second, it emphasizes the importance of using our existing equipment to develop production and of the role of technical reform in developing production. Third, it links economic development to science, technology and culture; and fourth, it stresses the importance of population control. Linking economic development to the issue of population conforms to the situation in this country.

Han Peixin, a deputy from and acting governor of Jiangsu, pointed out: Historical experiences were drawn and the current conditions in the country were taken into consideration in the course of formulating the Sixth 5-Year Plan. The target set forth in the plan can be safely attained and leaves some leeway. The guiding idea of improving economic efficiency is correct. After reviewing the actual conditions in Jiangsu, Han Peixin said the key to invigorating the economy is to start technical reform. The total value of Jiangsu's industrial output for 1981 topped that for 1977 by more than 19 billion yuan of which 41 percent, or 8 billion yuan, were earned from technical reform, he said. Of the 2.3 billion yuan of additional revenue for 1981, 76 percent, or 1.8 billion yuan, came from the achievements in technical reform.

Bai Rubing, a deputy from Shandong and the first secretary of the Shandong provincial party committee, said: As far as the situation in Shandong is concerned, we have the confidence and conditions to fulfill the fundamental task set forth in the premier's report. I say this in light of the following three specific areas:

1. In Light of the Pace of Historical Development

Since 1953, Shandong's economic growth rate has been maintained at an average of 7.3 percent. The total production output value of 19 counties and 614 communes in the province has quadrupled in 4 years since the third plenary session of the 11th party Central Committee.

2. In Light of Our Material and Technical Foundation and Our Natural Resources

Shandong Province has a fairly complete industrial system and has started to make further arrangements for improvement. As for agriculture, it has great potential for development because 52 percent of its uncultivated land has not yet been fully utilized.

3. In Light of the Political Situation

We have the correct leadership by the party Central Committee and the correct programs formulated by the 12th party congress and the current NPC session. We are confident that we can fulfill the call issued by Premier Zhao Ziyang to guarantee a 4 percent increase in our annual economic growth and that we can strive for an annual increase of 5 percent on the premise of improving economic efficiency.

Zhao Zengyi, a deputy from and acting governor of Jiangxi, said: Raising our economic efficiency is extremely important in order to win a decisive victory in bringing about a fundamental turn for the better in the country's financial and economic situation during the Sixth 5-Year Plan period. Jiangxi has lagged behind other provinces in this aspect.

We should have a correct guiding principle and change our deep-rooted idea of purely pursuing output value into actions of raising economic efficiency. We are determined to declare next year a year for raising economic efficiency so that we can lay a sound foundation for future development.

Ma Xin, a deputy from Ningxia and chairman of the Ningxia Hui Autonomous Regional People's Government, said: The state will appropriate an additional sum for financial subsidies for Ningxia during the Sixth 5-Year Plan period to support its construction projects. This represents the solicitude of the party and the government for the regions of minority nationalities. With support from the state, we are determined to proceed from realities in Ningxia and to learn to rely on our own efforts in developing the region.

Liu Tianfu, a deputy from and governor of Guangdong, pointed out: In his report to the current NPC session, Premier Zhao Ziyang touched on the achievements in the first 2 years of the Sixth 5-Year Plan and the current excellent situation. These must be affirmed. Liu Tianfu elaborated on Guangdong's achievements in economic construction since it adopted special policies and flexible measures after the third plenary session of the 11th party Central Committee. He said that an average increase of 7.4 percent in Guangdong's total industrial and agricultural output value has been realized annually in the past 3 years and the structure of the national economy has gradually been harmonized. The province has achieved a bumper agricultural harvest this year. Its foreign trade purchase and export value has doubled in the past 3 years and the province has stepped up construction of special economic zones. All these show that the principles and policies formulated at the third plenary session of the 11th party Central Committee are correct.

Meng Fulin, a deputy from and vice governor of Anhui, said: Premier Zhao Ziyang's analysis of the current rural situation completely conforms with the actual conditions in Anhui. The implementation of the production responsibility system in Anhui's rural area since the third plenary session of the 11th party Central Committee has aroused the peasants' enthusiasm and brought about a tremendous change in the rural economy. The main form of the responsibility system is the comprehensive contracting of farming work. This is especially true in Fengyang, Dingyuan, Guzhen, Yingshang and Guangde Counties where every household has bank savings and surplus grain. These counties used to suffer from crop failures in past years. This change fully reflects the correctness of the party's agricultural policy.

Qiang Xiaochu, a deputy from Jilin and first secretary of the Jilin provincial party committee, said: The situation in our province has become better since the beginning of the first 2 years of the Sixth 5-Year Plan. Despite the drought unprecedented since liberation, Jilin has reaped a bumper harvest this year. People said that the responsibility system in production won first class merits in making this year an abundant year in the harvest of all crops and in animal husbandry.

Li Linzhi, a Sichuan deputy and vice chairman of the Standing Committee of the Sichuan Provincial People's Congress, said: According to a survey of 125 production teams in Sichuan's 40 key counties of rural economy, the average annual income of commune members for the 3 years following the third plenary session of the 11th party Central Committee quadrupled that of the 20 years preceding that session. This shows that the rural policies of the party and the government are completely correct. So long as we adhere to the 12th party congress guidelines, the fundamental task set forth by Premier Zhao Ziyang in his report to the current NPC session can be fulfilled.

Wu Zhonghua, a noted scientist and deputy from Beijing, said: As a worker engaged in research of engineering science, I am very glad to know that economic construction in the future will rely on development of science and technology, which is a broad road for building a socialist modern society through self-reliance.

Wu Zhonghua suggested that the scientific research, design and production units of big projects be organized into combined organizations, saying that this practice should be feasible.

(Yuan Longting), a deputy from Hunan and a research fellow of the Hunan Provincial Academy of Agricultural Science, said: In his report to the current NPC session, Premier Zhao Ziyang spoke highly of scientific and technical personnel and placed great Hope on them. I was greatly encouraged by his report. Practice in many years in hybrid rice research has convinced me that science and technology mean productive forces. The fine strains of hybrid rice have won state special class prizes for scientific research. Our research, however, has not reached its pinnacle, though a new breakthrough has been made in the past 2 years. I am determined to learn from Jiang Zhuying and Luo Jianfu in demonstrating the spirit of devoting one's life to the four modernizations and to continue my research in hybrid rice.

Sun Daguang, a deputy from Shanghai and minister of geology and minerals, said: In his report to the current NPC session, Premier Zhao Ziyang especially stressed the need to strengthen geological prospecting. This is very necessary in ensuring the smooth progress of economic construction. Acting in line with the Sixth 5-Year Plan's principle on concentrating strength on carrying out major projects construction, including energy projects, we are ready to start a thorough prospecting program in the large mining districts in east China which have been included in the state construction and development plan. This program is to provide the scientific basis for the long-term development and rational distribution of the coal industrial enterprises.

Wang Duo, a deputy from Nei Monggol and permanent secretary of the Nei Monggol autonomous regional party committee, said: Four of the five big open-cut coal mines to be built first as decided by the Sixth 5-Year Plan are located in Nei Monggol which is vast in area and has rich natural resources. We will certainly do our utmost to develop coal production in the region during the Sixth 5-Year Plan period so that the region will contribute to the state's energy development program.

Huo Shilian, a deputy from Shanxi and first secretary of the party committee of that province, said: Shanxi is one of this country's important coal bases. To fulfill the Sixth 5-Year Plan, we will certainly give full play to the superiority of Shanxi's coal industry and promote coal production in efforts to support the whole country and stimulate export so that we can make new contributions to the nation's modernization drive.

In their joint statement at a group meeting, Henan's deputies from the Pingdingshan mining bureau, (He Daiwen), (Cao Su), (Yuan Tiancheng) and (Wang Kengchen), said that they will learn from the Shoudu Iron and Steel Company, formulate an economic responsibility system, and call everyone's attention to attaining economic efficiency so as to promote coal production. By so doing, the common effort to quadruple the country's industrial output value will not be frustrated.

Chen Liemin, a deputy from Heilongjiang and secretary of the Daqing municipal party committee, said: During the Sixth 5-Year Plan period, the annual petroleum output will be required to maintain at the 100-million-dun level. The Daqing oilfield will have to turn out 50 percent of it. The party and the people have placed great hopes on us. Daqing's output has been high and steady for 7 consecutive years. We must continue to tap potentials to ensure that the Daqing oilfield's annual yield will be maintained at the 50-million-dun level.

Yang Shutang, a Lianoning deputy and advisor to the Anshan Iron and Steel Company, said: The inclusion of the Anshan Iron and Steel Company into the existing enterprises' key technical reform program for the Sixth 5-Year Plan period represents the attention and solicitude of the party Central Committee and the State Council for the Anshan Iron and Steel Comapny. We feel that we have a great responsibility for this.

One of this country's important iron and steel bases, the Anshan Iron and Steel Company is, however, an old enterprise which must undergo technical reform. We have an initial tentative blueprint for this reform. So long as we can fully utilize the advantages we have while taking feasible measures, we are sure that the technical reform at the company will be a complete success.

Xu Ping, a deputy from Hebei and mayor of Qinhuangdao Municipality, said: Qinhuangdao is a main port for transporting coal and petroleum fuel to the coastal provinces and municipalities in south China. It has been included in the Sixth 5-Year Plan as a key construction project. In 1979 the state began expanding the coal wharves at this port. To ensure the success of this important construction project of the state, we must establish the viewpoint of taking the overall situation into consideration and mobilize the people throughout Qinhuangdao to render manpower and material support to the construction of this key project.

Jiang Hua's Report

OW080411 Beijing XINHUA in English 0129 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- People's and railway courts in China handled 24,636 cases of economic crime between January and September this year, of which 22,331 have been wound up with 26,227 defendants sentenced according to law.

In his written report to the current National People's Congress session, Jiang Hua, president of the Supreme People's Court, said 250 of the cases involved a sum of 100,000 yuan each, and 1,062 offenders each received more than 10,000 yuan in ill-gotten money.

Among the convicted, he added, 3,706 were former government functionaries, of whom 29 were cadres at the county level or above.

Combating economic crimes is an important guarantee for China's socialist orientation and modernization, Jiang Hua said. It also helps the policies of opening to the outside world and enlivening the country's economy.

He said that people's courts at various levels handled more than 203,000 criminal cases between October 1981 and September 1982, dealing timely and effective blows at the reactionaries and criminals.

In the past year, he continued, the people's courts also helped resolve a number of long-standing and difficult disputes between enterprises relating to economic contracts and new ones arising in the course of readjusting the national economy.

During the same period, Jiang Hua said, the people's courts also handled more than 300,000 appeals and redressed or corrected many injustices and wrong cases.

These efforts helped protect the people, improve public order, preserve stability and unity, strengthen the people's democratic dictatorship and facilitate the economic readjustment and the modernization drive, Jiang Hua said.

In combating economic crimes, he said, the people's courts have adhered to the principle of striking at the minority while trying to win over, disintegrate and educate the majority. They have also followed the policy of combining punishment with leniency, treating those who confess to their crimes more leniently and punishing those who refuse to do so more severely.

Jiang Hua said it is a protracted and important task to strike at serious cases of economic crime.

The people's courts should not only deal with such cases according to law but should analyze their special features and root causes, he said. The courts should also help organizations involved intensify political and ideological education for their workers and staff, improve rules and regulations and strengthen management, so as to prevent or reduce such cases.

In conclusion, Jiang Hua said that the enforcement of the new constitution adopted at the current N.P.C. session will greatly strengthen China's socialist democracy and socialist legal system. It will enhance political stability and unity among various nationalities in China, promote socialist modernization and further consolidate the people's democratic dictatorship.

Fang Yi, Xiang Nan at Talks

OW080235 Beijing XINHUA Domestic Service in Chinese 0730 GMT 7 Dec 82

[Excerpts] Beijing, 7 Dec (XINHUA) -- Over the past few days, NPC deputies of the Fujian delegation to the Fifth Session of the Fifth NPC have seriously discussed Zhao Ziyang's report on the Sixth 5-Year Plan. The deputies held that the objectives and measures set out in the report are realistic and practical. The various tasks laid down in the report will surely be accomplished, as long as we steadfastly carry out the relevant measures, they stressed.

Fang Yi attended the group discussion as an NPC deputy of Fujian Province. He said: In his report, Premier Zhao presented many new viewpoints. The grand objective of quadrupling China's gross annual value of industrial and agricultural production by the end of this century calls for both growth in production and improvement in product quality. For example, in steel production we should develop more alloy steel, because of its much higher value.

He continued: There is now incorrect thinking that quadruplication means to build more new plants, while paying no attention to technical transformation of old factories. We have altogether 300,000 enterprises, some of which are backward. If we solely build new plants instead of technically transforming old ones, the new plants will become old plants in another 2 years. Therefore, I fully support Premier Zhao's proposal for raising economic results. Of course, we must build new energy and railway projects, but we must also pay attention to the economic results of projects.

Fang Yi also said: In agricultural production, we must rely on science. The implementation of the production responsibility system in the rural areas has produced good results. However, to further develop production, it is necessary to rely on progress in science and technology.

NPC deputy Xiang Nan focused attention on economic results and the streamlining of various organizations. He said: In his report, Premier Zhao Ziyang stressed that all economic work in the next 5 years must be focused on raising economic results. This is absolutely correct. We must maintain a certain speed of development. However, such speed must be effected on the basis of better economic results, because we can no longer afford to blindly pursue growth in output value without paying attention to quality, production costs and the people's needs. There is no practical significance in quadruplication if we pay no attention to economic results.

He added: An important issue facing Fujian Province is how to gradually transform its over 6,000 old enterprises. It is important that we utilize the imported technology and funds to transform the old enterprises, lower production costs, improve product quality and enhance our products' competitiveness on the international market.

Xiang Nan stresses: To create a new situation for the four modernizations and to achieve the strategic objective of quadruplication, it is necessary to do well at the work of streamlining organizations. Presently, the work efficiency of many departments and organizations is very low because of duplication in administrative setups and redtape. If the organizations are not properly streamlined, all the objectives and programs will come to nothing. We must, therefore, quicken the tempo of streamlining the organizations according to the plans laid down by the central authorities.

NPC deputy Lu Jiaxi said: it is absolutely correct that the 12th party congress has decided to strategically develop agriculture, energy, communications, education and science.

Han Peixin on Jiangsu's Output

OW071045 Beijing XINHUA in English 0708 GMT 7 Dec 82

[Text] Beijing, December (XINHUA) -- Han Peixin, acting governor of the east China province of Jiangsu, described the Sixth Five-Year Plan submitted by Premier Zhao Ziyang to the National People's Congress (N.P.C.) as a "realistic program which has combined immediate development with long-term objectives."

Speaking at a N.P.C. panel discussion, Han Peixin illustrated his point with statistics from his province.

Jiangsu plans to bring its total annual industrial and agricultural output value to 78.5 billion yuan by 1985, representing an average annual growth of 4.9 per cent, he said.

This growth rate is much lower than the 8.9 per cent attained in the period 1950-1981, but it takes into consideration the economic readjustment to be made in the coming years that will pave way for a faster growth, Han Peixin said.

He said he is satisfied with Jiangsu's implementation of the plan in the first two years. The province's industrial and agricultural production was up 8.2 per cent in 1981 over 1980, and a further increase of 5.4 per cent is expected this year.

Han Peixin said it is his belief that economic readjustment plus technical tranformation will greatly boost production and prepare conditions for China to quadruple its total industrial and agricultural output value in two decades.

Jiangsu has more than 33,000 industrial enterprises, he said. They form a fairly complete system embracing the light, textile, electronics, chemical, machine building, building materials and other industries. But many enterprises are outdated.

Experience shows that technical transformation of existing enterprises is an effective measure to improve their economic performance, Han Peixin pointed out. Jiangsu's industrial output value increased by 19.4 billion yuan in 1981, compared with 1977, of which eight billion were gained through technical transformation.

The acting governor said that through technical transformation, the province aims mainly at saving energy and improving the quality of products.

New technologies and equipment will be adopted to ensure that most of the major industrial products made in Jiangsu will have a competitive edge on the international market in the 1990s, he said.

Meanwhile, Han Peixin said, a reform of the administrative setup will be carried out for Jiangsu's 11 cities and 1,900 towns. The aim is to build a balanced economic, cultural and scientific system, in which the cities will serve as the centers with the rural areas as their bases and the numerous towns as the ties between them.

He emphasized the importance of technical transformation for Jiangsu's existing enterprises, pointing out that the province has about the same amount of equipment and about the same number of industrial workers as Shanghai but its industrial output is only about one-third of the latter.

"We hope the situation will be changed by restructuring and updating our enterprises," Han Peixin said.

PLA Deputy on Intellectuals

OW070447 Beijing XINHUA in English 0210 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- The noted Chinese scientist Qian Xuesen said it is excellent that China's new constitution puts intellectuals alongside workers and peasants as one of the three basic social forces in building socialism.

Qian Xuesen said this at a panel meeting of the National People's Congress. He is a deputy from the People's Liberation Army.

Intellectuals as a rule are dependent on the ruling classes and serve the ruling classes, he said. "But today the intellectuals of China have departed from that rule of identifying themselves with the broad masses of workers and peasants. This is a great historic change they should be proud of," he said.

There may be some people who still do not quite understand the new role of the intellectuals as a part of the working class, he said. But there is no need to blame them, for the influence of old ideas that have existed for several thousand years can not be eliminated overnight.

Qian Xuesen said he is deeply moved by the admirable qualities of Jiang Zhuying and Luo Jianfu, the two eminent middle-aged scientists commended by Premier Zhao Ziyang in his report to the congress for their devotion to the country that continued till their last breath.

"I have much to learn from them," Qian Xuesen said. "At the same time, I wish to call attention to the fact that there are thousands of others like Jiang and Luo, who are playing a leading role in science and technology. We count on them to carry on our cause. We must not wait till their death to cite them as heroes, model workers or model communists. Some of their problems are crying for a solution. This is something related to our endeavor to build a modern socialist country. Though it has been emphasized by the central authorities and in the premier's report, great efforts will still be needed to solve the problems."

On the other hand, Qian Xuesen continued, intellectuals should not be smug and relax their effort to improve themselves because of the attention the central authorities and the new constitution have paid to them.

"As the late Premier Zhou Enlai said, one should keep learning and improving oneself so long as one lives," Qian said. "We should admit that intellectuals, too, are susceptible to the influence of feudal ideas. We should acknowledge our shortcomings and not allow our merits to become a hindrance to progress."

The well-known physicist said it's necessary to improve the living conditions of intellectuals, but he objected to their indiscriminate promotion to administrative posts as a sign of respect.

"This would immediately spoil their specialities," Qian said. "Because scientists are different. Some are good administrators while others are not. Capable scientists are not necessarily capable leaders."

Qian Xuesen said he spent 20 years in the United States and has returned to China for 27 years. By comparison, he said, Chinese scientists are very remarkable, at least not inferior to their foreign colleagues. They have a deep love for the country and exert themselves indefatigably with a zeal rarely seen in other countries.

"I'm sure that no difficult scientific problems can baffle us Chinese scientists," he said. "The only thing we are afraid of is the hindrance of imperfect management and administration."

HE DONGCHANG SAYS EDUCATION MUST BE EXPANDED

OW061241 Beijing XINHUA in English 1110 GMT 5 Dec 82

[Text] Beijing, December 5 (XINHUA) -- The provision about compulsory primary education in China's new constitution represents "a significant move forward," said He Dongchang, minister of education, in an interview with XINHUA here today.

In the drive toward modernization, he said, China needs also to restructure its secondary education and expand its higher and secondary vocational education, particularly in view of the needs of the rural areas.

A deputy to the National People's Congress, He Dongchang said he was pleased with the new constitution adopted by the congress yesterday. "It is the first time that compulsory primary education is included in a Chinese constitution," he noted.

Vast progress has been made in education, compared with the situation in 1949 when more than 80 percent of the people were illiterate, He Dongchang said. But, he said, the latest census shows there are still about 23 percent of Chinese who are illiterate or functionally illiterate.

To solve the problem, he said, it is necessary to take into consideration the conditions (?of) China which has a rural population of 800 million, and vast mountain and pastoral areas where people are thinly distributed or are constantly on the move.

"So we must run our schools in different ways in different areas," he said.

He Dongchang estimated that, by and large, primary education will become universal in China by 1985, except in a few areas where the conditions are most difficult and longer time would be needed to reach the goal.

"By that time," he said, "we may have popularized junior middle schools, too, both in the cities and in a number of better-off counties. This pace would not be slow for a country with a population of one billion."

Regarding the restructuring of secondary education, He Dongchang called attention to the constitutional provision that "the state provides necessary vocational training to citizens before they are employed." He described this as "an important stipulation to ensure the success of China's modernization."

At present, he said, only a fraction of the population can enter college, while large numbers of middle school students who would begin working upon graduation lack the vocational training necessary for their jobs.

He said many localities have begun to solve the problem. In Liaoning Province, for example, vocational training is being offered in 41 percent of the senior middle schools, and Shandong Province is making investments to ensure that there is at least one agricultural technical school in each county.

"When all quarters pool their forces," he said, "the restructuring of secondary education may proceed quickly. It may go faster in the rural areas than in the cities. He said it is his hope that about half of the middle school graduates would have received vocational training by 1990.

He Dongchang continued that a number of colleges and intermediary vocational schools will be reorientated to meet the needs of rural areas -- training teachers, public health workers, agronomists, civil engineers and other specialists for them. The students will come from the countryside and return there upon their graduation.

In this way, He Dongchang said, a diversified multi-level education system geared to the needs of rural areas will take shape, which will promote modernization of the countryside.

"If we do all this well in the 1980s," he said, "we shall have built a sound base for the further development of our education."

XU DIXIN COMMENTS ON SIXTH 5-YEAR PLAN

HK080418 Beijing ZHONGGUO XINWEN SHE in Chinese 0843 GMT 7 Dec 82

["Xu Dixin [6079 3321 2450] Talks About the Sixth 5-Year Plan" -- ZHONGGUO XINWEN SHE headline]

[Text] Xu Dixin, a famous economist and advisor to the Chinese Academy of Social Sciences, said: The Sixth 5-Year Plan is a plan that is based on reality, takes into account overall interests, gives priority to the key points and makes advance in a steady manner. The 12th CPC National Congress decided to strive to quadruple the total annual output value of industry and agriculture within 20 years by concentrating on laying a solid foundation in the first 10 years. The Sixth 5-Year Plan is designed to lay a foundation for that foundation.

It was when taking in part in the discussion of Premier Zhao Ziyang's report at the Fifth Session of the Fifth NPC that Xu Dixin gave his opinion to the ZHONGGUO XINWEN SHE reporter.

Xu Dixin said: The Sixth 5-Year Plan has four prominent characteristics. The first of these characteristics is that the growth rate of industrial and agricultural production is connected to the improvement of economic results and stress is placed on the latter. The Sixth 5-Year Plan treats the improvement of economic results as the focus of all economic work and requires that product quality continuously improve, product variety and assortments meet the social needs, and production cost be lowered to a considerable extent.

Through the implementation of this plan, economic results in all fields and all trades will be greatly improved so that the people's needs in their material and cultural lives can be satisfied. This is in full conformity with the purpose of the development of the socialist economy.

He said: The second characteristic of the Sixth 5-Year Plan is that it places stress on technical transformation of existing enterprises and increasing production by tapping inherent potential. This corrects the previous idea of increasing production mainly by building new enterprises and expanding setups. The Sixth 5-Year Plan requires that the great role of science and technology in economic development be brought into full play and requires all enterprises and departments to strive for technological progress. The plan shows a new way to speed up construction by placing stress on technical transformation in old enterprises.

Xu Dixin pointed out: The Sixth 5-Year Plan not only deals with production, it also takes the development of education, science and culture as a premise for production development. This is its third characteristic. In 1985, expenditure in the fields of education, science and culture will account for 16.8 percent of the total amount of the national financial expenditure. This may be increased in the course of implementation. This shows that the Sixth 5-Year Plan gives the training of professionals and the education for workers a very important place. It combines development in the fields of economy, science, technology and society, so it is a plan for overall development.

The fourth characteristic of the Sixth 5-Year Plan is that it correctly handles the relationships between the development of production and the improvement of the people's livelihood and between the improvement of the people's livelihood and the growth of the population, said Xu Dixin. He said, based on the actual capacity of the nation, the Sixth 5-Year Plan embodies the principle of "both feeding the people and building the country." The targets set forth in the plan are both inspiring and achievable, because the plan takes into account both the needs of building the country and improving the people's livelihood. He said: China's population now exceeds 1 billion. It is right that the plan requires that the population should be controlled below 1.06 billion in 1985, and this requirement is very important. If the population is not under control, both the development of social production and the improvement of the people's livelihood will be affected.

Xu Dixin added: The Sixth 5-Year Plan stipulates three important measures for the next 3 years: gradually replacing handing over of profits by state-owned enterprises to the state with taxation; giving full play to the role of key cities in the field of economic organization; and reforming the commodity circulation system so as to promote commodity production and exchange. By replacing profit delivery with taxation, the enterprises have no choice but to strive for good business results, because taxes are fixed and the enterprise must pay their due taxes no matter how good their business results are, but in the case of delivering profit, they may do it when they reap profits and they also have the right not to turn any funds over to the state when they incur losses in business. That is where the advantage of this measure lies. He said: By subjecting enterprises to the administration of authorities in large and medium-sized cities, we can avoid the maladies of separating urban areas from rural areas, too many leaders, and mutual restrictions that used to exist in our economic life. This can help break the blockade between localities and departments and help promote the development of production. He also said: The Sixth 5-Year Plan requires that apart from giving a dominant role to state-owned commerce, full scope should also be given to collective and individual commerce so as to form a commercial network which combines state-owned, collective and individual commerce and self-marketing by enterprises. In this way, commodity circulation will be conducted more smoothly. Doing a good job in the above three matters, the work of restructuring China's economic system as a whole will be promoted.

RENMIN RIBAO INTERVIEWS ECONOMIST SUN YEFANG

HK080604 Beijing RENMIN RIBAO in Chinese 6 Dec 82 p 4

[Newsletter by reporter Bai Sheng [2677 3932]: "Remembering You -- Visiting With Comrade Sun Yefang"]

[Text] On the afternoon of 3 December, the weather in Beijing was fine and sunny and the early winter sunlight was as warm as in spring. I accompanied Comrade Xu Xuehan, an old specialist in economic work, to Beijing Hospital to visit our famous economist Comrade Sun Yefang. Despite his illness, Old Sun is still in very good spirits. He smiled and shook our hands.

Old Sun is a member of the Fifth CPPCC. He has not been able to attend this conference because of his illness but he is still very interested in reports on the conference. He insists that his family members read to him the documents and newspaper reports on this conference. In a soft voice he expressed to us his regret for not being able to personally hear Permier Zhao Ziyang's report on the Sixth 5-Year Plan.

We congratulated him because, when reporting on the Sixth 5-Year Plan at the Fifth Session of the Fifth NPC, Premier Zhao Ziyang praised him for the excellence of his article "There Are Not Only Political but Also Technical and Economic Guarantees for Quadrupling Output Value in 20 Years" written for RENMIN RIBAO. He smiled and told us that despite his heavy schedule, Premier Zhao Ziyang still visited him at the hospital.

His wife, Hong Keping, and his grandchild also told us how glad and excited he was on the day Premier Zhao Ziyang visited him.

Premier Zhao Ziyang intimately said to him: Old Sun, the last time we met was in Sichuan, 4 years ago! Since coming to Beijing, I have not seen you. I heard that you were sick, so I purposely came to see you today.

Sun Yefang's eyes lit up with excitement and he said: You are so busy and still you come to see me.

Premier Zhao Ziyang said: You have been very successful in your research and the Central Committee has fully affirmed your work. Although I have not seen you since coming to work in Beijing, I always attach great importance to your viewpoint. I read your article published in the newspaper a few days ago; your viewpoint on quadrupling production is very good and your criticism of "high base and low speed" is very forceful. During the discussion of the 5-year plan, Comrade Chen Yun made special reference to your viewpoint and Comrade Yaobang also attaches great importance to your article. You have done a great deal of work for the party.

Sun Yefang gratefully said: I hope that I can still work a few more years for the party.

Premier Zhao Ziyang smiled and asked: Old Sun, what are your present plans?

Sun Yefang excitedly said: I am still working on a book about socialist economy!

Zhao Ziyang said with concern: You are not well; you can dictate and let your assistant write it down for you!

Sun Yefang laughed and said: Comrade Ziyang, I have developed a strange habit over the years, and I must do the writing myself!

Premier Zhao Ziyang kindly said: You can also change!

Sun Yefang pondered a moment and said to Zhao Ziyang: I hope that the Central Committee will pay attention to statistical work. Statistical work must be independent of other work before it can be reliable.

Zhao Ziyang said: Your view is correct, for without statistics there is no planning.

As Comrade Zhao Ziyang shook hands and left, he advised Old Sun to take good care of himself and, after his recuperation, to work a few more years for the party.

This famous economist is already 75 years old. He was elected a member of the Central Advisory Commission at the 12th party congress. At present, he is also an adviser to the Chinese Academy of Social Sciences and its Economics Institute, and not long ago, he attended the 12th party congress. Even in his illness he still enthusiastically provides counsel for creating a new situation in socialist construction. In the 1920's, after his graduation from the Moscow Far East University, he became a translator of political economics courses at the university and worked with the famous Soviet economist Leontyev. Since then, he has worked nearly 60 years in the field of economics.

A distinguishing feature in his study of economics is that it is not separated from actual socioeconomic life. As early as the 1930's, in the polemics of a social nature in China's countryside, he criticized the fallacies of the Trotskiyites and expounded the semicolonial and semifeudal nature of the socioeconomics of old China. After the founding of New China, he applied great concentration to the study and writing of economic theory, because it is a vital practical problem in socialist economic construction, and therefore, also a vital theoretical problem in socialist political economy. Even in his recent illness, he still constantly thinks about the magnificent goal of guadrupling production put forth by the 12th party congress as well as the rate of development of industrial and agricultural production and the question of economic benefit in the Sixth 5-Year Plan discussed by Premier Zhao Ziyang at the 5th Session of the 5th NPC.

He has full confidence in the Sixth 5-Year Plan presented by Premier Zhao Ziyang in his report to the present congress. As an economic specialist, he has long considered the question of raising economic benefit in our socialist country. This is also precisely a focal point of the Sixth 5-Year Plan.

When we discussed the contents of the talks between Comrade Chen Yun and some of the deputies from Shanghai published in the newspaper that day with him, Old Sun was delighted. He highly approved of Comrade Chen Yun's words and said that he also shared the same view. Our national condition is one in which there are many old enterprises. Relying on the technical transformation of old enterprises as our new path of speeding up the four modernizations will require less investment and produce better results than building new plants.

People who have read Old Sun's economic theory will know his strong emphasis on economic work must be carried out in accordance with economic laws. He holds that socialist society must take planned economy as the leading factor and regulation by market mechanism as the supplementary factor. We must pay attention to enlivening the economy under the guidance of state planning. If we arrange production entirely based on market supply and demand price fluctuations, then there will be no difference between our economy and capitalist economy.

Old Sun is not only an outstanding economist, but he is also a farsighted practical economic worker. As early as the 1950's when he was deputy director of the State Statistical Bureau and director of the Economic's Institute of the Chinese Academy of Social Sciences, he had proposed a series of constructive ideas for reforming the planning, statistical and financial management systems. He emphasized the important role played by the law of value in socialist economy and proposed with perfect assurance the need to pay attention to socialist profits.

However, this veteran party member who joined the CPC in 1924 and engaged for a long time in revolutionary as well as economic theory work, this honest and outspoken scholar with knowledge and original ideas, who for the sake of safeguarding and upholding his academic viewpoint, and moreover, who had proved the correctness of his viewpoint in practice, was persecuted by Kang Sheng and Chen Boda in the early 1960's. During the 10 years of turmoil, he was again handcuffed and thrown into prison for 7 years, and this consequently ruined his health. However, he still continued to work day and night at his research and writing.

After the smashing of the "gang of four," and especially since the 3d Plenary Session of the 11th CPC Central Committee, his views on economic theory have gradually been accepted by more people and they are now playing an important role in the four modernizations. He is extremely interested in applying economic theory and research to solve actual problems in economic life, and he is not afraid to express his own opinion on controversial issues in economic circles and has written a number of important articles. He has for a long time attached great importance to the training of new people. Today, many of our middle-aged economists have been taught and trained by him.

When we visited him at the hospital, the moment the current problems in economic reform and economic theory were brought up, he could hardly refrain from setting forth his views. From the smile which lit up his face, we could see the demeanor and radiance of a scholar.

On the way back from the hospital, I could not calm my excitement for a long time. I was deeply touched by the noble character as well as dedicated spirit of this economist who is not afraid to look and to struggle for truth. I wish him an early recovery.

RENMIN RIBAO CRITICIZES THEORY OF SENIORITY

HK080715 Beijing RENMIN RIBAO in Chinese 3 Dec 82 p 5

["Study Notes on Reading History" by Sui Xiwen [7131 0823 2429]: "We Should Break With the 'Theory of Seniority'"]

[Text] The practice of taking seniority into consideration in employing people was followed in China intermittently for more than 1,000 years. This seriously affected the development of people's abilities. The first author of this theory was generally believed to be Cui Liang of the latter period of the Kingdom of Wei. In the second year of Emperor Shengui of Later Wei (A.D. 519), Cui Liang was appointed a government official with the title of shilang. He was in charge of matters concerning the civil service examination and the appointment and dismissal of officials. For the sake of convenience, he "requested in a petition to the king the implementation of a length-of-service system. No matter what a man's qualifications, he is judged for promotion by the length of his service. Though his skills are immediately required, if he has not served long enough, he is to be passed over for promotion. Mediocre people are given preference after a given period of service. All those with long service are regarded as capable." ("Weishu" [Book of Wei], vol 66) This means that the promotion of officials is based on seniority without regard to qualifications. An official gets a promotion after a given length of service. No matter how competent, he has to wait before he qualifies for promotion. This system is hailed by mediocre fellows, but makes for serious neglect in the use of capable young people. Therefore, this system met with heated opposition at that time. Xue Shu, an administrative official of Luoyang, said in a petition to the emperor: "If officials are promoted on the basis of length of service and lined up like fishes strung on a piece of rope without regard to qualifications, then what is the purpose of the civil service examination system we have established? Liu Jingan, Cui Liang's niece on the maternal side, also pleaded with Cui Liang in a letter: Your following the "system of promotion based on the length of service" will make people lose the drive to get ahead. "Who would study hard in order to reach the top!" ("Weishu," vol 66)

But these criticisms were all written off as nonsense and not acted upon. According to historical records, due to Cui Liang's following the "system of promotion based on length of service," "people of ability are treated like all others with no distinction between the competent and the incompetent. The loss of talent by the Kingdom of Wei began with Cui Liang."

The system followed by Cui Liang was abolished after being followed for more than 20 years. In the 4th month of the 18th year of Emperor Kaiyuan of the Tang Dynasty, Pei Guangting, an official with the title of shangshu, again imitated Cui Liang following the "system of seniority." He put the theory of seniority on a systematic basis. Whether competent or incompetent, "officials must wait for a period of time before they can be promoted, step by step. There is promotion, and no demotion, for all those who wait in line." Therefore, the "mediocre people are all happy, equating the system with a 'sacred book.' Those who are capable and competent are dissatisfied." ("Wenxian Tongkao" [Literature for General Reference], vol 37) Song Jingceng with the official title of gong openly opposed this system at that time. But for lack of support, he eventually failed. After Pei Guangting died, Xiao Song, an administrative official with the title of zhongshu, wrote a petition to the emperor. He said: The "system of seniority" does not help the selection of talent. Only then was the system abolished. But this system was only nominally abolished.

Rating people according to seniority became popular only in the middle part of the period of Chinese feudal society. Before that, and especially in the Spring and Autumn Period and the Warring States Period, inheriting given official titles from generation to generation was the common practice. But the exceptional employment of outstanding men of ability was often seen. Of those cases one well known one was 12-year-old Gan Luo who was promoted to a high-ranking official post of the Kingdom of Qin for his meritorious services. He had gone on a mission to the Kingdom of Zhao and succeeded in capturing the area of the Kingdom of Yan. Up to the period of Western Han, not much attention was paid to qualifications in employing people. For example, Zhang Shi got stuck in the same rank for 10 years. The Yang Xiong's did not get promoted to a higher rank for three generations. On the other hand, Gong Sunhong was made prime minister when still a commoner. In his twenties, Jia Yi rose in one year to the position of a high official with the title of dafu of Taizhong. At the age of 21, Huo Qubing was made a great general in charge of cavalry. Of course, according to a survey by scholar Qiu Jun of the Ming Dynasty, "the theory of promoting people on the basis of seniority was already known in the Han Dynasty." ("Supplement to Daixue Yanyi" [University Notes]) But turning the practice into a system prescribed by law was indeed what happened after the period of Northern Wei. Moreover, it was "passed on to later generations and followed without any change." ("Wenxian Tongkao," vol 37) Why was it followed without any change? The reason was that officials through the ages "followed the system of promotion based on seniority just to save trouble" ("Rong Zhai Sui Bi" ["Notes by Rong Zhai"]) Is it not a saving of time and trouble to "judge people by the length of service" and "promote those with long service?" As time went on, it was generally regarded as abnormal to "relegate the aged to the background and put latecomers in the lead." This tradition of indolence permeating the administrative organs at all levels has become a chronic disease. For over 1,000 years it has proved difficult to cure.

Under the shackles and suppression of these traditional influences, officials generally were on the old side. Young and capable people had no chance to shine forth. Government organs at all levels became seriously affected by bureaucratism and inefficiency. Therefore, the practice naturally met with heated opposition from those people bent on making reforms. Sun Zhu of the Song Dynasty listed several big faults in the theory of seniority: "The competent working under the incompetent is due to the restrictions of the policy of seniority. If vocational skills are neglected by officials, this is the consequence of seniority. If people show a lack of courtesy, this is due to the assertion of seniority.

"If the people are subjected to tyrannical rule, this is because many go for seniority. If everything goes wrong, if all officials become lax in discipline and if the legal system is ruined, all these are the faults of seniority." ("Guanzhi Men" [The System of Officials], "Qunshu Kaosuo" [A Collection of Books for Reference and Exploration].) This was actually a criticism of the practice of seniority. From another point of view, Qiu Jun of the Ming Dynasty in the "Supplement to Daixue Yanyi" pointed out the defects of the theory of seniority: "All the people employed are old and weak. The old and weak are ubiquitous. It is thus difficult to take care of things and give the people peace. With things not properly taken care of, the people can have no peace. This is an omen of trouble." ("Gujin Tushu Jicheng" [A Collection of Ancient and Contemporary Books], vol 686) Of the many people opposing seniority in ancient China, Sun and Qiu were perhaps the two most heated and passionate in their speeches.

In the history of China, all the most important emperors and officials were mostly against the use of people on the basis of seniority. They favored "installing officials of ability and putting things in the hands of men of qualifications," and did not let seniority interfere with the use of men of ability. As Emperor Wu of the Han Dynasty said in an imperial edict, officials and men of ability "can become generals and ministers and join in the running of the country" ("Hanshu" [Book of Han], vol 6) Cao Cao employed men of ability regardless of their humble backgrounds. Wang Anshi recruited many young people in the political reform. After founding the great Ming empire, Zhu Yuanzhang employed people in a break with the norm and instructed the relevant department: "There is no need to consider seniority in promoting people." ("Sequel to Wenxian Tongkao," vol 36) Another who was worthy of praise was Wan Yanyong, an emperor of the Jin Dynasty. He had a deep understanding of the defects of the theory of seniority and opposed the practice many times. He scolded officials who adhered to the system of seniority, saying: "The policy of seniority is applied to ordinary people. But if someone distinguishes himself for his outstanding abilities, how can he be bound by the usual norm? Men of ability must be recruited in running state affairs. You people do not know how to use men of ability and many things are not properly taken care of. I am not good at the art of using people. But you people adhere to the system of seniority and do not think of using men of ability. How can you regard the use of men of ability as a threat to your own position? If you think so, this is the view of ignorant people." ("Jinshi" [History of Jin], vol 8)

These remarks by Wan Yanyong not only opposed the theory of seniority but also in a way revealed an important reason why the theory of seniority has for a long time not been given up. The reason is that "the use of men of ability will threaten my own position." There was no lack of people in the history of China who analyzed this problem. Many people thought that the lack of a sense of responsibility and the desire to save trouble were the main cause. For example, Dong Chang of the Tang Dynasty decided the selection of officials by a throw of the dice. During the year of Emperor Wanli of the Ming Dynasty, the method of selecing officials by drawing lots was followed. All these supported this argument. In addition, equating the appointment of high officials with the settlement of officials of merit is of course also one of the reasons why such a traditional habit of stressing seniority has for a long time been maintained.

In contemporary times, it is of course rare to openly cherish the "system of seniority" as a law. But the tradition of indolence is still playing a role in real life. Now is the time to thoroughly get rid of the spirit of that "theory of seniority" both from our thinking and our system, which has haunted our political life for more than 1,000 years!

JIANGSU RADIO ON HU YAOBANG INSPECTION OF NANJING

OW030531 Nanjing Jiangsu Provincial Service in Mandarin 1100 GMT 1 Dec 82

[Text] Comrade Hu Yaobang, general secretary of the CPC Central Committee, recently inspected Nanjing and heard a report by responsible comrades of the provincial party committee on the situation there. Comrade Hu Yaobang praised the work done in Jiangsu Province, saying great achievements and contributions were made by the provincial, prefectural, municipal and county party committees, as well as by the masses. Comrade Hu Yaobang laid special stress on agricultural problems, saying that the modernization of China must be based on the steady growth of agriculture and that the various kinds of professional households have a very bright future. He hoped that Jiangsu Province would make good use of its 26 million mu of water surface.

On quadrupling the total annual value of industrial and agricultural production by 2000, Comrade Hu Yaobang said: Jiangsu Province leads the nation in terms of absolute total industrial and agricultural output value. Quadrupling output is tough and difficult. To achieve this, Jiangsu Province must put in great efforts and stress product quality. First, the province should overcome difficulties in the next few years to lay the fondation for the construction work in the 1990's.

In a room where the model of the Nanjing Chang Jiang bridge was displayed, Comrade Hu Yaobang was briefed by chief engineer (Shen Liufu) on traffic conditions on the bridge and river since the bridge was completed. He also visited railway and highway bridges, as well as bridge towers. At the Nanjing woolen textile plant, Comrade Yaobang was briefed by deputy chief of the plant office (Zhang Liying) on the plant's operations. He was told that more than 5,000 spindles in the plant were imported with foreign loans, which were paid off in 1 year and 3 months, instead of the originally scheduled 2 years. Comrade Yaobang praised the plant for the good results it had obtained by simultaneously engaging in construction and production.

At the Nanjing alkylbenzene plant, Comrade Yaobang inquired about the wage and housing conditions from the accompanying deputy plant director (Feng Zichang), a 1964 college graduate. Before leaving the plant, Comrade Yaobang had cordial talks with workers seeing him off and inquired about their schooling, wages and living conditions. When inspecting the construction site of the Jinling Hotel in Nanjing, Comrade Yaobang visited the rooftop helipad after inspecting the revolving restaurant on the 36th floor. He also discussed with the responsible persons of the provincial tourist departments and the hotel the question of making better use of the hotel.

During his stay in Nanjing, Comrade Yaobang also viewed the works of famous calligraphers was painters of Jiangsu, as well as industrial arts and crafts of the province.

QUANGXI, JILIN, SHAANXI REPORT GOOD HARVESTS

OW071315 Beijing XINHUA in English 0739 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- Agricultural departments in the Guangxi Zhuang Autonomous Region and Jilin and Shaanxi Provinces report good grain and industrial crop harvests, as a result of the responsibility system and scientific farming.

Guangxi's grain output was 12.7 million tons this year, ten percent more than last, despite a decrease of 467,000 hectares in the growing area, the regional agricultural department said.

Guangxi -- one of China's major sugarcane producers -- harvested one million more tons of the crop than last year, following an expansion of 26,700 hectares in area of cultivation. The region also reaped 15,000 more tons of peanuts, an increase of ten percent.

An increase of 65,000 tons or 23 percent was registered in output of subtropical fruits, including oranges, bananas, pineapples and litchi. Output of tea rose 48 percent, silkworm cocoons, 42 per cent and tobacco, seven percent.

By the end of October, Guangxi peasants had sold 1.3 million tons of grain to the state, 250,000 tons more than in the same 1981 period.

Jilin Province -- a major wheat producing center -- harvested 9.43 million tons of grain this year, 215,000 tons above the record year of 1981, despite a severe drought, according to the provincial agricultural department.

Shaanxi Province brought in 8.95 million tons of grain this year, 19.3 percent more than than last, the provincial agricultural department said.

The province's cotton output topped 100,000 tons, an increase of 60 percent. Output of oil-bearing crops was 150,500 tons, next only to the peak year of 1981, despite a 13,000-hectare decrease in growing area. Big increases were also recorded in output of sugarbeets, flue-cured tobacco, silkworm cocoons and tea.

Shaanxi's agricultural output value is estimated at 5,618 million yuan this year, hitting an all-time high and representing a 10.4 percent increase over last year.

In addition, trees were planted on 343,000 hectares, more than at any time since 1949, exceeding the annual quota by 47 percent.

MILITARY CHEMICAL MATERIALS ADAPTED TO INDUSTRY

OW071147 Beijing XINHUA in English 1123 GMT 7 Dec 82

[Text] Hangzhou, December 7 (XINHUA) -- China is adapting and popularizing in industry new chemical materials formerly only used by the military, according to the second national symposium on special macromolecular compounds held here December 1 to 5 and sponsored by the State Scientific and Technological Commission.

Twenty-one research projects on new chemical materials were selected at the conference as priority projects for the Ministry of Chemistry in the next three years, a period which coincides with the completion of the sixth five-year national economic plan.

The new chemical materials include special macromolecular, light-sensitive and magnetic materials as well as special gases, and other reagents. The materials include some of highly advanced technology, the commission said. In the past, these chemicals were mainly put to military use in China. Since 1978, efforts have been made to apply them to civilian use in the electronics, petroleum, chemistry, machinery, construction, textiles, food, medicine, transport and communications industries.

For example, organic compounds of silicon and fluorine as well as new plastics are now being used in processing of textiles, chemical antisepsis, and preservation of farm produce and protection and leak-proofing of buildings.

Treatment with silicon compounds has raised the quality of China-made polyester fibers, the commission said. In 1981, China exported polyester fiber equivalent in value to 8 million U.S. dollars.

Last year, the Shanxi fruit research institute used a silicon compound film for preserving 510 tons of apples which remained fresh for eight months. Shanghai also used the film to preserve cauliflower for 60 days.

ZHANG AIPING, YANG DEZHI VISIT ART EXHIBITION

OW080537 Beijing XINHUA Domestic Service in Chinese 0928 GMT 7 Dec 82

[Excerpts] Beijing, 7 Dec (XINHUA) -- The exhibition of paintings by the late old revolutionary fighter and veteran painter Li Yimin [2621 6654 3046] was officially started at the Chinese People's Revolutionary Military Museum today. On display were 95 paintings carefully selected from among more than 400 of Li Yimin's artistic works.

Li Yimin was a native of Longquan County, Zhejiang, and joined the CPC in 1925. He was an active participant in the first revolutionary civil war and the Nanchang uprising and an experienced and outstanding leading cadre in political work in our army.

Attending the preview for the "exhibition of the works of the late Li Yimin" were leading comrades, including Defense Minister Zhang Aiping and Chief of the General Staff Yang Dezhi.

ZHANG AIPING VISITS BEIJING PHOTO EXHIBITION

OW060157 Beijing XINHUA Domestic Service in Chinese 0943 GMT 2 Dec 82

[Text] Beijing, 2 Dec (XINHUA) -- The 1-month exhibition in Beijing of over 400 photos taken by China's veteran photographers during the revolutionary war years has won wide acclaim from various quarters.

After a visit to the exhibition, Comrade Zhang Aiping said, the photos are genuine historical records of the revolutionary war and are invaluable. Many of them are of high artistic quality and can be used as lively material for carrying out education in communist ideology among the people and in revolutionary traditions among photographic workers.

Over 10,000 people from various circles including responsible persons of units concerned and well-known personages visited the exhibition. Some schools organized teachers and students to visit the exhibition to carry out education in revolutionary traditions. Some students wrote in the visitor's book: "The revolutionary forefathers pioneered a cause with their own blood and sweat. We of the younger generation must be their worthy successors." A veteran PLA fighter wrote: "The exhibition makes people understand the revolutionary army's past and exhorts them to work hard for the motherland's four modernizations." Some readers have written to their newspapers, suggesting that the photos be published in albums so that more people can be educated in the history of the revolution. Publishing units concerned will select photos of great historical significance and artistic value and publish them in albums.

YU QIULI PRAISES NANJING PLA FOR TRAINING WORK

OW052251 Beijing XINHUA Domestic Service in Chinese 0353 GMT 2 Dec 82

[Excerpts] Nanjing, 2 Dec (XINHUA) -- Yu Qiuli, director of the PLA General Political Department, commended a certain division under the Nanjing PLA units for doing an excellent job in training a large number of qualified personnel who can both go to war and promote socialist construction. This was done to the satisfaction of the army, the local people, the fighters and their families.

In the past 2 years, 95 percent of the division's companies organized study groups to learn various professions, including radio, photography, fine arts, martial arts, finance and accounting, horticulture, sewing and cooking. Over 90 percent of the fighters joined these study groups.

Those fighters who took part in the division's study groups were welcomed by the local people when they retired from the army. Incomplete statistics indicate that among the fighters from rural areas who retired from a certain regiment after 1980, 55 have found jobs at radio stations, newspaper offices, publishing houses, hospitals and agro-scientific institutes; 31 are engaged in their own business, running watch repair shops, photo studios, barbershops or small restaurants; and 5 others have been admitted to universities after passing examinations. Retired fighter Wang Tiancai, who mastered photographic technology while he was in the army, opened a photo studio in his hometown after his retirement last year and has been commended as a model of "becoming well-to-do through labor" in the county. The broad masses say admiringly: The People's Liberation Army is truly a large school where fighters are trained to become high-minded.

WAN LI STRESSES AGROSCIENTIFIC KNOWLEDGE

OW071311 Beijing Domestic Service in Mandarin 1200 GMT 5 Dec 82

[Text] Wan Li, member of the Political Bureau of the CPC Central Committee and vice premier of the State Council, said in his meeting on 3 December with the fourth group of leading agricultural cadres attending a study class, that in order to continuously develop the excellent situation in agriculture and to realize the modernization of agriculture, leading agricultural cadres at all levels must have modern ideas and acquire modern scientific knowledge. In addition, it is also necessary to raise the scientific and cultural level of the broad masses of peasants.

Comrade Wan Li said: If all those who lead are amateurs and know nothing about science, they are bound to make the mistake of giving arbitrary and impractical directions and go against the law of nature as well as economic law and in the end impede agricultural development again. Leading agricultural cadres must extend their supportive role and study agricultural science and management knowledge.

Comrade Wan Li pointed out with emphasis: In order to improve and strengthen party leadership over agriculture and put leading cadres in charge of agriculture through universal training within 1 or 2 years, provinces and prefectures must work hard to achieve this goal. Various localities must increase their investments in acquiring knowledge. They must have a strategic viewpoint and run primary education well and disseminate agricultural science. He said: Considerable progress in agriculture can be expected in our country by the 1990's if all our peasants are no longer illiterate or ignorant in science and all our cadres become professionals.

LI XIANNIAN, OTHERS MOURN DEATH OF YUAN KEFU

OW070507 Beijing XINHUA Domestic Service in Chinese 0711 GMT 4 Dec 82

[Excerpts] Lanzhou, 4 Dec (XINHUA) -- Yuan Kefu [5913 0344 2591], member of the Standing Committee of the Fifth CPPCC National Committee and advisor to the Lanzhou PLA units, died on 5 December 1982 at 75, as a result of lung cancer after failing to respond to medical treatment. When he was living, Yuan Kefu left word that no memorial meeting should be held for him after he died and that the funeral should be simple.

Comrade Yuan Kefu was a native of Hongan County, Hubei Province. He joined the CYL in January 1929 and the guerrillas in March of the same year. He became a CPC member in December 1930.

Comrade Yuan Kefu was a fine CPC member and an experienced and tested leading cadre in political work. He made contributions in early years in the building of the Hubei-Henan-Anhui and the Sichuan-Shaanxi revolutionary bases.

The CPPCC National Committee and party and state leaders Li Xiannian, Xu Xiangqian, Li Desheng and Qin Jiwei sent condolence messages, mourning the death of Comrade Yuan Kefu.

FOLLOWUP ON REPORTED FOREIGN INVESTMENT PROJECTS

OW061229 Beijing XINHUA in English 1147 GMT 6 Dec 82

[Text] Beijing, December 6 (XINHUA) -- China is having follow-up discussions on the 70 projects on which letters of intent were signed in June this year at the China investment promotion meeting in Guangzhou, according to the Ministry of Foreign Economic Relations and Trade.

Examination of these projects by the ministry showed that the second round of talks have already been held on 50 projects and new instruments have been signed on 20 of them. Final contracts are expected to be signed in 1983, the ministry said.

A recent State Council decision authorized sponsors of these projects to approve the documents and include them in their current construction program.

Some of the provinces and cities have already appropriated funds to carry out feasibility studies. Some have appointed committees to oversee collection of funds and construction of infrastructure.

By the end of October, foreign partners in 44 projects had come to China for spot surveys and talks. The French, Austrian, Australian and Spanish Embassies in China sent people to investigate projects and hold talks. China is sending people abroad to pursue discussions.

An official of the investment office of the U.N. Industrial Development Organization made a special trip to Beijing to follow up on the Guangzhou investment promotion meeting. He said his office would actively promote these projects and help find overseas investors for more projects.

GUANGDONG'S REN ZHONGYI AT EDUCATIONAL CONGRESS

HK231313 Guangzhou Guangdong Provincial Service in Mandarin 1000 GMT 22 Nov 82

[Summary] The Guangdong provincial congress of advanced educational workers and advanced educational workers and advanced collectives of the general education system concluded this afternoon. Leading comrades of the party and the government in the province, including Ren Zhongyi, Li Jianzhen, Wang De, Ou Mengjue, Yang Yingbin and Yang Kanghua, attended the closing ceremony. They also awarded citations and prizes to advanced units and individuals.

Provincial CPC committee First Secretary Ren Zhongyi spoke at the closing ceremony. On behalf of the provincial CPC committee, he extended earnest greetings to the delegates present at the congress and, through them, to all teachers, staff members and workers in all places, particularly in mountainous areas, on islands and in distant border areas, throughout the province, who engage in general education work. He expressed the hope that: "They will work hard and make new contributions toward creating a new situation in educational work in our province."

"This congress has lasted 5 days. This was a mobilization congress which whipped up an upsurge in learning from and catching up with the progressives on the general education front throughout the province. Four hundred outstanding collectives, outstanding educational workers and outstanding teachers who were attending the congress were commended. Six hundred advanced collectives, advanced educational workers and advanced teachers who had been assessed before the congress was held were also commended by the congress."

The congress emphatically pointed out that all places must carry out the activities of learning from and catching up with the progressives. The education departments of all prefectures, municipalities and counties must establish a system of regularly commending and rewarding teachers and also regularly hold meetings of the representatives of the advanced educational workers and advanced collectives.

At the closing ceremony, all delegates attending the congress issued a written proposal to all educational workers of the general education system throughout the province. The written proposal calls on all educational workers throughout the province to work hard to create a new situation in general education and socialist construction.

Views Public Order Work

HK230342 Guangzhou Guangdong Provincial Service in Mandarin 2350 GMT 22 Nov 82

[Text] The Guangdong Provincial CPC Committee's political and legal committee held a telephone conference on the evening of 22 November to convey the spirit of the telephone conference of the central political and legal committee and the important speech of provincial CPC committee First Secretary Ren Zhongyi on getting a good grasp of social order work this winter and next spring, and to make arrangements for social order in the province this winter and next spring. The provincial CPC committee and government demanded that the party committees and government at all levels strengthen leadership, tackle the problems in a comprehensive way, deal resolute blows at various criminal activities and let the people of the whole province pass a still more peaceful new year.

Comrade Ren Zhongyi pointed out: The 12th party congress has just been held. There have been new developments in the province's industry and agriculture this year and new successes have been scored in all work. We should let the people of the whole province pass the new year in still greater cleanliness, joy and peace. To have still greater peace, we must do still better in promoting order and also make a good start to the new year. First, we must continue to deal blows at serious economic crime.

At the same time, we must also do a good job in handling other counterrevolutionary and and criminal cases that sabotage socialism. Murder, arson, robbery, burglary, rape and other criminal activities and crimes committed by bands of thugs directly endanger the masses, who have the greatest loathing of them. We must deal vigorous blows at these criminal activities. We must be effective in handling cases, otherwise we will have failed to carry out our duty of protecting the people.

Comrade Ren Zhongyi pointed out: In promoting social order, we must tackle problems in a comprehensive way and organize joint battles. The party, government, army, people, schools and all departments and sectors must take the initiative to cooperate with each other. The party committees and government at all levels must strengthen leadership. All departments must take immediate action to promote social order work during the winter and spring so that the masses can rejoice, while the enemies and villains will be in disorder and panic.

GUANGXI CPC COMMITTEE 10-11 NOV PLENARY SESSION

HK220359 Nanning Guangxi Regional Service in Mandarin 1130 GMT 21 Nov 82

[Excerpts] The Sixth Enlarged Plenary Session of the Fourth Guangxi Regional CPC Committee was held in Nanning on 10 and 11 November. Regional CPC committee First Secretary Qiao Xiaoguang and Secretary Qin Yingji presided. Present were 67 members and 25 alternate members of the regional CPC committee and over 300 observers including responsible comrades of the regional organs, prefectures, counties, Liuzhou railroad bureau, institutes of higher education and a number of factories, mines and transport stations.

The meeting analyzed the initial situation in the study of the 12th party congress documents by the region's party members, cadres and masses, discussed arrangements for studying thedocuments in depth and adopted a resolution to this effect.

The resolution said: In-depth study can generally be done in three stages, and different points of emphasis can be grasped. In the first stage, from now to year-end, people should concentrate on studying contents of the 12th party congress documents that deal with socialist modernization. In connection with this, they should also study Comrade Zhao Ziyang's important speech on a strategic question in economic development and the relevant central instructions. On the basis of appreciating the spiritual essence of the documents, people should emancipate their minds, broaden their vision, go all-out in a truth-seeking way and establish firm confidence in accomplishing the vast goal. It is also necessary to seriously study how to create a new situation in economic construction in our own areas, departments and units and formulate targets for endeavor for 20 and 10 years and specific plans and practical measures for developing industrial and agricultural production, developing education and science, controlling population growth, reforming the economic system and improving the commodity circulation channels in the next 5 years.

Industrial production plans must be on a reliable basis. There must be ample raw materials, guaranteed energy and transport, sales outlets for and competitiveness of the products. There must also be a corresponding technical force. We must base our efforts on self-reliance, tapping the potentials of existing enterprises and improving economic returns.

In agricultural production plans, we must correctly handle the relationship between grain and diversification and bring about all-round development of agriculture, forestry, animal husbandry, sideline occupations and fisheries. We should strive for a fundamental turn for the better in the next 3 years in production and supply of meat, vegetables and other staple foodstuffs for the urban and industrial areas.

We must regard reliance on the progress of science and technology to vigorously develop the economy as a basic, guiding idea in future economic construction. We must further implement the policies on intellectuals and properly solve a number of problems that should be solved, so as to fully mobilize the role of intellectuals in the modernization drive.

In the second stage of study, in the first quarter of next year, in connection with the new year, spring festival and the civility and courtesy month, we should concentrate on studying contents of the congress documents that deal with building socialist spiritual civilization. In the urban areas we should further solve problems of dirt, disorder and bad service. In the rural areas we must further strengthen ideological and political work, conduct education in taking care of the interests of the state, the collective and the individual, formulate rural pacts, launch a drive for civilized and hygienic villages and five-good households, boycott feudal superstitutions and resolutely arrest the bad trends of gambling, indiscriminate tree felling, indiscriminate occupation of farmland for building houses and looting and stealing state and collective property.

In the third stage, in connection with the reform of the administration structure in the organs, we must organize the party members and cadres to concentrate on studying the new party constitution and the contents of the congress documents that deal with party building.

The plenary session called on the CPC and CYL members, cadres and people of all nationalities in the region to seriously study and implement well the 12th party congress spirit and maintain a high degree of political unity with the Central Committee. Under the leadership of the Central Committee they should hold high the great banner of Marxism-Leninism-Mao Zedong Thought, uphold the four basic principles and work in concert to strive for fundamental turns for the better in the financial and economic situation, social mood and party work style in the region and fulfill all the combat tasks put forward by the 12th party congress.

BRIEFS

GUANGDONG PROMOTES JOINT VENTURES -- Over the past 3 years, Guangdong Province has done well in using foreign investment to promote joint ventures. Foreign firms have invested $2.1 billion in joint ventures. At the provincial symposium on joint ventures which recently concluded, the participants held that in future it will be necessary to develop these joint ventures even more boldly. According to statistics, between July 1979 and August this year the joint ventures throughout the province engaged in 605 items of work which included industry, repairs, agriculture, animal husbandry, tourism and its affiliated service work, communications, posts, telecommunications, culture, education, public health, science, technology, languages, books and housing with foreign investment. Although the majority of these items of work are being prepared or are under construction, their economic results will be completely apparent in a few years' time. However, some advantages have already begun to emerge. [Guangzhou Guangdong Provincial Service in Mandarin 2350 GMT 20 Nov 82 HK]

PRESIDENT CHIANG ON UNITY AGAINST COMMUNISM

OW080255 Taipei CNA in English 0232 GMT 8 Dec 82

[Text] Taipei, Dec. 7 (CNA) -- President Chiang Ching-kuo Tuesday called on the free nations of the world to solidly unite in the common struggle to crush both the communist ideology and system.

Human freedom, he said, will surely thus be safeguarded and world peace maintained.

President Chiang made the remarks in his written congratulatory message to the joint opening ceremony of the 15th Conference of the World Anti-Communist League and the 28th Conference of the Asian People's Anti-Communist League, and the Fourth Conference of the Asian Youth Anti-Communist League held in Tokyo Tuesday.

The full text of the president's message follows:

The joint conferences of world peace-loving, anti-communist leaders in Tokyo, Japan, to deliberate the solemn proposition on establishing "a global strategy to safeguard human freedom" -- assume epochal meaning. I warmly congratulate you on behalf of the Government and people of the Republic of China.

The major disturbances in the world since World War Two have resulted from the expansion of Marxism-Leninism. Since both the Chinese and Soviet communists are Marxist-Leninist disciples, and they are now discussing restoration of friendship, it should be obvious that they will never abandon their common goal of "communizing the world and enslaving humankind," regardless of whether they are united or divided. The Free World should not toy with the idea of cooperating with one communist regime in order to counterbalance the other in an attempt to buy temporary peace. It should realize that the solution to world problems hinges on the strengthening of the anti-communist forces. Only when the free nations of the world solidly unite in the common struggle to obliterate both the communist ideology and system, will they surely safeguard human freedom and maintain world peace.

Since their inauguration, your leagues have contributed greatly by insisting on justice, uniting the forces of freedom, and vigorously promoting the world anti-communist movement. We are convinced that freedom is destined to prevail over slavery and that democracy, to reign over totalitarianism. I hope your leagues will further establish a global anti-communist strategy. You should enmesh such strategy with the common pursuit by people everywhere of freedom and democracy, in order to strengthen the anti-communist ideology. You should, of course, directly link your strategy with all peace-loving free nations and peoples of the world in order to strengthen anti-communist organization. Moreover, you should coalesce your strategy with the struggle against slavery and totalitarianism, and for freedom and human rights, behind the Iron Curtain. This is the pathway to eradication of the communist scourge and to the creation of a glorious era of freedom, democracy, and peace.

I wish the conferences great success, and all of you good health. Thank you.

LORD MACLEHOSE SPEECH ON FUTURE OF HONG KONG

HK070401 Hong Kong SOUTH CHINA MORNING POST in English 7 Dec 82 p 2

["Text" of speech delivered on Friday 3 December in London by Lord MacLehose to the Hong Kong and China Association]

[Text] I agreed to speak on "Hong Kong, Past, Present and Future."

Of this trio our interest now is on the "future," although no doubt in practice we have a good deal of time to spare for the threat of protectionism, the course of world recession on exports, the state of the dollar, the Hang Seng Index and the property market and a good many other things.

Though such things make the life-blood of Hong Kong I will leave them on one side today, except for repeating words of cheer said to me by a visiting minister in the dark period of 1975.

"Remember Hong Kong is so quick and flexible a puff of demand anywhere will fill its sails.

"Let us hope such a puff will come in 1983."

Perhaps it is a good omen a bilateral agreement under the multi fibre agreement has now been agreed with the European Economic Community and the recent GATT meeting on the rising forces of protectionism and indeed of trade anarchy were at least fought to draw, or even slightly thrown back.

But getting back to my theme, the present is certainly relevant because the present is the basis from which the future must be discussed.

To my mind the past is only of interest to the extent it shows how totally different the modern Hong Kong, whose future is for discussion in Beijing, is from the original British trading post and naval station established by force on the edge of China 140 years ago.

During its first 110 years, say to the time of the final defeat of the nationalists, the essential character of Hong Kong did not change very much.

Steam and oil replaced sail, a few industries, shipyards and public utilities were added to the entrepot and merchandising businesses, life became healthier and more comfortable, some schools, hospitals and clinics were built and a unity established.

But the population, on average, scarcely exceeded a million at the end of the period; administratively and commercially it was essentially expatriate dominated, though the numbers and wealth of local Chinese were very great.

Trade in all directions at the end of this period did not exceed pound 500 million (about HK$5.25 billion).

It was during the years after the Chinese people's government assumed power Hong Kong diverged so rapidly and radically from its past form.

I will come back to this, but at this stage would like to make one or two general points.

With the influx of population, cutting of the entrepot trade with China by the United Nations embargo and consequent rapid industrialization, Hong Kong's commercial links developed west to Europe and subsequently very strongly east to North America and later Japan.

With these commercial links developed, new educational and social ties, particularly with North America though also with the United Kingdom and unhappy and traumatic events in China in that period reinforced this tendency.

These ties are now a feature of modern Hong Kong.

Though the import of foodstuffs and other materials from Guangdong and other provinces grew very substantially -- even to be of some significance in China's foreign exchange earnings -- it was only in comparatively recent years the new, welcome and very large two-way trade and investment and entrepot trade developed.

This phase, up to the oil price crisis, coincided with a period of unprecedented expansion in world trade and Hong Kong's new industry for export took full advantage.

As industrial and commercial activity expanded, so did financial services and communications; and with the development of Hong Kong as a place of worldwide repute came the new industry of tourism.

The expansion of wealth at all levels during this period was phenomenal and for instance, the annual growth rate of the gross domestic product in real terms between 1962 and last year was about 10 percent a year compound.

Though all benefited, the element of the population of Chinese, say 98 or 99 percent, naturally predominated; and this wealth and financial power in aggregate and in family fortunes far out-stripped that of expatriates, though individual firms retain great strength and influence and provide a widely recognized element of stability.

During this period the British forces that had been stationed in the Far East since the middle of the 19th century were progressively withdrawn.

The existence of Hong Kong clearly depended on a certian relationship between China and the United Kingdom and Hong Kong, but the physical power of Britain was no longer a significant element in it, since China had vast local superiority.

Against this background, during my governorship, I concluded the status quo was maintained because this was the policy of the Chinese Government, having regard both to Sino-British relations and to their evaluation of the role of Hong Kong.

For a decade or more Chinese spokesmen had been accustomed to say Hong Kong and Macao were the product of unequal treaties not recognised by China and were problems left over from history whose settlement was entirely within China's sovereign right and they would be settled in an appropriate way when conditions were ripe.

And in 1972 this position was embodied in a formal letter to the United Nations Special Committee on Decolonisation.

Some people ask why this situation could not have been left alone to drift on perhaps indefinitely.

I don't think it could.

If Hong Kong were much smaller and less important, this might have been possible if and this is a big if, acceptable to the Chinese Government.

But with Hong Kong a centre of industry and finance and communications on a worldwide scale, with all the accompanying financial and legal transactions and investment this involved, its future after 1997 had to be clearly and satisfactorily defined very soon if confidence was to be maintained in the run-up period.

If it were not, obviously the unique concentration of plant, skills, services and capital would be dispersed through uncertainty or fear and great distress would be caused to the population.

Moreover it had long been apparent Chinese leaders regarded 1997 at least as a significant date, while of course the British Government was bound by it.

Finally, against such a background, speculation in Hong Kong itself would sooner or later erode all confidence if people did not get a clear statement of what their future would be.

This situation became as apparent to the Chinese Government as it did to the British and Hong Kong Governments.

The Chinese Government had taken the initiative, notably in 1979, in endeavouring to reassure the Hong Kong business community; progressively they appeared to conclude like us something more definite than general assurances were necessary; and during the prime minister, Mrs Margaret Thatcher's recent visit, while restating their position on sovereignty, they readily agreed to start talks to work out measures to maintain Hong Kong's prosperity and stability.

Before I turn to these discussions, I would like to take a further look at the Hong Kong they are talking about because it is the special character of Hong Kong that makes these discussions so necessary and important.

As I have said, since the revolution it has entirely changed.

The population has grown by more than four million to about 5-1/2 million so it has become quite a large city by world standards.

The value of trade -- that is the sum of exports, re-exports and imports in Hong Kong dollar terms -- rose by about 3,500 percent between 1950 and last year, putting Hong Kong in the top league of world trading communities.

Similarly, in the financial sector, from 29 listed banks in 1954, by this year there were 125, with many finance houses in addition.

Virtually all major banks in the world were represented.

So in this field too Hong Kong had become a major world centre.

The same is true of communications.

The port had developed to be among the first four in the world in the number of containers handled; the number of aircraft arriving had increased from 5,000 in 1950 to 55,000 in 1980.

And since the present leadership's administration in China there has been a vast expansion of communications with other parts of China by water, land and air, with corresponding increase in freight and passenger movements.

Similarly tourism increased from about 100,000 visitors in 1950 to 2.5 million today.

The figures illustrate the staggering change in scale in economic terms.

This economic expansion was accompanied by massive social change.

Firstly, the standard of living was transformed.

But also progressive provision was made for a wide range of medical, educational, housing, social, cultural and recreational services and labour legislation.

In spite of the frustration of constant dilution by immigration and in spite of obvious imperfections, taken together, these services are better than anywhere in Asia outside Japan and indeed better than most communities in the world.

This change is the product, not only of new wealth and liberal government, but also of the pressure of a new Hong Kong-born generation looking on Hong Kong as home rather than as a refuse, used to the capitalist system of Hong Kong with its British law and high degree of social as well as economic freedoms, insistent on the maintenance of these freedoms and social standards and wishing to have a direct or indirect voice in the administration of their home.

Without underrating the very important part played by the comparatively small number of expatriates, or the genius and capital resources of the older generation, it is this new class which is becoming more and more the backbone of the public services, industry, the tertiary sector and the intellectual life of the community.

If I were to personalise the future of Hong Kong, it would be of the fortunes of this group that I would think and of the enormous contribution they can make if they stick with Hong Kong.

The implications of this section of what I have to say about Hong Kong as it is can be best summed up by the statistic that while the GNP per head of population in Japan in 1980 was approximately U.S.$10,000 (about HK$65,000) and U.S.$8,000 (about HK$52,000) in the United Kingdom and about U.S.$4,400 (about HK$28,600) in Hong Kong and Singapore, most other parts of Asia achieved only a fraction of this figure, for instance in the Philippines it was U.S.$700 (about HK$4,550) and in many other countries considerably less.

So with all its problems, Hong Kong has become a modern, basically Chinese city, of international stature in all its aspects and with all the attributes necessary to move itself up the scale of industry, technology, finance and education so as to continue to compete and earn its way in world markets.

This is something worth preserving for the sake of its people and also for the sake of what they can contribute in the modernization of China.

Moreover, Hong Kong has become a focal point in the western Pacific basin, which is the fastest growth area of the world; and its worldwide trade and financial dealings have attracted the interest of many countries other than the United Kingdom.

Though for the United Kingdom it is in fact its biggest export market in East Asia.

In other words, Hong Kong is a unique phenomenon, not only on the mainland of China, but also among other great cities of the world and whether we like it or not, the eyes of the world are on it.

This then is the problem the Chinese Government faces, as does the British Government and the Government and people of Hong Kong.

How to preserve the essentials of all this in a form acceptable to China and therefore compatible with its long-held and oft repeated position on Hong Kong, but which also carries with it a promise of the continuity and insurance against violent change I am sure the people of Hong Kong want.

These are obviously prerequisites for retention of prosperity and stability based on business confidence, whether local or international.

This is what I see the discussions in Beijing to be about and it was high time they were started.

Their object was clearly defined, agreed at the highest level and announced in a joint communique.

Both Britain and China have the strongest motives for achieving it.

Surely this is something we should all welcome with relief and on which the prime minister and Chinese leaders should be congratulated.

Since then there has been a flood of unofficial, semiofficial and official comment and criticism and countercriticism.

This seems to be inevitable with such a long-awaited issue, on whose solution there have long been many views.

But is is also confusing to people in Hong Kong who are after all desperately anxious about their future and willing to clutch at any piece of news purporting to suggest what it might be.

They should remember what matters for their future is not the mass of secondhand commentary that washes about their heads now, but only what will come out of the discussions in Beijing eventually.

It is only this that will be of real significance.

Much of the commentary and rumour has come from people who have related things allegedly said to them in China or from official or leftwing press sources.

There has of course been a mass of speculation too in all media.

I have heard expressions of criticism and dismay, that the British and Hong Kong Governments have not as it were thrown their hats into the ring and joined issue with what might be described as a propaganda offensive.

For my part I can only say I would regret the need of anything of the sort.

Surely this should be an exercise in Sino-British cooperation; it should reflect the friendly relations and unique co-operation over Hong Kong that have so well developed in recent years.

These provide a good basis of mutual understanding for frank and productive discussions.

At this juncture, deliberately to degenerate this habit of co-operation into further confrontation would be regrettable and irresponsible.

It takes two to make a tango, but I do hope all concerned will try to cool it and create an atmosphere in which the discussions in Beijing can prosper and people in Hong Kong be permitted to await this outcome with composure.

Obviously this period of waiting and uncertainty will be an anxious one and it is very bad luck it should have coincided with the impact on Hong Kong of world recession.

And it is also bad luck the long expected slide in property prices and consequent fall in equities should have all come at the same time.

It would have been much easier to get through this period in a glow of commercial well-being.

Nevertheless, this is how the cards have fallen and Hong Kong will just have to wait with the patience and realism that have carried it through so many difficulties in the past.

Though I hasten to add, it is the future of the people of Hong Kong that is at stake and if they have views on it they should make them known.

Mind you, it is worth pointing out that in spite of all these problems the economy of Hong Kong is standing up pretty well.

A four per cent growth rate may be poor by Hong Kong standards but it is enviable in the recessionary world of today.

Moreover good new firms are continuing to open in Hong Kong because of its natural advantages.

I appreciate that discussions, necessarily in confidence, are not exactly confidence-building until their outcome can be stated.

But because, until recently, I have been taking part in this dialogue since it started nearly four years ago, I do feel it important to make one point about what I believe to be the Chinese Government's attitude, since alleged versions of it have apparently shaken confidence in Hong Kong.

From the start the Chinese leaders volunteered Hong Kong was a special case, that whatever changes there were its position as a free port and international centre of commerce and finance under its capitalist system would be preserved and obviously its administration would be quite different anywhere else in China.

And since then much fine print -- what validity I don't know -- has been added but all tending to underline the need for unique or even semi-autonomous treatment.

This at least reflects a perception of the situation of Hong Kong consistent with what I have tried to describe and this perception has wide implications which I presume will be explored in the discussions in Beijing.

But it would be foolish not to add there can be wide differences of opinion as to what these implications are and what practical arrangements are therefore appropriate.

Nevertheless from the start it is at least accepted that Hong Kong is a special phenomenon and the essentials of its present systems be preserved.

While therefore I think eventually some change inevitable -- I think everyone in Hong Kong has always realised that -- what comes out of these discussions should be an assurance of a future which Hong Kong people can live with and in which businessmen have confidence.

Considering the enormous mutual interest in achieving this result I cannot conceive a failure of common sense so massive as to frustrate it.

Question and Answer Session

Mr John Swire, chairman of the Hong Kong association:

There is one point that is worth asking.

We have all heard a lot of controversy about the validity of the treaties and the background to the treaties and we would all like to hear what Lord MacLehose feels on that particular point.

Lord MacLehose:

This is the question which I think is in most of your minds and if you have not asked it, it is out of consideration for my situation.

All our minds are on the future, not on the past and whatever may have been the basis of British administration in Hong Kong and whatever may be the legal definition of it, what we are concerned about is good arrangements about the future.

And if good and satisfactory arrangements can be made which will ensure the prosperity and stability of Hong Kong, I cannot believe anything will be allowed to stand in the way of the implementation of such arrangements.

PRC PROPOSES COMMISSIONS FOR SPECIAL REGIONS

HK071000 Hong Kong HSIN WAN PAO in Chinese 6 Dec 82 p 1

["New Talk" column: "A Proposal For Establishing Special Commissions For Special Administrative Regions"]

[Text] After adopting the new constitution, the NPC held another preliminary session today to study ways to revise the rules and regulations of the people's congresses at various levels according to the new constitution and the organic as well as electoral laws of the central government and local governments at all levels. Today's session was presided over by Liao Chengzhi, with whom people in Hong Kong are quite familiar.

According to the new constitution, all power in the PRC belongs to the people. The organs through which the people exercise state power are the NPC and the local people's congresses at various levels. People's congresses at various levels are elected democratically, responsible to the people and subject to their supervision.

Therefore, the supreme organ of state power is the NPC rather than any political parties or organizations. The Chinese people accept the leadership of the CPC, but legislative power, administrative power and judicial power belong to the people.

According to the new constitution, elections will be conducted early next year throughout the country and the new NPC will be established by next April. The Sixth NPC will be opened next May or June. At the congress, the state organs will be established and state leaders elected and the new democratic system in China will be set up.

According to new regulations under discussion, the names of the elected people's deputies will be announced before the opening of the NPC. This practice is different from the previous one. According to past practice, the qualifications of the deputies were examined after the opening of the NPC. After that, the names of the people's deputy were announced. According to the new regulations, people know who will exercise power on their behalf before the opening of the congress.

The people's deputies are elected according to the proportion of the population in the rural and urban areas and those deputies will represent views from all quarters. The new constitution guarantees that all adult citizens have the right to elect and to be elected. The following provision is added to the new constitution: "All people with PRC nationality are citizens of the PRC." This provision, which was not included in previous constitutions, is different from the existing laws of some countries. For example, the newly adopted British Nationality Act maintains that people with British nationality are not necessarily British subjects. Some British passport holders do not enjoy the same rights as those of British natives.

Within the territory of China, not all people can fully enjoy citizen's rights. Due to some historical and practical reasons, citizens in Taiwan and Hong Kong do not enjoy electoral rights to elect state organs. In Hong Kong, officials of the Hong Kong Government admit that no democratic system exists in Hong Kong today. In Taiwan, martial law is still in force. It is impossible to conduct a true democratic election in Taiwan. The Chinese mainland is the only place on Chinese territory in which a democratic constitutional government is exercising its full power. There are a handful of people abroad who oppose the Chinese system under the pretext of promoting "democracy;" this is wishful thinking that runs counter to basic reality.

The new constitution has a provision that special administrative regions will be established in Taiwan and Hong Kong and that the rules and regulations in force in special administrative regions shall be stipulated by law by the NPC according to specific conditions. We believe that the NPC elected through a democratic election will fully reflect the will of the people. It will wisely and properly handle the affairs of the special administrative regions to ensure the rights and interests of the people in Taiwan and Hong Kong.

The new constitution also stipulates that various special commissions may be established, whose members might be people's deputies. They may also appoint experts who are not people's deputies as advisers. Due to special conditions in Taiwan and Hong Kong, we also propose that the NPC establish special administrative commissions for special administrative regions and invite some people from Taiwan and Hong Kong to take up the posts of advisers to discuss future legislation and the system to promote the reunification of the motherland.

HU YAOBANG URGES FUZHOU PLA TO SUPPORT LOCALITIES

HK070358 Hong Kong WEN WEI PO in Chinese 7 Dec 82 p 3

[Dispatch from Fuzhou: "Hu Yaobang Speaks in Fujian on PLA Support for Local Construction"]

[Text] During his recent inspection in Fujian, Hu Yaobang urged the commanders and soldiers of the Fuzhou PLA units to make greater efforts in helping local construction. He pointed out: "Now, it is necessary to make a further study on how to enable the army to make more contributions to local construction of the four modernizations. It is not really necessary to transfer large numbers of the labor force, for the army itself is quite busy with training. We must study methods. The army can offer technical guidance, give ideological mobilization talks and help local units build important and difficult projects. For example, it can offer technical guidance for the construction of roads and hydropower stations."

When talking about strengthening the unity between the old and new cadres in the construction of the four modernizations, as well as the unity between the army and the government and the army and the people, Comrade Hu Yaobang recalled what Chairman Mao said in 1948: "The army marches on, production grows by an inch [as published]; strengthen discipline and the revolution is victorious." Hu Yaobang said: We are carrying out construction of the four modernizations now, and we can say: "Order has been brought out of chaos; unite and march on; give play to initiative and the four modernizations are bound to triumph." All of us must unite. Old and new cadres, the army and the people and the army and the government must unite.

REN ZHONGYI MEETS HONG KONG, MACAO NPC DELEGATES

HK030432 Hong Kong WEN WEI PO in Chinese 3 Dec 82 pp 1, 2

[Dispatch from correspondent Cheng Hsiang: "Ren Zhongyi Assesses Major Contributions of Hong Kong and Macao Compatriots in Four Modernizations"]

[Text] Ren Zhongyi, first secretary of the Guangdong Provincial CPC Committee, took part in a group discussion by deputies to the NPC from the Hong Kong and Macao region on Thursday. He highly evaluated the role of Hong Kong and Macao compatriots in the four modernizations and pointed out that most of them are patriotic and upstanding. After hearing Ren's speech, all deputies attending the discussion meeting were deeply inspired.

Ren Zhongyi said: The vast number of patriotic overseas Chinese and Hong Kong and Macao compatriots have made major contributions to the four modernizations. Taking Guangdong as an example, in this province most of the imported technical equipment and economic cooperation projects are provided by overseas Chinese and Hong Kong and Macao compatriots. Patriotic overseas Chinese and Hong Kong and Macao compatriots also have contributed money to build roads, brigades, hospitals and schools and run other social welfare undertakings in their home towns and villages. Facts have shown that loving the motherland and home towns and villages is a common characteristic of most overseas Chinese and Hong Kong and Macao compatriots. We must cherish their feelings and aspirations and show concern for their undertakings.

Ren Zhongyi said: In the drive to crack down on economic crimes in Guangdong, a large number of facts have also shown that most overseas Chinese and Hong Kong and Macao businessmen are upstanding and law-abiding. They, too, bitterly hate the economic crimes inside our country. On this point, we all hold the same position.

Ren Zhongyi also said: Many understandable problems have occurred since the open-door policy was put into effect. The correctness of this policy adopted by the central authorities should first be affirmed. In order to make progress, any society must come into contact and carry out cooperation with the outside world. The closed-door policy once stagnated China's social progress and led it into a backward and ill-informed position. By looking at Chinese history, we find that whenever the open-door policy was adopted, the society prospered. Especially at present, when science and technology are developing day after day, if we still confine ourselves, we will certainly lag behind. This is our experience and lessons. Over the past few years, the open-door policy has played an active promoting role in China's progress. This must be realized. Things are the same in Guangdong Province -- wherever the open-door policy is properly implemented, the economy and technology there will develop more rapidly. Facts have shown that an open-door policy is beneficial to us, while a closed-door policy is detrimental.

Ren Zhongyi continued, saying that it is necessary to approach the outside influence with a viewpoint of dividing one into two. He said: We can never blindly oppose foreign things. We can oppose filthy things and the decadent side of capitalism, but can never take a xenophobic attitude. Xenophobia only reflects the lack of self-confidence. If someone refuses to go out for fear of catching a cold, he will be more susceptible to colds for the lack of tempering through wind and rain. We should actively assimilate rather than exclude the advanced science and technology and the outstanding cultural achievements of capitalism. China's 1922 revolution, the May 4th movement and even the founding of the CPC are all effects of foreign influence. This foreign influence is a good thing. I feel that we should also analyze the influence from Hong Kong and Macao in this way.

Ren Zhongyi held: In general, the implementation of the open-door policy is now only in the initial stage. But some people, once they encounter problems, advocate that the door has been opened too excessively. In my opinion, the open-door policy has been put into practice from the point of view of the whole country. The central authorities have reaffirmed that this policy is invariable. In his report, Premier Zhao Ziyang also put forth concrete measures for further implementing this policy and solving the problem that our door has not yet been opened enough.

Finally, Ren Zhongyi said: Guangdong Province will continue to implement the central instruction on the implementation of special policies and flexible measures in Guangdong and Fujian. Guangdong will be further opened to the outside and more relaxed on the inside and try to become prosperous as soon as possible. If several places can become prosperous in a shorter time, this will promote the whole country. This will not only benefit the two provinces but also the whole country.

'ABSURD,' 'BARBARIC' MISSILE RIVALRY SCORED

HK090841 Beijing RENMIN RIBAO in Chinese 9 Dec 82 p 6

["Jottings" by Feng Xiong [1409 7160]: "Who Is More Barbaric?"]

[Text] President Reagan met with groups of congressmen to demand that they support his so-called "dense pack" MX missile deployment plan. According to reports, this plan would cost $26.4 billion. Its opponents say that this is not only financially unsupportable but also "absurd," while its supporters hold that a lot of money has to be spent in the nuclear contest with the Soviet Union, and that the Soviets must be forced to spend their last kopek before they can be brought to sit down and discuss disarmament.

Subsequently, Soviet Defense Minister Ustinov announced on 6 December that the Soviet Union too would deploy "similar ICBM's in no way inferior to the MX."

According to anthropologists, when conflicts occurred between two primitive tribes, the tribal chiefs personally would lead their tribes to the confrontation and vie with each other to see who could provide the greatest sacrifice. If A could kill a sheep, B would kill an ox so as to surpass him; if A wanted to win, he would have to sacrifice something still more valuable. Both sides would go on until one or the other could go no further. The loser then had to obey the conditions set by the winner. Reading these accounts in today's society, one no doubt would be struck by their "absurdity" and "barbarism." However, who is being the more absurd and barbaric in this "sacrificial contest" between the United States and the Soviet Union in their nuclear rivalry?

SEA LAWS TREATY'S FINAL SIGNING SESSION AT UN

OW071035 Beijing XINHUA in English 0759 GMT 7 Dec 82

[Text] Montego Bay, Jamaica, December 6 (XINHUA) -- The Third United Nations Conference on the Law of the Sea today held its final session for the signing of a new U.N. sea law convention and the final act of the conference.

Opening the five-day session here this morning, Tommy Koh, president of the conference and ambassador of Singapore, said: "The new convention constitutes a very significant improvement on the pre-existing law and it has succeeded in promoting several interests of the world community." He expressed the hope that no nation will "put asunder this landmark achievement of the international community."

The convention was adopted in New York last April by a vote of 130 to 4 with 17 abstentions. It took nine years and 11 long sessions as well as a series of key informal negotiations in between to reach agreement on a comprehensive, delicately balanced package of 320 articles.

It was reported that the United States, Britain and some other countries have declared that they will not sign the convention.

In his welcoming address Edward P.G. Seaga, prime minister of Jamaica, said that this conference presented a multilateral undertaking of the greatest significance and its successful conclusion will be a "historic event".

He said the new convention "is a remarkable attempt to arrive at a compromise between the legitimate concerns of all interest groups including the developing countries". Without mentioning by name, he criticised some big countries for trying to boycott the convention with their "mini-treaty". But this mini-treaty could not occupy "any legal status", he said.

He declared that Jamaica accepted the new convention "because though it could not meet all our demands it best represented the collective interests of the international community" and it reflected the collective will of the international community to promote peace and security and economic development.

Attending this session were more than 150 delegations including the Chinese delegation headed by Han Xu, vice-minister of foreign affairs.

'Mini-Treaty' Criticized

OW090746 Beijing XINHUA in English 0717 GMT 9 Dec 82

[Text] Montego Bay, Jamaica, December 8 (XINHUA) -- The "mini-treaty" proposed by the United States and some other Western countries which is in violation of the new sea law convention was under criticism in and outside the final session of the law-of-the-sea conference.

Speaking at a press conference on December 6, president of the law-of-the-sea conference Tommy Koh said that the "mini-treaty" was "illegal". On another occasion, he said the "mini-treaty" would not be effective.

Addressing the session, Unison Whiteman, foreign minister of Grenada, declared that his country would reject attempts to conclude a so-called mini-treaty which was designed "to accord priority to transnational corporations."

Rabbie L. Namaliu, minister for foreign affairs and trade of Papua New Guinea, said that "Activities to be undertaken by any country outside the sphere of the convention in relations to deep seabed mining cannot be justified and would be illegal under international law."

Jamaican Prime Minister Edward Seaga pointed out that the "mini-treaty" could not occupy any legal status. "It is contrary to the provisions of the law-of-the-sea convention."

Dozens of countries have announced their intention to sign the convention. It is believed that some 110 countries would sign the convention on December 10. Many countries have urged the U.S. to re-examine its position and to sign it too.

Among major Western industrial countries, France announced today its decision to sign. French Minister of the Sea Louis Le Pensec said that the text of the convention contained numerous positive aspects, though he regretted some "imperfections" in regard to "mandatory transfer of technology and the financing of the International Sea-bed Authority." Japan praised the convention as worthy of signature. However, its representative Topu Nakagawa said that the new Japanese Cabinet was unable to complete the necessary review for signing the convention at the conference. Britain said that the convention would remain open for signature for two years and there was time for revision before the United Kingdom needed to take a final decision on signature. West Germany rejected the convention.

GATT SESSION HIGHLIGHTS U.S.-EEC TRADE 'WAR'

OW081922 Beijing XINHUA in English 1546 GMT 8 Dec 82

["Round-up: U.S.-EEC Trade War Heats Up" -- XINHUA headline]

[Text] Brussels, December 7 (XINHUA) -- The confrontation at the recent General Agreement on Tariffs and Trade (GATT) meeting in Geneva between the United States and the European Community (EEC) over agricultural subsidies has highlighted their protracted trade war.

In their rivalry for more markets for their farm exports, both the United States and the EEC nations held to their original stands at the meeting with the United States unsuccessfully urging the EEC to phase out farm subsidies.

The issue became more acute since the United States diverted a greater share of its resources to beef up its defense capabilities at the expense of subsidies destined for farm exports. From the resulting weaker position, the United States has been calling on the EEC nations to reduce their farm subsidies to open up more chances for U.S. farm exports.

However, the issue of agricultural subsidies concerns the basic policy of both sides and so defies an easy solution.

In post-war years, half of U.S. farm exports went to Western Europe and contributed significantly to its favorable balance of trade.

With the establishment of the European Community, however, the Western European nations formed a customs union and adopted a common agricultural policy. This has boosted EEC's agricultural production and dealt a blow to U.S. grain exports.

EEC's share of farm exports to world markets increased from 9.5 percent in 1973 to 11.1 percent in 1980. Moreover, EEC's grain production this year has hit an all-time of 127.88 million tons with surplus wheat reaching 22 million tons and stockpiled milk products totaling 400,000 tons.

In the meantime, however, the U.S. share of farm exports from 1973-1980 dropped from 19.8 percent to 18.9 percent. The stockpiled U.S. milk products are valued at 3 billion U.S. dollars, equal to half the volume of this item annually traded on world markets. All this has posed for both sides the serious problem of overproduction of grains and has led to repeated disagreements between them.

To find a way out, the United States has lifted the grain embargo on the Soviet Union and threatened to sell grains to other nations at lower prices. It has also been calling on the EEC to phase out its subsidies for agricultural products.

U.S. Agriculture Secretary John Block had threatened before the deadlocked GATT Geneva meeting that if the EEC nations held to their origianl stand, the United States would take a "more aggressive" policy toward them.

Ignoring the U.S. call, the EEC nations, in a preemptive move, have sold 25,000 tons of butter to the Soviet Union and threatened to raise import taxes for grain. They also appealed at the same time to the United States to reduce its farm exports to Western Europe.

However, to avoid further harm to their alliances, both the United States and the EEC nations have expressed the desire for continued negotiations over the issue of farm exports. U.S. Secretary of State George Shultz will lead a high-level U.S. delegation here this month for consultations with EEC leaders to prevent the farm exports issue from degenerating into a political one.

Though concessions are expected from the forthcoming meeting on some specific points, the essential issue of agricultural subsidies can hardly be fully resolved, and the struggle between them over the their basic differences in farm policy will continue for a long time to come.

BEIJING RADIO LECTURE ON CHINA'S FOREIGN POLICY

OW080207 Beijing Domestic Service in Mandarin 1130 GMT 30 Nov 82

[Excerpts] The commune program now continues to broadcast the 16th in a series of popular lectures on studying the documents of the 12th CPC Congress, entitled "Study China's Foreign Policy, Develop the Patriotic and Internationalist Spirit."

Part five of Comrade Hu Yaobang's report to the 12th CPC Congress deals with adhering to an independent foreign policy. Today we will dwell on China's foreign policy in accordance with the guidelines of the report.

We will deal with China's foreign policy in terms of three basic points, five principles and two kinds of spirit. The three basic points mean the three basic aspects of China's foreign policy. The first basic point is that our country will strengthen unity and cooperate with countries of the Third World and firmly come over to their side. Compared with the superpowers, the Third World countries have a bigger population, larger territory and richer resources. If the Third World really could unite, its power certainly would surpass the superpowers. The two superpowers would find it hard to dominate the destiny of the world, and the superpowers' aggression and expansion could be halted. China attaches great importance to unity and cooperation with the Third World countries, because China is also a country of the Third World.

The second basic point is to oppose hegemonism. What has caused the turbulent situation in the world today? The root cause lies in the two superpowers -- the Soviet Union and the United States -- scrambling for world hegemony. The Soviet Union dispatched troops to occupy Czechoslovakia in the late sixties and occupied Afghanistan by force 2 years ago. It also supported Vietnam's invasion and occupation of Kampuchea. In addition, it has practiced expansionism in the Indian Ocean, the Persian Gulf and many other regions of the world.

As for the Untied States, it has always supported the South African racist regime in southern Africa and obstinately supported Israel in the Middle East in opposing the African and Arab peoples. In Latin America, the United States supports reactionary forces opposing local people's democratic and national movements. In South Korea, the United States refuses to withdraw its forces and obstructs Korea's peaceful reunification. As for dealing with China, some high-ranking officials in the U.S. Government still take an inflexible stand on the "Taiwan Relations Act" and persistently interfere in China's internal affairs.

The third basic point is to maintain world peace, which is the aim of China's foreign policy. China is carrying out the heavy task of promoting socialist modernization and raising the people's living standard. We need a long-term peaceful international climate. How can one engage in construction while fighting a war? To maintain world peace not only meets our need but also is in the common interest of the people of all countries. We believe that if people throughout the world really can unite against hegemonism and expansionism, world peace can be safeguarded.

We have just discussed the three basic points in China's foreign policy. We now deal with the five principles. What are the five principles? They are the principles of mutual respect for territorial integrity and sovereignty, mutual nonaggression, noninterference in each other's internal affairs, equality and mutaul benefit and peaceful coexistence. We always have followed the five principles in dealing with other countries. You all know that aggression and expansionism are inseparable from the exploitation system. Imperialism and colonialism engage in aggression and expansionism because their exploiting class wants to plunder the resources of other countries and enslave their peoples. Ours is a socialist country in which the exploiting class has been eliminated and the people are the masters. We must devote ourselves to socialist modernization. What we need is to promote friendship and cooperation with people of all countries. Aggression and expansionism -- in an attempt to exploit people of other countries -- contradict communist ideology which we embrace. We believe that communism eventually will certainly prevail throughout the world. However, revolution cannot be exported. It can come to fruition only after people of all countries choose it.

We now deal with the two kinds of spirit -- patriotism and internationalism. China's foreign policy is permeated by patriotism and internationalism, whose integration is our basic point of departure in handling our external relations.

We are patriots. For more than 100 years the Chinese people have conducted a heroic struggle against foreign aggression and enslavement and for national liberation. In 1949 our democratic revolution was victorious and the semifeudal and semicolonial old China became New China -- attaining independence and seizing the initiative in its own hands. Today our right to maintain independence and keep the initiative in our own hands is the fruit from ground irrigated with the blood of numerous martyrs. It is the most precious thing in the world. No one can damage it.

The patriotism we now touch on is patriotism of the proletariat. It is closely integrated with internationalism of the proletariat. We believe China's future is inseparable from the future of the world. China's revolutionary and construction victories are a strong support for the revolutionary cause of the world's people. Conversely, the struggle of the world's people for progress also supports us. Our national interests are in keeping with the general interests of all mankind. We must implement our independent foreign policy to maintain not only our national interests but also the noble duty of internationalism, making our due contributing to safeguarding world peace and promoting the progress of mankind.

PRC, UNITED NATIONS HELP ASIAN RURAL DEVELOPMENT

OW301656 Beijing XINHUA in English 1624 GMT 30 Nov 82

[Text] Jinan, November 30 (XINHUA) -- China and the United Nations Development Program (UNDP) have since 1981 established seven research and training centers in China to help promote development in countries of Asia and the Pacific region.

According to officials of the Ministry of Foreign Economic Relations and Trade attending an international seminar on integrated rural development which closed today in Huangxian County, Shandong Province, Beijing's international acupuncturist center has run 27 training sessions since 1969. Three hundred medical workers from Asia, the Pacific region, Africa and the Middle East were trained. The center runs two sessions annually in Beijing, Shanghai and Nanjing, each for 15 trainees.

The other six centers are the marsh gas training center in Chengdu, Sichuan Province; the training center in small hydroelectric power stations in Hangzhou, Zhejiang Province; a fish farming training center in Wuxi, Jiangsu Province; the training center of sericulture in Guangzhou, Guangdong Province; the international center of cooperation in public health work in rural grassroots units; and the integrated rural development center in Huangxian County.

The public health center has established pilot projects in Jiading County under the Shanghai Municipality, Conghua County of Guangdong Province and Yexian County in Shandong. The Food and Agriculture Organization helped start the Huangxian County center, which mainly serves demonstration purposes.

Office and classroom buildings, laboratories, libraries and dormitories for trainees are built at the expense of the Chinese Government, while teaching facilities, including video and other electronic devices, were provided by the UNDP and other U.N. organizations.

PRC ENVOY ADDRESSES UNESCO ON MEDIUM-TERM PLAN

OW272332 Beijing XINHUA in English 1503 GMT 27 Nov 82

[Text] Paris, November 26 (XINHUA) -- Development figured prominently in the 3-day general debate at the fourth session of the U.N. Educational, Scientific and Cultural Organization (UNESCO).

Many delegates held that development concerns not only developing countries but also developed countries because they are also facing the most serious economic recession since World War Two.

Delegates from Third World countries said that most of the political-independent countries have not achieved real independence because of the existing unjust global economic order.

They demanded technical transfer from developed countries to developing countries and urged the UNESCO to assist the latter in their efforts for promoting education and culture.

The debate centered on the medium-term plan proposed by the organization's director-general Amadon Mahtar M'bow Wednesday. The huge plan for 1984-89, which consists of five tasks and 13 major programs, gives priority to development in developing countries.

Some delegates attacked the mounting arms race and complained that a lot of advanced technology is being used for threatening world peace instead of eliminating poverty.

Elaborating China's views on the UNESCO's medium-term plan during the debate, the head of the Chinese delegation Gao Yi expressed his appreciation for the plan, particularly because it is in favor of developing countries.

"The general development of the Third World countries and the continuous growth of their strength are of great importance to world peace and stability," he said.

He held that the UNESCO should actively support the developing countries in their studies on the development strategy so that they could formulate their own plans which best suit their own conditions.

He urged the UNESCO to give more attention and make a greater contribution to the important task of improving the South-North relations in the fields of economy, culture and communication.

The general meeting and group meetings have proceeded simultaneously. The general meeting discusses the world situation and development while the two group committees debate educational and cultural exchanges as well as natural resources protection.

THIRD WORLD'S ASSERTIVE ROLE IN UN DISCUSSED

HK060952 Beijing RENMIN RIBAO in Chinese 3 Dec 82 p 6

[Commentary by Chen Yichun [7115 2011 2625]: "The Third World Is Asserting Itself in the United Nations"]

[Text] New York, 2 Dec -- In the 37 years since the founding of the United Nations, the international situation has undergone tremendous and profound changes. One important indicator of such changes is that a large number of Third World countries have united successively in the United Nations as a political force not to be overlooked -- a force which is playing an ever-important role in the United Nations.

When the United Nations was founded, of the 51 charter member nations there were only 13 Asian countries. The people that accounted for almost one-third of the world's population then were still under the yoke of colonial rule. The latter part of the 1940's and the early 1950's was when Asia emerged. The victory of the Chinese revolution and the convening of the Bandung conference gave a hefty boost to the vigorous growth of the national liberation movement. In the 1960's the African continent quickly woke up. By the mid-1970's more than 70 newly independent countries had joined the United Nations. UN membership today has increased to 157, of which Third World countries account for more than two-thirds. The composition of the United Nations has undergone tremendous changes.

Under the influence of the spectacular national liberation movement, the United Nations after its funding took a series of decolonization measures to speed up the decolonization process. The 16th UN General Assembly decided to establish the "Special Committee on Decolonization" (now composed of 25 member countries). The problem of decolonization became one of the important items on the agendas of many UN General Assembly sessions. The Third World countries also demanded the enjoyment of a fair share of representation and decisionmaking in important UN organs. According to a charter amendment which became effective in 1965, the number of nonpermanent members sitting on the Security Council was increased from 6 to 10. The number of vice presidents of the general committee was increased from 13 to 17. In 1973 the membership of ECOSOC increased from 18 to 54. In these organs there was an increase in the number of members from Third World countries.

An important event that took place in the United Nations in the 1970's was that in 1971 the 26th UN General Assembly passed by an overwhelming majority the restoration of the PRC seat in the United Nations, thus further adding to the strength of the Third World in the United Nations. China persistently has stood on the side of the Third World, showing mutual support and fighting shoulder to shoulder with Third World countries. It has made its own contributions toward maintaining world peace and security and fighting hegemonism, imperialism and colonialism.

At the UN General Assembly last year, China joined forces with Third World countries in electing Peruvian diplomat Javier Perez de Cuellar as UN secretary general. This represented a major victory for the Third World in the United Nations. China's just stand won the warm praise of the majority of Third World countries.

The United Nations was for a long time under the manipulation and control of the United States and later became the site for the contest for hegemony and behind-the-scene deals between the United States and the Soviet Union. Since the mid-1970's, a large number of small, poor and weak countries in the Third World which were once despised have united to form a powerful force. This force has waged a persistent and ceaseless struggle in the United Nations against hegemonism and power politics represented by superpowers. It has won one victory after another, gradually changing the situation in which the United Nations has been controlled by superpowers. The veto lever of the superpowers has gone out of order. The time when they could dictate the fate of small nations and did as they wished is gone forever. The large number of Third World countries have reared their heads, full of confidence. At present, the nonaligned countries, the "group of 77" (whose membership has now increased to 125 countries), the Organization for African Unity, the Arab League, the ASEAN and other regional organizations are playing an ever prominent role in the United Nations. They have constantly taken united actions putting forth various important resolutions at the general assembly.

At the Third World countries' suggestion the UN General Assembly, for four consecutive terms since 1970, has refused to accept the full status of the representative of South Africa -- which is supported by the United States and other countries. In 1974 the 29th UN General Assembly also adopted a resolution of the General Assembly president refusing to let the African delegation participate. This event was the first of its type in the history of the United Nations. The General Assembly also passed other resolutions to adopt sanctions against South Africa.

On the Middle East problem the United Nations passed a series of resolutions condemning the act of aggression in the Middle East by Israel, which was supported and shielded by the United States. It recognized the national rights of the Palestinian people and invited the PLO to participate in the General Assembly with observer status.

After the Vietnamese invasion of Kampuchea and the Soviet invaison of Afghanistan, the UN General Assembly successively passed by an overwhelming majority resolutions on many occasions demanding that South Vietnam and the Soviet Union immediately and unconditionally withdraw from Kampuchea and Afghanistan, respectively. All this shows that today's United Nations has become an important international forum for the Third World in maintaining its rightful interests and exposing, indicting and condemning the crime of superpower hegemonism.

In the United Nations, the Third World countries are uniting to cope with the drastic challenge of certain developed countries which are shifting the economic crisis through trade, tariffs, currency and other means. They are striving to break the old pattern of international economic relations and establish a new international economic order of equality and mutual benefit. As a result of Third World initiative, the Sixth Special Session of the UN General Assembly held in April 1974 passed the "Declaration on the Establishment of a New International Economic Order" and the "action program." In September 1975, the Seventh Special Session of the UN General Assembly again specially discussed the problem of development and international economic cooperation. It also passed a resolution stipulating the adoption of certain measures to speed up the development of developing countries and to narrow the gap between developing and developed countries. In the mid-1960's the UN General Assembly also decided to regard the "UN Conference on Trade and Development" as one of the permanent UN organs and to establish the UN Industrial Development Organization to stimulate and speed up the industrialization of developing countries and coordinate the industrial development activities of the UN system. In December 1972 the third session of the UN Conference on Trade and Development passed three resolutions, including "On International Trade Relations and Policies and Principles" put forth by the "Group of 77." In September 1980 the 11th Special Session of the UN General Assembly passed the international development strategy for the 3d development decade -- which began in January 1981 -- in coordination with long-term development plans of the Third World countries.

After nearly 9 years of talks, various kinds of obstruction and sabotage from superpowers have been removed. The 11th session of the 3d UN Maritime Law Conference passed, by an overwhelming majority 130 votes, the draft of the "Maritime Law Pact" providing for the right of coastal countries to own a given speical economic zone of 12 knots [corrected to 200 knots, according to a correction carried in RENMIN RIBAO on 4 December] and recognizing that "the international seabed area and its resources are the common heritage of mankind." This came as an effective blow to superpowers in their attempt to assert hegemony and to control the sea and to maintain the old maritime order. Despite the refusal by some Western powers to affix their signatures, the United Nations will sign this pact in Jamaica in December this year.

The Third World has also made a strong appeal for the early global talks in order to establish a just,new international economic order. It has called for the strengthening of South-South cooperation, for following the road of relying on our own resources collectively and individually, for coping jointly with the Western way of shifting the economic crisis, and for stimulating the Third World economic development.

In the past 10 years there has been a marked increase in the scope of authority at the United Nations as well as in the variety of its activities. But many important resolutions adopted by the United Nations constantly have met with resistance and sabotage from the superpowers. The United Nations has yet to develop its proper role in solving certain major issues. In the United Nations there is still an acute struggle between forces that seek and forces that resist control. The Third World countries must strengthen their unity further and continue to struggle. They surely will achieve still greater victories in the just struggle to maintain world peace, fight hegemonism and colonialism and boost the progressive cause of mankind.

UN PROTESTS PLANNED EXECUTION IN SOUTH AFRICA

OW071922 Beijing XINHUA in English 1910 GMT 7 Dec 82

[Text] United Nations, December 7 (XINHUA) -- The United Nations General Assembly in a resolution adopted today urged the racist regime of South Africa not to proceed with the execution of six South African freedom fighters and to commute the death sentences as soon as possible.

The six freedom fighters, namely Anthony Tsotsobe, Johannes Shabangu, David Moise, Simon Mogoerane, Jerry Mosloli and Marcus Motaung, are members of the African National Congress of South Africa. They have been condemned to death for their strong opposition to the apartheid policy of the South African authorities.

The resolution, adopted with a vote of 127 in favour to none against with one (the United States) abstention, requests that the Security Council should direct an appeal for clemency to the South African authorities not to proceed with the execution of the six freedom fighters.

NATO SECRETARY GENERAL ON EAST-WEST RELATIONS

OW090836 Beijing XINHUA in English 0724 GMT 9 Dec 82

[Text] Brussels, December 8 (XINHUA) -- While talking about possible new relations with the Soviet Union, the West should not forget the fact that Moscow has consistently manipulated the West's desire for peace to serve its own purpose, NATO Secretary-General J. Luns said here today. Speaking at a press conference on the eve of a two-day conference of 16 NATO foreign ministers, the secretary-general said Moscow's assertions of willingness to improve relations with the West have little meaning without positive steps.

But if such steps are forthcoming, he said, the NATO allies will quickly respond constructively because they have already offered for better relations with it at the Bonn summit last June.

However, Luns also said the NATO ministers, including U.S. Secretary of State George Shultz, will send "a signal to Moscow, and I think this time it will be important because of the new set-up in the Kremlin."

Referring to the recent discussion on nuclear weapons and their role in NATO strategy, Luns said a reply to armed aggression and the possible use of nuclear weapons constitute the essential part of NATO's defense strategy. If NATO's capability of deterrence suffers, he said, chances of conflict will increase.

The secretary-general criticized the proposition that NATO should abandon the first-use-option of nuclear weapons. Such analysis will gratuitously assist Soviet attempts to play upon fears of a nuclear war as part of Moscow's campaign to block NATO's deployment of intermediate-range nuclear forces (INF) short of progress in the Geneva talks, he said.

In the context of the transatlantic strains, Luns said there is nothing especially novel about occasional differences within the alliance. NATO allies will continue to find common ground whenever this is in their common interest, he added.

ASIAN REMOTE SENSING MEETING HEARS PRC REPORT

OW061908 Beijing XINHUA in English 1854 GMT 6 Dec 82

[Text] Dhaka, December 6 (XINHUA) -- Asian scientists on remote sensing today called for greater regional cooperation in using this technology for better harnessing the earth's resources and predicting natural disasters.

The scientists made the call at the Third Asian Conference on remote sensing which concluded here today.

During the four-day conference, 170 delegates and observers from 20 nations and U.N. bodies exchanged academic and technical information and discussed ways to develop this technology in Asia. They presented 10 national reports and 50 technical papers on remote sensing.

The Chinese national report delivered at the conference said that China has achieved preliminary results in the application of remote sensing in geology, agriculture, water conservancy, oceanography, meteorology mineral exploration, environmental monitoring and other fields. More than 20 departments and agencies in China conduct application researches on remote sensing.

It was decided at the conference that the next three annual conferences of the Asian association remote sensing will be held in Sri Lanka, India and Nepal respectively.

DENG XIAOPING MEETS SCHLESINGER, HOLBROOKE 9 DEC

OW091122 Beijing XINHUA in English 1100 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- Deng Xiaoping, chairman of the Central Advisory Commission of the Chinese Communist Party, met with James Schlesinger and Richard Holbrooke, senior advisers to the Lehman Brothers Inc., and other U.S. guests, this morning in the Great Hall of the People.

Also present were in Jin Deqin, president of the Bank of China; Zhang Wenjin, vice-minister of foreign affairs; and Charles W. Freeman Jr., charge d'affaires ad iterim of the U.S. Embassy in Beijing.

U.S. REFUTES SOVIET ACCUSATION ON MX PLAN

OW081157 Beijing XINHUA in English 1133 GMT 8 Dec 82

[Text] Washington, December 7 (XINHUA) -- The U.S. Government today refuted a Soviet accusation that the projected U.S. deployment of "MX" nuclear missiles was aimed at "achieving military superiority over the U.S.S.R."

The Soviet accusation was intended to "cast the MX in the role of another excuse (for the Soviets) to build more missiles," said White House Deputy Press Secretary Larry Speakes in a statement issued here today.

According to a TASS report, Soviet Defense Minister Dmitriy F. Ustinov charged in Moscow yesterday that the "MX" program marked an "extremely dangerous round of the nuclear arms race" and it meant that the United States was preparing "for an all-out nuclear war." He warned that the Soviet Union would respond by deploying a new ICBM "not inferior" to the American weapon.

Speakes contended that the "MX" was projected "to redress the balance of power which the Soviet union has upset" by its deployment of 308 SS-18 and 300 SS-19 ICBMs. The Soviet Union had just undertaken a flight test of its next generation of ICBMs, he noted.

The White House spokesman termed Ustinov's statement, made on the eve of a vote in the U.S. House of Representatives on a defense appropriation bill involving the "MX" program, "a clear effort to influence the American political process".

The "MX" (acronym for "Missile, Experimental") is a new type of intercontinental ballistic missile which carries 10 warheads and has a range of 10,000 kilometers. It has been regarded by President Reagan as a necessary defense against increasingly accurate Soviet nuclear attack.

According to Reagan, the "MX" missiles will be housed in capsules that act as the launchers. With the entire system based in silos for protection, they will be deployed in a "dense pack" grid in southeastern Wyoming.

SHULTZ REAFFIRMS U.S. STAND ON TALKS WITH USSR

OW081556 Beijing XINHUA in English 1537 GMT 8 Dec 82

[Text] Bonn, December 7 (XINHUA) -- U.S. Secretary of State George Shultz reaffirmed here today that his country will negotiate with the Soviet Union from a position of strength.

Speaking at a press conference after talks with West German Foreign Minister Hans-Dietrich Genscher, Shultz said that the goal of disarmament will come true only when the West gets stronger. Shultz arrived here this morning for a two-day visit.

The U.S. secretary of state told reporters that he and Genscher discussed the issue of disarmament, NATO's double-decision on the deployment of medium-range missiles in Europe and East-West economic relations.

Shultz rejected an assertion by Soviet Defence Minister Dmitry Ustinov yesterday that the U.S. development and deployment of MX missiles runs counter to the terms of the SALT II treaty. "The problem is to the contrary," he said, adding that the Soviet Union has already developed missiles that now "oblige" the United States to match.

Shultz said he is satisfied with the negotiations among Western countries on a common policy to deal with the East-West trade. He said the Western countries are working on principles concerning the issue and he will discuss it with West European leaders.

Referring to the Middle East, Shultz made it clear that the United States will not make any direct contact with the Palestine Liberation Organization (PLO) before it recognizes Israel's right to exist.

The West German foreign minister said his country will adhere to the Ostpolitik (eastern policy), but the Soviet Union should see clearly that it ought to make response to the Western initiatives.

Chancellor Helmut Kohl also exchanged views with Shultz on the future East-West relations.

Shultz is scheduled to leave for Brussels tomorrow to attend a meeting of NATO foreign ministers. He will also visit the Netherlands, Italy, France, Spain and Britain before returning to Washington December 19.

XINHUA ANALYZES REAGAN'S LATIN AMERICA TRIP

OW090129 Beijing XINHUA Domestic Service in Chinese 0120 GMT 7 Dec 82

[Text] Beijing, 7 Dec (XINHUA) -- The following is a news analysis by Sun Guowei on the conclusion of Reagan's visit to Latin America. It is entitled: "Lots of Sweet Talk, Very Few Substantive Accomplishments."

Following his meetings with the presidents of Honduras and Guatemala in Honduras' San Pedro Sula on 4 December, U.S. President Reagan headed home, concluding what he termed a "trip to promote democracy and peace."

The U.S. magazine NEWSEEEK today summed up the topics of the discussions Reagan had with the presidents of the six Latin American countries as: 1) to enhance democracy; 2) to ensure the region's freedom from outside interference; and 3) to strengthen the region's economic ties with the United States. The weekly maintains that during the visit, "Reagan could only say a few encouraging words and make a few warm gestures with his own charisma, but could not establish friendly relations with generous gifts."

On the first leg of his trip to Latin America, Reagan and Brazilian President Figueiredo had "serious talks" on the two countries' financial and trade issues and on their foreign policies. They decided to set up some committees to study the possibility of cooperation between the two countries in the military, nuclear production and space fields. The United States hoped that, through Brazil, it can "maintain a powerful defense" in the Western Hemisphere. The Brazilian Government has indicated that, with regard to nuclear production, any bilateral cooperation between it and the United States should not be construed as a commitment on the part of Brazil to support the nuclear non-proliferation treaty. The two countries had signed a nuclear treaty earlier; but it was later terminated because of a bill passed by the U.S. Congress. The bill prescribes that Brazil will not receive further U.S. aid unless it signs the nuclear non-proliferation treaty.

During his visit to Brazil, Reagan announced the U.S. decision to grant $1.23 billion in credit to Brazil and promised to give an impetus to the negotiations between the International Monetary Fund and the Brazilian Government to grant credit to that country in order to overcome its economic crisis. Although it was "the most substantive thing" in Reagan's Latin American trip, the American President's "generosity" is far from adequate for Brazil, which has a foreign debt reaching $80 billion.

News agencies in the West maintain that the main purpose of Reagan's whirlwind visit to Colombia was to learn more about the new government of President Betancur because, instead of following the U.S. leadership as his predecessor did, the new administration has adopted a more independent policy, a policy of edging toward the Third World. Its current relationship with the United States is all but a "courteous but estranged" one. The meeting between Betancur and Reagan touched upon the crisis in Central America, the Caribbean situation and the two countries' differences caused by U.S. protectionist barriers against Colombia's sugar, flowers, textile products and other export commodities. They also explored ways and means to strengthen the two countries' cooperation in striking at drug trafficking, since 70 percent of the marijuana consumed by Americans comes from Colombia. Betancur also asked Reagan to urge the American Development Bank to reach a loan agreement with Colombia. He criticized the acts of representatives of U.S. financial circles for always being "rigid and irrational." During the meeting, he criticized the U.S. policy towards Central America and its support for Britain during the Britain-Argentina dispute over the Malvinas, and annofinounced Colombia's decision to join the Nonaligned Movement. This has "cast a shadow" on the already increasing differences between the United States and Colombia.

Reagan then had short meetings with the presidents of four Central American countries: Costa Rica, Honduras, El Salvador and Guatemala. Before the presidential plane "Air Force 1" arrived in Central America, Secretary of State Schultz, who accompanied Reagan on the trip, declared that Reagan would give some military aid to certain Central American countries in order to deal with "rebellions and the threat from Nicaragua," and that no other new assistance plans would be announced.

During Reagan's visit to Central America, the only document that needed to be signed was an agreement with Costa Rica regarding extradition. During the visit, Reagan glibly praised the "democratization process" in Latin America and repeatedly urged the Central American countries to pool their efforts in dealing with the "challenge from outside forces." Without naming names, he denounced the Soviet Union and Cuba for attempting to impose a "non-democratic political system" on countries in that region. He also indicated orally that the United States would strengthen its economic cooperation with Latin American countries, relax U.S. trade restrictions and increase the amount of economic aid. However, Reagan's pages and pages of empty verbiage, assurances and promises can in no way help the Latin American countries surmount the serious and urgent problems caused by the worldwide economic recession.

The British newspaper THE TIMES pointed out that the United States is eager to mend its relations with Latin America, but that Reagan's visit was merely a signal, which "at best can create a more harmonious atmosphere and pave the way for a substantive decision in the future."

Reagan's trip to Latin America involved a lot of people. He was accompanied by six helicopters and two bullet-proof automobiles. Wherever he went, thousands of security personnel had to be mobilized. There was even a "dress rehearsal" with somebody who acted as Reagan's stand-in. But the Latin American people did not show their respect for his "good-will" visit. In Brazil and Colombia, people held meetings and demonstrations to voice their protest and they expressed their hatred toward the "exploitative eagle that makes the hungry workers live in poverty" by shouting "Reagan get out!" and "Down with imperialism!"

USTINOV SAYS U.S. MX PLAN CHALLENGES USSR

OW071253 Beijing XINHUA in English 0727 GMT 7 Dec 82

[Text] Moscow, December 6 (XINHUA) -- Soviet Defense Minister Dmitriy Ustinov said today the Soviet Union would deploy a new kind of missile if Washington insists on deploying MX missile.

"If the present White House leadership...challenges us by starting MX missile deployments, then the Soviet Union will respond by deploying a new intercontinental ballistic missile of the same class in every way matching the MX," he said.

He told the Soviet news agency TASS in an interview that Moscow could, if necessary, "respond effectively and promptly to Washington's other threats."

The Soviet marshal's speech was apparently directed at U.S. President Ronald Reagan's recent announcement about basing 100 MX missiles in Wyoming, and at NATO's reaffirmed plan to deploy Pershing-2 and cruise missiles in Western Europe.

The U.S. plans to establish superiority over the Soviet Union and start a new phase of arms race, he said.

Addressing a party activists' meeting of the Moscow Military District today, Ustinov said the U.S. pursues a policy of "an increasingly dangerous character," and the Soviet armed forces should double and triple its vigilance and enhance their combat capability and preparedness.

Washington has launched "an economic, political and ideological offensive" against the Soviet Union, he said.

REAGAN, ZIA HOLD TALKS ON U.S.-PAKISTAN TIES

OW081151 Beijing XINHUA in English 0736 GMT 8 Dec 82

[Text] Washington, December 7 (XINHUA) -- U.S. President Ronald Reagan and Pakistani President Mohammad Ziaul Haq emphasized in their talks here today that Soviet troops must withdraw from Afghanistan.

Both parties noted with satisfaction the recent overwhelming favorable vote of the U.N. General Assembly on the non-alignment resolution on the situation in Afghanistan. "We obviously shared the view that an early negotiated settlement for Afghanistan must be found which includes Soviet troop withdrawal, Afghan self-determination, Afghan independence and non-alignment, and return of the 2.8 million refugees with safety and honor," a senior U.S. administration official said.

President Zia is on an eight-day state visit to the United States, beginning December 6. This was the first meeting between the heads of state of the two countries since the Soviet invasion of Afghanistan.

In his welcoming remarks before the talks, Reagan stressed the importance of close ties between the two countries. President Zia said in reply that he looked forward to the strengthening of the relations between the two countries.

During the talks, which lasted more than an hour, the two presidents reviewed bilateral relations and exchanged assessments of the regional and world issues.

The U.S. side praised Pakistan for its help to Afghan refugees in Pakistan and warmly welcomed the improvement of the India-Pakistan relations.

President Zia and Secretary of State George Shultz signed a document yesterday on the establishment of a joint commission to strengthen economic, commercial, scientific and cultural cooperation between the two countries.

The U.S.-Pakistan relations have notably improved since the Soviet invasion of Afghaniatan, with Pakistan playing a more important role in the context of the security in the Persian Gulf. In September 1981, the United States agreed to provide Pakistan with a five-year 3.2 billion-dollar military and economic aid package, beginning fiscal year 1983. In addition, it has agreed to sell Pakistan 40 F-16 aircraft, the first 6 of which will be delivered soon.

"We emphasized that the U.S. will continue to make every effort to continue to provide the proposed assistance" to Pakistan, the senior administration official said.

PAKISTAN PRESENTS GIFTS TO CHINESE ATHLETS

OW081900 Beijing XINHUA in English 1510 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- Dr Maqbool Ahmad Bhatty, Pakistan ambassador to China, on behalf of President General Mohammad Ziaul Haq, presented bicycles to each player of the Chinese women's volleyball team, which won the ninth world women's volleyball championships in September.

The ceremony took place in the Pakistan Embassy here, where Dr Bhatty and Mrs Fatimah Bhatty gave a reception for the team.

"When news of the Chinese team's victory reached Pakistan, his excellency President Ziaul Haq and the Pakistan people were very happy and excited. The president decided to present the team with Pakistan-produced bicycles," the ambassador said.

"At the recently concluded Ninth Asian Games," he said, "the Chinese women's volleyball team scored another gold medal for China and captured the champions in the Asian games for the first time. President Ziaul Haq took great pleasure in that news."

Bhatty hoped the Chinese athletes would achieve greater progress.

Xu Yinsheng, vice-minister of the Chinese Physical Culture and Sports Commission, expressed his as well as the team's thanks to President Zia.

"We see the president's gifts as a symbol of Sino-Pakistan friendship, and a credit to Chinese athletes," he said.

Xu Yinsheng hoped the friendship between the Chinese and Pakistan people and sportsmen would consistently develop.

Sun Jinfang, on behalf of the team, said the gifts are an honor and encouragement given by the Pakistan Government and people. She said the team would train harder to achieve still better results.

Among those present were Li Menghau, minister of the Chinese commission, and Chen Songlu, deputy director of the Asian department of the Foreign Ministry.

RENMIN RIBAO COMMENTS ON RESULTS OF EC SUMMIT

HK080347 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 7

["Short commentary": "Aspiration and Reality"]

[Text] The summit conference of 10 European community [EC] countries was centered on how the EC should deal with present economic difficulties, resolve economic contradictions between the United States and Europe and coordinate actions so as to jointly overcome difficulties. Through the conference, the leaders of the 10 countries expressed an aspiration to strengthen the community's unity and to ease contradictions between the United States and Europe. However differences still exist on some thorny issues concerning gains and losses.

The conference was convened in the wake of the GATT ministerial meeting. At the GATT meeting, differences between the United States, Western Europe and Japan remained the same on the international trade issue. Various disputes still exist within the EC, which are undermining its consolidation. Furthermore, there is still no sign of an economic recovery. In such circumstances, the EC summit conference was faced with a serious problem: Should the EC countries sit tight and just look at the crisis they are suffering and watch the EC's role in the world fade away, which leads to undermining the interests of all countries, or should they strengthen their coordination, promote cooperation and protect the development of the EC.

According to the resolution of the conference, although there were differences, the EC countries exercised comparative restraint. On the issue of relations with the United States, they made some compromise to avoid a new trade war between the United States and Europe.

However, while the capitalist world is suffering a serious and sustained economic crisis, there is little room for the capitalist countries to make a compromise. Therefore, disputes still exist on some crucial issues, both within and outside of the EC.

QIAO SHI MEETS SWEDISH COMMUNIST PARTY GROUP

OW031913 Beijing XINHUA in English 1617 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- Qiao Shi, alternate member of the Secretariat and head of the International Liaison Department of the Central Committee of the Communist Party of China, hosted a banquet in the Great Hall of the People this evening in honor of a delegation on the Swedish Communist Party led by its chairman, Roland Pettersson. Qian Liren, and Zhu Liang, deputy heads of the International Liaison Department, and Feng Xuan, adviser to the department, were present.

The Swedish delegation arrived here this afternoon. Tomorrow, Pettersson will hold talks with Qian Liren to exchange views on the relations between the two parties and issues of mutual concern.

SWEDISH PROPOSAL ON NUCLEAR FREE ZONE IN EUROPE

OW090824 Beijing XINHUA in English 0729 GMT 9 Dec 82

[Text] Stockholm, December 8 (XINHUA) -- The Swedish Government today launched an initiative that would free a European zone of tactical nuclear weapons.

Swedish Foreign Minister Lennart Bodstrom told a press conference that the initiative sprang from a proposal made last June by the independent commission on disarmament and security issues under the chairmanship of Olof Palme, who is now Swedish prime minister.

In an initial phase, according to the plan, a nuclear-free zone would be established in Central Europe and thereafter it would be expanded along the southern and northern flanks of both the power blocs -- the Warsaw Pact and NATO military alliances. Such a zone would have a total breadth of 300 kilometers, or 150 kilometers on each side of the borders between the two power blocs. Its exact geographical extent should, however, be the subject of negotiations between the parties concerned.

The commission's proposal also implies that neither nuclear warheads nor storage space for nuclear weapons would be allowed within the nuclear-free zone. Bodstrom said the Swedish Government was contacting all members of both military alliances and the neutral and non-aligned states in Europe, such as Finland, Ireland, Yugoslavia, Switzerland and Austria, through diplomatic channels. The purpose was to identify the conditions necessary for a zone free from tactical nuclear weapons in Europe and to ascertain the views of these states on the initiative.

The foreign minister recently visited other Nordic capitals to discuss the possibility of a nuclear-free zone being established to cover Sweden, Norway, Denmark and Finland.

DENMARK SUSPENDS FUTURE NATO MISSILE FUNDING

OW090954 Beijing XINHUA in English 0742 GMT 9 Dec 82

[Text] Copenhagen, December 8 (XINHUA) -- The Folketing (parliament) passed an opposition motion yesterday evening to freeze further contributions to the deployment of medium-range nuclear missiles in Europe.

According to the new bill, Denmark will continue to allocate the 26 million crown (3 million dollars) NATO payment already committed by the former Social Democratic government, but decisions relating to future instalments on the total 75 million crown (about 8.9 million dollars) Danish contribution to the new missiles will be left in abeyance "until further notice." Government officials said this would depend on results from the Geneva arms limitation talks between the United States and the Soviet Union. The bill was adopted by a vote of 49 to 13 with 90 abstentions and 27 absent after a four-hour heated debate.

The decision was opposed by the Conservative-led government, which supports NATO's plan to deploy U.S.-made cruise and Pershing II missiles in Europe to counter the more than 300 Soviet SS-20 missiles aimed at the continent.

But the minority government, which commands only 66 seats in the parliament, abstained during the vote to avoid possible passage of a more radical proposal by two far left parties. The Social Democrats had said they would back the radical proposal if theirs was voted down, and that would trigger off an election when the government was only three months in office. Earlier on November 26, the parliament adpoted an opposition motion to suspend Denmark's NATO appropriations for the nuclear missile deployment. Yesterday's bill was a compromise version tabled by the Social Democratic Party after a meeting between Prime Minister Poul Schluter and Social Democratic leader Anker Jorgensen.

CPC PARTY SCHOOL DELEGATION LEAVES FOR ITALY

OW020400 Beijing XINHUA in English 0258 GMT 2 Dec 82

[Text] Beijing, December 2 (XINHUA) -- At the invitation of the Italian Communist Party, a delegation from the party school of the Central Committee of the Chinese Communist Party led by its dean, Professor Song Zhenting, left here today for a friendship visit to Italy. The delegation was seen off at the airport by Qian Liren, deputy head of the International Liaison Department of the C.P.C. Central Committee.

FRENCH LEADERS RECEIVE OUTGOING PRC ENVOY

OW082130 Beijing XINHUA in English 1836 GMT 8 Dec 82

[Text] Paris, December 8 (XINHUA) -- Chinese Ambassador to France Yao Guang today left here for home at the end of his term. Louis Mermaz, president of National Assembly, and Pierre Mauroy, prime minister, met the Chinese ambassador yesterday. Minister of Foreign Affairs Claude Cheysson held luncheon in honor of Yao Guang before his departure. Georges Marchais, general secretary of the Communist Party of France, gave a banquet on December 6 in honor of the Chinese Ambassador. Earlier, French President Francois Mitterrand, President of the Senate Alain Poher and Mayor of Paris Jacques Chirac met Yao Guang separately.

RENMIN RIBAO TO REOPEN PARIS BUREAU

PM071503 Paris LE MONDE in French 3 Dec 82 p 40

["M.L." dispatch: "RENMIN RIBAO To Be Represented in Paris Again"]

[Text] Beijing -- RENMIN RIBAO, CPC central organ, will very shortly be represented in France by two permanent correspondents, according to a source close to that newspaper. The two future correspondents -- Mr Zhai Xiangqian and Mr Ma Meiming -- are due to leave for Paris in mid-December. Mr Zhai is an expert on economic questions and Mr Ma an expert on French political life. Both are excellent French-speakers and have already visited France several times as special correspondents.

RENMIN RIBAO had not been represented in Paris since relations between the CPC and Communist Party of France were broken off in the mid-sixties. The decision to carry out an exchange of correspondents between the two parties' central organs had been made during Marchais'recent visit to China.

PRC SENDS ALBANIA GREETINGS ON NATIONAL DAY

AU081427 Tirana ZERI I POPULLIT in Albanian 2 Dec 82 p 3

[Text] The Standing Committee of the People's National Assembly of the People's Republic of China and the State Council of the People's Republic of China write in their telegram addressed to the Presidium of the People's Assembly of the People's Socialist Republic of Albania and the Council of Ministers of the People's Socialist Republic of Albania:

On the occasion of the 38th anniversary of Albania's liberation we send the Albanian people greetings on their holiday. We wish the Albanian people new successes in construction.

ROMANIAN PRIME MINISTER MEETS OUTGOING PRC ENVOY

OW090155 Beijing XINHUA in English 0129 GMT 9 Dec 82

[Text] Bucharest, December 8 (XINHUA) -- Romanian Prime Minister Constantin Dascalescu today met and held a cordial talk with outgoing Chinese ambassador to Romania Chen Shuliang.

Chen Shuliang gave a farewell reception last evening. Present on the occasion were First Deputy Prime Minister Ion Dinca, member of the National Council of the Romanian Socialist Democracy and Unity Front Iosif Uglar and Vice-Chairman of the Grand National Assembly Emilia Sonea.

CSSR'S HUSAK MEETS WARSAW PACT COMMANDER

OW090350 Beijing XINHUA in English 0256 GMT 9 Dec 82

[Text] Prague, December 8 (XINHUA) -- Gustav Husak, general secretary of the Communist Party of Czechoslovakia and president of the republic, met here today with Soviet Marshal Viktor Kulikov, commander-in-chief of the Unified Armed Forces of the Warsaw Treaty states.

Soviet Army General Anatoliy Gribkov, chief of staff of the unified Warsaw Pact armed forces, was also present. The two military leaders were here on a short working visit.

According to the CZECHOSLOVAK NEWS AGENCY (CTK), the host and guests discussed the present international military and political situation as well as the cooperation of the Czechoslovak People's Army with the Soviet Army and other allied armies of the Warsaw Pact members.

Kulikov's visit is reportedly to make preparations for the Warsaw Pact summit meeting and the defense ministers meeting to be held here early next year.

JORDAN'S KING HUSAYN CONCLUDES OFFICIAL VISIT

Attends Acrobatic Performance

OW081852 Beijing XINHUA in English 1605 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- Jordan's King Husayn, accompanied by Wei Guoqing, vice-chairman of the Standing Committee of China's National People's Congress, watched an acrobatic performance here this evening.

The display by the China acrobatic troupe was enthusiastically received by the guests. Husayn presented a basket of flowers to the performers at the end of the show.

Given Final Greeting by Zhao

OW090607 Beijing Domestic Service in Mandarin 0400 GMT 9 Dec 82

[Text] King Husayn of Jordan left Beijing for Japan by a special plane this afternoon after a successful official visit to our country.

Before the king's departure, Premier Zhao Ziyang called at the Diaoyutai state guest house to see him off. The guest and the host warmly bid each other farewell.

Zhao Ziyang said: Your visit has been a very successful one. It has promoted understanding and friendship between our two countries and has contributed significantly to the further development of friendly Sino-Jordanian relations.

King Husayn replied: I have been among friends these few days. This visit will give me the best memories of my life. Relations between Jordan and China are based on the most solid foundation. I hope that relations between our two countries will continue to develop. I also hope that friendly relations between the two great peoples, Chinese and Arab, will develop further. He wished China success in its endeavors to make itself a strong country and to enhance the well-being of its people in future generations.

Zhao Ziyang asked King Husayn, on his return home, to convey China's good will to the Jordanian people.

King Husayn was seen off at the airport by Vice Foreign Minister Wen Yanzhan and others.

Departs for Japan

OW090824 Beijing XINHUA in English 0736 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- Jordanian King Husayn and his party left here for Japan by air today at the end of their official friendship visit to China.

Bidding farewell to the visitors at the Diaoyutai guesthouse, Premier Zhao Ziyang described the Jordanian monarch's visit as "highly successful." He said that it had helped deepen mutual understanding and friendship and made great contributions to future development of friendly relations between China and Jordan.

King Husayn thanked his hosts for according him such warm hospitality. The visit would remain a wonderful memory, he said. He said that a solid foundation had been laid for friendly relations between the two countries. He expressed the hope that there would be further development in the relations not only between Jordan and China but also between the Arab world and China.

RENMIN RIBAO COMMENDS JORDAN'S DIPLOMACY

HK090348 Beijing RENMIN RIBAO in Chinese 8 Dec 82 p 6

[Article by An Guozhang [1344 0948 4545]: "Jordan's Fruitful Diplomacy"]

[Text] In the Middle East political arena the voice and image of Jordan have drawn widespread attention. In particular -- after Israel launched the invasion of Lebanon on 4 June, Jordan actively carried out diplomatic activity and has scored considerable achievements.

Jordan's diplomatic activities were focused mainly on the following two aspects: 1. It tried to restore and strengthen the unity of Arab nations and to prevent and resist the control of the Middle Last by the superpowers. 2. It tried to promote realistic and feasible measures for reaching an overall and just solution to the Middle East problem by winning agreement from other Arab countries.

The Jordanian Government always has been concerned with the stability and security of the Middle East. After the Soviet Union occupied Afghanistan, King Husayn pointed out that the Soviets who stayed in Afghanistan might go on to Iran and expand their influence to the Strait of Hormuz, the Strait of Mandeb and the Red Sea. In this event, another superpower would intensify its presence in the Middle East region so that the fundamental cause of the Arabs would be harmed. He also held that the Arab world must take a united stand to cope with this threat. At the end of last year the Arab League's 12th summit meeting had to be suspended due to differences over ways to solve the Middle East problem between the countries attending the meeting, which was held in Fes, Morocco. The unity of the Arab world then faced a serious test. At that time, King Husayn said that he would try to promote the unity of the Arab ranks and suggested that Arab countries should work out a coordinated peace plan on the basis of Saudi Arabia's 8-point proposal. For this purpose, King Husayn visited most Arab countries in the Gulf region. Thanks to the joint efforts of the Arab countries, including Jordan, the 12th summit meeting of the Arab League finally resumed in September this year and worked out a realistic program for solving the Middle East problem. This important contribution to the settlement of the Middle East problem has won the universal praise of the international community.

The Jordanian Government also has actively improved its relations with Egypt and appealed to other Arab countries to welcome Egypt's return to the Arab fold. Husayn said: "One of the most eager desires of the Arabs is to see the Arab race, including Egypt, march forward again in unity." The Jordanian Government sent a military delegation to visit Egypt which was met by Egyptian Defense Minister Ghazalah.

In order to solve the Palestine problem in a realistic and just way, the Jordan Government actively improved its ties with the PLO. In late August this year, when the PLO decided to withdraw from West Beirut, Jordan was the first country to show its willingness to receive the PLO armed forces. During the Fes conference, King Husayn reached agreement on the Middle East peace program with PLO leader 'Arafat. After that, King Husayn worked out further concrete measures and suggested establishment of a "federal union" between Jordan and Palestine. He invited 'Arafat to visit Jordan and their talks "achieved great success." They agreed to strengthen relations between Jordan and the PLO. At the end of last month, 'Arafat once again was invited to visit Jordan. That was the second high level meeting between Jordan and the PLO within a little over a month.

According to reports, both sides seriously discussed the issue of forming a "federal union" and set up a commission headed by Jordanian Prime Minister Badran and 'Arafat to deal further with this issue. At the same time, in order to deal with the United States -- which refuses to recognize or to carry out any dialogue with the PLO but is a decisive binding force on Israel -- both sides suggested forming a joint delegation consisting of Jordanian delegates and Palestinians approved by the PLO to engage in a dialogue with the United States and force it to change its erroneous pro-Israeli Middle East policy. This would facilitate a reasonable solution to the Middle East problem. The strengthening of Jordan-PLO relations and their idea of forming a "federal union" have drawn close attention from Saudi Arabia and other Arab countries.

In the meantime, King Husayn also visited Turkey not long ago. Turkey is a country showing close concern for the Middle East problem. At present, Husayn is leading an Arab 7-member delegation to visit five countries that are permanent members of the UN Security Council. He will visit the United States soon and explain to the Reagan administration the Arab countries' position on solution of the Middle East problem. The diplomatic efforts made by Jordan have played and will continue to play an active role in the stability of the Middle East situation.

FURTHER COVERAGE OF FIFTH SESSION OF FIFTH NPC

9 Dec Presidium Meeting

OW090404 Beijing XINHUA Domestic Service in Chinese 0225 GMT 9 Dec 82

[Text] Beijing, 9 Dec (XINHUA) -- At its fourth meeting held at the Great Hall of the People this morning, the Presidium of the Fifth Session of the Fifth NPC adopted the drafts of some resolutions to be voted on at the plenary session.

Peng Zhen, permanent chairman of the Presidium, chaired the meeting.

The draft resolutions adopted by the Presidium today are: the draft of the NPC organic law; the draft of the State Council organic law; the draft resolution on the regulations governing the revision of the organic laws of the local people's congresses and people's governments at different levels; the draft resolution on the regulations governing the revision of the electoral laws of the NPC and the local people's congresses at different levels; the draft resolution on the work report of the NPC Standing Committee; the draft resolution on the work reports of the Supreme People's Court and the Supreme People's Procuratorate; and the draft resolution on the quota and election of deputies to the Sixth NPC.

The plenary session will also vote on a report submitted by the Motions Examination Committee of the current NPC session on the examination of motions.

Draft Organic Laws Discussed

OW081850 Beijing XINHUA in English 1521 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- National People's Congress deputies held panel discussions today and yesterday on the four draft organic laws and the draft resolution on the number of deputies to the next N.P.C. and their election now under deliberation.

Speakers expressed their approval of the draft organic laws of the National People's Congress, the State Council, the local people's congresses and governments, the draft electoral law for the national and local people's congresses, and the draft resolution.

Wang Shitai, a deputy from Gansu Province, said that the four draft laws embody the principle of democratic centralism set forth in the new constitution. They will serve as a guideline for the building of organs of state power at all levels, he added.

Speaking of the changes in the method of electing N.P.C. deputies, Guo Zhi from Hebei Province, north China, said that in the past when the qualifications of deputies were examined only after the N.P.C. was convened, the work could not be done thoroughly.

Now that the qualifications of the deputies are to be examined by a credentials committee set up by the N.P.C. Standing Committee and the list of the deputies is to be published before the convocation of the first session of each congress, he said, the work can be done more effectively.

Deputies agreed that the reduction in the number of N.P.C. deputies -- from 3,500 to 3,000 -- will make it more convenient for this supreme organ of state power to make decisions while guaranteeing adequate representation.

Tian Fuda, a deputy of Gaoshan nationality from Taiwan, said he was particularly satisfied with the provision that 13 deputies will be elected to represent Taiwan for the time being, the same as at the Fifth N.P.C.

This shows that the people of all nationalities in China are eager to have compatriots from Taiwan join them in running the country, he said.

Huang Juxiang, a deputy of Li nationality from the Guangxi Zhuang Autonomous Region, said she particularly appreciated the stipulation that every nationality in China, however small, must be represented on the National People's Congress. "This is a strong proof that our country is indeed a great socialist family in which all nationalities enjoy equal rights and live in harmony and unity."

Motions Reviewed

OW090930 Beijing XINHUA in English 0817 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- Deputies to the Fifth Session of the Fifth National People's Congress have proposed 2,102 motions, Luo Qingchang, chairman of the committee to examine motions, reported at a Presidium meeting here this morning.

These constructive motions centered around the strategic goals, emphases and dispositions of China's modernization program, he said.

Of these motions, 161 or 7.8 percent of the total involve construction of commodity grain producing bases, building or renovation of water conservancy projects, increase of funds for forestry, and interflow of goods between town and countryside.

Another 185 motions, or 8.8 percent of the total, suggest building bridges and highways, opening certain waterways to navigation, increasing other transport facilities, strengthening the exploration of energy resources and developing nuclear power.

The 379 motions on education, science and technology, which account for 18 percent of the total, call for increasing funds, paying attention to the role of the intellectuals, strengthening workers' education and technical training, spreading primary education in the rural areas, and improving educational facilities in remote border regions and areas inhabited by minority nationalities.

One hundred and twenty-nine motions, or 6 percent of the total, have to do with the strengthening of the socialist legal system and the extension of socialist democracy.

There are also motions concerning finance and trade, national defence, nationalities affairs, foreign relations, employment, price control and housing.

In view of the tremendous growth of agricultural production as a result of the responsibility system, a number of motions urge strengthening scientific and technical work in the rural areas, facilitating the peasants' sale of grain, cotton and vegetable oil to the state and building more warehouses and cold storages.

Luo Qingchang suggested that the motions be referred respectively to the N.P.C. Standing Committee, the State Council, the Supreme People's Court and the Supreme People's Procuratorate for study and implementation.

Education Stressed

OW091012 Beijing XINHUA in English 0832 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- Deputies to China's National People's Congress (N.P.C.) are paying more attention to education and science and less to social problems this year than they did last year.

This change is revealed in a preliminary analysis of the 2,102 motions which have so far been put by the deputies before the current N.P.C. session.

A spokesman of the office under the N.P.C. Motions Examination Committee told XINHUA that 379 motions, or 18 percent of the total, call for efforts to intensify technical and other training for workers, popularize primary education in rural areas, improve education in minority and border regions and increase spending on education and scientific research. By contrast, he said, these questions accounted for less than 10 percent of the motions during the 1981 session.

"N.P.C. motions usually reflect the most urgent questions of the time, changing with the general situation," the spokesman said.

For example, he said, the deputies focused their attention last year mainly on such problems as employment, wages and bonus, which made up 25.6 percent (598) of the 2,318 motions at the 1981 session. Such motions have become far less in number and percentage at the current session, because the situation has improved, he added.

An outstanding feature of this year's motions, the spokesman said, is that many of them include detailed specific suggestions to facilitate the nation's modernization. Apart from education and science, they are more or less focused on the following questions:

-- Faster development of marketable grain producing centers; building of more water conservancy projects; improvement of commerce to expedite urban-rural interflow of goods; and more investment in forestry.

-- Greater efforts to improve transport and communications and develop energy resources and more attention to the development of nuclear energy.

-- Formulation of a family planning law, laws on education and revision of some laws.

A staff of 58 members drawn from departments under the State Council are helping in the work of the Motions Examination Committee, the opinions of which will be transmitted to the departments concerned upon approval by the congress.

The spokesman said that 70 percent of the problems raised in the motions to the 1981 session have been or are being solved, 20 percent have to wait until the conditions are ripe, and 10 percent are not accepted for various reasons.

He said Chinese Government departments pay great attention to N.P.C. motions. The Ministry of Education has assigned a vice-minister to attend to motions on education.

"No matter how they are handled," the spokesman said, "all motions will get due replies."

Chen Muhua on Trade Goals

OW031250 Beijing XINHUA in English 1223 GMT 3 Dec 82

[Text] Beijing, December 3 (XINHUA) -- China's foreign trade goals set in the Sixth Five-Year Plan (1980-1985) will be attained, Chen Muhua, state councillor and minister of foreign economic relations and trade, said today. She made this statement at one of the panel discussions of the current National People's Congress session.

The economic development plan sets the total volume of import and export for 1985 at 85.5 billion yuan (approximately 57.4 billion U.S. dollars) and the average annual rate of increase for the five-year period at 8.7 percent.

The minister said that China will make use of both internal and external resources, both the domestic and the international markets, and both the skills for national reconstruction and those for expanding foreign economic relations in developing China's socialist modernization.

This further clarifies the strategic position of external economic activity in China's modernization program, she said.

According to the five-year plan, the total volume of export for 1985 will reach 40.2 billion yuan (27 billion U.S. dollars), or growing at an average annual rate of 8.1 percent, higher than the growth rate of 4-5 percent for the gross value of industrial and agricultural output. The total volume of import will reach 45.3 billion yuan (30.4 billion U.S. dollars), or growing at an average annual rate of 9.2 percent. By the year 2000, China's annual volume of export and import will be 160 billion yuan, four times the present figure.

Chen Muhua gave the following five reasons for the possibility of reaching these goals:

(1) Generally speaking, China's imports and exports have been on the rise over the last 32 years. The average annual rate of increase in the world's total volume of exports from 1950 to 1980 was 12.3 percent while that of China was 12.4 percent. The annual rate of increase in the world's total volume of exports from 1970 to 1980 averaged 20.2 percent while that of China 23.2 percent. China's exports increased by 14.5 percent in 1981, at a time when the world's exports were on the decline due to the economic recession.

These figures show, Chen said, that the past increase of China's exports has always been higher than the international level and the growth of total industrial and agricultural production in China. It is also higher than the average annual growth rate of 8.1 percent set in the Sixth Five-Year Plan.

(2) China's total volume of exports accounts for a very small portion of the world's total volume. It stood at only 1 percent of the total of almost 2,000 billion U.S. dollars in 1981. So, there is much room in the international market for Chinese export commodities. It is necessary to broaden the range of export, change the product mix, develop new varieties of commodities, and reach out to new markets, particularly in the Third World.

(3) The international demand for capital goods is diminishing due to the world-wide economic recession but consumer goods are still in heavy demand. This situation is very favorable for China's export of this category of commodities.

(4) There are broad prospects for the export of Chinese-made machinery and chemicals. China's export of machinery, electrical appliances, instruments and meters accounts for only 0.14 percent of the world's total and chemicals (including petroleum) only 0.42 percent.

(5) With the adoption of various flexible practices in foreign economic exchange, China will be able to find many channels for her exports. Construction of projects and provision of labor service abroad will entail greater export of Chinese machinery, electrical appliances, building materials and light industry products.

Chen Muhua urged all industrial and agricultural departments to aid the country's export trade by increasing production of commodities which have a ready market abroad.

To do this, she said, the producers have to improve quality, increase variety and reduce costs through well-planned technical transformation.

Huang Huoqing on Public Order

OW081353 Beijing XINHUA in English 0725 GMT 8 Dec 82

[Text] Beijing, December 8 (XINHUA) -- A 15.7 percent drop in criminal cases was registered between January and September this year as against the same 1981 period, but further improvement of public order remains a drawn-out and arduous task in China. Huang Huoqing, procurator-general of the Supreme People's Procuratorate, said this in a written report he submitted to the Fifth Session of the Fifth National People's Congress.

In the January-September period of 1982, he said, procurators around China issued warrants for a total of 180,086 arrests, instituted prosecution against 184,441 accused, and appeared in court to support public prosecution involving 117,635 legal cases.

"These acts exposed criminal activities in good time and dealt telling blows to the offenders," he said. "As a result, public order has markedly improved."

In strengthening public security, he said, stress has been laid on punishing murderers, robbers, rapists, arsonists and other criminals who did grave damage to society.

Huang Huoqing said the procuratorates have cooperated closely with the police and judicial departments and worked in concert with people of various nationalities. Order has improved considerably in many cities and towns and along railway lines.

More and more people have stepped forward boldly to fight against criminal elements and an increasing number of offenders have surrendered themselves under public pressure, he said. "All this has served to consolidate and develop political stability and unity in the country."

Since the beginning of this year, Huang said, the procuratorates have actively involved themselves in dealing with offences that inflicted serious damage to the country's economy.

Between January and September, the procuratorates placed 32,605 serious economic offences on file for investigation, of which 2,512 were major cases involving over 10,000 yuan each, and 12,698 offenders were arrested.

The procuratorates also issued warrants to security organs for arresting 4,345 offenders and instituted prosecution in court against 10,966 people including smugglers, embezzlers, racketeers and offenders guilty of stealing state or collective property.

There is evidence, he said, that certain remnants of the Lin Biao and Jiang Qing counter-revolutionary cliques are still trying to stir up trouble and undermine the country's socialist economy. "Unless resolute and timely steps are taken to bring such rampant economic crimes under control," he said, "China's modernization program would sustain heavy losses and damage."

He said the procuratorates have also been successful in encouraging offenders to give themselves up and make a clean breast of their guilt so as to have their punishment lightened.

The struggle has won initial success in stemming economic crimes and the people have learned useful lessons in combatting corrosion, he added.

Huang Huoqing stressed the need to intensify education for juvenile delinquents who account for about half of the criminal offences. It is imperative to mobilize all social forces, including the organizations and schools where the offenders work or study and their families, to help them amend their ways, the procurator-general said.

Although public order has improved remarkably, there are still many problems in both city and countryside, he said.

Now that the new constitution has been adopted, Huang said, the procuratorates should work even more conscientiously to safeguard the modernization program, develop socialist democracy, strengthen socialist legality and consolidate the people's democratic dictatorship.

Resolution on National Anthem

OW090205 Beijing XINHUA Domestic Service in Chinese 1307 GMT 4 Dec 82

[Text] Beijing, 4 Dec (XINHUA) -- The resolution of the Fifth Session of the Fifth National People's Congress of the People's Republic of China on the national anthem of the People's Republic of China (adopted by the Fifth Session of the Fifth National People's Congress on 4 December 1982):

The Fifth Session of the Fifth National People's Congress decides: The "March of the Volunteers" is hereby restored as the national anthem of the People's Republic of China and the resolution adopted by the First Session of the Fifth National People's Congress on 5 March 1978 on the national anthem of the People's Republic of China is hereby annulled.

FURTHER COVERAGE FIFTH CPPCC NATIONAL COMMITTEE

Standing Committee Meeting

OW090639 Beijing XINHUA Domestic Service in Chinese 1238 GMT 8 Dec 82

[Text] Beijing, 8 Dec (XINHUA) -- The 22d session of the Standing Committee was held at the Hall of the CPPCC National Committee this morning.

The session's principal agenda was: To discuss the adoption of the resolution of the Fifth Session of the Fifth CPPCC National Committee regarding the "constitution of the Chinese People's Political Consultative Conference" (draft); the political resolution of the Fifth Session of the Fifth CPPCC National Committee (draft); the resolution of the Fifth Session of the Fifth CPPCC National Committee regarding the work report of its Standing Committee (draft); and the resolution on the work report of its Standing Committee (draft); and the resolution on the report submitted by the Motions Examination Committee of the Fifth Session of the Fifth CPPCC National Committee regarding the examination of motions (draft). The meeting, after consultation, also approved the namelist of candidates for additional members of the Standing Committee of the Fifth CPPCC National Committee.

The members had heated discussions on the drafts of the several resolutions. They also presented numerous important opinions regarding implementation of policies towards intellectuals, bringing the intellectuals' role into fuller play, strengthening the legal system, developing education and creating a new situation in the work of the CPPCC, and so forth.

The Standing Committee meeting today was chaired by Ulanhu, vice chairman of the CPPCC National Committee. Present at the meeting were Vice Chairmen of the CPPCC National Committee Liu Lantao, Li Weihan, Wang Shoudao, Pagbalha Geleg Namgyai, Zhuang Xiquan, Hu Ziang, Rong Yiren, He Changgong, Yang Xiufeng, Burhan Shahidi, Zhou Peiyuan, Qian Changzhao and Dong Qiwu.

Members Hail Constitution

OW090818 Beijing XINHUA in English 0709 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- China's new constitution with its stress on an independent foreign policy and friendship with the people of all lands has won acclaim at the current session of the National Committee of the Chinese People's Political Consultative Conference.

Many members of the committee described the foreign policy provisions in the constitution as "a combination of patriotism and internationalism."

Wang Bingnan, president of the Chinese People's Association for Friendship With Foreign Countries, said in a XINHUA interview that these provisions "have reflected China's role in world affairs and summed up its expereince in foreign affairs over the past three decades."

Before the founding of the People's Republic in 1949, he recalled, China was unable to make its voice heard at major international conferences and many vital issues concerning it were settled behind its backs.

Wang Bingnan said: "Only socialist China can pursue an independent foreign policy, which means that it will not yield to any foreign pressure or control, that it will not attach itself to any foreign power or power bloc, that it will not allow any foreign country to infringe upon its national interests, and that it will not play any foreign card or allow any foreign country to use China as a card in its games."

Only by adhering to this policy will China be able to render effective support to the struggle of all oppressed nations for independence, firmly oppose imperialism, hegemonism and colonialism, and effectively safeguard world peace and promote human progress, he said.

Yang Gongsu, who represented China in foreign countries as ambassador for many years, said the five principles of peaceful coexistence set forth by China in the early 1950s have won admiration and support from many countries. "The inclusion of these principles in our constitution will help the development of China's foreign relations," he said.

Qian Duangsheng, the 82-year-old professor of law, said the foreign policy provisions in the new constitution are more comprehensive and clear than previous constitutions. It is "a constitution which embodies both patriotism and internationalism," he said.

Wang Yaoting, chairman of the China Council for the Promotion of International Trade, pointed out that the constitution, in its preamble and article 18, includes provisions for developing economic exchanges with foreign countries and permitting foreign enterprises and economic organizations and individual foreigners to invest in China in accordance with Chinese law.

These provisions, which will protect the lawful rights and interests of such investors, will "strengthen China's friendship and economic exchanges with foreign countries," Wang Yaoting said.

Enforcement of Constitution

HK090944 Beijing RENMIN RIBAO in Chinese 6 Dec 82 p 3

[Newsletter by RENMIN RIBAO reporter Yu Huanchun [0151 3562 2504]: "A Basis for Establishing Oneself and Handling Problems -- CPPCC Members on Enforcing the New Constitution"]

[Text] The new constitution has been adopted!

When the NPC deputies attending the Fifth Session of the Fifth NPC passed the new constitution in the afternoon of 4 December 1982, the CPPCC members who were present in the session as observers were very excited. Some of them burst out:

"This is an historic event in our country during the 1980's! It is an important matter that decides the future development of our country!"

"It is an achievement gained through struggle and a summary of experience!"

"It is paid for with blood!"

With these words the CPPCC members fully expressed their excitement and joy.

Now that the new constitution has been adopted, the question now is how it should be enforced. Will the new constitution be enforced without fail after it has been promulgated? The CPPCC members are generally concerned about this question. In the past few days, they warmly and seriously discussed this question while discussing the draft of the revised constitution and Comrade Peng Zhen's report on the draft of the revised constitution.

"Will the new constitution become a mere scrap of paper as the 1954 constitution became during the 'Great Cultural Revolution'?"

"What should be done if someone violates the constitution? Who will enforce discipline and supervision?"

"Will the phenomena that 'law is changeable' and 'lawlessness is justified' reappear in the future?"

In short, they still have worries. The sad memories of wanton violation of the constitution during the "Great Cultural Revolution" have not yet been completely dispelled from their minds. Many of the CPPCC members had similar experiences of being deprived of their civil rights and suffering from the situation caused by "defiance of laws human and divine." Today, with the adoption of the new constitution, they treasure all the more the rights they have regained. They recall this chapter of miserable history and put forth these questions for the mere purpose of urging all to set an example in observing the constitution and to actively fight to defend its sanctity.

As history enters the 1980's, it is impermissible for the constitution to be violated again. Ye Duyi, deputy secretary general of the Central Committee of the China Democratic League and member of the Legislative Affairs Commission under the NPC Standing Committee, said: "I am confident about this. We have learned a bitter lesson. Comrade Hu Yaobang declared solemnly in his report to the 12th CPC National Congress: 'It is impermissible for any party organization or member to act in contravention of the constitution and laws.'

"With the abolition of the system of the leading cadres' life-long tenure of office, with the extermination of the personality cult and with the ideas of rule by law gradually imprinted in the people's minds, there is a guarantee for the enforcement of the constitution."

Wang Guangmei agreed that there was a guarantee. She said: "The political situation of stability and unity, the continuous rectification of party style, the continuous improvement of the general mood of society, the people's growing understanding of the law, the stipulation in the constitution requiring all political parties and individuals to abide by the constitution, and the rule laid down by the central authorities forbidding the 'five kinds of people' to take leading posts -- all these guarantee the enforcement of the constitution."

Rong Zihe held an optimistic view. He said: "Summing up its lesson paid for with blood, the CPC Central Committee is firmly determined to strengthen socialist democracy and the legal system. The stipulation in the new party constitution that 'the party must conduct its activities within the limits permitted by the constitution and laws,' and the exemplary role played by the more than 30 million party members in observing the constitution, are the most important guarantee for its implementation. It is laid down in the general principles governing the work of drafting the new rules and regulations of the CPPCC that the CPPCC 'National Committee and local committees will publicize and implement the constitution and the law and various guidelines and policies of the state.' The exemplary role played by the CPPCC members in publicizing and carrying out the constitution and their democratic supervision of the enforcement of the constitution will serve as another guarantee for implementing the new constitution. This constitution has been discussed by the whole people and therefore has an extensive mass base. This will serve all the more as a guarantee for the implementation of the new constitution."

Of course, promulgation of the new constitution does not mean that its implementation will be plain sailing. We are required to take exemplary action, display our courage in struggle and adopt effective measures.

Wang Guangmei said: "In his report on the constitution in 1954, Comrade Liu Shaoqi pointed out: 'After the promulgation of the constitution, things which contravene the provisions of the constitution will not disappear by themselves. But the constitution provides us with a powerful weapon and enables us to wage an effective struggle to wipe them out.' In a sense, this new constitution has been paid for with blood. We should strive to guard the new constitution. The party members should all the more impose strict demands on themselves and play an exemplary role in observing and enforcing the constitution."

Wu Yifang, vice chairman of the China Association for Promoting Democracy and vice governor of Jiangsu, said: Even if the new constitution is still better, there will still be people who try to take advantage of its loopholes. The key lies in letting all people know that they have the right and duty to implement the constitution and that mass supervision is the most effective way of supervision. In Chinese society, there is the notion that "the tea house is the judge," which means that the masses are the arbitrators. Therefore, the masses should be made aware of the legal system and get rid of the idea of "minding one's own business."

Some CPPCC members said: Rule by man and rule by law are opposed to each other. To establish the rule by law, it is necessary to negate rule by man. In the past several thousand years, China was ruled by man and the practice of "what one person says goes" was deeprooted. For this reason, the road to rule by law will be beset by great difficulties. We must emulate the spirit of Bao Zheng, an ancient upright judge, and show no fear of sacrifice in guarding the new constitution.

Shen Panwen, professor of Nankai University, said: "Party and government discipline should be subordinate to law so as to guarantee enforcement of the constitution. Just like disciplinary action within the party, administrative disciplinary measures are defective in that an administrative leader may protect those he likes and retaliate against those he dislikes. In Shanxi's Hongdong County, the transformer of a factory was damaged in a fire, resulting in a great loss. Afterward, the factory leadership held a model worker of this factory responsible for this loss and were going to 'prosecute him according to law' if he refused to assume responsibility. The legal department rejected this case on grounds of insufficient evidence. However, the model worker was dismissed from the factory and his residence registration and food supply were cancelled. He was innocent but has been an 'illegal resident' for the past year. I voluntarily acted as his legal counsel. After many setbacks, the case was lodged with the Shanxi provincial court of justice. The case is still pending. The practice of taking administrative disciplinary measures has serious defects." For this reason, he proposed setting rules governing the adoption of administrative disciplinary measures, so as to prevent the leaders of some units from doing whatever they liked and placing themselves above the law.

Guo Rengjiang, vice chairman of Xiamen Municipal CPPCC Committee, said: "If a party member who holds a post has violated the law, it will not do just to dismiss him without prosecuting him. Otherwise, it will be difficult to establish the party's prestige and endorce the new constitution."

Du Renzhi, Liao Mosha, Wang Fu and other CPPCC members made many proposals on guarding the sanctity of the constitution and guaranteeing its enforcement. Their proposals can be summed up as follows: 1) The work of publicizing the constitution and educating the masses in it should be carried out systematically. The contents of the constitution should be implemented in pedagogical work in universities and middle and primary schools and written in the textbooks for middle and primary schools so that everyone knows that the constitution is the base for establishing oneself and handling problems. 2) Rules and regulations should be formulated, so as to embody the principles of the constitution. 3) It is necessary to establish and strengthen organs for supervising enforcement of the constitution. The NPC Standing Committee may organize special investigation committees and the people's procuratorates and courts of justice should set up special organs for guarding the constitution, so as to guarantee its implementation. 4) From now on, it is necessary to strike at those who violate the constitution and at deeds of violating the constitution, just as in hitting out at serious crimes in the economic sphere. 5) The ruling party must take the lead in strictly observing the constitution, so as to really create a situation in which all are equal before the law, the law is enforced wherever necessary and punishments are meted out impartially. It is imperative to resolutely oppose privileges and all other unhealthy tendencies.

The CPPCC members believed that the new constitution will definitely be observed and enforced. As Peng Zhen said in his report on the draft of the revised constitution: "When our one billion people all cultivate the consciousness and habit of observing and upholding the constitution and fight against all acts violating and undermining it, this will become a mighty force." "The authority of the constitution concerns the political stability and the future of our country, and it is absolutely impermissible to undermine it in any way."

LEADERS AT PARTY FOR NPC DEPUTIES, CPPCC MEMBERS

OW082257 Beijing XINHUA Domestic Service in Chinese 1541 GMT 8 Dec 82

[Text] Beijing, 8 Dec (XINHUA) -- Laughter swept the banquet room of the Great Hall of the People on the evening of 8 December as the CPC Central Committee's United Front Work Department, NPC Nationalities Committee, State Nationality Affairs Commission and Bureau of Religious Affairs under the State Council, jointly sponsored a party to welcome NPC deputies and CPPCC members from minority nationalities, religious circles, Hong Kong, Macao and Taiwan attending the Fifth Session of the Fifth NPC and the Fifth CPPCC National Committee.

Ulanhu, member of the Political Bureau of the CPC Central Committee and vice chairman of the NPC Standing Committee and of the CPPCC National Committee, addressed the gathering. First, he extended a warm welcome and greetings to NPC deputies and CPPCC members. He said: This has been an eventful year, during which we have accomplished several important things. First, our party has triumphantly convened its 12th national congress, defined the new program and general tasks in the new historical period and pointed out the direction for creating a new situation in all fields of socialist modernization. Second, the current NPC session has adopted a new constitution. The enactment of this general statute for running the country and keeping its stability during the new period will certainly harness the enthusiasm of the people of all nationalities in our country to strive to quadruple the total industrial and agricultural output value by the end of this century. Third, the completion of the work to draw up the Sixth 5-Year Plan has provided the Chinese people with a clearer fighting goal for their near future and will encourage the people of all nationalities to advance more steadfastly towards the gigantic goal at the end of this century.

Ulanhu said: These three major events are of vital importance for the prosperity of our party, country and people of all nationalities, as well as for creating sound foundations for future generations. He urged NPC deputies and CPPCC members from minority nationalities, after returning from the sessions, to set good examples among the masses of minority nationalities in further enhancing unity with the Han people and marching along the direction pointed out by the 12th CPC National Congress with one heart and one mind.

Seated at round tables and each holding a cup of tea, the 1,400-odd NPC deputies and CPPCC members chatted freely and expressed their feelings in different nationality languages. The central theme of their conversation was to bring back the spirit of the current sessions to their localities, strengthen the grand unity of people of all nationalities and circles, and, under the CPC leadership, strive to contribute more to the socialist modernization of the motherland until they meet again.

Attending the party were Xi Zhongxun, Seypidin, Ngapoi Ngawang Jigme, Baiqen Erdini Qoigyi Gyancan, Liu Lantao, Pagbalha Geleg Namgyai, Hu Ziang, Bao Erhan, Zhou Peiyuan, Qian Changzhou, Dong Qiwu, Jiang Hua, Wang Feng and Qiao Liansheng, as well as responsible persons of all departments concerned, provinces, autonomous regions and municipalities directly under the central government.

Yang Jingren, deputy director of the CPC Central Committee's United Front Work Department and chairman of the State Nationality Affairs Commission, presided over the party.

Literary and artistic workers' excellent performance at the party won continuous applause from NPC deputies and CPPCC members.

HONG XUEZHI DISCUSSES MILITARY SPENDING CUTS

OW080247 Beijing Domestic Service in Mandarin 2340 GMT 5 Dec 82

[Special interview by XINHUA reporter (Guo Diancheng) and station correspondent (Zhou Zhongmai) with Hong Xuezhi, deputy secretary general of the CPC Central Committee's Military Commission and director of the PLA General Logistics Department]

[Text] One recent morning we visited the General Logistics Department. While we were making clear to Comrade Hong Xuezhi's secretary what we had gone there for, he came in. When he heard that we were looking for him, he said candidly: Please come in and sit down.

He warmly invited us into his office and told a staff member to bring two glasses of water for us. Please tell me what you want to see me for? he asked us in a strong Anhui accent.

Big and tall, he was full of vigor and had a broad smile on his face. However, he, a battle-tested old general, had been subjected to repeated suffering in political movements.

We said: Would you please tell us how logistics work should be done in the army when the expenditure for national defense is reduced?

After hearing our request, Comrade Hong Xuezhi said: The question you have raised is indeed a big one. Since logistics work involves army building and every aspect of army life, as well as the country's economic construction, this question naturally attracts people's attention. Reducing expenditure for national defense is a major measure to further readjust the national economy as a whole. National economic construction is the foundation of national defense construction. Only when economic construction is developed will we be able to have a reliable material guarantee for national defense construction. The resolution of the 6th Plenary Session of the 11th CPC Central Committee pointed out that national defense construction should be commensurate with national economic construction. It is in accordance with this guiding principle that all army commanders and fighters, under the leadership of the CPC Central Committee Military Commission, conscientiously take the overall economic situation into consideration and resolutely support the decision of the party Central Committee and the State Council to reduce military spending. We are determined to do army work well, within the limited expenditures for national defense, and in the spirit of being responsible to the state and the army.

Comrade Hong Xuezhi continued: In the past 2 years, while alloting the budget, we have carefully and rationally planned our projects, according to our capability and in order of their importance and urgency, and resolutely eliminated nonessential capital construction projects. We have thus ensured funds for essential projects and spent the limited amount of funds in the most effective manner. Regarding management, we have mobilized the entire armed forces to make careful calculations and strict budgeting, practice economy, check warehouses and storage rooms to tap potential, resolutely cut nonproductive expenses, strictly follow the standardization system and strive to do more jobs properly and economically. Furthermore, we have mobilized the entire armed forces to develop production and, under the guidance of the state's economic planning, tried to enliven economic work in the military and create more material wealth for the state and the armed forces. Let me give you an example from our agricultural production and sideline occupations. Although certain areas were hit by serious drought and floods this year, the armed forces' grain output is still higher than that of last year. Economic diversification and multipurpose use of resources have also been developed. This has lessened the state's burden, made up the shortage of supply and improved the armymen's well-being.

While striving to ensure production of military supplies, military enterprises have also worked energetically to develop production of civilian goods. The gross output value of the first 9 months of this year was 4.1 percent higher than the same period last year. Thanks to these measures, what is essential for armed forces' operations, training, combat readiness and normal work has been ensured at a time when the defense budget has been cut. We have also settled certain problems left over from the chaotic decade, and the armymen's well-being has been substantially improved.

We could not help expressing our heartfelt respect after listening to Comrade Hong Xuezhi's briefing. It is really impressive that the measures he cited have achieved such remarkable success when the defense budget has been cut. Soon after we uttered our praise, Comrade Hong Xuezhi laughed heartily and said: Such measures were really not invented by us. They are simply a manifestation of our army's old tradition of self-reliance and arduous struggle in the new period.

Comrade Hong Xuezhi also repeatedly stressed: If there is any success to speak of, it is because of Comrade Xiaoping's fine leadership over the work of the Military Commission and because of the joint efforts of the broad masses of commanders and fighters. We in the Logistics Department have merely done what we should have done.

Comrade Hong Xuezhi was born in an impoverished peasant's family in the Dabie Mountain area of Jinzhai County in 1913. His parents died when he was still young. He had worked as a hired hand tending cattle and had been an apprentice. In 1929 he took part in a rebellion and joined the Red Army. Later, he served as a guerrilla fighter [words indistinct] and squad, platoon and company commander. He had been a political worker, served as a company political instructor as well as a regimental, divisional and corps political department director. In the military field, he had served as a military district commander and first deputy commander of a corps. During the war to resist U.S. aggression and aid Korea, when Marshal Peng Dehuai was commander in chief of the Chinese People's Volunteers, Comrade Hong Xuezhi was his deputy and concurrently commander of the logistics service. After returning home, he was appointed first deputy director, and later director, of the General Logistics Department. He held the post until 1959. During the following period lasting nearly 20 years, Comrade Hong Xuezhi's life was full of frustration and he suffered immensely from injustice. After the crushing of the gang of four, his mishandled case of injustice was completely redressed and he was reappointed to work in the General Logistics Department in 1980. We learned that Comrade Hong Xuezhi's revolutionary life of over half a century has been marked by integrity, outspokenness, loyalty to the party, and by practical and solid work.

Our conversations proceeded in a happy and relaxed atmosphere. When we realized that certain problems left over by history had been resolved, despite the cut in the defense budget, we expressed our interest in the General Logistics Department's past efforts in organizing combined investigation groups to solve the problems concerning the defense of the border and coastal areas. We asked: Why should such a large-scale investigation be conducted with such great determination?

Comrade Hong Xuezhi said frankly: After my return to the General Logistics Department, I felt that improvement of the work style of our administrative organs was highly important for strengthening the logistics service. After thorough study, the standing committee of the General Logistics Department party committee put forward a proposal, saying that 1/3 to 2/3 of the staff workers of the administrative organs must go down to work at the grassroots units. At that time, some comrades did not understand how that could be done. They maintained that they were already too busy with the work in the administrative organs to work at the grassroots units.

In fact, the busier the staff is with work in the administrative organs, the more disputes over trifles will be, the harder it is to resolve problems, and the old habits of doing things become even more difficult to change. To change the work style of our administrative organs, the staff must be sent to conduct investigations and study at the grassroots units.

The investigation at the border areas and offshore islands was conducted at a time when the administrative organs were engaged in the particularly busy work of streamlining and reorganizing themselves. But we were determined to carry out the project. Thus, with the comrades of the logistics departments of the miltiary regions and the naval and air force units concerned, 10 combined investigation groups, composed of hundreds of cadres, were formed and sent to conduct investigation and study at the grassroots units. The project lasted 6 months. Although a large number of staff workers were withdrawn from the administrative organs to work at the grassroots units for as long as 6 months, the administrative organs' operation was greatly enhanced, and not delayed. Facts prove that, if the leading authorities have put forward the great call of creating a new situation in all fields of socialist modernization, the issue of whether the leading organs and cadres are willing to investigate and study the actual situation at the grassroots units is not merely an issue regarding their method of work and work style, it is also an important issue concerning whether they are able to effectively combine the call of the party Central Committee with the actual situation at the grassroots units, and an important issue concerning whether their leadership meets the requirements of the new period and the new situation. Investigation and study is a fundamental requirement of the administrative organs and an important measure in creating a new situation. To boost the logistics service, the leading cadres must go down to work at the grassroots units. The investigation and study which was conducted at the border and coastal defense units was only the first step to creating the new situation. We are determined to continue to sum up our experience and institutionalize our practice so that this task can go on in an organized and planned manner and on a selective and long-term basis, and so that still greater contributions can be made to the building of a modern, regular and revolutionary army.

The topic of discussion then turned to how to create a new situation in the logistics field. After taking a sip of tea, Comrade Hong Xuezhi stood up, walked round for a short while, sat down beside us and then continued: A great part of our logistics service involves economic affairs in the military. Not only must it meet the requirements of military operations and modern warfare, it must also adapt itself to national economic development. This means that it must serve to coordinate the needs of military construction with our country's economic capabilities. When we consider how to strengthen the logistics service and create a new situation of logistics work, we must have a clear idea of the overall situation. He said: At present, our army has entered a new period of building itself into a modern, regular and revolutionary army, and the logistics service is an important part of the entire military operation and of the armed forces' fighting strength. What kind of logistics service should we provide in order to meet the requirements of building a modern, regular and revolutionary army is an issue we people in the logistics service must earnestly study and resolve.

Following the fast development in modern military science and technology, weapons and military equipment have become more and more advanced, the army has become more and more organized, the army's reliance on logistical support has become greater and greater, and it has imposed even stricter demands on the logistics department. Modern logistics work is definitely not a simple procedure of receiving and issuing supplies. The logistics department has a double duty of orgnaizing supplies and directing military operations.

If we still cling to our old thinking and fail to see the new problems and requirements which modern warfare and a modern army have posed for the logistics department, we will not be able to make progress in doing logistics work and ensure the prompt delivery of logistics supplies to the army in time of war. We may have to pay a heavy price for all this. It is under this situation that we propose to build a militant logistics department which can not only fight but also ensure victory in time of war, while keeping in mind the general target of building a modern, regular, revolutionary army.

Comrade Hong Xuezhi said: Recently, we held an all-army logistics work conference. Taking the guidelines laid down by the 12th CPC National Congress for our guide, we implemented the directives issued by the Central Military Commission and studied issues on how to create a new situation in logistics work. We were full of confidence at the conference. When he made this remark, he clenched his fists to show his confidence. The happy feelings of the old general deeply touched us. He pondered for a short period, twisting his pencil. He said: On the basis of the militant goal set by the 12th CPC National Congress and the guidelines laid down by the Central Military Commission in close connection with the actual situation in logistics work, we believe that while paying attention to the work of ensuring logistics supplies, we must carry out the following tasks well in order to create a new situation in doing logistics work:

1. Efforts must be made to reform the logistics system, simplify procedures and turn the logistics department into a highly efficient military organization.

2. It is necessary to strengthen education and training of the logistics cadres and build a contingent of cadres who are revolutionary, younger, more educated and professionally more competent.

3. It is essential to strengthen preparedness against war and raise the logistics department's capability in preparing for all eventualities.

4. Efforts must be made to strengthen operational measures in handling logistics affairs, set up scientific and regular rules and regulations and make the logistics operation systematic, scientific and regular.

5. It is essential to strengthen political and ideological work, and step up efforts in developing spiritual civilization in the field of logistics. We must conduct communist education on the basis of the guidelines laid down by the 12th CPC National Congress, help personnel working in logistics departments raise their political and ideological level, identify ourselves with the central government ideologically and politically, and resolutely implement the line, principles and instructions of the central government and the Central Military Commission. It is necessary to strengthen education against corruption, encourage healthy trends, combat unhealthy practices and resolutely strike at criminal activities in the economic sphere. In doing logistics work, we must adopt an overall point of view, strengthen praparedness against war, maintain close ties with the masses, implement the policy, observe discipline, and practice economy. We must give full play to the militant work style of doing logistics work rigorously, speedily, accurately and meticulously; adhere to principle; observe discipline and laws; perform our official duties honestly; work harder than ever before; and wholeheartedly serve the army and the task of strengthening preparedness against war.

Our conversation did not end until noon. When we bid farewell to Comrade Hong, he said, with profound feeling: The central government and the Central Military Commission are greatly concerned about logistics work. They have issued many important instructions regarding our work. We must carry out logistics work well under the guidance of the principles laid down by the 12th CPC National Congress, continuously create a new situation, and let the party Central Committee and the Central Military Commission feel at ease and let all the comrades in the army and all the people throughout the country rest easy.

CPC DISCIPLINE BODY HOLDS CHENGDU, XIAN FORUMS

OW081251 Beijing XINHUA Domestic Service in Chinese 1201 GMT 7 Dec 82

[Text] Beijing, 7 Dec (XINHUA) -- The CPC Central Commission for Discipline Inspection recently held a forum of southwest provinces (regions) on discipline inspection work in Chengdu Municipality and a forum of northwest provinces (regions) on discipline inspection work in Xian Municipality.

Han Tianshi, secretary of the Central Commission for Discipline Inspection, successively presided over and addressed the forums.

The forums concentrated on exchanging information and experiences on the struggle against grave criminal offenses in the economic sphere, the situation of the style of the party and the efforts to effect a fundamental turn for the better in the style of the party in various southwest and northwest provinces (regions). The forums also discussed the primary tasks of the commissions for discipline inspection for a period from now on.

The southwest and northwest provinces (regions), implementing the instructions of the central authorities, have made great achievements in waging struggles against grave criminal offenses in the economic sphere. They have investigated and handled a number of cases, struck powerful blows at those who committed serious economic crimes, prevented some economic crimes and redeemed a number of cadres. They have greatly helped improve the style of the party, the general mood of the people and the public order and begun to gain some experience of the struggle. At the forums, the participants analyzed the situation of the struggles in the southwest regions.

They held: Although great achievements have been made, there are still many backward units in the struggle. Particularly, the struggles waged by some units directly under provincial (regional), prefectural and county authorities and some enterprises directly under central departments and provincial (regional) authorities are not good enough. At present, there are two problems that obstruct the deepening of the struggles. First some leading cadres' insufficiently understand the great significance of the struggle against grave criminal offenses in the economic sphere. Second, a slack mood exists among some cadres. For instance, some cadres think that the struggle has been "just about enough."

The forums emphasized: The party committees at all levels should organize the leading cadres at various levels to study and understand the guidelines of the 12th CPC National Congress, know the importance, protracted nature and imperativeness of the struggle firmly strengthen their leadership, overcome various resistances and concentrate their time and energy to deepen the struggle.

The forum also studied how to correct unhealthy tendencies and strive for a turn for the better in the style of the party, and made relevant arrangements.

RENMIN RIBAO ON URBAN COLLECTIVE ECONOMY

HK090326 Beijing RENMIN RIBAO in Chinese 8 Dec 82 p 2

[Editorial: "Boldly Develop the Collective Economy in Cities and Towns"]

[Text] In recent years, the state has adopted a policy of actively supporting the collective economy in cities and towns. This has resulted in the corresponding development of the collective economy. According to statistics, the number of staff members and workers employed in collective enterprises in cities and towns throughout the country now amounts to 25.68 million, an increase of 5.2 million persons over 1978 and accounting for 23.5 percent of the total number of staff members and workers throughout the country. The collective economy has become an important force that should not be ignored in the national economy.

Due to the long-term influence of "leftist" guiding ideology, a few comrades still lack an ample understanding of the importance and urgency of developing the collective economy in cities and towns. Some comrades are still skeptical about the collective economy and even go so far as to interfere in or restrict it. Some comrades hold that the collective economy is an "elementary" form of public ownership. They always try to bring collective enterprises in line with the "pattern" run by the government and, at the mere rustle of leaves in the wind, they will make an example of the collective enterprises by toppling a number of them. Under these circumstances, it is very important to continuously eliminate the influence of "leftist" ideology and attain a unified understanding of guiding ideology.

Has the collective economy been sufficiently developed? Take Beijing for example. The proportion of the collective economy (not including the big collectives) is still very small. Judging from the total turnover of social commodities, it accounted for only 5.5 percent in 1980, 6 percent in 1981, and about 7 percent this year. In the catering trade, the business proportion of the collective catering trade accounted for 40 percent of the entire trade in the city in 1956. It had dropped to 6 percent in 1974. Although it developed to some extent in 1981, it still accounted for only 16 percent of total trade. Thus it can be seen that the collective economy should still be developed relatively faster and to a greater extent.

Does the collective economy have a dubious future? A review of history shows that the collective economy has taken a tortuous path. The period from post-liberation to 1957 witnessed the first great development; starting from 1958, under the guidance of "leftist" ideology, most of the collective enterprises were "upgraded" and "amalgamated" and then "accomplished the transition" into state-run enterprises; in early 1960's, following the readjustment of the national economy, the collective economy attained the second great development; during the "Cultural Revolution," the collective economy again suffered destruction and a great many enterprises were again "upgraded" and changed into state-run enterprises. The result was that the networks of collective enterprises decreased drastically, which has brought great inconvenience to the masses of people in the basic necessities of life such as food, clothing, shelter, transportation and so on. Although the collective economy has undergone several ordeals, it has not disappeared. It has managed to survive tenaciously. This shows that the collective economy has demonstrated its immense superiority; it is set up at a great many points covering a large area; it is scattered all over the place and operates on a small scale; it is flexible, mobile and highly adaptable. It assumes sole responsibility for its profits or losses and practices the system of distribution according to work, thus avoiding the malpractice of "eating from the same pot and receiving equal benefits." It does things simply and thriftily, requires little investment and is therefore in a position to employ more manpower. It is precisely due to these superiorities that it displays such vitality. It has very bright prospects.

Does it constitute a retrogression to develop the collective economy? First of all, it is necessary to make clear what we mean by progress and what we mean by retrogression. With respect to changes in the relations of production, all relations of production that liberate the productive forces and promote the development of productive forces are progressive. Conversely, those that surpass the level of development of the productive forces under the name of "productive forces" are retrogressive. In actual economic life, the collective economy is full of vitality in its operation because it practices independent accounting and assumes sole responsibility for its profits or losses. In some enterprises under collective ownership, the staff and workers take great pains to build up enterprises, serve customers solicitously and thus win the welcome of the broad sections of consumers. A few small state-run factories, retail shops and restaurants have attained marked results after they have been contracted to the staff and workers for collective management. They assume sole responsibility for their profits or losses and deliver profits to the state in the form of taxes. Thus it can be seen that developing the collective economy does not constitute retrogression but real progress.

The level of development of the productive forces in our country is still low and uneven and the needs of the people in their livelihood differ in thousands of ways. This determines that it is necessary to maintain the state, the collective and the individual economy for a long time to come. Only with the rational disposition and development of diversified economic elements will it be possible to promote economic prosperity and facilitate the people in their livelihood. As a basic form of socialist economy, the collective economy is indispensable. In the future, job opportunities in cities and towns will primarily come from the collective and individual economies. Without a relatively developed collective economy in cities and towns and without an appropriate amount of individual economy, it is impossible for China's economy to develop soundly. It is precisely an important feature of the Chinese-style socialist economy to rely mainly on the state economy and supplement it with the collective and individual economy.

At present, in order to speed up the development of collective economy, it is imperative to emancipate the mind, strengthen leadership and make overall plans and all-round arrangements. It is necessary to resolutely put an end to acts of discriminating, restricting, vilifying and swallowing up the collective economy and substitute them with the policies and measures of supporting, guiding, encouraging and promoting the collective economy. Practical efforts should be made to solve the problem of excessive economic burdens sustained by the collective economy. No department or individual is allowed to indiscriminately transfer, embezzle, swallow up or privately divide up the capital and goods of collective enterprises under any pretext, or to transfer the labor force of the collective enterprises without any compensation. It is necessary for collective enterprises to conscientiously implement the principle of voluntary association, sole responsibility for profits or losses, distribution according to work and democratic management, step up ideological education toward staff and workers and strictly practice the economic responsibility system. At the same time, it is also necessary to penetratingly study and promptly solve some specific problems concerning policies for consolidating and developing the collective economy so that they can play an increasing role in the national economy.

ZHOU YANG ON POLICY TOWARD INTELLECTUALS

HK090801 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 2

[Unattributed report: "Comrade Zhou Yang Speaks to Reporters, Stresses Need To Firmly Implement Policy Toward Intellectuals and Uphold the 'Double-Hundred' Principle"]

[Text] On the morning of 4 December, reporter Du Sikun of the Central People's Broadcasting Station and reporters Lan Ling and Zheng Ronglai of RENMIN RIBAO called on CPPCC Standing Committee Member Comrade Zhou Yang who was then attending the Fifth Session of the Fifth CPPCC. The reporters asked him for his views on the further implementation of the policy toward intellectuals.

Comrade Zhou Yang said: This is indeed a very important question. Both the NPC and the CPPCC have this time placed particularly strong emphasis on the question of education, science and education, the question of intellectuals and the question of capable people and have also regarded them as a great strategic task and a fundamental measure for the building of a high level of socialist material civilization and spiritual civilization of the whole party at present to be brought before the whole party and people throughout the country.

Comrade Zhou Yang said: In his report to the NPC, Comrade Zhao Ziyang hopes that all units with intellectuals can further correct their understanding of intellectuals, conscientiously implement the policy toward intellectuals and allow them free rein to display their aspirations for building the socialist motherland. Apart from this, the people who definitely possess organizational ability and are suitable for holding administrative and leading posts, we must allow to devote themselves wholeheartedly to their own specialized line of work. Comrade Zhao Ziyang expresses deep sorrow over the unfortunate early death of promising middle-age scientists Jiang Zhuying and Luo Jianfu (here, comrade Zhou Yang wept and paused for a long time unable to speak); he has highly praised Comrade Sun Yefang, who -- though seriously ill -- still shows concern for the cause of socialist construction and offers many very good suggestions on the question of how to carry out the technical transformation of our existing enterprises. This is an important call as well as a great encouragement that warms the hearts of the people and inspires fighting will.

Comrade Zhou Yang said: Comrade Deng Xiaoping has brilliantly set forth the party's policy toward intellectuals. He said, "We are not without capable people. The question is whether or not we can properly organize and make use of them, arouse their enthusiasm and give full play to their professional knowledge or skill." He said that there are capable people everywhere. The question is how to boldly select, employ and train them. We must cherish capable people and use them in a rational manner. We must have a plan for allowing the rational circulation of capable people so that they can give full play to their ability.

Comrade Zhou Yang said: Comrade Nie Rongzhen has even more clearly pointed out that the cause of socialist construction must rely on the workers, peasants and intellectuals, for they are the three basic forces of our country. When he said that the four modernizations cannot succeed without intellectuals, he spoke with curt finality.

The reporters asked Comrade Zhou Yang for his view on the question of how to further implement the "double-hundred" policy, initiate a new situation in literary and art creation, and promote the flourishing development of socialist literature and art. Comrade Zhou Yang began by discussing the talk given by Comrade Chen Yun on the question of economy. He said: Comrade Chen Yun has stated that our country is now faced with the magnificent task of a major revolution and a major construction and has pointed out how to correctly link up the tasks of major revolution and construction of the whole country with the minor revolution and construction of the localities.

Our economy is livening up and remarkable results have been achieved. We must continue to liven it up and definitely cannot let it die down. He also pointed out that the livening up of the economy must be carried out under planned guidance, and not divorced from the planned guidance of the state. "Letting a hundred flowers blossom" must also be conducted within the confines of socialism. The building of socialism is an undertaking of the broad masses of people and without the consciousness, enthusiasm and creativity of the masses in their millions nothing can be done. Only by fully arousing the enthusiasm and creativity of the scientific and literary and art workers can our scientific, educational, cultural and artistic undertakings really become invigorated. We must allow their wisdom and imagination to freely take flight. The problem is, we must guide their flight in the correct direction along the orientation in keeping with the interests of the people. We must not squeeze them to death, and we must also not let them fly away and disappear without a trace. Deviating from socialist orientation and always thinking in terms of money is pure and simple liberalization and we must oppose it. This requires us to do a great deal of practical and difficult work. This is also our responsibility.

In conclusion Comrade Zhou Yang said: I wish to say something about attaching importance to the border regions and minority nationalities regions. This is an infinitely vast area with extremely rich resources that has, however, not been properly developed. Some comrades have suggested that we should pay attention to developing and building up the northwest. I think that this is correct. They say that people only want to go to the developed regions of the southeast and are unwilling to go to regions where conditions are more difficult. Some who have gone there also want to return. There is a saying: "The peacock flies to the southeast and the water of the river flows eastward." This situation should be changed. We must create more and better conditions because of this.

RENMIN RIBAO ON PREJUDICE TOWARD INTELLECTUALS

HK090952 Beijing RENMIN RIBAO in Chinese 7 Dec 82 p 5

[Article by Luo Zhufeng [5012 4554 7685]: "It Is Imperative To Fight Against the Prejudice of Discriminating Against Intellectuals"]

[Text] We often say "labor created the world." But how did we understand this viewpoint in the past? It usually referred to manual labor and such a viewpoint is a prejudice. The correct way to understand this viewpoint is that it must include mental labor. It is also necessary to correctly understand the phrase: "Knowledge is strength." Knowledge comes from practice and the latter naturally includes the two areas of physical strength and intelligence. Intellectuals mainly engage in mental labor, that is to say, they are serving the people and society mainly with their intelligence.

Strictly speaking, without the assiduous labor of intellectuals, it would be difficult to carry out revolution. Would it be possible to disseminate Marxism-Leninism in China without the introduction of this theory by the older generation of the proletarian revolutionaries? The key reason for the victory of the Chinese revolution is the integration of the universal truth of Marxism with the practice of the Chinese revolution. Comrades Mao Zedong, Zhou Enlai, Liu Shaoqi and Zhu De opened up this road of integration and completed this task and they each were persons of great learning. The accomplishments made by intellectuals can in no way be belittled. On the contrary, they must be recorded in letters of gold.

During the period of the war of resistance against Japan, Comrade Mao Zedong put forth the question of coordination between armed struggles and cultural struggles and expounded the relations between these two areas. He also stressed the importance of intellectuals. He pointed out that the problem was not that there were too many intellectuals but that there were too few. He pointed that it was imperative to absorb tens of millions of intellectuals into the revolutionary ranks so as to strengthen the force against Japanese aggression. It shows that intellectuals are also very important even during times of war.

From the beginning of the new democratic revolution and into socialist revolution and socialist construction, up to the march toward the more grand goal of communism, we can in no way depart from the joint efforts of the broad masses of workers and peasants and intellectuals. At the present stage, in particular, when the modernization program is being carried out in our country, it has become more urgent to fully display the talent and wisdom of intellectuals so as to accomplish this arduous and glorious historical task. The end result of the modernization program is to realize material civilization and spiritual civilization and these two goals complement and condition each other. Nor will it be possible to build material civilization or spiritual civilization without the labor of intellectuals. Communist ideology is formed on the basis of inheriting and developing the fine cultural wealth of mankind while intellectuals have shouldered important tasks in the process of building socialist spiritual civilization with a communist ideology as the core.

And yet we have traversed a tortuous path in dealing with such a major question that should be treated conscientiously. The prejudice of discriminating against intellectuals is a common phenomenon; it is just like an iceberg that is changing, disappearing and reappearing amid the waves of the oceans. In the early 1960's, Comrade Zhou Enlai suggested that we "take off our hat in respect" for intellectuals. If we correctly handle this question from that moment on and thus put an end to the situation in which intellectuals are in a dilemma, in difficulties trying to make progress with heavy burdens and living an extremely unhappy life, the contributions made by intellectuals in our socialist construction will no doubt be much greater. It is a pity that in this aspect we let time slip by without accomplishing anything and for quite a long period we have hesitated in solving this problem. The prejudice against intellectuals developed into an almost obsessive position during the "Great Cultural Revolution." Zhang Cunqiao and Yao Wenuuan and their like brazenly advocated a slogan, saying that "the more the intellectuals there are, the more reactionary they become" and consequently the violence of discriminating against, attacking, persecuting and trampling upon intellectuals was at its height during this period.

Comrade Hu Yaobang pointed out in his report to the 12th party congress: "Because of 'leftist' thinking and the bondage of the concept of small-scale production, in the past, the wrong concept of despising education, science and culture and discriminating against intellectuals generally existed within our party for quite a long time. Such an attitude has seriously hampered the building of material and spiritual civilization in our country." In its effort to restore order and thoroughly change this situation, the CPC Central Committee has taken a series of effective measures since the 3d Plenary Session of the 11th CPC Central Committee to reinstate intellectuals, implement policies and correct in a big way the prejudice of discriminating against intellectuals. Good achievements have been made in this work. Yet we must understand that the influence of "leftist" thinking is far from eliminated. In the past and at present, there are still some people who are proud of posing themselves as "uneducated, rough-and-ready fellows" and it seems to them that the lower their cultural level, the more firm their revolutionary will. This attitude represents an abnormal psyche of neglecting culture and discrimination against intellectuals. We must understand that the lack of culture is a "scar" of the era and we can in no way praise this situation; otherwise how can we understand the pure motive of such lovely persons as Lei Feng and others who are so eager to study culture in their effort to make up for their "lack of culture?"

The thinking of discriminating against intellectuals comes from the theory of the unique importance of class origin. Most of the intellectuals of the older generation are not from worker-peasant families and consequently they have been regarded as petty bourgeoisie or bourgeoisie and naturally they have been treated as needing to be reformed. Eventually, some people have all along grasped the formula of "uniting, educating and reforming" and they have been particularly interested in the concept of "reforming," which they have constantly kept in their mind. Such a formula was necessary in the early days of liberation or under particular historical conditions. At that time most intellectuals were from the old society and therefore inevitably they were tainted with certain filth. But after more than 30 years of study and work, these intellectuals of the older generation have become basic members of the socialist society, just like workers and peasants. The intellectuals trained by ourselves since the founding of New China not only have the same consciousness as workers and peasants -- they were born in New China and have grown under the red flag -- but their so-called class origin is also different from that of the intellectuals who entered from the old society in the early liberation days because of the changes of class relations. What are the reasons then to constantly use the incantation, "reform", as the golden hoop against intellectuals?

Another reason for discrimination against intellectuals is a wariness of them. That is to say, intellectuals are not treated as friends. On the contrary, they have been put into the position of "dissidents". Eventually, there has appeared a thinking to "control" and "reform" them. Such a prejudice has resulted in unjust treatment; all achievements are related to workers and peasants while intellectuals are held responsible for all shortcomings and mistakes. Contributions made in certain technical reforms in industrial production are attributed to workers, without mentioning technicians, as if they did not exist. In the field of literature and art, there is also a saying: "Leadership puts forth the thinking, the masses provide reference material through their life and writers are just to write." All this means nothing but to negate the roles of intellectuals. Such deeds and concepts are not only unjust but also wrong and they will naturally and seriously influence the initiative of intellectuals.

Today it is not only intellectuals that have to be reformed; we cannot tighten the screw on the pretext of a world outlook that has not been reformed well. It is not only intellectuals whose world outlook is yet to be reformed, but also communists. Does it not mean that to reform the party work style is a kind of reform of party members?

Since our grand goal is communism, we cannot say that we have left nothing to be desired. To speak from this point, it is naturally a golden saying when we say it is necessary to keep on learning and reforming as long as we live.

The 12th party congress stressed the importance of simultaneously grasping material civilization and spiritual civilization. These two tasks penetrate and promote each other and consequently it is imperative for intellectuals to display their roles. It will not be possible to build material civilization without science and culture. We would not be able to launch satellites without research achievements made by nuclear physicists and other scientists; nor would it be easier to develop fine species of agricultural crops without experiements and guidance by agroscientists. Would it be possible for hundreds of millions of youths and teenagers to grow up without the education and nurturing of tens of millions of teachers? Cultural education is an effective weapon for improving people's morality and changing their social habit, while the true "soul engineers" represent an indispensable basic strength for building a modern socialist country with high civilization and high democracy and therefore they must be respected by society.

For this purpose, we must create a social atmosphere in which intellectuals are respected and we must fight against all prejudices of discriminating against intellectuals. We must understand this question from the strategic point of the socialist modernization program, and it must be measured from that point whether or not we are conscientiously implementing the program of the 12th party congress. To stress the importance now of fighting against the prejudice of discriminating against intellectuals is totally in the interest of the people and socialism; it is also in the interest of the party.

Such struggle may be protracted. People's ideological inertia often consciously or unconsciously hinders great changes in history and this situation is often termed as "bad old practices die hard." Therefore it is necessary to have the spirit of carrying out "tenacious" and protracted "war".

PROVINCES RECORD INCREASES IN GRAIN OUTPUT

HK090832 Beijing RENMIN RIBAO in Chinese 8 Dec 82 p 1

[Unattributed report: "Seven Provinces Record Increase in Grain Output"]

[Text] Shandong, Jilin, Jiangsu, Zhejiang, Shaanxi, Hebei and Shanxi Provinces have recorded increases in grain output this year.

Despite the reduction of more than 8 million mu of grain fields and the reduction of more than 900 million jin of summer grain due to the drought, Shandong's total grain output this year still reached more than 47 billion jin, an increase of about 1 billion jin over last year.

In Jilin, an important commodity grain base in China, drought was conquered and the total grain output reached 18.87 billion jin, which is an increase of 430 million jin over 1981, a year of bumper harvest.

Jiangsu Province has recorded a continuous increase of grain output season after season. The total grain output this year reached 52.2 billion jin, which is an increase of more than 6 billion jin, or 12.1 percent over last year.

The total grain output in Zhejiang Province this year reached 31.4 billion jin, which is an increase of more than 4.7 billion jin or 15 percent over last year and is an all time high.

In Shaanxi Province, the total grain output was more than 17.9 billion jin, an increase of 19.3 percent over last year.

Hebei's total grain output reached 33 billion jin, an increase of 8.5 percent over last year.

The total grain output in Shanxi was 16.5 billion jin, which is an increase of 500 million jin over the previous historical high in 1979.

CHRISTIAN COUNCIL PRESIDENT VIEWS CONSTITUTION

HK090547 Beijing CHINA DAILY in English 9 Dec 82 p 4

[By Li Xing: "Constitution Guarantees Religious Belief"]

[Text] Chinese Christians welcome the new constitution, Bishop K.H. Ting, principal of Nanjing Theological College and president of the China Christian Council, said in an interview with CHINA DAILY. They are especially pleased by the change in working of the statement on freedom of religious beliefs and the support given by the constitution to the independence of Chinese churches, Ting said.

"It took more than two years for the committee on the revision of the constitution to work out the new one," he said. "The whole period was a very good process of consultation. The committee paid attention to suggestions of religious groups and accepted them."

Ting, who is also chairman of China Three-Self Movement, said that the constitution's stipulation that "religious bodies and religious affairs are not subject to any foreign domination" approves and lends support to the Chinese Christians' movement for self-government, self-reliance and self-propagation.

He explained that early in the century, some Christians began to advocate the three-selfs. "They realized that Christianity could hardly take root in China unless it did away with its foreign image," he said.

He said that for a long time, people regarded Christianity as a foreign religion. It came with colonial expansion. Western churches took China as the largest mission field and spent a lot of money. "But they won few converts," the bishop said.

By 1949, there were about 700,000 Protestants in the country after 100 years of preaching by foreign missionaries. He quoted an old saying: "One more Christian, one fewer Chinese."

Council

After liberation, the Chinese Christians under Dr Y.G. Wu started the Three-Self Movement. They have tried to make the religion more Chinese. In the last 33 years, the number of Protestants has increased to more than two million. "Protestantism in China entered into its post-denominational stage in the 1960's," the chairman of the movement said.

The China Christian Council was set up in 1980. Since then, the council has published one million Chinese Bibles of the 1919 version.

More than 700 Protestant churches, which were closed during the "Cultural Revolution," have been reopened thus far. "There are many small groups of Christians who are worshipping in homes and they are under the care of the Three-Self Movement," he said.

Besides Nanjing Theological College, theological training centres have been founded in two other cities.

There are 72 students now in Nanjing Theological College and 40 per cent are women. The average age of the students is 25. "Theological students are similar to students in other colleges," said Ting, the principal. "Besides theological studies, they take courses in music, painting, literature, and English. They like to play volleyball and take part in other kinds of activities."

The Christian Council is compiling a Chinese hymnal, which will be ready next year. One hundred of its 400 hymns are entirely Chinese in both music and words.

As to the future of Christianity in China, Ting said that he was confident that it will become more and more Chinese. Sinicizing will continue and more people will want to know what Christianity is all about, although Christianity will most likely remain a minority religion in China, he said.

On the invitation of the archbishop of Canterbury, Bishop K.H. Ting recently headed a Chinese Christian delegation to visit the United Kingdom and then to tour to the Republic of Ireland, the Federal Republic of Germany, Sweden and Kenya.

"I feel the visits were successful," Ting said. "We were warmly welcomed wherever we went. Many people attended our lectures and sermons."

But he said the visit to Kenya was the most significant. "The visit was historical," he said. "For the first time, our churches have set up relations with the churches in Africa. The established contacts will help Chinese churches and African churches to support each other and co-operate with each other."

CHINA DAILY EXAMINES STATUS OF DAIRY INDUSTRY

HK090551 Beijing CHINA DAILY in English 9 Dec 82 p 3

[By "our staff reporter" Jiang Lei: "Dairy Cattle Thrive at Heartening Pace"]

[Text] Milk cows are becoming firmly established in China; they have been bred at a quickening pace since 1979, an average increase of more than 10 per cent annually.

In 1978, the country had some 470,000 fine-bred head of dairy cattle. The number reached 700,000 in 1981. And another big increase is expected this year.

They are raised by state farms, collectives or individual families. Recently individual and collective raising have grown rapidly owing to the government's encouragement of family sideline production.

In Heilongjiang Province, 2,200 families raise a total of 25,000 cows — and their number is increasing.

Two-thirds of the dairy cattle are raised near big cities. In 1981, Beijing had 24,126, Shanghai 29,913 and Tianjin 9,207. The three make up nearly 10 per cent of the total for the country. Now all the big and medium-sized cities across the country have set up their own dairy industries.

But more and more small cities and counties have started raising cows. There are more than 100,000 head of dairy cattle in Heilongjiang Province — its Anda County alone has 15,000 head. Most of the counties along the railway lines linking Harbin and Manchouli in the province have become dairy bases which not only produce milk but also turn out all kinds of milk products.

In 1981, China set up more than 300 dairy factories turning out 79,000 tons of milk products.

China has been trying to improve the quality of its milk cows in the past few years and has achieved satisfactory results. Scientific breeding and artificial insemination have helped.

Milk cows in Beijing, Tianjin and Shenyang can all produce an average of 5,000 kilograms of milk annually, while in Shanghai the yield is as high as 7,000 kilograms.

But in general, China's dairy industry is still weak. The number of its milk cows still needs to be increased and their quality be improved so as to ease the shortage of milk and milk products in the big cities.

China sees it as important to import some fine breeds of foreign cows to help improve the quality of its native cattle.

GEOLOGY MINISTER DISCUSSES MINERAL RESOURCES

OW090852 Beijing XINHUA in English 0700 GMT 9 Dec 82

[Text] Beijing, December 9 (XINHUA) -- The mineral resources China needs to fulfil its plan up to 1990 have been largely located, and work has started to look for new deposits necessary for its economic development in the last decade of the century.

In an interview with XINHUA today, Minister of Geology and Minerals Sun Daguang said China has enough minerals, with only a few exceptions, to meet the needs of its modernization drive. The reserves are so rich that a great variety of minerals can be exported. "The survey of energy resources now tops the list on the ministry's working schedule," he said. All kinds of minerals known in the world have been found in China and the amount of reserves has been verified for some 140 varieties of them, the minister said.

A nationwide survey of the distant prospects of coal resources will be completed before 1990, except for some far-off border areas. This will provide scientific data for a long-term development program of the coal industry, Sun Daguang said.

Intensive prospecting will be conducted in a number of big mining areas in eastern China to find more workable reserves to ease the energy supply in that part of the country.

China's crude oil output increased rapidly for two decades following the discovery of the Daqing oilfield toward the end of the 1950's, but lingered at 100 million tons in recent years. Sun Daguang said the main problem lies with the work of surveying and prospecting, which has lagged behind the need.

"The prospects for oil are good," he said.

Geological surveys show that there are more than 300 promising sedimentary basins with a total area of 4.5 million square kilometers. In addition, there are 1.2 million square kilometers of continental shelf where the long-term oil-gas prospects are very good. A rough estimate shows that China's oil reserves range from 30 to 60 billion tons.

Sun Daguang said efforts will be made to quicken the pace of surveying for more oil reserves in eastern and central China, step up the geological survey in the Tarim, Junggar and Caidam Basins in western China, and solve the technical problems in the geological and physical survey of carbonate rock areas in the south.

He expected a new development in China's petroleum production in the late 1980's.

China will also strengthen its cooperation with foreign companies in opening up the continental shelf and off-shore areas where the oil-gas prospects are good, he said.

Geological survey of non-ferrous metals, precious metals and non-metal minerals will be intensified, the minister said. By the end of the century, China's production of non-ferrous metals will triple the present output, he said.

YANG SHANGKUN COMMENDS BEIJING PLA UNIT

OW052222 Beijing Domestic Service in Mandarin 2340 GMT 29 Nov 82

[Excerpts] Under the leadership of the party committee at the higher level, cadres and fighters of a certain PLA division stationed in Tianjin have made great contributions to the project of diverting water from the Luan He to Tianjin, one of China's major projects now under construction.

They have created a new situation in fulfilling the task of digging a tunnel. Yang Shangkun, permanent vice chairman of the Military Commission of the CPC Central Committee, recently paid an inspection tour to this construction unit and pointed out: There are two reasons why the commanders and fighters participating in the project of diverting water from the Luan He to Tianjin has achieved such good results. They relied on revolutionary enthusiasm on the one hand and on the scientific approach on the other.

On 15 May, 1981, a meeting was in full swing at the Tianjin municipal guest house which was surrounded with green bamboos and willows. The meeting was called by the State Council to discuss how to solve Tianjin's water shortage problem. Responsible comrades of the Tianjin Municipal CPC Committee and Municipal People's Government made reports in rather worried tones. Vice Premier Wan Li suddenly stood up, walked up to the center of the conference room, made a gesture and expressed his views. Experts in water conservation, geology, engineering and finance from all over the country aired their views. Many experts were gathered together to discuss the water shortage problem. Tianjin Municipality, China's second largest industrial city with a population of 7.7 million people, was faced with the severest water shortage problem of the past half century. Water, water! Who can do without water!

After careful consideration, the party Central Committee and the State Council finally decided on the strategic policy of diverting the water of Luan He originated in (Bayantukuer) of the Zhangjiakuo area into Tianjin through the (Panjiakuo) dam in the Tangshan area and through the (Dapeiqin) dam in the lower reaches of the river.

The key to the success of this bold project was whether the project digging a tunnel for diverting water could be completed on schedule. The tunnel starts from the lower part of the (Dapeiqing) dam, goes through the watershed and reaches the (Zhagaodian) village in Zunhua County.

(Yan Dongmao), commander of a certain PLA army unit stationed in Tianjin Municipality, courageously volunteered to take up this task with support from the party committee of the Beijing PLA units. Commanders and fighters resolutely said that they would definately fulfill the task in order to bring benefits to the people of Tianjin Municipality.

The whole project of diverting water from the Luan He to Tianjin is just like a game of chess. The progress of the tunnelling project is of great importance to the whole project. The Tianjin municipal command of the project to divert the water of the Luan He to Tianjin has worked out a plan to channel the water once the tunnel is completed.

During the 12 CPC National Congress, Comrade Hu Yaobang mentioned the project to divert water from the Luan He to Tianjin at the panel discussions. Comrade Wan Li held several talks with leading comrades of Tianjin Municipality and repeatedly stressed that the project should be completed speedily, with good quality, and economically.

At present, cadres and fighters of the division are working untiringly shoulder to shoulder with other fraternal units and broad masses of workers and hand in hand with the people of Tianjin Municipality so that the water can be smoothly diverted through the tunnel to Tianjin on National Day next year.

CAAC OFFICIAL ON ROUTE, AIRPORT EXPANSION PLANS

OW071351 Beijing XINHUA in English 1253 GMT 7 Dec 82

[Text] Beijing, December 7 (XINHUA) -- China plans to open international air routes to Southeast Asia and Oceania in the next three years, Shen Tu, director general of the Civil Aviation Administration of China, said today.

In due course, the airlines will provide air service from China to both north and west Africa, to complete the country's international air route network, he said.

He said China's civil aviation should be developed rapidly along with the development of the national economy and foreign relations.

Shen Tu made his remarks at the current CAAC's planning meeting now in session in Beijing. As for the regional flights to Hong Kong, Shen said, CAAC will continue to operate chartered flights from Chengdu, Fuzhou, Guilin, Xian to Hong Kong while offering scheduled flights from Beijing, Hangzhou, Guangzhou, Kunming, Shanghai and Tianjin to Hong Kong.

In the next three years, he said, CAAC will provide air service to all large cities and major medium-sized cities in China, and particularly increase flights from Beijing, Shanghai and Guangzhou as well as tourist areas and outlying regions.

CAAC plans to purchase a number of long and medium range carriers and about 100 planes for industrial and agricultural purposes between 1983 and 1990 in order to meet the needs of China's civil aviation development and national modernization program, he said.

The CAAC director said China plans to expand five domestic airports in Changsha, Chengdu, Dalian, Kunming and Hohhot and build airports and open new air routes in tourist areas and regions where returned overseas Chinese live, including Chongan in Fujian Province and Wenzhou in Zhejiang Province.

CAAC's total passenger, cargo and mail loads will go up from 429 million ton/kilometers in 1980 to 650 million tons/kilometers in 1983, and 800 million tons/kilometers in 1985, he said.

OCEANGOING FLEET EXPANDS CAPACITY, ROUTES

OW040920 Beijing XINHUA in English 0700 GMT 4 Dec 82

[Text] Beijing, December 4 (XINHUA) -- China's oceangoing fleet's cargo shipping capacity has been expanded 45 times in the past 21 years, reaching 10 million tons this year, the China Ocean Shipping Company (COSCO) said today.

The company has 552 ocean-going vessels, including roll-on and roll-off, container and general cargo ships, bulk carriers, oil tankers, refrigerator ships and passenger vessels.

This year, China opened two new container shipping routes to both the east and west coasts of the United States and increased regular container ship service on international shipping routes from north China to West Europe and West Africa.

A COSCO official told XINHUA: "The company has opened direct regular shipping services between China and the Democratic People's Republic of Korea, Japan, Southeast Asia, the Persian Gulf, the Red Sea, the Mediterranean, Europe, Africa, the Americas and Oceania. China's oceangoing vessels call at 425 harbors in more than 100 countries and regions."

Founded in April 1961, the China Ocean Shipping Company had then only 28 vessels with a capacity of 220,000 tons, which traveled to 13 harbors in seven countries of Southeast Asia. Most of China's export goods were then handled by chartered ships.

From January to October this year, COSCO's fleet shipped a total of 35.13 million tons of cargo and is expected to carry 42 million tons of cargo by the end of the year, said the official. Last year the fleet carried 41.53 million tons.

Up to November this year, China has concluded ocean shipping agreements with 32 countries. COSCO has offices or representatives in Australia, Belgium, Britain, Egypt, Japan, the Netherlands and West Germany.

The Ministry of Communications said recently that China's ocean shipping fleet should be modernized and upgraded with various types of vessels. The fleet's shipping capacity should be raised to 20 million tons by 1990 to meet the growing needs of a fast developing national economy and increased foreign trade, it said.

By the end of this century, the fleet is expected to have a shipping capacity of 30 million tons, the ministry said.

CHEN PIXIAN ON MATERIALS FOR LEGAL EDUCATION

OW060035 Beijing XINHUA Domestic Service in Chinese 1518 GMT 3 Dec 82

[Text] Beijing, 3 Dec (XINHUA) -- At today's meeting on the complation of teaching materials for legal education Chen Pixian, member of the CPC Central Committee Secretariat said: On the basis of the guidelines laid down by the 12th CPC National Congress on further improving the socialist legal system, we must offer education courses on the legal system in various types of schools. Therefore, the compilation and writing of teaching materials for training, education and propaganda work are essential.

Chen Pixian said: Under the solicitude of the party Central Committee, specialists, scholars, professors and lecturers have compiled and written teaching materials, totaling more than 17 million words, within a short period of a little over 2 years. Their achievements are tremendous, and they have rendered highly meritorious service to legal education and propaganda work on the legal system. He hoped that those who are engaged in compiling and writing such teaching materials would work ceaselessly and unremittingly on what has already been achieved, and fulfill their task of compiling and writing the teaching materials on time and in high quality.

Chen Pixian said: In compiling and writing teaching materials for legal education, it is essential to uphold the four fundamental principles, and on the basis of the new constitution which will be adopted soon, to make the basic guidelines and specific stipulations in the constitution a part of the teaching materials. It is necessary to maintain close touch with reality, conduct investigation and study in the course of practice, proceed from actual conditions and from those problems needing to be solved in practice, and strive to write more teaching materials on legal education with distinguishing Chinese features.

The meeting was sponsored by the Ministry of Justice and the editorial department for compiling and writing of teaching materials on legal education under the Ministry of Education. Liu Fuzhi, minister of justice, presided over the meeting. Attending the meeting were Yang Xiufeng, honorary president of the law society; Jiang Hua, president of the Supreme People's Court; and others. Wang Min, chief editor of the editorial department for compiling and writing teaching materials on legal education, made a report on the work being done by the editorial department.

Those who spoke at the meeting included Jiang Hua; Peng Peiyun, vice president of education; Wang Tieya, chief editor of "International Law" and professor of Beijing University; He Chunchao, chief editor of "History of International Relations" and assistant professor at the Beijing No 2 Foreign Language Institute; We Jiali, chief editor of "Study of Constitution" and vice president of Ningxia University; and Gao Mingxuan, chief editor of "Science on Criminal Law" and assistant professor of the People's University of China.

HU QILI ATTENDS NATIONAL ARCHIVES CONFERENCE

OW070639 Beijing XINHUA Domestic Service in Chinese 0908 GMT 4 Dec 82

[Excerpts] Beijing, 4 Dec (XINHUA) -- This reporter has learned from the national archives work conference, which opened today, that China is gradually opening historic archives to the public to serve socialist modernization. There are currently more than 2,500 archive halls of different levels and categories in our country, keeping large quantities of precious historic archives. In the meantime, various government organs, mass organizations and enterprises and business units have also set up and perfected document-filing and archives management systems to make available for the first time a more comprehensive set of archives by category.

With the development of the economy, the formulation of developmental plans and the compilation of specialized and local histories, the archives departments are now playing a large role in providing more and more archives, especially those on scientific and technological subjects.

In order to make the archives serve socialist modernization even better, many archives halls have installed modern equipment for protecting, reproducing and micro-filming archives. To exchange experience in archives work and activities, some departments concerned have put out magazines, such as ARCHIVES WORK and HISTORIC ARCHIVES. At present, archives departments at all levels are actively engaged in collection, compilation and categorizing archives, and have introduced many ways to provide archives in the service of socialist modernization.

Attending the conference were Hu Qili, member of the Secretariat of the CPC Central Committee; and responsible persons from other departments concerned Yang Hanzhong, Kang Yimin, Wang Fulin, Zeng San, Yu Guangyuan and Li Qi.

FUJIAN IMPLEMENTS HU YAOBANG'S INSTRUCTIONS

OW031215 Fuzhou FUJIAN RIBAO in Chinese 18 Nov 82 p 1

[Excerpts] The Standing Committee of the Fujian Provincial CPC Committee held a plenary meeting yesterday to earnestly discuss the question of implementing the instructions that Comrade Hu Yaobang, general secretary of the CPC Central Committee, had given during his inspection tour of this province. The meeting was attended by leading comrades from the provincial CPC committee, the standing committee of the provincial people's congress, the provincial government as well as various departments, and comissions and offices concerned. This meeting followed the one of secretaries of prefectural and municipal party committees which was held on 8 and 9 November.

The meeting unanimously pointed out: Comrade Hu Yaobang fully affirmed the achievements of the work of our province since the 3rd Plenary Session of the 11th CPC Central Committee, particularly during the last 1-2 years, and expressed the hope that Fujian would march in the van of the program of four modernizations. This is a great stimulus to the cadres, armymen and civilians in our province and has further increased their determination and confidence in creating a new sitaution of work on their respective fronts.

In discussions, the participants held that in order to implement Comrade Hu Yaobang's instructions, continued efforts should be made to eliminate the "left" influence so that the mind would be further emancipated and thus become more resourceful. Fujian has great potentials for further exploiting its mountain, sea and land resources for better utilization of its leadership and for striving for solid results in building small hydroelectric power projects; in breeding aquatics; in carrying out the policy of opening to the world and enlivening the economy; in correcting the frameups, false charges and wrong verdicts; in promoting spiritual civilization; and in strengthening the unity between the army and the people.

With regard to mobilizing the masses to run electric power projects, the participants pointed out the need to take a more active attitude in this regard and to carry out the principles of having the people run electric power projects with government assistance, using the revenue earned to support the operations of such projects and considering the needs of both production and people's livelihood so as to achieve a relatively high level of electrification of the Chinese style. In developing education in mountain areas and training competent workers for construction in those areas, they said, it is imperative to get rid of the old habits and conventions so as to change the long backwardness of mountain areas in culture and education.

In addition, the participants pointed out: We should dare to do [illegible]hing that we believe is in the interest of creating a new situation of the work o[illegible] [illegible]our modernizations in Fujian. When we meet with difficulties and obstructions in our work, we should courageously step forward to overcome them instead of worrying about this or that. As to the problems encountered in the areas of resturcturing of organizations, education in science and flow of commodities, we should earnestly study them and work out solutions.

The meeting also asked all units, departments and localities to seriously discuss how to implement Comrade Hu Yaobang's instructions while studying the documents of the 12th CPC National Congress and make suggestions for creating a new situation of their work. Discussions on this subject will be continued by the provincial CPC committee in the future.

FUJIAN HOLDS TELEPHONE CONFERENCE ON SECURITY

OW052045 Fuzhou FUJIAN RIBAO in Chinese 24 Nov 82 p 1

[Excerpts] The political and legal affairs commission under the Fujian Provincial CPC Committee called a telephone conference on the evening of 23 November to make arrangements for the public security work in the coming winter and next spring. The conference urged party committees and political and legal affairs departments at various levels to take immediate action and adopt effective measures for public security in the winter and spring.

Hu Hong, permanent secretary of the provincial CPC committee, spoke at the conference. Also speaking at the conference were responsible persons of the provincial public security department, people's procuratorate, higher people's court and judicial and civil affairs departments. Responsible party and government leaders from various provincial departments, municipalities and prefectures attended the conference.

Comrade Hu Hong said: Our province has achieved noticeable progress in consolidating social order in recent years and the public security work has improved considerably. Compared with the same period last year, the crime rate in the first 10 months of this year declined by 29.2 percent, including an 11.5 percent decrease in major criminal cases. However, problems remain. We must fully understand the urgency and protracted time required for consolidating social order, make great efforts and pay keen attention to the work. Especially in view of the new year and spring festival period, we must take effective measures to reinforce public order. It is necessary to penetratingly study the documents of the 12th CPC National Congress, continue to implement the guidelines of the national and the provincial political and judicial work conferences and recent telephone conference called by the central commission of politics and law, and pay keen and timely attention to the work in all fields. In light of the reality in Fujian, it is necessary to pay attention to the public security work in the following three fields in the winter and spring.

1. It is necessary to swiftly and severely punish major crimes offenders caught on the spot.

2. It is necessary to formulate a comprehensive program to combat crime with the security responsibility system as the main content.

3. Party committees must pay attention to and strengthen the leadership over the work.

SHANDONG'S BAI RUBING VIEWS SIXTH 5-YEAR PLAN

SK080939 Jinan Shandong Provincial Service in Mandarin 2300 GMT 7 Dec 82

[Text] According to a XINHUA report reprinted in DAZHONG RIBAO, in a panel discussion for the Shandong provincial delegation to the Fifth Session of the Fifth NPC, Bai Rubing, a deputy to the NPC and first secretary of the provincial CPC committee, said: Having listened to Premier Zhao Ziyang's report on the Sixth 5-Year Plan, I find that the tasks and measures for the near future have become more clear, confidence in fulfilling the strategic object set forth by the 12th party congress has become stronger and the sense of urgency and responsibility in work has become more solid.

Bai Rubing said: Our confidence in fulfilling the quadrupling goal and the Sixth 5-Year Plan is based on three reliable bases. First, the past. We have had the same growth rate as that called for by the quadrupling goal. Second, we have solid material and technical foundations and rich natural resources.

Third, viewed from a political angle, since the 3d plenary session of the 11th party Central Committee, leading bodies at all levels have further strengthened unity and all people in the province have been in high spirits, shown no differences in understanding and have acted in unison. Meanwhile, through implementing the principle of readjusting the national economy, leaders at all levels have accumulated much experience in economic work.

After making a concrete analysis of these three bases, Bai Rubing said: Having confidence and a foundation is not tantamount to turning something into reality. An important thing is concentrating our efforts on the present work while keeping long-term interests in view. We should, in line with the measures set forth in Premier Zhao Ziyang's report on the Sixth 5-Year Plan, pay more attention to work in the latter 3 years, especially 1983. To this end, Comrade Bai Rubing put forward some tentative plans as follows:

1. Further straighten out our guiding ideology in agriculture, persist in the simultaneous development of agriculture, forestry and animal husbandry and in the integration of agriculture, industry and commerce and vigorously develop the diversified economy, processing industry, transportation and marketing. Over the past few years, the province's agricultural front has adopted three steps, one after another: 1) in Yantai Prefecture and some other localities whose economic base is relatively good, great efforts have been made to develop the diversified economy while continuing to develop grain production; 2) in the four prefectures in western and northern parts of the province, efforts have been made to bring about an upswing in cotton production so as to solve the long-standing problem of the semi-paralysed economy; 3) beginning this year, we have comprehensively developed the mountainous areas that account for over 40 percent of the total acreage of the province. Achievements have already been scored in these three steps. The fourth step is to march towards the utilization of water areas and seek wealth from oceans, lakes, rivers and reservoirs.

2. Resolutely open a new situatuion in the circulation of industrial products. In developing industry, stress should be put on the following four fields: 1) Continually pay attention to trades and enterprises which are under readjustment and pay attention to product mix and the improvement of economic results. 2) Pay special attention to enterprise readjustment. 3) Vigorously perfect the economic responsibility system. 4) Concentrate efforts on technical transformation to adopt the path of first tapping potential and then making technical progress. In the circulation of industrial products, another four methods should be stressed. 1) Expand in a planned manner the retail sales of daily necessities, catering trade, repair trade, service trade and [words indistinct] run by collectives and individuals. 2) Contract the state-run medium-sized and small commercial projects to collectives or individuals. 3) Gradually change the rural grassroots supply and marketing cooperatives into collective commerce. 4) Allow collectives and individuals to transport and market their goods.

3. Pay attention to energy resources and foreign trade. Solving the energy shortage should depend on exploitation and conservation. We should make full use of the province's relatively rich resources of coal to vigorously build small coalpits to increase production and utilize energy resources well. Those localities with the right conditions should build small hydropower stations through their own efforts and should run and utilize these stations themselves. At the same time, they should try every means to conserve energy resources. In addition, we should make full use of our province's favorable conditions for developing foreign trade to vigorously develop such trade.

4. Speed up the development of an intellectual force and the training of competent persons. We should accelerate the popularization of middle and primary school education, transform educational structure and vigorously develop secondary professional education. Some senior middle schools should be changed to vocational senior middle schools. In the coming few years, only one regular middle school can be retained in each of the various counties in rural areas and the rest should be changed to vocational schools of various kinds. By 1985, the number of vocational senior middle schools is projected to increase from the present 27 percent to 50 percent of the total. At present, the most urgent thing is to further implement the policy towards intellectuals. The province should conduct a reexamination in this work and strive to solve intellectuals' practical problems in study, work and livelihood so as to bring their initiative into full play.

5. Pay attention to the readjustment of and installation of personnel in leading bodies. Those comrades who have strong party spirit, a high educational level and good professional knowledge and who are in the prime of life should be promoted to leading bodies at all levels. Reorganization of leading bodies of organs directly under the provincial people's government should by completed around the spring festival and that of organs at prefectural and municipal levels should be completed in the coming spring.

Bai Rubing said in full confidence: Since the 3d plenary session of the 11th party Central Committee, 19 counties and 614 communes have quadrupled their industrial and agricultural output value in 4 years. Now that we have a correct leadership of the party Central Committee, such good policies of the party Central Committee, such a good new constitution and such a good Sixth 5-Year Plan, the only thing that remains for all people in the province is to work hard so as to win a victory step by step.

SHANGHAI'S CHEN GUODONG ON PUBLIC SECURITY WORK

OW060101 Shanghai City Service in Mandarin 1130 GMT 29 Nov 82

[Excerpt] On the morning of 29 November, the Shanghai municipal party committee convened a cadres meeting at the Shanghai exhibition hall and made arrangements for public security work in the coming winter-spring period. At the meeting, Chen Guodong, first secretary of the Shanghai party committee, first relayed the full text of the important speech given by Comrade Chen Pixian, member of the CPC Central Committee Secretariat in charge of political and legal affairs, at a telephone conference convened by the political and legal affairs committee of the CPC Central Committee on 18 November. Comrade Chen Guodong also made an important speech on how Shanghai should further implement the guidelines of the telephone conference, particularly on how to fully arouse the initiative and enthusiasm of the vast numbers of cadres, Communist Party members and the masses to form a powerful army of security-safeguarding activists to strengthen security work at factories, enterprises and grassroots units. At the meeting, Yang Di, vice mayor and director of the municipal public security bureau, Chen Tinghuai, deputy chief procurator of the municipal people's procuratorate, Guan Zizhan, president of the municipal higher people's court, (Wang Zhuangxiao), deputy director of the municipal bureau of justice, and (Sun Chengguo), deputy director of the municipal civil affairs bureau, separately voiced their opinions on how to properly carry out public security work in the coming winter-spring period in accordance with the guidelines of the telephone conference. Wang Kai, deputy commissar of the Shanghai Garrison district, also spoke at the meeting.

Wang Jian, deputy chief of the municipal party committee's political and legal affairs leading group, chaired and addressed the meeting. He stressed: Party committees at all levels should fully understand the importance of this telephone conference and, according to the 12th party congress' guidelines, fully realize that the coming winter-spring period is a starting point for bringing about a fundamental turn for the better in public security and the social atmosphere. Therefore, if we start with successful public security work it will have an important effect on bringing about the "three fundamental turns for the better."

ZHEJIANG'S TIE YING ADDRESSES MILITARY MEETING

OW052211 Hangzhou ZHEJIANG RIBAO in Chinese 20 Nov 82 p 1

[Excerpts] The Seventh CPC Congress of the Zhejiang Military District was ceremoniously held in Hangzhou from 15 to 19 November. Comrade Tie Ying delivered an opening speech. On behalf of the provincial military district party committee, Comrade Luo Qingtao made a work report entitled "Follow the Guidance of the 12th Party Congress' Guidelines, Strive To Create a New Situation in Army and Militia Building in the Provincial Military District." Comrade Kang Mingcai delivered the closing speech.

After reviewing the course of struggle in the 13 years since the sixth party congress of the provincial military district was held in December 1969, the provincial military district party committee's work report said: During the 10 years of internal disorder, instructed by the Lin Biao and Jiang Qing counterrevolutionary cliques, the factional forces of Zhejiang directed their spearhead against the provincial military district and brought serious disaster to it. Party organizations at all levels and the broad masses of party members, commanders and fighters of the provincial military district repeatedly waged fierce struggles against the factional forces and withstood rigorous temperings and tests. Most comrades were firm and clear-cut in their stand during the struggle and displayed their high-level political consciousness and firm adherence to principles. After the smashing of the "gang of four," particularly since the 3d Plenary Session of the 11th CPC Central Committee, the broad masses of party members, commanders and fighters of the provincial military district have done away with all obstacles and interferences, thoroughly carried out the struggle to expose and criticize the Lin Biao and Jiang Qing counterrevolutionary cliques, investigated the people and incidents connected with the cliques' conspiratorial activities, implemented the party's line, principles and policies, effected a switch in work emphasis and scored marked results in preparedness against war, training and other work of army units.

During the session, after carrying out full discussions, all delegates unanimously endorsed the work reports of the provincial military district party committee and of the committee's commission for discipline inspection. The Seventh CPC Committee of the Zhejiang Provincial Military District and the committee's commission for discipline inspection were elected by the congress after full deliberations in accordance with the requirements of the new party constitution.

GUANGDONG CIRCULAR URGES STUDYING CONSTITUTION

HK080723 Guangzhou Guangdong Provincial Service in Mandarin 2350 GMT 7 Dec 82

[Text] The Guangdong Provincial CPC Committee issued a circular today on seriously studying and publicizing the PRC constitution.

The circular reads: The provincial CPC committee holds that party committees at all levels must attach great importance to and earnestly do a good job in publicizing the constitution and carrying out education in this respect. We must carry out an extensive and thoroughgoing education on the legal system through publicizing the constitution among the people. We must endeavor to help everybody understand the constitution and foster the mentality and habit of observing and safeguarding the constitution.

The circular puts forth the following requirements:

1. All party members, leading cadres at all levels in particular, must take the lead in studying and publicizing the new constitution, play an examplary role in implementing and observing the constitution and struggle against acts undermining the constitution.

2. Integrate the study of the new constitution with that of the 12th CPC National Congress documents. At present, concentrate a little more time on the study of the former. Organize sufficient people to publicize the constitution among the masses.

3. Newspapers, publications, cultural organizations, radio, television and other units and means of propaganda must make great effort in publicizing the new constitution and good deeds and people in observing and safeguarding the constitution.

GUANGXI COUNTY LEADERS RESIST CENTRAL INSPECTION

HK090709 Nanning Guangxi Regional Service in Mandarin 1130 GMT 7 Dec 82

[Excerpts] After the CPC Central Committee and the State Council issued the urgent circular on stopping the random felling of trees, some leaders in Wuming County deliberately concealed the fact that they had violated this directive and refused to correct their mistakes. When they knew that the inspection groups sent by the Central Commission for Discipline Inspection and the regional authorities would come to their county, they ordered the masses to hide the lumber which had been gathered by random felling of trees.

The county leaders' deceptive action and their resistant attitude toward the inspection of the central and regional authorities aroused anger and resentment among the masses and cadres. They exposed and denounced this evil practice to the inspection groups. The inspection groups took it seriously and immediately made investigations. The regional party committee and people's government have indicated that they will seriously deal with this case as soon as possible.

HAINAN PLA COMMENDS PROGRESSIVES IN PRODUCTION

HK070803 Haikou Hainan Island Service in Mandarin 0330 GMT 7 Dec 82

[Text] On the afternoon of 5 December, the agricultural and sideline production summing up and commendation rally of the Hainan Military District commended 13 advanced units and 11 advanced individuals in agricultural and sideline production. Since the beginning of this year, the units of the Hainan Military District have reaped an all-round bumper harvest in agricultural and sideline production, including grain, sugarcane, meat and vegetables.

Among the advanced units and individuals who were commended at this time were some old progressives who have done well in agricultural and sideline production for many years and some who are new typical examples who have changed their backward outlook over recent years. At the rally they introduced their experiences in doing well in agricultural and sideline production.

At the commendation rally, Jiang Hai, commander of the Hainan Military District, and (Sun Fengzhang), deputy commander, spoke, demanding: All PLA units must strive to attain and exceed local levels in the production of grain, sugarcane, meat, vegetables and other industrial crops next year. The PLA units' rate of self-sufficiency in vegetables must reach about 80 percent and the profits of their farms must increase by 100 percent. The PLA units must make new contributions toward lightening people's burdens and pressure on the market, improving their livelihood and guaranteeing the fulfillment of their training task for preparing against war and other tasks.

HENAN HOLDS CONFERENCE ON WORK CONCERNING WOMEN

HK091008 Zhengzhou Henan Provincial Service in Mandarin 1100 GMT 7 Dec 82

[Text] The conference on work concerning women in rural grassroots units which was held by the Henan Provincial Women's Federation concluded in Zhengzhou on 5 December. The conference conveyed the spirit of the national conference on work concerning women in rural grassroots units and of the forum of six provinces which was held by the All China Women's Federation. The conference exchanged work concerning women in the rural grassroots units in our province and of protecting the legal rights of women and children.

Vice Governor Cui Guanghua attended the conference and made a report on the new rural situation. (Peng Yifeng), chairman of the provincial women's federation, made a summing-up report. Comrade (Peng Yifeng) stressed: Work concerning women in rural grassroots units must include continuously doing well in grasping the study and publicity of the spirit of the 12th party congress and completely understanding Comrade Hu Yaobang's important statement on work concerning women, which is contained in the report. In the new situation, we must continue to do work concerning women well. We must penetratingly unfold the five good family activities and build spiritual civilization with communist ideology as the core. In close coordination with relevant departments, we must universally conduct publicity of and education in the legal system resolutely strike blows at the criminal activities of ruining and persecuting women and children, really protect the legal rights of women and children and do well in grasping the readjustment and building of grassroots women's organizations.

Directors or deputy directors of all prefectural and municipal women's federations who are in charge of work concerning women in rural areas and cadres of some county and commune women's federations attended the conference.

GUIZHOU'S CHI BIQING ADDRESSES WORK CONFERENCE

OW031213 Beijing XINHUA Domestic Service in Chinese 0705 GMT 1 Dec 82

[Text] Guiyang, 1 Dec (XINHUA) -- At a recently held provincial party committee work conference, Chi Biqing, first secretary of the Guizhou Provincial CPC Committee, said that leading cadres at various levels should be pioneers and not "door bars," on the march to implement the guidelines of the 12th party congress and build socialism with Chinese characteristics.

Chi Biqing said: To create a new situation in socialist modernization in Guizhou, the key lies in emancipating the mind and boldly carrying out reforms.

After citing the difficulties and criticisms confronting some households engaged in two or more occupations, key households, households engaged in individual farming or households jointly engaged in a specialized line of production in their development, he pointed out: Some comrades are hampered by ideas of small-scale peasant economy and contented with a "full stomach" and have no desire to reform and advance. Some departments and some leading cadres use old conventions and patterns to judge the new things and new experiences emerging in the process of reforms, forbid people to do this or that and do not allow some people and units to become prosperous first. Some cadres in provincial-level organizations still think they should take care of everything and suppress the masses' creativeness.

Chi Biqing said: Without emancipating our minds we cannot move a single step toward reform. Emancipating the mind means having the courage to break through the shackles of old conventions and patterns, adhering to the principle of seeking truth from facts and respecting the masses' initiative. New things should be supported, helped and guided and must not be opposed, suppressed and strangled. In dealing with talented people who have made outstanding contributions and important suggestions, we should boldly promote them to leading posts at various levels and in various departments. On the premise of adhering to the four fundamental principles and giving consideration to the interests of the state, the collective and the individual, and under the guidance of state plans, all pioneering work and people that can contribute to the high-speed development of a commodity economy should be firmly supported. All well-considered reform plans should be firmly implemented, and conscientious efforts should be made to sum up experiences and popularize them.

XIZANG'S YIN FATANG ATTENDS MEMORIAL SERVICE

HK220633 Lhasa Xizang Regional Service in Mandarin 1130 GMT 21 Nov 82

[Summary] On 17 November 3,000 representatives of the Xizang regional organs, Xizang Military District and Lhasa municipal organs held a memorial service for Yang Dongsheng, vice chairman of the State Nationalities Affairs Commission, chairman of the Xizang Regional People's Congress Standing Committee and Standing Committee member of the National CPPCC Committee, who died of illness in Beijing on 13 November. Also present at the service were regional party, government and army leaders Yin Fatang, Yangling Duoji, Redi, (Zhang Xiangmin), Yang Zongxin, (Tao Xu), Duojie Caidan and Xia Chuan. Among the organizations sending wreaths were the Xizang offices in Beijing, Shanghai, Chengdu and Xian.

YUNNAN'S AN PINGSHENG ADDRESSES CPC MEETING

HK100732 Kunming Yunnan Provincial Service in Mandarin 1100 GMT 9 Nov 82

[Text] Comrade An Pingsheng, first secretary of Yunnan Provincial CPC Committee, delivered a report on five problems at the fifth enlarged meeting of the third provincial CPC committee.

First, review and prospects of economic construction. Comrade An Pingsheng said: Since the downfall of the gang of four and particularly since the 3d Plenary Session of the 11th CPC Central Committee, the party organizations at various levels of our province have led all the party members and the people of various nationalities in gradually shifting the focus of our work toward economic construction. The entire economic work has achieved marked results. The serious imbalance of proportion in the national economy has been readjusted and the speed of development has been accelerated. The total output value of industry and agriculture of the whole province from 1977 to 1981 has increased by an average of 10.5 percent annually. Economic returns are increasing. We have passed the most difficult period in the economy. The national economy has stepped on the path of steady and normal development. By the end of this century, the annual total output value of industry and agriculture of our province must also be quadrupled.

Second, grasping agriculture well remains a primary task. Comrade An Pingsheng said: Our rural population covers 89 percent of the whole province. Eighty-five percent of the consumer goods of the people come from agriculture and the processing industry of agricultural and sideline products. Over 80 percent of the raw material of light industry also comes from agriculture. Over 60 percent of exported goods are agricultural or processed goods. These facts show that agriculture occupies a decisive position in the economy of our province. Provided agriculture is promoted, the entire national economy will have a reliable base and the standard of our life will be improved. Leading comrades of the party, government and concerned departments of the whole province must raise their consciousness in this respect.

Third, constantly improving our management level and carrying out technical transformation on the basis of relying on the existing industry is the main channel in developing industry. Comrade An Pingsheng said: By relying on the existing industrial base, we must constantly improve our management level and carry out technical transformation. This is the main channel in developing our industrial production. The key for quadrupling and developing industry in the first 10 years is to give full play to the potentials of the existing industrial enterprises and accelerate our speed under the prerequisite of attaining better economic results.

Fourth, create a new situation in the fields of finance, commerce and banking. Comrade An Pingsheng said: Since the 3d Plenary Session of the 11th CPC Central Committee, there have been new developments in the collective economy in cities and towns and in rural enterprises, but it is not perfect enough in general. Yunnan is located in the border region, has a vast territory and is multinational. The development of economy and culture in various localities in Yunnan also differs greatly. The basis of our collective economy is weak and its proportion low. Due to these conditions, it is necessary to accelerate the speed of collective economy in the future and give priority to it. We must grasp it as a strategic task. We must also create a new situation in the fields of finance, commerce and banking.

Fifth, it is necessary to lay stress on the work of education, science and technology. Comrade An Pingsheng said: Yunnan is rich in natural resources, but the level of our economic development is not high enough. One of the important reasons is that our science and education have been in a backward situation for a long time. Without developed education there can be no developed science and economy. It is imperative for the party committees and responsible comrades of the party and government at various levels of our province to realize the importance and urgency of this problem at a strategic level.

We must earnestly regard education and science as a fundamental link in economic development, firmly grasp it well and create a new situation in the fields of education and science.

Finally, Comrade An Pingsheng also spoke on family planning. He said: It is a basic policy of our country to practice family planning and improve the quality of our population. This is a matter of prime importance that concerns the building of a high level of socialist spiritual and material civilization. The key to controlling population in our province is to grasp the family planning work well in rural areas. Party committees and governments at various levels must grasp this work for a long time.

Session Concludes 18 Nov

HK200606 Kunming Yunnan Provincial Service in Mandarin 1100 GMT 19 Nov 82

[Excerpts] The Fifth Enlarged Plenary Session of the Third Yunnan Provincial CPC Committee concluded in Kunming on 18 November. The closing session adopted a resolution pointing out: This enlarged plenary session has listened to Comrade Liu Minghui's report conveying the spirit of the 12th party congress and has further studied and discussed the congress documents. The participants unanimously express loyal support for the 12th party congress resolutions and pledge to resolutely implement them.

The session agreed with the work reports delivered by Comrades An Pingsheng and Li Qiming on behalf of the provincial CPC committee standing committee. The session held: Since the 3d plenary session of the 11th Central Committee, relying on the party organizations, party members and people of all nationalities in the province, the provincial CPC committee has seriously implemented the line, principles and policies laid down by the CPC Central Committee and scored notable success in all work. The province has made very great progress in building socialist material and spiritual civilization, in the building of socialist democracy and legal system and in party building. Thus an excellent foundation has been laid for further development in the future.

The future task is, under the guidance of the 12th party congress spirit, to enhance ideology, unify understanding and, in connection with Yunnan reality, mobilize and organize the people of all nationalities in the province to create a new situation in all fields of socialist modernization. The key to accomplishing this great task lies in promoting economic construction and party building. So long as we continue to embrace revolutionary spirit, making unstinting efforts and do not relax a single day in grasping work in the next few years, the province will certainly be able to accomplish the great target of quadrupling total annual industrial and agricultural output value by the end of the century.

The session called on the party organizations throughout the province to lead the whole body of party members and CYL members, together with the masses of all nationalities, to study and implement the 12th party congress documents in depth and thus further emancipate the mind, be bold in reform, forge ahead step by step by proceeding from the province's realities, fulfill outstandingly well the work tasks proposed by this session and strive for fundamental turns for the better in financial and economic conditions, in social mood and in party work style in the next 5 years. In this way the province's economy may develop, nationality unity strengthen, people's living standards improve and border defense be more consolidated every year, and Yunnan can be built into a prosperous new border region making new contributions to China's socialist modernization.

Comrade An Pingsheng outlined the tasks for this winter and next spring at the concluding session.

YUNNAN ISSUES CIRCULAR ON ACHIEVING OBJECTIVES

HK080354 Kunming Yunnan Provincial Service in Mandarin 1100 GMT 7 Dec 82

[Excerpts] Yesterday the Yunnan Provincial CPC Committee and the provincial people's government issued a circular requiring all localities and departments throughout the province to use 3 months, up to February next year, to carry out a mass discussion on the way to achieve the grand objective set forth by the 12th party congress. This discussion should be carried out in leading organs at all levels and grassroots units in urban and rural areas.

The circular said: This mass discussion is the continuation to a deeper degree of the study of implementation of the 12th congress spirit in this province. People must connect this discussion closely with their actual thinking and work, sum up experience and lessons, overcome and correct ideological tendencies which are at variance with the 12th congress spirit, boost their confidence, morale and spirits, work hard, further enhance their consciousness in implementing principles and policies adopted by the 12th congress and make due contributions to achieving the grand objective set forth by the congress.

The circular required that, through this discussion, all localities and units should work out their long-term plans for social and economic development which are in accordance with their actual situation and are practicable. It is necessary to carry out a discussion of the question of what we shall do, when the whole nation is striving to quadruple the output value under the guidance of the 12th congress documents, to mobilize the masses and further emancipate our minds. People should be asked to suggest ways and means for the realization of the great objective.

The circular said: This mass discussion should not only work out long-term plans, but should also place stress on the current work. Localities and departments should carefully review and analyze their work this year, discover the most prominent contradictions and weak links in their work and concentrate their efforts on effecting measures down to the grassroots units for the fulfillment of next year's economic plans, first doing a good job in industrial and agricultural production this winter and next spring. Effective organization work should be done to achieve a continued growth of industrial and agricultural production next year.

BRIEFS

XIZANG AGRICULTURAL STOCKRAISING MEETING -- Lasting for 7 days, the regional conference on the popularization of technology in agriculture and animal husbandry concluded on the afternoon of 1 December. At the conference, the regional agricultural and animal husbandry department and the regional peasants' association awarded certificates of merit and bonus to those advanced individuals and collectives having made remarkable contributions to the popularization of technology in agriculture and animal husbandry this year. (Hu Shongjie), deputy director of the regional agricultural and animal husbandry department and deputy director of the council of the regional peasants' association, assigned the 10 major tasks of agricultural production and animal husbandry for this winter and next year, which included further improving the production responsibility system for agriculture and animal husbandry, properly carrying out resistance against natural disasters, vigorously promoting tree planting, carrying out pilot projects of mechanization of agriculture and animal husbandry in Nedong and Damxung Counties and so on. (Hu Shongjie) also talked about the work of the peasants' association for next year in principle. [Lhasa Xizang Regional Service in Mandarin 1130 GMT 2 Dec 82 HK]

HEBEI DETAILS ADMINISTRATIVE RESTRUCTURING PLANS

HK300601 Shijiazhuang HEBEI RIBAO in Chinese 20 Nov 82 pp 1, 3

[Unattributed report: "Provincial CPC Committee Holds Meeting of Responsible Persons of Provincial Organs To Mobilize and Do a Good Job in Administrative Restructuring of the Provincial Organs"]

[Text] The Hebei Provincial CPC Committee held a mobilization meeting on the morning of 18 November to restructure the provincial level party and government organs. Zhang Shuguang, secretary of the Standing Committee of the provincial CPC committee presided over the meeting. Liu Bingyan, secretary of the provincial CPC committee and acting governor delivered a mobilization report and Gao Yang, first secretary of the provincial CPC committee made a speech.

The principal comrades in charge of the provincial CPC committee, the Standing Committee of the provincial people's congress, the provincial government, the provincial political consultative conference and the various provincial level departments, commissions and bureaus, in all over 360 people, attended the meeting.

In his mobilization report, Comrade Liu Bingyan pointed out: The restructuring of administrative organs is a major strategic decision issued by the CPC Central Committee in accordance with the entire situation. It is an important subject in implementing the spirit of the 12th CPC Congress and a most important task for the present situation that brooks no delay. He said: At present, in the provincial level party and government organs, there exist the problems of departments existing in great numbers, complexity in the division of labor, levels overlapping, too many links, aged and overstaffed leadership groups and so on. Moreover the party and government, the government and enterprises and the government and institution are not separate from each other. Due to the existence of the above defects, the phenomena of unclear responsibility, disputing over trifles, documents traveling from one department to another, slowness in doing things and low work efficiency have developed. All these have encouraged the growth of bureaucraticism, red tape and other pernicious habits. If we do not conduct such restructuring, it would be empty talk to accomplish the tasks of the 12th CPC Congress and open a new situation in all fields of socialist modernization in Hebei Province. We must fundamentally deepen our understanding of the necessity and urgency of the restructuring and profoundly realize that it is the objective demand of historical development and a serious historical task to abolish the system of holding lifelong leadership posts and organize well the cooperation and replacement of old and new cadres.

After expounding the great significance of administrative restructuring, Comrade Liu Bingyan said: In accordance with the spirit of the 12th CPC Congress and the principles and demands of the CPC Central Committee, the provincial CPC committee has decided that the administrative restructuring of our province must be firmly grasped and that it is "better to be in front than to lag behind and better to be early than to be late." The administrative restructuring of the provincial level party and government organs will start in November and be finished by next March. The restructuring of various prefectures and municipalities will be carried out in succession and finished before next June. The restructuring of county and commune levels will follow on the basis of accomplishing the restructuring work of the provincial, prefectural and municipal levels. The whole work is to be completed by early 1984. The present administrative restructuring covers two aspects: 1) to simplify administration and raise working efficiency; 2) to restructure the cadre system and cadre ranks.

How can we properly carry out the administrative restructuring in the provincial level organs? In his speech, Comrade Liu Bingyan stressed the following points:

1. In order to simplify the provincial level organs, we must consider that the setting up of an organization should accord with the organizations of the CPC Central Committee and the State Council and also be closely linked to the practical conditions of our province. It will not be necessary for the lower level to be geared to the higher level. Overlapping organizations must be removed, those business that are similar must be merged and irrational installations must be readjusted. It is imperative to resolutely change the situation of a multilevel leadership system and departments existing in great numbers and also change the state of the party and government, the government and enterprises, and the government and institutions not being separated. In the light of the above principles, the tentative plan is as follows: The working organs of the provincial CPC committee will be simplified from the present 12 to 7, a reduction of 41.7 percent and the working organs of the provincial government will be simplified from the present 70 to 44, a reduction of 37.1 percent.

There is one point that merits our attention, namely that the present government structure is "over blown" and must be "deflated." The comrades seriously considered further simplification and whether the present government organization could be reduced to under 40 in number. This is quite possible. We must combat the idea that "the more people that handle affairs the better" and oppose the opinion that leadership bodies should be enlarged and more organs be set up for the sake of strengthening leadership and the scientific division of work. Government administration must be efficient, flexible in command, firm in work style, quick in reflection and high in efficiency.

2. On the basis of simplifying the administration, it is necessary to rationally assign the range of responsibility and the limits of authority of various departments. There must be rules and regulations laid down for the responsibilities each organ, the sort of affairs they handle, the number of people allowed in their office and the relationship between departments, so that they know their duty, responsibility and authority. How can the internal administration of each department be restructured? The assignment of duty and relationships between offices must also be considered and properly solved. Each unit must work out a system of personal responsibility, strict assessment and reward and punishment for the working personnel of the organ, and thoroughly change the phenomenon of working or being idle, good or bad service all meriting the same treatment.

3. The key link for administrative restructuring is to select cadres according to their political integrity and ability, equip and build well capable leadership bodies. According to the range of their duties and tasks, the departments, commissions and bureaus should have one head with one deputy head or with two to three deputy heads, but not more than four and their age should not exceed 60. The office levels should have one head or one head and one deputy head, but not more than two deputy heads. We must carefully chose talented personnel so that our cadre ranks will be more capable. According to the demands of more revolutionary, younger in average age, better educated and more professionally competent cadres, it is necessary to select large numbers of cadres who have both ability and political integrity and who are in the prime of life to the various leadership posts as early as possible, so that the situation of aging leadership bodies can be conspicuously changed and we can make a decisive step in replacing the old with the new. It is important to withdraw from leadership bodies but it is more important to select people into the leadership bodies. We must be steady in withdrawing and good in entering, but we must never allow the "five kinds of people" to be selected into the leadership bodies. Those of this category who have already entered the leadership bodies must be thoroughly cleared out. In consideration of the present condition of the cadre ranks and the transition necessary for replacement, some old cadres who are at their posts may remain in office for a period after approval, even though their ages may be a bit high.

4. The retirement and withdrawal of old cadres to the second line must be appropriately arranged. We must conscientiously implement the policies and stipulations of the CPC Central Committee on arranging old cadres and make the retirement and the withdrawal of these cadres to the second line a system. There are a substantial number of cadres at the provincial level who have reached or exceeded retirement age. Among these old cadres, some will be arranged as advisors or hold honorary posts but more comrades will retire. We must appropriately arrange and care for these old comrades and also pay attention to giving full play to their role so that they can continue to make contributions to the prosperity and long-term stability of our country.

In the process of adminstrative restructuring, one of the decisive factors that ensures the victory of this revolution is to have full confidence and rely on old cadres and bring their active role into full play. Old cadres must actively help the building up of new leadership bodies and make new contributions for the revolution. They must become advisors who know and make good use of people, and select large numbers of outstanding young and middle-aged cadres to leading posts. They must enthusiastically greet young and middle-aged cadres who have lower qualifications and less experience than themselves and believe that through study and practice, these young people will certainly catch them up. The responsibility of these old cadres is to pass on experience, give help and set an example in training new hands, praise their strong points and avoid their shortcomings and never apply the viewpoint of metaphysics to oppress and stifle real talents. In a word, we must pave the way for the growth of young cadres and be bold in selecting those cadres who are capable of creating new situations to leadership posts. Old cadres should take the lead in abolishing the system of holding life long leadership posts that now exists and be happy to retire or withdraw to the second line. Old cadres consciously withdrawing from the first line is a contribution to an important aspect of selecting outstanding young and middle-aged cadres. When a cadre is old enough to withdraw from the first line, his political treatment remains and he enjoys preferential treatment for the rest of his life. This fully shows the concern of the party and the superiority of the socialist system. Therefore, they must not inappropriately ask for more from the party organization, but happily submit to the arrangements made by the higher level organizations. Before leaving their posts, these old cadres must try to be fine examples in sticking fast to their posts and observing discipline. In the course of restructuring, all cadres and working personnel must be conscientious and devoted to their duty and not take a wait-and-see attitude or relax in their work, so that we can ensure the normal operation of the work of the organs.

5. Train cadres who are in office in rotation, by stages and in groups. We must raise the political quality and the level of professional knowledge of the cadres' ranks through training in rotation. This is an important measure in reforming the structure of the cadres' ranks, gradually making the ranks of cadres more revolutionary, younger in average age, better educated and more professionally competent, improving our working efficiency and meeting the needs of the building of socialist modernization. The present administrative restructuring has laid down conditions for training cadres in rotation. We must resolutely promote this work. It must be a system to assess cadres accordingly in the course of their study and work.

At the end of his report, Comrade Liu Bingyan stressed that leadership work in administrative restructuring must be strengthened. Although the time and conditions for the present restructuring is ripe, we must be aware that there are extreme difficulties in the work, the conditions are complicated and a wide range of problems is involved.

Therefore, it is imperative for party committees (party groups) at all levels to strengthen leadership. Comrades in charge of the party organizations at all levels, in particular, should personally take a hand in the work, have great determination, painstakingly organize and carefully work to guarantee the successful progress of this revolution and reach the desired results.

It is necessary to persist in the principle of ideology taking the lead. We must conduct thoroughgoing and painstaking ideological work well, use communist ideology to educate the vast number of party members, cadres and the working masses and unify the thinking of all of them on the principles and policies laid down by the CPC Central Committee. All cadres must take the interests of the whole into account, have the cardinal principles in mind, practice unity, observe discipline, be open and aboveboard, upright and just, speak in front of others and act strictly in accordance with the "Guiding Principles for Inner-Party Political Life" and the new party constitution.

It is imperative to practice the mass line well. We cannot merely rely on a few people of the organizational departments in setting up an organization, determining the staff and setting the leadership body, but must delegate the work to the party organizations of various departments and generally accomplish it by mobilizing the cadres at various levels. We must mobilize the masses in holding discussions, pool the wisdom of the masses, encourage the free airing of views and let the people say and express their thoughts. Through repeated deliberations, we must widely listen to the opionion of the people. We must resolutely oppose the decadent ideological style of "the words of the high carry heavy weight"; "the words of the low carry little weight"; "not rejecting an opinion because of the speaker"; being unwilling to listen to "words or advice unpleasant to hear" and so on. In this way, we can avoid such defects as stifling real talent and not selecting the right person or even selecting the wrong person.

We must carry on the restructuring step by step in groups and by stages. In no case must we impose uniformity on everything.

When the restructuring of administration starts, all commissions, departments and bureaus must form two groups, one grasping the daily routine work and the other administrative restructuring, so that neither daily routine work nor administrative restructuring suffer.

Comrade Gao Yang, first secretary of the provincial CPC committee further emphasized party discipline at the mobilization meeting. He said: The provincial CPC committee expects all the comrades present to be conscientiously responsible in their work. Even if they are comrades who have passed 60 and who are to be retired, they must work in an exemplary way until their replacement. I hope that in the following few months -- which is an important time -- everything will be done to implement the decisions of the higher levels and see to the proper running of affairs. Not implementing the decisions of the provincial CPC committee and the provincial government is an act of neglecting one's duty. The provincial CPC committee has determined to resolutely and rapidly implement all the principles, policies and measures determined by the 12th CPC Congress and never be indulgent toward those who violate discipline. I hope that you will set strict demands on your subordinate cadres. From now on, the provincial CPC committee will investigate and fix responsibility when anyone is discovered who has behaved in a lax and undisciplined way in handling affairs, who has connived with the cadres under his leadership, tolerated their violating discipline and improved other cadres.

HEBEI RIBAO ON IMPROVING PARTY STYLE IN 5 YEARS

HK070933 Shijiazhuang HEBEI RIBAO in Chinese 23 Nov 82 p 3

[Article by Feng Yunting [1409 0061 0080]: "Strive For a Fundamental Turn for the Better in Party Style in 5 Years"]

[Text] The 12th CPC National Congress has formulated the general task of the party in the new historical period and, according to the requirements of the general task, put forth to strive for three fundamental turns for the better within 5 years, from this congress to the next. That is, a fundamental turn for the better in the country's financial and economic situation, in social mood and in party style. The fundamental turn for the better in the three fields are closely linked. The bringing about of a fundamental turn for the better in party style certainly plays an important role in promoting a fundamental turn for the better in the other two fields.

There is a saying that unhealthy practice in society is totally caused by unhealthy party style. This is not completely true. Some unhealthy practices do not appear and exist first within the party, and the spread to society. However, we must realize that an unhealthy party style certainly has a bad influence on social mood. Only by setting to right party style and raising the prestige of the party among the masses, can we promote and improve social mood with fine party style and justifiably correct and eliminate unhealthy practices in society.

In his report to the 12th CPC Congress, Comrade Hu Yaobang made a penetrating analysis of the state of affairs of the party, saying. "In the course of leading the people in effecting this historic change, our party has withstood tests and remolded itself. It has done much to rectify party style, gradually revived its fine traditions and become more mature and firmer in the course of struggle." He also pointed out: "In the last few years the Central Committee, local party committees and party discipline inspection commissions at all levels have attained notable results in their major efforts to uphold party discipline and correct party style." Such analyses and estimates totally correspond with the situation in our province.

In recent years, there has been considerable improvement in party style in our province, but no fundamental turn for the better so far.

A handful of cadres, violating financial discipline, have embezzled public funds to build residential houses, established relations with people with connections while building high-standard residential houses for leading cadres and sought special treatment for their children.

Since the promulgation of the "regulations and laws," the unhealthy practice of illegally transferring registered agricultural households into nonagricultural ones has lessened, but not yet been completely eliminated. It is still very popular in some areas. From the beginning of 1980 to November 1981, some cadres, staff and workers in Chongli Country transferred some agricultural households to nonagricultural ones by moving them to other areas and then transferred them back to their original places again. Some even went so far as to neglect all normal procedures in transferring household registration.

They simply transferred those agricultural households into nonagricultural ones by filling names on the blank household registration forms and documents of grain and edible oil allotment, all of which they obtained from other areas. Such nonagriculture households transferred from agriculture ones are described as "flying households". According to investigations, there are now a total of 631 people of "flying households" in the country, and 15 communes and 35 factories, mines, enterprises, institutions and departments directly under the county authorities are involved. Among them, five are members of the Standing Committee of the county CPC committee and vice chairmen of the county revolutionary committee.

It is a common occurrence that public funds and properties are used to entertain guests and sent to others as gifts, and goods are bought at low prices by those who take advantage of their positions or powers to obtain more commodities in short supply for the benefit of their children or to establish "connections".

There still exist in certain areas cases in which feign compliance is practiced and perfunctory attitudes adopted in carrying out the guiding principles and policies of the CPC Central Committee. For example, it is a major decision made by the CPC Central Committee to eliminate from all leading organs "people of three categories," but some areas have failed to earnestly implement this regardless of repeated instructions given by the central authorities. A handful of people with serious factional ideas still adhere to factional activities. Some cadres who were relieved of their leading posts because they belonged to the "people of three categories" or made serious mistakes during the Cultural Revolution, have been slack in work and disobeyed new assignments. In one county, some cadres who have been justly punished for their mistakes, even have gone so far as to refuse to shoulder responsibilities any longer and party organizations there have not taken prompt measures to deal with them.

In my opinion, the following three points must be adhered to in order to strive for a fundamental turn for the better in party style: 1) We must resolutely implement the tasks put forth by the 12th CPC Congress, carry out our work in accordance with the strategic plan drawn up by the 12th CPC Congress and maintain political unanimity with the CPC Central Committee; 2) We must recognize difficulties. It is a hard task to completely eliminate the poisonous influence of the 10 years of internal disorder, correct unhealthy practices and bring about a fundamental turn for the better in party style and we will meet many difficulties and obstacles. We are, therefore, required to double our efforts and earnestly carry out our work; 3) We must have confidence. There has existed, since the implementation of "Guiding Principles Governing Inner-Party Political Life," the problem of confidence, which has not yet been completely resolved. We must fully realize that we possess very favorable conditions to bring about a fundamental turn for the better in party style.

First the CPC Central Committee has always attached great importance to the issue of party style by considering it a matter of the life and death of the party, and considered the straightening out of party style and party organizations as one of the important guarantees in building socialism, thus educating the whole party to have a complete understanding. A series of measures have been taken by the central authorities to set to right party style and a decision has been made at the 12th CPC Congress to carry out an overall party rectification and improvement of party style. Meanwhile, organizational reforms and readjustment of leading organs will make it possible for leading bodies at all levels to take the initiative in setting to right party style and to vigorously eliminate unhealthy practices. Education in ideals, morality and the observance of discipline conducted in the drive to build spiritual civilization will certainly give impetus to the promote the development for setting to right party style.

The fierce struggle launched against criminal activities in economic and other fields will relatedly expose and get rid of unhealthy practices in all fields. That is to say, all these important undertakings are linked with the setting to right of party style and will also create favorable conditions for improving party style.

Second, the study of the documents of the 12th CPC Congress, the new constitution in particular, will certainly give impetus to setting to right party style and strengthen the party spirit of the vast numbers of party members. Therefore, party members will set to right party style, observe discipline and vigorously raise their consciousness to be qualified communist party members.

Third, as regards the whole party, the vast majority of party members have maintained the fine tradition and work style of our party and are the healthy force in the struggle against unhealthy practices. There are only a handful of people who engage in unhealthy practices and violate law and discipline.

We enjoy the common aspirations of the people and the party in carrying out the work of setting to right party style. The vast numbers of party members will give warm support and assistance to the party. According to the practical situation in correcting unhealthy practices over the past few years, no matter how serious or how widely spread the unhealthy practices are provided we are resolute and have a good method. We can effectively get rid of unhealthy practices or severely restrict them.

Facts have shown that the "theory of pessimism" that treats unhealthy practices as an incurable disease and lacks confidence in setting to right party style does not tally with the actual situation, and is hence groundless.

Some party members act as onlookers on the issue of getting rid of unhealthy practices. They hold: It is almost impossible to bring about a fundamental turn for the better in party style and I would like to see whether you can make any achievements. On this serious issue, they stay aloof from the matter and do not think of making contributions to setting to right party style in their capacity as party members. Still others, engaging in liberalism, turn a blind eye to all affairs. They fail to see unhealthy practices and refuse to detest, expose, criticize and struggle against illegal activities. Worse, some veteran comrades hold that by offending fewer people, they will get more benefit after their retirement and on convalescence leave and more people will deliver wreaths after they die. Some people are weak and incompetent and either delay solving the problem of unhealthy practices in their own departments or units, or pass on difficulties to the leadership. Some people have engaged in unhealthy practices, but refuse to take the initiative to make self-criticisms or correct their mistakes and shortcomings. Conversely, they conceal their faults for fear of criticism or only confess their mistakes verbally, yet refuse to correct them practically so as to achieve the purpose of "confessing one's mistakes for a while, yet becoming easy for the whole life." They even go so far as to suppress democracy when others expose and criticize them. This is absolutely wrong. These comrades must, in the course of studying the new party constitution, seriously think it over in connection with the obligation of party members and the basic requirements of cadres and rectify their incorrect attitude. It is a task of the whole party to set to right party style, and party organizations at all levels must pay full attention to the matter and earnestly carry out the work. All party discipline inspection organizations must take up important responsibilities and all discipline inspection cadres must brace themselves, be staunch and just and bring into full play their roles in the setting to right party style.

HEBEI REGULATIONS ON INTELLECTUALS REPORTED

HK071414 Shijiazhuang HEBEI RIBAO in Chinese 20 Nov 82 p 3

[Unattributed report: "Hebei Provincial CPC Committee and People's Government Regulations on Bringing Into Play the Role of Intellectuals and Improving Their Working and Living Conditions"]

[Text] The party's 12th national congress put forward the magnificent goal of quadrupling the annual total output of industry and agriculture by the end of this century. The key to the four modernizations is the modernization of science and technology. Intellectuals are a vital force in the construction of the four modernizations. In order to mobilize their enthusiasm, bring into full play their wisdom and talent and make great contributions to the party and the people, the following regulations have been made according to the successive instructions of the Central Committee and the gist of the talk made by Comrade Zhao Ziyang at the awards ceremony at the national conference of science and technology as well as considering the practical situation of our province.

1. The government and party committees at all levels should earnestly list the work of intellectuals on the important agenda. The government and the party committees at all levels above the county should have one responsible member in charge of the work of intellectuals. The government and the party committees should study the report of responsible departments at regular intervals so as to be able to have a timely understanding of the situation, study the existing problems and find a solution for them.

The government and party committees at various levels should attach importance to the correspondence from intellectuals and visits paid by them, study the situation and earnestly solve the problems reflected by them and investigate the people and events responsible for suppressing, excluding and harming intellectuals. Those problems of a serious nature should be handled severely.

In the future, one of the important marks judging the work of a unit and a region will be whether they have mobilized the enthusiasm of the mass of intellectuals and whether they have brought their talents into full play and reaped fruit.

2. To continuously solve well the remaining problems of carrying out the policies of intellectuals, it is necessary to make a thorough reversal of the unjust, false and mishandled verdicts that have not been thoroughly reversed. Archives should be put in order and documents should be thoroughly sorted out. Salary that was deducted and stopped during the "Cultural Revolution" should be paid in arrears. Units who have financial difficulties can clearly state the situation and pay back at regular intervals later on.

3. To be concerned about the progress of intellectuals politically, it is necessary to organize them to study Marxism, Mao Zedong Thought, reinforce the ideological education of communism and uphold the four basic principles and strive hard to be both red and expert. The party organization at various levels should enthusiastically and in a planned way recruit party members from the intellectuals especially from among the middle-aged intellectuals and admit into the party those who are qualified to be party members so as to bring into play their exemplary avant-garde role in the construction of the four modernizations.

4. High ranking intellectuals who do not hold a leading position in the party and the government or those who do not hold a leading position in the technological field and in administration should receive remuneration of the rank of county (regiment). Middle ranking intellectuals should receive the renumeration of the section of a county (bureau).

3. Middle-aged and young cadres with specializations and techniques who have both ability and political integrity as well as organizational and leading ability should be promoted to the leading post at various levels, so that their expertise is fully brought into play. Intellectuals who are party members and those who are not should be treated equally and without discrimination. Respect the opinions and suggestions of experts and technical personnel. Let them have powers and authority of office and responsibility. Earnestly carry out "the tentative regulations on the system of job responsibility of general engineers" issued by the provincial people's government in 1980. Give them decisionmaking powers on problems about expertise and technology that are within their range of functions and powers.

6. Professional and technical cadres who are not working at their own profession or are not working at what they are most good at should change jobs. No units should stand in the way. If the person is reluctant to change his job, regardless of the fact that the other job needs him, do a good job in persuading him and talk him into it. The senior organization and personnel department have the right to transfer and reassign those who are not properly used and those whose own units are not eager to help them transfer. In the future, the job assignment of graduates from institutions of senior education and technical secondary schools should emphasize fitting the graduate with their specialiies and prevent new cases of having people work in areas that they have not studied. Individuals who really cannot find a suitable unit can be temporarily assigned to departments close to their special field. Since there is no fixed authorized size of staff, there is nothing to affect the assignment of graduates from institutions of higher education and technical secondary school to professioal posts. It is possible to admit extra newcomers.

7. Enhance the vocational level of professional and technical cadres. Every region and department should make plans to train professional and technical cadres and adopt a variety of forms to train them. Regions and departments that have not yet established training centers should actively create conditions and plan their building as soon as possible. Institutions of higher education should respectively hold refresher courses and short-term training courses, to train in rotation the middle-ranking personnel and the middle-aged and young professioal backbone personnel. The provincial bureau of higher education will work together with the associated departments to stipulate plans. The committee of planning should include this in their plans of capital construction while local finance should include this in the budget.

Every 3 years,high ranking and middle ranking professional and technical cadres should generally be given 3-6 months for further study. Each unit should make active overall planning. In principle, we should take self-study as the main way for further study, but it should be supported by a self-study plan and summing up report. Those who need to take refresher courses or make investigation tours in places other than the province can apply for reimbursement for their travel and board expenses with the permission of the leadership. Those who have difficulties in dealing with their living can receive subsidies according to their situation.

8. Each unit should supply the professional and technical cadres with necessary working and study conditions such as books and reference materials, apparatus and equipment. Each unit should reduce extra work, guaranteeing that five sixths of the professional and technical cadres' time is spent on vocational work.

Each year, professional and technical cadres of any kind can apply for reimbursement of a certain amount of specialized books and reference materials in the unit they are working at according to the needs of the job. Concrete measures for implementation can be stipulated by each unit.

9. The spouses and children under 16 of middle ranking technical cadres (including those who do not enjoy home leave) who have agricultural domiciles and who, in keeping with the conditions set by the Ministry of Public Security, the Ministry of Food and the State Personnel Affairs Bureau are not qualified to transfer their agricultural domiciles, can have their original domiciles transferred to towns and cities. Likewise, permission will be granted to personnel who meet the following conditions: are above the level of middle rank; started their jobs before 1965; have fairly good working ability; have made certain contributions; and can report to the provincial personnel department if their spouses and children under 16 are in agricultural domiciles. After examination and approval their domiciles can be transferred to towns and cities. The same thing can be applied to professional and technical cadres who are above the level of middle-rank (whose spouses have domiciles in towns or cities yet their children under sixteen have agricultural domiciles.)

As for professional and technical cadres of the various counties that are in mountainous areas, Zhang Jiakou and Cheng De plain whose spouses and independents are not qualified to transfer their agricultural domiciles, we can make proper exception to allow them to transfer. Concrete measures can be drawn by the local regions and they submit to the provincial government for approval of the implementation.

10. An award and promotion system for professional and technical cadres should be established and perfected and rewards should be given those who do their bit in creation and invention or in economic profits. This can very well be regarded as an important basis for promotion. Those who have made special contribution can be promoted at any time, even if it means breaking the rules to promote them.

Politically mobilize and encourage the professional and technical personnel to go and work in the forefront of production and to work in places where conditions are hard, while at the same time, giving them the best treatment materially. Professional and technical cadres who are appointed to work in regions where conditions are hard, should be given good treatment by the employing unit according to the contract.

Personnel who are directly engaged in scientific research, technology, design and experiments in enterprise units practising the bonus system should get the same bonus as workers working at the forefront of production.

11. Local regions and departments can employ professional or technical personnel of their own in order to solve the problem of the shortage of technical force, or employ competent self-taught personnel to work for a certain period of time, offering them satisfactory salaries.

Teachers or technicians of institutions of higher education can go to production units and help solve technical problems or train capable hands during the holidays. A certain amount of pay shall be given by the employing unit.

12. The living conditions of intellectuals should be improved. According to the special needs of intellectuals' working and studying, from this year on, a certain proportion of houses under unified construction should be spared for distribution among middle ranking and high ranking intellectuals who have housing problems. Units constructing residences with saving funds should also give first thoughts to the middle-ranking and high-ranking intellectuals and other middle-aged vocational backbone personnel who have housing problems. In provincial, local, municipal units (including municipalities under local authorities) or medium-size and small enterprise units, intellectuals are relatively concentrated, yet these units are unable to solve their housing problems. Local finance organs can allocate funds for the construction of part of the residence so as to give priority to solving the housing problems of middle-aged intellectuals.

By the end of this year, a one time temporary subsidy should be given to intellectuals above the middle rank and middle-aged professional and technical backbone personnel. For intellectuals working in party, political organizations and institutional units, from the provincial budget a special sum of 800,000 yuan will be allocated to solve their problems. For those working in enterprise units, the solution can be made through deducting a percentage from the funds or profits of the enterprises. Applicable measures will be drawn by the provincial bureau of finance together with associated departments.

Each unit should carry out an annual body check on intellectuals above the middle rank. The fee should be paid by the unit itself.

Agricultural technical personnel (including popularization and management personnel) should be entitled to the same treatment in politics and in living as personnel in agricultural and scientific research. As for technical personnel in agriculture below the county level working in the forefront all the year round, each month each person should be offered an extra post subsidy and necessary equipment for labor protection (payment should stop on departure). Concrete measures will be taken by the provincial committee of agriculture, together with associated departments of finance and personnel. They will be submitted to the government and then carried out after approval.

These regulations will be implemented from the day they are issued. Local regions and departments can stipulate concrete measures according to their practical situation.

NEI MONGGOL RADIO REPORTS ON 'DEGENERATE' CADRE

SK080914 Hohhot Nei Monggol Regional Service in Mandarin 1100 GMT 4 Dec 82

[Newsletter by reporters of RENMIN YOUDIAN BAO: "The Degeneration of a National Model Worker -- The Story of (Tian Fenglin)"]

[Text] At around 1400 on 28 October, public security police came to the Nei Monggol postal and telecommunications machinery plant and arrested a man in his late forties. The arrested individual is an eminent criminal, (Tian Fenglin), who was once elected a national model worker and later became secretary of the party branch of the machinery plant and concurrently its director. (Tian Fenglin's) degeneration into a corrupt criminal is a thought-provoking story that provides profound lessons for us.

Those who have heard reports about him will remember that he left his famine-stricken home and became a beggar when he was 3 years old. At 14 he was hired by a government organization as an errand boy. Tempered by his experience before liberation, he displayed a will to get ahead and worked hard after liberation. Consequently, he was elected to attend the 1959 national conference of outstanding workers. However, life in the old society had tainted him with the habits of (?rascals). For example, he is good at debating and can delineate anything extravagantly and vividly. He has an inclination for brotherhood. He is very obliging to people who act in submission to him and stops not at nothing to make the life of those who have offended him miserable.

During the 10-year internal turmoil, (Tian Fenglin), then a leading cadre who had assumed office only a few months before, was accused and denounced by the rebels. His house was searched, his property confiscated and he himself was locked up in a cowshed. From this experience he came to realize a so-called truth: Act in submission to the rebels to minimize immediate losses. At criticism sessions he outdid his critics by roundly cursing himself. When ordered by the rebels to watch others' activities, he made more reports than others and his reports were more exhaustive. Therefore, he was soon released from the cowshed and began clamoring the slogan: Seize state power through rebellion.

In 1972, (Tian Fenglin) regained power when he assumed control of the personnel, supplies and financial affairs of the postal and telecommunications machinery plant. After he regained power, his bourgeois individualism malignantly cultivated in him during the Cultural Revolution spurred him to reconsider and replan his future -- how to firmly grasp power and how to use his power to get whatever he wanted as the rebels had done. The first thing on his mind was to establish himself as a model worker. In less than a year after he regained power, he impatiently submitted a report to the higher level without the knowledge of his party branch and other higher administrative units. In the report he fabricated and synthesized the deeds of others as the exemplary deeds of (Tian Fenglin), the model worker. He even directed scenes in which he acted as a model worker attired in a boiler suit working for a while at a workshop, while reporters were on the scene took photographs. His pictures were printed in the newspapers and his story beamed on the air. These tricks, sure enough, again made him a glittering model worker.

Meanwhile, he did not forget to use his positions as secretary and plant director to seek personal advantage. While seeking one advantage after another, the born-again power holder (Tian Fenglin) preached the philosophy: What is life all about if we do not enjoy good food, have fun and enjoy ourselves. His pet phrase is: Enjoy yourself while you are alive; money is no good for a dead man. His early years in the old society as a refugee and beggar from a famine-stricken area were completely wiped out of his memory and his mind was occupied with creature comforts. Governed by the world outlook of the bourgeiosie, he set out to pursue the so-called modernization of life. Although in those years he was promoted two grades within a span of 2 years, his monthly salary of 80 yuan or so was far from meeting his desire of pursuing the modernization of life. In addition to applying for reimbursement for his personal expenses and encouraging workers to send gifts and cash to him, he did what he could to make a bigger fortune and get the thing that is more valuable than money -- the power to exchange things. By using this power of exchange he turned his hold on the postal and telecommunications machinery plant and his control over the plant's worker recruitment quotas, the promotion and wage increase of workers and the materials in the warehouse that were in short supply into power over labor employment, personnel affairs, the transfer of commodities and the use of newspapers. At one time, for example, he illicitly gobbled up more than 20 of the 30 employment quotas earmarked exclusively for the children of the plant's staff members and workers. Nobody could fathom how much use value was represented by these quotas.

He arranged for several people to advertise for him. In 1979 the machinery plant convened four summing-up meetings on the advanced deeds of (Tian Fenglin). These meetings were invariably followed by lengthy and tedious newsletters and large-sized photos advertizing (Tian Fenglin) as a good secretary who worked wholeheartedly for the four modernizations and a selfless leader who had the utmost interests of the masses in mind and so on. These extremely incredible and abstruse flattering advertisements brought to this national model worker innumerable political titles such as representative of the people, standing committee member of a trade union and member of the leading party group of the postal and telecommunications machinery plant and so on and so forth.

For (Tian Fenglin), reputation, money and power have become a regular pattern. Under the cover of the many political titles, (Tian Fenglin), sure enough, would not forget to amass more money and property. Incidents like this began to occur in the machinery plant -- today a newly assembled motorcycle was missing. The next day the frame and engine of a motorcycle deposited by other unit for repair disappeared. Nobody bothered to look for them, for it was understood that it was old (Tian) amassing his fortune.

In his sinking into the abyss of crime (Tian Fenglin) formed an exaggerated opinion of his abilities. He did not attend the party cell meetings and the study sessions for party members anymore. He considered the study of the guiding principles as an attack on him by innuendo and would not allow others to attend the study sessions. When the party organization was carrying out ideological and political work, he remarked: How productive can a ready tongue be?

The masses dearly cherish the party. They could not stand to see (Tian Fenglin) lead the only motorcycle assembling plant in Nei Monggol on the road of ruin, and they were burning with anxiety. They wrote one letter after another to report on him and asked competent leading departments to investigate the problem of (Tian Fenglin).

When (Tian Fenglin) learned of these developments, he convened many rallies to issue warnings to his informers. He threatened on many occasions to identify the handwriting and ferret out the backstage supporters, intimidating those who resisted him with ruin and promising those who submitted themselves to him with prosperity. People were forced to leave the machinery plant with resentment. In the 9 years during which he held sway at the machinery plant -- which had a payroll of 165 -- 105 staff members and workers were transferred from the plant.

After expelling batches and batches of people whom he considered mischievous, (Tian Fenglin) became even more frenzied in fishing for personal gain. He engaged in blackmail and extortion in a big way. A production team sold raw materials worth more than 3,000 yuan to the plant. (Tian Fenglin) took 1,425 yuan of the payment, telling the team to collect the money after it send him 2,000 jin of (?fish). He sold coupons and certificates. An overseas smuggling group selling motorcycles asked him to issue certificates stating that the motorcycles were put out by his plant so that the buyers could use them to apply for vehicle licenses. (Tian Fenglin) issued two receipts certifying that the motorcycles were sold for 4,855.26 yuan. By a stroke of pen, he earned himself half of the aforementioned amount of money.

(Tian Fenglin) took part in swindles and resold goods at a profit. Once he purchased two cars. He resold one car at the price equivalent to the original purchasing price of the two cars, earning 4,500 yuan for his partners and himself. He established connections with (Zhong Jialun), a boss of a swindling group in Beijing and, by turning in two reports, drew 255,000 yuan of public money to engage in the smuggling of woolen fabric, woolen blankets and imported motorcycles. After (Zhong Jialun) was arrested, the machinery plant found its public fund 62,300 yuan short.

(Tian Fenglin), a man who once considered himself unexcelled in the world, is now caught in the net of justice. His serious economic crimes are now under investigation by the judicial department. However, this case provides a profound lesson to the people. Cannot we party members, leading cadres of the party in particular, draw any lesson from it?

Circular Issued

SK051021 Hohhot Nei Monggol Regional Service in Mandarin 1100 GMT 4 Dec 82

[Text] The Discipline Inspection Commission of the regional CPC committee recently issued a circular on the subject of (Tian Fenglin) who became morally degenerate and ended up an economic criminal. The circular urged party committees at all levels in the region, in the light of the on-going struggle to crack down on economic crimes and rectify the malpractices within the party, to carry out in-depth education on countering the corrosive influence of bourgeois ideology with the case of (Tian Fenglin) as a negative example so as to increase the capacity of the vast number of party members to identify and resist the corrosive influence of the various ideologies of the exploitative classes and enhance their understanding of communist ideology and their sense of party spirit.

The circular reads: (Tian Fenglin) was an influential person on the industrial and communications front of our region. Twice elected national model worker, he attended national meetings of representatives of advanced elements many times and was received by the leaders of the party and state. However, it was none other than he who, since 1977, abused his position and power to unscrupulously embezzle public money and fleece the state by engaging in illegal sales at extraordinary profits. His degeneration into a vicious economic offender is at once distressing and thought-provoking.

The circular points out: The fact that (Tian Fenglin) degenerated into a criminal shows that a party member must, under all circumstances and at all times, not abandon his banner of ideals, that is, communism. What we need most at a time when we are struggling for the cause of socialist modernization is the inspiration of communist ideology. Those who have forfeited communist ideals will certainly end up being the [word indistinct] of the revolutionary ranks and eliminated by the trend of history.

The fact that (Tian Fenglin) became morally degenerate also shows that a party member should properly use the power vested in him at all times and foster a revolutionary outlook on life characterized by serving the people wholeheartedly. Otherwise, he will get into trouble when he assumes a position and holds the attendent power, as (Tian Fenglin) did.

The circular calls on party organizations at all levels in the region to make the 12th party congress guidelines an impetus for promoting education in countering corrosive influences and rectifying the party's workstyle, to gradually enhance the ideological understanding of party members while carrying out the various tasks of the party, to improve the party's workstyle step by step and to bring about a fundamental turn for the better in the party's workstyle in 5 years.

HEILONGJIANG FORUM DISCUSSES NPC GUIDELINES

SK300355 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 29 Nov 82

[Text] This morning the provincial CPPCC committee invited various democratic parties and noted non-party personages to a forum to study and discuss the guidelines of the Fifth Session of the Fifth NPC and the Fifth Session of the Fifth National CPPCC Committee. With an attitude of being masters of the state, participating comrades enthusiastically and freely talked about their personal feelings of the convocation of the NPC and national CPPCC Committee sessions.

The forum was chaired by Tang Liandi, vice chairman of the provincial CPPCC committee. He delivered a speech in which he said: These two sessions are important ones convocated in the course of creating a new situation in all fields of socialist modernization in China following the 12th national party congress. The new constitution and the CPPCC constitution to be adopted at the sessions have taken the four basic principles as their guiding ideology, fully reflecting the desire of the people of various nationalities throughout the country. (Wang Zhiqian), vice chairman of the provincial branch of the China Democratic League, (Wang Dejin) and (Li Jiejian), vice chairmen of the provincial branch of the Revolutionary Committee of the Kuomintang, (Ma Xingming), vice chairman of the provincial federation of industry and commerce, (Lin Beiqing), chairman of the provincial federation of returned overseas Chinese, (Wan Yongcai), chairman of the board of directors of the Taiwan Compatriots Fellowship Society, (Zheng Nenghui), noted personage of the religious circles, and (Huang Yushou), noted non-party personage, delivered speeches at the forum. They held that the NPC and CPPCC constitutions to be adopted soon are a guarantee for promoting the work of the democratic parties and for winning victories in the four modernizations. They said: The new constitution to be adopted will affirm and guarantee that the people of all nationalities and all social strata will fully enjoy the democratic rights in politics, economics, culture, social affairs and other fields of work. This kind of affirmation and guarantee will greatly arouse the enthusiasm of the people throughout the country to go in for socialist construction and expedite the pace of the four modernizations drive. The new CPPCC constitution to be adopted has further reflected the status and role of the patriotic united front in the new period. It will certainly promote the work of the people's CPPCC to meet the demands of the new historical stage. They expressed the determination to study, publicize and implement the new NPC and CPPCC constitutions well and contribute to fulfilling the Sixth 5-Year Plan.

(Zhang Shuchun), (Fu Zhentong), (Li Dezhi), (Zhu Qiuming), (Yu Xianzhi), (Liu Guozhang) and (Hu Lichang) also delivered speeches at the forum.

8 Dec Meeting

SK090655 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 8 Dec

[Text] The provincial people's congress standing committee convened a forum of noted personages in our province this afternoon to discuss and study the new constitution. Lu Guang, vice chairman of the provincial people's congress standing committee, presided at the forum. Forum participants unanimously pointed out: The constitution adopted by the Fifth NPC at its Fifth Session is the best one since the founding of the PRC. It reflects the common will and the fundamental interests of the entire people of the country. It is a constitution for running the country well and giving the people peace and security in the new period. The constitution lays down the regulations governing the activities of people of all nationalities in the country, all state organs, the armed forces, the political parties, the various social organizations, enterprises and establishments.

(Wang Jintian), vice chairman of the provincial committee of the China Democratic League, said: The promulgation of the new constitution is an important event in the political life of people of all nationalities of our country. The new constitution provides explicit stipulations on the status of workers, peasants and intellectuals, the popularization of education and the development of secondary vocational education. These stipulations cannot be found in the previous constitutions. Many of us members of the China Democratic League are engaged in educational, medical and public health work. We are determined to contribute to developing educational and public health undertakings.

(Huang Dexin), vice chairman of the provincial committee of the China Democratic League, said: The new constitution provides explicit stipulations on the return of Taiwan to motherland. It reflects the common wish of the people throughout the country, including compatriots on Taiwan. This constitution will certainly advance the achievement of the unification of the motherland to an early date.

(Ma Xintong), vice chairman of the provincial committee of the China Democratic National Construction Association and the provincial federation of industralists and businessmen, said: The promulgation of the new constitution represents a basic guarantee for the four modernizations. The constitution, with the four basic principles as its guiding ideology, reflects the common wishes of people of all nationalities in the country.

(Li Weiqing), chairman of the provincial federation of returned overseas Chinese, said: The new constitution expressly provides the legitimate rights and interests of the returned overseas Chinese, Chinese living abroad and their family members. We are greatly inspired by it. In implementing the new constitution, I am determined to organize the intellectuals from among the returned overseas Chinese so that they will contribute to the achievement of the general task of the party.

HEILONGJIANG'S CHEN LEI VIEWS 1983 PRODUCTION

SK030500 Harbin Heilongjiang Provincial Service in Mandarin 1100 GMT 2 Dec 82

[Text] In a speech delivered at the provincial government-sponsored telephone conference held last evening, Governor Chen Lei said: We must enhance our spirit, attend to production in the last month of this year and make good preparations for next year's production. Chen Lei said: At present, it is a critical moment to make 1 month's work benefit 2 years. Doing a good job in this work is of decisive significance in ensuring the fulfillment of the annual national economic plan and in creating a new situation in next year's economic work. We have only 1 month left this year, therefore we must realistically grasp the current production and next year's production preparations well.

In agricultural production, at present, we must truly solve the practical problems in the production and daily life of the people in the disaster-stricken areas so as to ensure the livelihood of the masses, to safeguard the production forces and to guarantee next year's production. In addition, we must do a good job in preparing for next year's production. Leaders at all levels must urge the cadres and the masses to learn a lesson from the 2 successive years of serious drought and waterlogging and exert efforts to build more pumped wells. Meanwhile, we must attend to draining waterlogged fields so as to intensify the disaster combating capability, strive to change as soon as possible the situation in which agricultural production is at the mercy of the elements and do all we can to achieve high and stable yields.

In industrial production this year, we must resolutely realize the goal of increasing our province's industrial output value by 5 percent and conscientiously make preparations for creating a new production situation next year, especially preparations for making a good start. Industrial departments at the provincial level and in various localities must mobilize the masses to earnestly examine the implementation of industrial plans. Units which can fulfill the production tasks in the last month of this year must strive to overfulfill their production quotas; units which have difficulties in fulfilling the production tasks must try all possible means to overcome difficulties and strive to fulfill their tasks; and money-losing units must try to find a way to reduce deficits. Efforts must be made to sepcifically implement the December work plan level by level, item by item and down to every person and to make outstanding achievements in energy production and conservation. All energy-consuming industrial departments and enterprises must find new ways to conserve energy and strive to conserve more energy.

Communications and transportaiton departments must guarantee the transport of grain, coal and timber this year and make arrangements for transporting major raw materials for next year's industrial use.

In this speech, Comrade Chen Lei called on all localitites to make good arrangements for the markets during the new year and spring festival period, do a good job in procuring, allocating and transporting grain and in supplying grain to urban and rural areas. He called for efforts to do a better job in producing and supplying nonstaple food with an emphasis on vegetables, poultry and fish to ensure ample port supplies and to guarantee that commodities are in sufficient supply in the market during the spring festival period. He said: Leaders at all levels must grasp the work on the economic benefits of industrial, agricultural and commercial enterprises and on maintaining a balance in state revenue and expenditure firmly and well, attend to year-end revenue and strive to economize on expenditure. Efforts must be made to resolutely check extravagance and waste and guard against lavish spending during the year-end.

Comrade Chen Lei also urged all localities to further sum up and perfect all forms of economic responsibility systems, examine and sum up experience in this year's consolidation work and map out plans for next year's consolidation work.

JILIN PEOPLE'S CONGRESS STUDIES NEW CONSTITUTION

SK090841 Changchun Jilin Provincial Service in Mandarin 2200 GMT 8 Dec 82

[Excerpts] Members of the standing committee of the provincial people's congress living in Changchun gathered together on the afternoon of 8 December to discuss glowingly their understanding of the new constitution. Liu Cikai, vice chairman of the provincial people's congress standing committee, presided at the forum. He said: The new constitution reflects the common will and fundamental interests of people of all nationalities. It is the country's law with supreme legal power.

As a legislative organ, the provincial people's congress standing committee should abide by laws and, what is more important, understand the law. The provincial people's congress standing committee and the deputies to the provincial people's congress should take the lead in studying the constitution together with people of all nationalities in the province, publicize and abide by the constitution, safeguard its dignity and struggle against activities of any kind which violate or disrupt the constitution. This is a basic guarantee for the implementation of the constitution. It will also help facilitate the creation of a new situation in our province for socialist modernization.

(Zuo Jingoun), member of the provincial people's congress standing committee and professor with Bethune Medical College, said· The constitution expressly provides for the freedom of individuals and inviolabilit the personal dignity of citizens. These are indispensable stipulations which corre· the common aspirations of the people and constitute a basic guarantee for uniti obilizing the entire people to struggle for the four modernizations.

(Sun Yunzhong), member of the provinci congress standing committee and head of the advisory group of the provincia .. district, said at the forum: The new constitution puts forth the purpose of e people's army, that is, to strive to serve the people. The vast number of cadres and soldiers are determined to study and implement the constitution well and contribute to the smooth progress of the four modernizations.

LIAONING'S GUO FENG AT COMMERCIAL WORK MEETING

SK250903 Shenyang Liaoning Provincial Service in Mandarin 2200 GMT 24 Nov 82

[Text] The provincial commercial work conference held by the Liaoning Provincial CPC Committee and people's government called on all leading persons on the commercial front to continue emancipating their minds and be vanguards in creating a new situation in commercial work.

The provincial commercial work conference was held from 16 to 23 November in Shenyang. Deputy Governor Wang Jiyuan relayed the guidelines of the national commercial work conference and delivered a report. He pointed out that, according to the guidelines of the national commercial work conference, the fundamental task for commercial work in the new period is to promote commodity production, expand commodity circulation, enliven urban and rural economy and serve the people's growing material and cultural needs and socialist modernization.

The conference noted: Over the past few years, we have relied on emancipation of the mind to score achievements. Today, when we are striving to fulfill the great task of opening up a new situation, we should still rely on emancipation of the mind and enhance our awareness in implementing the party's line, principles and policies. This is the key to a new situation in commercial work.

The conference noted: In conducting commercial work, we should conscientiously readjust and implement the policies toward the purchase of farm and sideline products while adhering to the principle of the leading role of the planned economy and the supplementary role of the market regulation. We should adopt a flexible policy on the delivery and marketing of farm and sideline products. We should allow multichannel marketing and delivery of farm and sideline products of the third category and those of the first and second categories, except for grain, after the state purchase quotas are fulfilled. We should adopt a flexible policy toward the delivery and marketing of small industrial products of the third category so as to invigorate the circulation of such products. We should energetically set up and develop small commodity markets and allow self-employed peddlers to deliver and sell, wholesale or retail, small industrial products of the third category. Urban peddlers with licences are allowed to deliver to and sell small commodities in rural areas. Licensed rural peddlers may deliver to and sell small commodities in urban areas. Licensed peddlers are also allowed to deliver and sell small commodities in and outside their own localities. We should continue to develop collective and individual commerce and service trades and earnestly conquer their difficulty in obtaining licenses, finding places and securing goods supplies.

We should learn from the revolutionary spirit and work style of the principal leading comrades of Tianjin Municipality who attended to the work personally, relied on the masses, went to the reality of life and were bold in a good at solving problmes. Concerning the institution of the enterprise operation responsibility system in a planned and energetic manner, we should ensure that the state can increase its revenues, enterprises can retain more profits and individuals can have more income.

The conference stressed the need to make proper arrangements for the people's livelihood centering on grain supply and to do a good job in the procurement of grain and oil-bearing seeds.

Comrade Guo Feng, first secretary of the Liaoning Provincial CPC Committee, spoke at the conference. Comrade Zhang Zhengde, secretary of the provincial CPC committee, delivered a summing-up speech.

LIAONING FORUM STUDIES NEW CONSTITUTION 5 DEC

SK060850 Shanyang Liaoning Provincial Service in Mandarin 2200 GMT 5 Dec 82

[Excerpts] The chairman and vice chairmen of the provincial people's congress standing committee and some people's deputies attended a forum to study the new constitution in Shenyang on the afternoon of 5 December. Comrade Huang Oudong, advisor of the provincial CPC committee and chairman of the people's congress standing committee, presided over the forum. In a speech he said: The new constitution reflects the fundamental interests of the people of various nationalities in China and the general regulations for running the country well and maintaining the state's stability.

He called on the people of all levels, to serve as models in studying, publicizing and implementing the new constitution.

Zhou Chiheng, Wang Kuncheng, Zhao Shi, Liu Wen, Xiao Zuohan, Fu Zhonghai and Tang Hongguang, vice charimen of the provincial people's congress standing committee, (Zhou Lin), (Guo Qiang) and (Ma Yulan), representatives of intellectuals, and (Zhong Guilan) and (Mao Fengyun), model workers, also delivered speeches in which they unamiously said that the formulation and enforcement of the new constitution indicate that our country's socialist democratic development has entered a new stage. In the course of formulating the new constitution the broad masses of people have actively participated in discussions and set forth opinions on the revision of the constitution with the attitude of being masters of the country. The new constitution has collected the wisdom of millions and millions of people. They all expressed the determination that they will conscientiously study and resolutely implement the new constitution which embodies the socialist democracy, guard the sanctity of the new constitution, resolutely act in accordance with the law and struggle against all persons and deeds that violate the new constitution. They all believed that through the enforcement of the new constitution the enthusiasm of the people of all quarters will be greatly mobilized and our country will be able to maintain stability for a long time and become more prosperous, and the grand objective set forth by the 12th National People's Congress will surely be achieved.

SHAANXI MILITARY DISTRICT STUDIES CONSTITUTION

HK081003 Xian Shaanxi Provincial Service in Mandarin 0500 GMT 8 Dec 82

[Text] On 6 December, the Shaanxi Provincial Miltiary District CPC Committee held a forum to study the relevant articles on the building of the army and militia which are contained in the new constitution. They all held: The promulgation and enforcement of the new constitution is of important significance to strengthening the state machine and speeding up the revolutionization, modernization and regularization of our army. At the forum they all said: The addition, for the first time, of the article on the important policy decision vividly embodies the importance which the state and the poeple attach to the army and the concern which they show for the army. It reflects the practical situation and requirements since the founding of our country and is a major event in the history of our army-building. It will vigorously strengthen and promote the modernization of national defense.

While dealing with the passage in which the new constitution reiterates that joining a militia organization in accordance with the law is the glorious obligation of every citizen, they all declared that, in compliance with the provisions of the new constitution and under the guidance of the spirit of the 12th party congress, it is necessary to create a new situation in our province's militia work. At the forum, they all stated that in the coming winter and spring CPC committees of PLA units and people's armed forces departments at all levels must universally publicize the new constitution among the PLA units and militia and do well in firmly grasping publicity as a major matter. They must closely link the study of the new constitution with the study of the documents of the 12th party congress and teach commanders, fighters and militiamen to serve as models in enforcing and upholding the new constitution.

SHAANXI RIBAO ON RESTRUCTURING SHAANXI ORGANS

HK030520 Xian SHAANXI RIBAO in Chinese 20 Nov 82 pp 1, 2

[Report: "Provincial CPC Committee Holds Mobilization Rally on Restructuring Provincial Party and Government Organs"]

[Text] On the afternoon of 19 November the provincial CPC committee called a mobilization rally on the restructuring of provincial party and government organs. Attending the rally were members of the standing committee of the provincial CPC committee and advisers; responsible comrades of the standing committee of the provincial people's congress, the provincial people's government and the provincial CPPCC; members of party organizations of various departments, committees, offices and bureaus at the provincial level, deputy directors and cadres at and above the level of adviser; and retired cadres at the bureau level. The attendants totaled more than 600. Comrade Zhang Ze, executive secretary of the provincial CPC committee, presided over the meeting. Ma Wenrui, first secretary of the provincial CPC committee, gave a mobilization report on the proper handling of the work of restructuring provincial party and government organs. The report dealt with five problems: 1) the program to be implemented in restructuring provincial party and government offices and organs; 2) making a penetrating effort to arouse people ideologically and to realistically strengthen organizational leadership; 3) selecting and appointing competent personnel and reinforcing and properly building leading groups; 4) relying on old comrades and giving full play to their role; and 5) doing a good job in training cadres on a rotating basis and continuously improving the quality of the ranks of cadres.

Referring to the first problem, Comrade Ma Wenrui pointed out that the work of restructuring organs is a matter of top importance taken up by the CPC Central Committee this year. Early this year the central party and government organs made a good start and set a very good example. In March of this year preparations for the restructuring of our provincial organs started. In order to work out a feasible program for the restructuring of provincial party and government organs, we first let provincial organs put forth views on restructuring their own systems or departments -- doing so under the guidance of the spirit of the instructions of CPC Central Committee and the State Council and in light of the experiences of central party and government organs in restructuring organs and the actual conditions of our province. Then we repeatedly compared and summed up these views. An initial program thus formed. According to this program, the number of provincial party and government organs is to be reduced from 76 to 55, or reduced by 35.5 percent. The number of their personnel is to be trimmed by around 30 percent. The number of organs under the provincial CPC committee is to be cut from 14 units to 10 and the working staff reduced by 20 percent. The provincial government plans to integrate the existing 62 units and reduce their number to 39. A total of 40 auditing bureaus are also to be set up. Concerning other administrative departments, except for the organs of democratic parties and groups whose structure is not to be streamlined, the number of people's organizations in principle is to be reduced by 20 percent on a proportionate basis. The same principle of simpler administration applies to procuratorates and courts.

The restructuring of provincial party and government organs must be started immediately. We must not take a wait-and-see attitude. By the spring festival, we must basically complete the first stage of work. This stage chiefly involves two tasks: 1) we must fix the number of organizations and organs and the number of working personnel and define the basic tasks for various departments, the limits of duties or authority and the relations among them; and 2) we must properly select persons to man the leading groups of new organs and properly settle the retired old cadres.

Referring to the second problem, Comrade Ma Wenrui said: "Streamlined administration" is our party's glorious tradition. Simplifying the administrative structure is of deep significance. Just as Comrade Deng Xiaoping said: "This is a revolution. Of course, if is a revolution directed not at people but at the system." In the current administrative reform we mean to remove redundant workers in overstaffed organs, to change the irrational structure or system and to change the bureaucratic style in various forms. Our aim is to further improve and strengthen the state system of people's democratic dictatorship within the limits of the leadership system. Comrade Ma Wenrui said that since administrative restructuring is a revolution we must accomplish it in a revolutionary spirit. It should be noted that this task covers a wide area and involves complicated circumstances and much work. A massive administrative structure has become a way of administration taken for granted by us. To change this way of administration we must change our pattern of activity and our way of thinking. This inevitably gives rise to various conflicts and clashes involving our own way of thinking, our habits and our individual interests. The complicated and arduous nature of the task at hand can be imagined. The leading comrades of party and government organs at all levels must act in accordance with Comrade Hu Yaobang's instructions: "Be a bit more emancipated in thinking and a bit bolder in making reforms." They must be firm in their resolution and prudent in their approach to work. Concerning organizational leadership, the leading groups of various departments must respectively split into two groups in the process of administrative reform -- one devoted to reform and the other to routine work.

Both administrative restructuring and routine work must be handled well. Those units slated for abolition or integration must continue to do their routine work well before action on them is taken. They cannot neglect their normal duties or upset the usual work schedule. This cannot be allowed. Meanwhile, they must energetically take good care of relevant preparatory work. In the political and ideological fields, they must do their work in a thorough and prudent manner, arousing the cadres and the masses ideologically, organizing the study of relevant central documents, making things clear to them, relieving them of unnecessary worries and raising everyone's ideological awareness. They must make a point of following the mass line and cannot just rely upon organizing a small number of people in an organization or department to get things done, from the establishment of an organ and the fixing of a system to the job of manning a group.

On the third problem, Comrade Ma Wenrui said that the party Central Committee pointed out: "The problem of restructuring provincial party and administrative organs focuses on properly manning leading groups by resolutely following the principle of simpler administration and the guideline calling for people more revolutionized, younger, more knowledgeable and more specialized." Through this administrative reform, we must seriously try to overcome the common situation existing among the leading groups of our provincial organs -- a situation marked by a staff which is a bit too old, which has too low a cultural level and which has very few specialized personnel. We must properly man the leading groups of various departments. From March last year to April this year, we reorganized the leading groups of 87 provincial departments in three separate groups, basically solving the problem of lack of unity, lack of enthusiasm and impurity. We seriously worked on withdrawing the old and weak comrades to the second and third lines and selecting fine and younger cadres for promotion, with relatively satisfactory results. But we did not go far enough in staffing the leading groups with people more revolutionized, younger, more knowledgeable and more specialized. In the current administrative reform we must continue to seek a solution, so that the leading groups of various departments can have a proper composition in regard to age, knowledge and quality. The matter of age means that the ages of the leading members of groups at all levels must be brought in line with the requirements set by the CPC Central Committee, the proportion of younger cadres to be fixed. Administrative leading groups have a relatively heavy schedule in regard to everyday economic matters and so forth. Their members should be younger than those of the leading groups of party committees. The matter of knowledge means that we must seriously select a number of cadres with the cultural standards of a specialized college for promotion to leading groups at various level. It must be noted that selecting middle-aged and younger cadres for promotion to leading groups at various levels actually means promoting intellectuals. The chief responsible comrades of party committees at all levels must personally tackle this matter. They must widen their horizon and flexibly select talent from various fields. Those elite workers can be specially promoted in a departure from set standards.

The matter of quality has a many-sided meaning. Here, we chiefly stress its three aspects: 1) the newly reorganized groups must maintain complete unity with the central authorities politically and ideologically; 2) newly reorganized groups should be ones capable of boldly creating a new situation and ones highly militant and highly efficient in getting things done; 3) every member of a group must be equal to the new duties assumed. The current effort in manning groups must be a very prudent job. Quality must be guaranteed. In no way can we let the "five categories of people" make it into the leading groups.

On the fourth problem, Comrade Ma Wenrui said that the provincial CPC committee hoped that our older comrades would make new contributions and perform new deeds of merit in the current administrative reform, win honor for the party through their own exemplary acts and lofty style and set examples for the younger generation. They must play a leading role in the process of combining the new with the old and replacing the latter with the former and in selecting elite and younger cadres for promotion. We must make proper arrangements and realistically care for retired old cadres. Work related to old cadres must be assigned to special organs and designated personnel. It must be entrusted to comrades who have strong party spirit, a good work style, a good grasp of policy and profound feelings for old cadres.

Touching on the last problen, Comrade Ma Wenrui said that after the reorganization of our provincial organs and organizations and the fixing of their working personnel, over 2,600 people, perhaps a bit more, will be in excess. Therefore, we must immediately proceed with preparations for the proper training of cadres on a rotating basis in separate groups over different periods of time. Through training, we must continuously improve on the quality of the ranks of cadres.

URUMQI PLA'S XIAO QUANFU ON DOCUMENTS STUDY

HK070211 Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 6 Dec 82

[Excerpts] Addressing the first congress of progressive units and individuals of units directly subordinate to the Urumqi PLA units on 4 December, Urumqi PLA units Commander Xiao Quanfu stressed: In studying the 12th party congress documents, it is necessary to work hard to carry out study in depth and continually deepen it. He put forward the following demands on deepening the study in light of the situation in the units' study of the documents:

1. Continue to enhance understanding. Judging by the current study situation, many comrades are satisfied with half-baked study, holding that it is enough to have heard and read the documents. This is a universal problem that hampers the deepening of study. Hence, it is necessary to do a good job in ideological mobilization, continually correct the attitude to study, enhance spontaneity in study, overcome slackness and the idea that the job is almost complete, change the attitude of being content with superficial understanding and deepen study of the 12th party congress documents in a thoroughly sound way.

2. Grasp study by the cadres. The cadres have a dual responsibility in studying the 12th party congress documents: to organize study in the units and to do their own study well. Comparing these two, the latter is even more important than the former.

3. Do a good job in providing guidance for study. The contents of the 12th party congress documents are extremely abundant and they also have a very strong theoretical nature. In order to carry out the study in depth, it is necessary to make big efforts to master theory. For instance, some fighters have raised the question of whether quadrupling total industrial and agricultural output value by the end of the century means again making a rash advance, as in 1958 and 1978, and of whether communism is actually something dimly remote. It is essential to help the fighters to understand these points by combining theory with practice. It is necessary to train a force of backbone theorists.

4. Do a good job in linking theory with reality. This mainly means linking with the reality of work and ideology in the units and among the individuals.

5. Establish typical examples to guide the way.

XINJIANG SUCCESSFULLY COMBATS ECONOMIC CRIME

HK030246 Urumqi Xinjiang Regional Service in Mandarin 1300 GMT 2 Dec 82
